The Bureau of Labor Statistics estimated the average total labour force (including armed forces) during 1963 at 75,713,000; of the civilian labour force (72,975,000), 4,166,000 persons (5·7%) were unemployed; 4,946,000 were working in agriculture and 63,863,000 in non-agricultural industries. The Bureau estimated that an average of 17,036,000 persons were employed in manufacturing, 11,863,000 in trade and 9,534,000 in civilian government service.

## AGRICULTURE

Since its beginning in the USA, agriculture has been characterized by rapid expansion, abundant production and improvident use of soil and water resources in many areas. A successful conservation programme, highly co-ordinated and on a national scale—to restore the native fertility of damaged land, prevent erosion of both crop land and grazing land, and adjust land uses to the production capabilities of soils—has been in operation since early in the 1930s. More than a third of the farmers and ranchers now use soil- and water-conservation methods. Increases in per-acre yields are permitting changes in land use required to prevent further land damage.

There has been a remarkable increase in total farm output due to a higher degree of mechanization; greater use of lime and fertilizer, cover crops and other conservation practices; improved varieties such as hybrid maize and grain sorghums; a better balanced feeding of livestock; more effective control of insects and disease; a reduction in farm-produced power (horses and mules and the feed to keep them), and improved breeds of livestock and poultry. Since 1910 farm output has doubled; in 1962 it was about 69% above the 1935–39 level.

Farms are divided into two broad groups, *commercial* farms and *other* farms. *Commercial* farms (*i.e.*, those operated to provide the major source of income) include: (1) Large-scale, highly mechanized farms, which use considerable hired labour and with farm sales per farm (1959 census) of $20,000 or more, make up 8% of all farms and account for 50% of the value of farm products sold; (2) commercial family farms, approximately 47% of all farms, ranging from $2,500 to $20,000 in value of products reported and account for 45% of the value of farm products sold; and (3) small-scale farms (9% of all farms) with reported farm sales of $50 to $1,199 and with operator working off the farm less than 100 days, and with income from farm sales greater than that from other sources.

*Other* farms (35% of the total) include part-time farms with farm sales from $50 to $2,500 and with the operator working 100 or more days off the farm or with income of the farm family from non-farm sources exceeding sales from the farm, part-retirement farms with operator 65 years of age or older and sales of $50 to $2,500, and abnormal farms, such as experimental farms.

Figures for Oct.–Nov. 1959 census of agriculture (with the 1954 figures in parentheses) are: Number of farms, 3,703,894 (4,782,416); area of land in farms, 1,120,157,789 acres (1,158,191,511); crop land harvested in 1959, 311,476,141 acres (332,870,479 acres in 1954); average farm, 302·4 acres (242·2 acres). The figures for number of farms at the two censuses are not strictly comparable; in 1959, 231,862 farms were dropped on account of a change in definition.

Farms operated by owners, 1959, were 2,925,626 (3,593,884); by all tenants, 757,513 (1,167,885); proportion of farms operated by tenants, 20·5%, which is the lowest since 1880 (26·8% in 1950); farms with white operators, 3,417,839 (4,298,766); with non-white operators, 285,803 (483,650).

Regarding equipment the 1959 census shows: Farms with telephones, 2,404,677 (2,332,309 in 1954); 2,173,419 farms had 2,825,493 motor trucks (2,212,892 farms had 2,702,811); 2,677,658 farms had 5,134,385 tractors (2,876,572 farms had 4,692,341); virtually all farms had electricity.

In 1959, 240,733 farms had a size of under 10 acres; 811,202, of 10–49 acres; 657,685, of 50–99 acres; 997,760, of 100–219 acres; 660,250, of 220–499 acres; 199,965, of 500–999 acres; 136,299, of 1,000 acres and over.

In April 1962, 14,313,000 farm residents comprised 7·7% of the total population.

Hired farm workers in 1962 averaged about 1·8m., and farm family workers, including operators, averaged about 4·9m. (yearly average of the numbers working on farms each month).

About one-third of farm residents are employed in non-agricultural industries. A larger proportion of women than men, among farm residents, do non-farm work; more than half of the employed women were working in non-agricultural industries in 1962.

## FORESTS AND FORESTRY

In 1953 the US forest lands, including coastal Alaska, capable of producing timber for commercial use, covered 488,609,000 acres (about one-fourth of the land area), classified as follows: Saw-timber stands, 182,708,000 acres; pole timber stands, 169,483,000 acres; seedling and sapling stands, 94,784,000 acres; non-stocked and other areas, 41,634,000 acres. Ownership of commercial forest land is distributed as follows: Federal government, 103,124,000 acres; state, county and municipal, 27,216,000 acres; privately owned, 358,269,000 acres, including 165,217,000 acres on farms. Of the live saw-timber stand (2,056,847,000m. bd ft) Douglas fir constitutes 26%; Western yellow (ponderosa) pine, 11%; Southern yellow pine, 8%; other softwoods, 35%; hardwoods, 20%. In 1952 timber cut amounted to 10,756,773m. cu. ft compared to net annual growth of about 14,243,000m. cu. ft. In live saw-timber stands, timber cut amounted to 48,839,829m. bd ft against an annual growth of 47,397,000m. bd ft. The net area of the 154 national forests and other areas in USA and Puerto Rico administered by the US Forest Service, including commercial and non-commercial forest land, was on 30 June 1963, 186,203,183 acres.

Fire takes a heavy annual toll in the forest; total area burned over in 1962 was 4,078,894 acres, of which 53% was unprotected land; 97% (774,816,000 acres) of total forest area is now under organized fire-protection service. In 1962, 1,402,115 acres of land were planted in trees (1961: 1,796,206).

The two world wars and record levels of industrial production have hastened the depletion of once abundant supplies of metal and US is increasingly an importer. US is wholly or almost wholly dependent upon imports for industrial diamonds, quartz, tin, chromite, nickel, strategic-grade mica and long-fibre asbestos; it imports the bulk of its tantalum, platinum, manganese, mercury, cadmium, tungsten, cobalt and flake graphite, and substantial quantities of antimony, bauxite, arsenic, lead, fluorspar, zinc, gypsum, bismuth and copper.

The precious metals are mined mainly in Utah, Arizona, Colorado, Montana and Idaho (in order of combined output of gold and silver). US output of gold (troy oz.), 1930–39, 31.453.370; 1940–49, 24,171,646; 1950–59, 18,817,241; total 1792–1962, 305,662,531. Output of silver (troy oz.), 1930–39, 466,412,499; 1940–49, 434,656,631; 1950–59, 374,055,521; total 1792–1962, 4,501,290,555.

## MANUFACTURES

The following table presents general statistics of manufactures as reported at various censuses from 1909 through 1958 and from the Annual Survey of Manufactures for years in which no census was taken. The figures for 1958 include data for home establishments previously classified as non-manufacturing. The figures for 1939, but not for earlier years, have been revised to exclude data for establishments classified as non-manufacturing in 1954. The figures for 1909–33 were previously revised by the deduction of data for industries excluded from manufacturing during that period.

The statistics for 1947, 1954 and 1958 relate to all establishments employing 1 or more persons any time during the year; for 1950–53, 1955–57 and 1959–61, on a representative sample of manufacturing establishments of 1 or more employees; for 1929 through 1939, those reporting products valued at $5,000 or more; and for 1909 and 1919, those reporting products valued at $500 or more. These differences in the minimum size of establishments included in the census effect only very slightly the year-to-year comparability of the figures.

The annual Surveys of Manufactures carry forward the key measures of manufacturing activity which are covered in detail by the Census of Manufactures. The estimates for 1952–53 are based on reports for approximately 45,000 plants out of a total of more than 260,000 operating manufacturing establishments; those for 1955–57 on about 50,000, and those for 1959–61 on about 60,000 out of about 300,000. Included are all large plants and representative sample of the much more numerous small plants. The large plants in the surveys account for approximately two-thirds of the total employment in operating manufacturing establishments in the US.

[1] For the period 1954–61 value added represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value is obtained by subtracting cost of materials, supplies and containers, fuel, electricity and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account value added by merchandizing operations plus net change in finished goods and work-in-process inventories between the beginning and end of the year.

For comparison of broad types of manufacturing, the industries covered by the Census of Manufactures have been divided into 20 general groups according to the *Standard Industrial Classification*. This was revised in 1957; 1954 figures are not therefore strictly comparable.

Wholesale price index of iron and steel (1957–59 = 100) was: 1939, 38; 1944, 38·5; 1950, 66·9; 1955, 83·2; 1960, 100·6; 1962, 99·3; 1963, 103·6.

Leading producers of pig-iron (including ferro-alloys) in 1962 were: Pennsylvania, 15,727,558 net tons; Ohio, 11,625,415; Indiana, 8,776,108; Illinois, 4,716,314.

Consumption of ore, 1962, was 108,073,676 net tons, of which blast-furnaces took, 61,876,603 tons; steel producing furnaces, 7,522,137 tons, and sintering plants, 38,642,454 tons.

The iron and steel industry in 1962 employed 402,622 wage-earners (compared with 449,888 in 1960), who worked an average of 36·6 hours per week (46·6 in peak year 1944) and earned an average of $3.62 per hour (compared with the average of $1.17 during 1942 to 1945); total wages were $2,783m. and total salaries for 117,876 employees was $1,120m.

Apparent *per capita* US consumption of steel, 1961, was 1,067 lb. (1,099 lb. in 1960).

In 1962 (preliminary figures) electric utilities produced for public use 792,039m. kwh.; 640,189m. kwh. was produced with fuel as the prime mover and 151,850 kwh. with water. Industrial plants produced 86,673m. kwh.

## Tennessee Valley Authority

Established by Act of Congress, 1933, the TVA is a multiple-purpose federal agency which carries out its duties in an area embracing some 41,000 sq. miles, in 125 counties (aggregate population, about 3·7m.) in the 7 Tennessee River Valley states: Tennessee, Kentucky, Mississippi, Alabama, North Carolina, Georgia and Virginia. In addition, 74 counties outside the Valley are now served by TVA power distributors. Its 3 directors are appointed by the President, with the consent of the Senate; headquarters are in Knoxville, Tenn. There were 18,075 employees at 1 July 1963.

Under the Act its chief duties are flood control; the maintenance of navigation; generation, transmission and sale of electric power; and the development and production of fertilizers and munitions. There are now 32 major dams and reservoirs (21 built by TVA) controlling the flow of the river. A navigable channel 650 miles long, connecting with the American system of inland waterways, in the calendar year 1962 carried more than 2,268m. ton-miles of traffic in iron and steel products, grains, coal, petroleum, chemicals and forest products. Flood damages averted by river control exceed $300m.

Growing out of this has been the production and distribution of electric power, totalling 68,548m. kwh. in fiscal year 1963; the same region used 1,500m. kwh. in 1933 before TVA operations began. Installed capacity, 1963, was 12,711,215 kw. (3,987,215 kw. in hydro plants, 8,724,000 kw. in steam). Power is distributed to about 1·5m. consumers by 157 local distributors who purchased 25,530m. kwh. from TVA in fiscal 1963. Rates are kept low to encourage consumption; average cost to residential consumers served by distributors of TVA power is 0·94 cent per kwh. (national average, about 2·39 cents); average residential consumer used 10,406 kwh. in fiscal 1963 (national average, 4,336 kwh.). The federal government is the largest user of TVA power; purchases by the Atomic Energy Commission and other government agencies amounted to 25,211m. kwh. in 1963. Net income, fiscal year 1963, $55·1m.

A fourth activity is experimentation in the development and manufacture of mineral fertilizers accompanied by programmes designed to encourage proper fertilizer use in all parts of the country. The TVA works closely with other federal agencies, and with state and local authorities in combating soil erosion, improving forest resources, the conversion of farms, in whole or in part, from row-crops, such as maize, to livestock, and to the development of local industries based on natural resources. In the depression year, 1933, the average *per capita* income in the Valley region was $168 compared with the national average of $375; in 1961 the region's *per capita* income had multiplied 9 times to $1,494 while the national average had increased 6 times to $2,263.

Total fixed assets, before depreciation, 30 June 1963, was $2,702m., of which $213m. was devoted to navigation, $185m. to flood control, $44m. to fertilizers and about $2,236m. to the financially separate and self-supporting development of power. At 30 June 1963 TVA had paid $397m. of power revenue to the US Treasury, including $65m. in redemption of bonds issued in 1938–39. It had also paid $41m. of non-power proceeds. In July 1959 Congress amended the TVA Act to authorize TVA to issue up to $750m. of power revenue bonds to finance additions of generating capacity. The amendment also required TVA to repay $1,000m. of the remaining Treasury investment of $1,199m. in the power system within 54 years and to pay a return on the unpaid balance equal to the average interest rate on marketable public obligations. In fiscal year 1963 TVA repaid $10m. on the power investment and paid $38·8m. as a return. Total appropriations for TVA to 30 June 1963 were $2,070m.

[2] Imports from China (including Manchuria) and North Korea, rigidly controlled by the US Treasury, were 1961, $447,000; 1962, $246,000; exports are embargoed.

[3] Includes also South-West Africa and British High Commission territories of Bechuanaland, Basutoland and Swaziland.

**Tariffs.** The American tariff system has ceased to be an important revenue-raising device. In 1789–91 customs duties (plus the tonnage tax) furnished 99·5% of the government revenue; in 1859, just preceding the Civil War, 92·6%; in 1939 (excluding the tonnage tax), 6·1%; and now provides about 1%.

During the 5-year period 1956–60 annual imports for consumption averaged $13,570m. (as compared with $10,784m. during 1951–55 and $2,440m. during 1936–40). Of 1956–60 imports, 43·1% ($5,843m.) entered duty free and the remainder ($7,727m.) paid duties averaging $882m. or 11·4% of dutiable imports and 6·5% of total imports for consumption. Imports increased each year from 1955 to 1958, levelled off in 1958, rose again in 1959, levelled off in 1960 and 1961, and rose again in 1962.

Exports of US merchandise, including aid and relief shipments, during the same period, 1956–60, averaged $19,029m. compared with $15,196m. in 1951–55 and $3,167m. in 1936–40.

*Per capita* exports fell from $41.77 in 1929 (the 'boom year' when American investors lent heavily abroad) to a low of $12.42 in the depression year of 1932, rising to $23.44 in 1939, and to $103.68 in 1947 (including civilian supplies donated abroad); thereafter they stood at: 1950, $65.65; 1955, $91.68; 1957, $118.63 (an all-time high); 1959, $96.80; 1960, $111.17; 1961, $110.82; 1962, $112.98 (all years including economic and military aid shipments). *Per capita* imports (for consumption) were as follows: 1929, $35.14; 1932, $10.44; 1939, $17.08; 1947, $38.57; 1950, $56.59; 1955, $67.41; 1957, $74.32; 1959, $83.23; 1960, $80.04; 1961, $77.13; 1962, $85.95.

The average rate of duty actually collected on US dutiable imports has declined markedly since the early 1930s, as a result both of reductions in US import duties by trade agreements and of the great advance in prices. In the depression years of 1930–33 the average rate under the Hawley–Smoot Law was 52·8%. The rate on dutiable goods declined to 37·3% in 1939, then to an average of 28·2% in the 5 years, 1943–47, then to 14·3% in 1948 (the first year the majority of the Geneva concessions were in effect). Rates since have been: an average of 12·1% in 1951–55, 11·3% in 1956, 10·8% in 1957, 11·1% in 1958, 11·5% in 1959, 12·2% in 1960, 12·1% in 1961. In 1949 the average rate of duty on total US imports—both dutiable and free—was 5·8%; in 1951–55, an average of 5·4%; in 1956, 5·7%; in 1957, 5·8%; in 1958, 6·4%; in 1959, 7·1%; in 1960 and 1961, 7·4%.

## NATIONAL INCOME

The Office of Business Economics of the Department of Commerce prepares detailed estimates on the national income and product of the United States. The *National Income*, 1954 edition, contains detailed national income and product estimates covering the period 1929–45. A revised and expanded set of estimates for the period 1949–57 was presented in *US Income and Output* (a supplement, 1959, to the Commerce Department's monthly *Survey of Current Business*). Calculations are carried forward in the July issues of the *Survey*. These latest figures[1] in $1,000m. for various years are as follows:

| | *1929*[2] | *1933*[3] | *1950* | *1955* | *1960* | *1961* | *1962* |

[1] The inclusion of statistics for Alaska and Hawaii in 1960 does not significantly affect the comparability of the data. Details do not always add up to totals because of rounding.

[2] Peak year of the inter-war period.

[3] Low point of the depression.

## LABOUR

The American trade unions comprise 182 national and international unions and 50 state and territorial organizations. In 1962 total membership was approximately 17·6m., including 1,044,000 Canadian workers affiliated with American unions and 79,000 outside the USA. The American Federation of Labor (founded 1881 and taking its name in 1886) and the Congress of Industrial Organizations merged into one organization, named the AFL–CIO, in Dec. 1955, representing 14·5m. workers (excluding 3 expelled unions) late in 1962.

Four Railroad Brotherhoods (2 members of the AFL–CIO and 2 unaffiliated) covering operating staffs embracing engine-drivers, firemen, conductors and trainmen, had over 310,000 in 1960. Unaffiliated or independent unions, inter-state in scope, including those organizing coalminers and government workers, had an estimated total membership of about 3·1m. (including 3 unions expelled from the AFL–CIO).

The Labor-Management Relations (Taft–Hartley) Act, 1947, applicable to industries affecting inter-state commerce, prohibits the closed shop, but permits union shop arrangements except where forbidden by state laws. Statutes regulating, restricting or prohibiting closed shop or other types of union security agreements are in effect in 24 states, of whom 20 ban all types of union security agreements (Alabama, Arizona, Arkansas, Florida, Georgia, Indiana, Iowa, Kansas, Mississippi, Nebraska, Nevada, North Carolina, North Dakota, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia and Wyoming); a 21st state, Louisiana, has such an act applicable only to agricultural labourers and workers engaged in processing certain agricultural products; Colorado and Wisconsin ban all-union agreements unless a certain percentage of employees have voted for them; in Hawaii an all-union agreement may be entered into unless a majority of employees vote against it. Thirteen states have acts to prevent industrial disputes between public utilities and their employees by means of compulsory arbitration or seizure; however, a number of these laws have been declared unconstitutional in so far as industries in inter-state commerce are concerned. Laws to restrict or regulate picketing or other strike activities have been enacted in over half the states. About one-third of the states also prohibit certain types of strikes, such as 'sit down', jurisdictional or sympathy strikes. About two-thirds of the states have 'criminal syndicalism' laws in some form or other.[1]

Minimum-wage laws governing private employers have been enacted in 33 states, the District of Columbia and Puerto Rico. The laws of 15 states and Puerto Rico cover men, women and, usually, minors; in the other states they cover only women or women and minors. The minimum wage rate under federal law is $1.25 per hour for employees in inter-state commerce or producing goods for inter-state commerce previously covered by the federal minimum, and $1 for other employees brought under the law for the first time in 1961.

A total of 3,614 strikes and lockouts occurred in 1962, involving 1·2m. workers and 18·6m. idle man-days; the number of idle-man-days was 0·16% of the year's total working time of all workers in non-agricultural establishments, excluding government.

There are 3 federal agencies which provide formal machinery for the adjustment of labour disputes: (1) The Federal Mediation and Conciliation Service (now an independent agency, formerly the Conciliation Service of the Department of Labor), whose services are available 'in any labor dispute in any industry affecting commerce . . . whenever in its judgment such dispute threatens to cause a substantial interruption of commerce'. Its aim is to prevent and minimize work stoppages. (2) The National Mediation Board (1934) provides much the same facilities for the railroad and air-transport industries pursuant to the Railway Labor Act. (3) The National Railroad Adjustment Board (1934) acts as a board of final appeal for grievances arising over the interpretation of existing collective agreements under the Railway Labor Act; its decisions are binding upon both sides and enforceable by the courts.

The National Labor Relations Act, as amended by the Labor-Management Relations (Taft–Hartley) Act, 1947 (*see* THE STATESMAN'S YEAR-BOOK, 1955, p. 617), was again amended by the Labor-Management Reporting and Disclosure Act, 1959. This requires extensive reporting and disclosure of certain financial and administrative practices of labour organizations, em-

[1] The Idaho Act (1925) may be taken as representative. The primary offence, punishable as a felony, is the advocacy, by word of mouth or in writing, of the 'doctrine of criminal syndicalism', which is defined as 'the doctrine which wilfully and maliciously advocates crime, sabotage, violence or unlawful methods of terrorism as a means of accomplishing industrial or political reform'. The Act defines 'sabotage': 'Sabotage for the purpose of this chapter is defined to mean damage, injury or destruction of real or personal property; work done in an improper manner; tampering with or disabling machinery; improper use of materials; loitering at work; slack work; slowing down work or production; scamped work; waste of property; the publication of trade secrets.'

ployers and labour relations consultants. In addition, certain powers are vested in the Secretary of Labor to prevent abuses in the administration of trusteeships by labour organizations and to provide standards and procedures for the election and removal of officers of such organizations. Other provisions impose a fiduciary responsibility upon union officers and provide for the exclusion of former Communists and felons from office for specified periods; more stringently regulate secondary boycotts and banning of 'hot' cargo agreements; put limitations upon organizational and recognition picketing and permit States to assert jurisdiction over labour disputes where the National Labor Relations Board declines to act. The Act also contains a 'Bill of Rights' for union members (enforceable directly by them) dealing with such things as equal rights within the organization, freedom of speech and assembly subject to reasonable union rules, and safeguards against improper disciplinary action.

## COMMUNICATIONS

### Shipping

On 30 June 1963 the US merchant marine included 2,665 sea-going vessels of 1,000 gross tons or over, with aggregate dead-weight tonnage of 30,534,000. This included 386 tankers of 7,776,000 dead-weight tons.

On 30 June 1963 US merchant ocean-going vessels were employed as follows: Active, 920 of 13·59m. dead-weight tons, of which 582 of 7·18m. tons were in foreign trade, 15 of 164,000 in foreign to foreign, 299 of 5,479,000 tons in domestic trade and 34 of 766,000 tons in other US agency operations. Inactive vessels totalled 1,745 of 16,941,000 dead-weight tons, of which 35 of 501,000 tons were temporarily inactive; 54 of 768,000 tons privately owned were laid up and 1,656 of 15,671,000 tons were in the Maritime Administration's reserve fleet. Of the total vessels in the US fleet, 983 of 14·59m. dead-weight tons were privately owned. US exports and imports carried on dry cargo and tanker vessels in the year 1962 totalled 293,686,000 long tons, of which 27,945,000 long tons were carried in US flag vessels.

### Roads

As of 1 Jan. 1963 the total US highway mileage, including rural and urban roads, amounted to 3,599,581 miles, of which 2,646,549 miles were surfaced roads. The total mileage cited includes 673,139 miles of rural roads under control of the states, 2,351,435 miles of local roads, 119,763 miles of federal park and forest roads, and 455,244 miles of municipal roads and streets. Expenditures for construction and maintenance amounted to $10,080m. in 1962.

By the end of 1962, toll roads, financed by private capital through bond issues and administered by state toll authorities, totalled 4,189 miles (including some under construction) compared with 344 miles in 1940. Only a few major toll-road programmes are contemplated at present.

Motor vehicles registered in the calendar year 1962 were (US Bureau of Public Roads) 79,022,916 including 65,928,547 automobiles, 285,219 buses and 12,809,150 trucks.

Road haulage of goods by motor lorries and trucks in 1962 used 12,809,150 vehicles (250,048 in 1916). The industry (1962) employed 8m. workers, or 1 out of every 9 employed in the USA. Motor carriers of passengers and property earned, in the calendar year 1962, $9,107m. compared with the railways' $9,563m.

Inter-city truckers (private and for hire) averaged 320,000m. revenue net ton-miles in 1962. Of the 285,219 buses in service in 1962, 209,682 were school buses (including some church, industrial, etc. buses), 26,500 were in inter-city service, and 50,000 were classed as local and inter-urban, including trolley buses in city transit service. Inter-city buses ran a total of 1,300m. bus-miles and earned a total of $570m. in 1962.

There were 40,900 deaths in road accidents in 1962.

## RAILWAYS

Railway history in the USA commences in 1828, but the first railway to convey both freight and passengers in regular service (between Baltimore and Ellicott's Mills, Md., 13 miles) dates from 24 May 1830. Mileage rose to 52,922 miles in 1870; to 167,191 miles in 1890, and to a peak of 266,381 miles in 1916, falling thereafter to 261,871 in 1925; 246,739 in 1940 and 230,815 in 1960 (these include some duplication under trackage rights and some mileage operated in Canada by US companies). The ordinary gauge is 4 ft 8½ in. (about 99·6% of total mileage). The USA has about 29% of the world's railway mileage.

The following table, based on the figures of the Interstate Commerce Commission, shows some railway statistics for 5 calendar years:

Equipment in service, Dec. 1962 (with figures for 1950 in brackets) was: Locomotives (Class I railways), 28,639 (40,494) of which steam locomotives numbered 51 (25,640); freight-train cars (exclusive of caboose cars), 1,550,067 (1,721,269); passenger-train cars, 23,346 (57,146). Average number of employees, 1961, on Class I railways was 700,146 (1,220,784 in 1950), who earned an average $128.06 per week ($72.59).

## POSTS AND TELEGRAPHS

International cable and radio telegraph services, providing connexions with all parts of the world, are operated by 9 companies; in addition the international radio telephone circuits, as well as circuits through various ocean telephone cables, are operated by the American Telephone and Telegraph Company. In 1962 there were 24·8m. transoceanic telegraph messages (24·5m. in 1961); in addition, receipts for the new international customer-to-customer teleprinter service amounted to $12·1m. (1961: $10m.). Transoceanic telephone calls, 1962, numbered 4·5m. (1961: 3·9m.). The international cable and radio telegraph services had on 31 Dec. 1962 a gross communications plant investment of $163·4m. and 10,522 employees.

The telegraphs of the USA are largely in the hands of the Western Union Telegraph Company, which (excluding its ocean cable system) on 31 Dec. 1962 had 6,855 offices, a gross communications plant investment of $541m., 30,021 employees and handled 112·5m. telegraph messages in 1962.

The telephones of the USA are largely in the hands of the American Telephone and Telegraph Company and its chief telephone subsidiaries, which together form the Bell Telephone System. There are, however, more than 2,800 other telephone systems not a part of the Bell Telephone System but which connect with it.

The following table shows the number of telephones in use by all the telephone systems in the USA, including the Bell Telephone System, and the chief operating statistics of the Bell Telephone System (including the international telephone facilities) as of 31 Dec. of each year:

## BANKING

On 29 June 1963 there were 13,993 domestic banks doing a general deposit business with the public and having aggregate deposits of $309,428m. Of these, 4,537 with deposits of $145,513m. were national banks operating under charters granted by the federal government; the remaining banks, including trust companies and savings banks, were organized under the laws of the various states. Of the total number, 6,058 were members of the Federal Reserve System, namely, all the 4,537 national banks and 1,521 state banks admitted to membership.

The Federal Reserve System, established under the Act of 1913, comprises the Board of 7 Governors, the 12 regional Federal Reserve Banks with their 24 branches, 6,058 member banks, the Federal Open Market Committee and the Federal Advisory Council. The Governors, appointed by the President with the consent of the Senate, determine monetary, credit and operating policies. Each Governor holds office for 14 years, one Governor's term expiring every 2 years. No two may come from the same Federal Reserve District. The Board supervises the Reserve Banks and the issue and retirement of Federal Reserve notes; it appoints 3 of the 9 directors of each Reserve Bank; it passes on the admission of state banks to the System and has power to remove the directors or officers of member banks for continued unsafe or unsound banking practices; and it has power to control the expansion of bank holding companies and to require divestment of their non-banking interests. The Board and 5 representatives of the Reserve Banks constitutes the Federal Open Market Committee, which directs the purchase and sale of Government obligations made by the Reserve Banks to influence the general credit conditions of the country. The Board also influences credit conditions through powers to set member-bank reserve requirements, to approve discount rates at Federal Reserve Banks and to fix margin requirements on stock-market credit.

The 12 Reserve Banks (one for each district) implement Federal Reserve policies, chiefly through their dealings with member banks, which, although outnumbered by non-member banks, hold about 85% of the country's total commercial banking resources. The Reserve Banks hold bank reserves, advance funds to member banks, provide currency for circulation, act as fiscal agent for the Government, and afford nation-wide cheque-clearing and fund transfer arrangements. They may issue notes, fully secured; discount paper for member banks; increase or reduce the country's supply of reserve funds by buying or selling Government securities and other obligations at the direction of the Open Market Committee. Their capital stock is held by the member banks, but it carries no voting rights except in the election of directors.

Every member bank is required to subscribe to stock in the Reserve Bank of its district in an amount equal to 6% of its paid-up capital and surplus. Only one-half of the par value of the stock is paid in, the other half remaining subject to call by the Board of Governors. However, no call has been made for the second half of the subscription. The reserve balances which member banks must carry with Reserve Banks are based on the volume of their net demand and time deposits. The Board of Governors has the power to alter these requirements within limits.

The Federal Advisory Council consists of 12 members (one from each district); it meets in Washington four times a year (or oftener) to advise the Board of Governors on general business and financial conditions.

Banks which participate in the federal deposit insurance fund have their deposits insured against loss up to $10,000 for each depositor. The fund is administered by the Federal Deposit Insurance Corporation established in 1933; it obtains resources through annual assessments on participating banks.

All members of the Federal Reserve System are required to insure their deposits through the Corporation, and non-member banks may apply and qualify for insurance. On 30 June 1963, 13,189 commercial banks with deposits of $264,653,824,000 were members of the insurance fund. This insurance also covered 331 mutual savings banks with deposits of $37,585,079,000. There were 499 uninsured banks comprising 318 commercial banks and trust companies (including 2 non-deposit state banks that are non-insured) with deposits of $1,525,467,000 and 180 mutual savings banks with deposits of $5,663,321,000. Bank suspensions, 1962, numbered 2 with deposits of $1,201,000.

There are also banks which operate solely in the field of agricultural credits under the Farm Credit Administration, and Federal Home Loan Banks to make advances to financial associations and institutions upon the security of home mortgages.

## CURRENCY

Prior to the banking crisis that occurred early in 1933, the monetary system had been on the gold standard for more than 50 years. An Act of 14 March 1900 required the Secretary of the Treasury to maintain at a parity with gold all forms of money issued by the USA. For a description of these, *see* THE STATESMAN'S YEAR-BOOK, 1934, p. 491.

The old gold dollar had a par value of 49·32*d*., or $4·8666 to the £ sterling; it contained 25·8 grains (or 1·6718 grammes) of gold 0·900 fine. Under existing statutes the Government is still under obligation to maintain parity between gold and all forms of currency. By the Act of 12 May 1933 the President of the USA was given authority to reduce the gold content of the dollar by not more than 50% and by the Gold Reserve Act of 30 Jan. 1934 the minimum reduction which he could make was fixed at 40%; on 31 Jan. 1934 he fixed its value at 59·06%, or $15\frac{5}{21}$ grains of gold 0·900 fine. This was equal to a price for gold of $35 a fine oz. (old price, $20·67183). The President's power to alter the gold content of the dollar to 50% of its value, which was extended by Congress in 1937, 1939 and 1941, was not again extended in 1943.

At the time of the banking crisis in March 1933 gold payments by banks and the Treasury were suspended by the Government, and in April the Secretary of the Treasury placed an embargo on gold exports. Steps were taken to withdraw from circulation all gold coin and gold certificates.

Currency in the USA for many years has comprised several varieties. Prior to May 1933 the legal tender qualities of the classes varied, but in that month all types of currency were made equally legal tender.

Only four of the seven kinds of notes outstanding are important, (1) Federal Reserve notes in denominations of $5, $10, $20, $50, $100, $500, $1,000, $5,000 and $10,000; (2) silver certificates in denominations of $1, $5 and $10; (3) US notes in denominations of $2 and $5, and (4) gold certificates in denominations of $100,000; these are issued only to Federal Reserve Banks and do not appear in circulation. The following issues are in process of retirement: (1) Federal Reserve Bank notes prior to series of 1934; (2) National Bank notes; (3) Treasury notes of 1890; (4) gold certificates prior to series of 1934; (5) silver certificates issued before 1 July 1929.

Federal Reserve notes are redeemable in lawful money (but not in gold) on demand at any Federal Reserve Bank or the US Treasury. They are obligations of the USA and a first lien on the assets of the Federal Reserve Banks through which they are issued. Each of the 12 banks issues them against the security of an equal volume of collateral. In addition, each issuing bank must set aside a reserve in gold certificates, equal to not less than 25% of its notes in actual circulation.

Gold coins (of the old weight and fineness) were $20, $10, $5 and $2½ pieces called *double eagles*, *eagles*, *half-eagles* and *quarter-eagles*. The old eagle weighed 258 grains or 16·7181 grammes 0·900 fine, and therefore contained 232·2 grains or 15·0463 grammes of fine gold. Except for collector's holdings, these are no longer legally in circulation. The stock of gold bullion held by the Treasury on 30 June 1963 was 452·3m. fine oz., valued at $15,830m.; stock of silver bullion was 1,607·5m. fine oz. Estimated stock of domestic coin was $2,993m., of which $486m. were standard silver dollars and the remainder silver and other subsidiary coin.

The silver dollar weighs 412·5 grains or 26·7296 grammes 0·900 fine, and contains 371·25 grains or 24·0566 grammes of fine silver. Subsidiary silver coins contain 347·228 grains of fine silver per dollar. These are the half-dollar, quarter-dollar and dime (one-tenth). Minor coins currently issued are the cupro-nickel 5-cent piece and the bronze 1-cent piece.

On 18 Sept. 1949 the British Government fixed the official pound–dollar selling rate at $2·79¾ and buying rate at $2·80¼. Since 17 Dec. 1951 the British Government has allowed the dollar price of the pound to fluctuate between $2·78 and $2·82. Average (in New York) for 1952, $2·7926; 1958, $2·8098; 1960, $2·8076; 1961, $2·8022; 1962, $2·8078; 1963, $2·8003.

## WEIGHTS AND MEASURES

British weights and measures are usually employed, but the old Winchester bushel and wine gallon are used instead of the new or imperial standards: *Wine gallon* = 0·83268 Imperial gallon; *Bushel* = 0·9690 Imperial bushel. Instead of the British cwt of 112 lb., one of 100 lb. is used; the *short* or *net ton* contains 2,000 lb.; the *long* or *gross ton*, 2,240 lb.

### I. STATISTICAL INFORMATION

Within the federal government of the USA, responsibilities for the collection, compilation, analysis and publication of statistics are decentralized among a number of agencies, with specified responsibilities for general-purpose statistics in particular areas. In addition, most agencies of the Government collect statistical data as a by-product of their administrative or operating responsibilities in specific fields. Responsibility for co-ordinating the decentralized statistical activities rests in the Office of Statistical Standards, Bureau of the Budget, Washington 25, D.C., as a part of the Executive Office of the President. This Office reviews all proposed collections of statistical data to avoid duplication or overlapping; promotes the use of improved statistical techniques; develops standard definitions and classifications so that the data collected by different agencies are comparable; serves as liaison between federal agencies and international organizations and as an information centre on government statistical programmes. The Division does not itself collect or publish statistics.

The major general-purpose statistical agencies and their principal areas of responsibility are:

(1) Bureau of the Census in the Department of Commerce (Richard M. Scammon, Director). Decennial censuses of population and housing and quinquennial censuses of agriculture, manufactures and business; current statistics on population and the labour force, manufacturing activity and commodity production, retail and wholesale trade and services, foreign trade, and state and local government finances and operations.

(2) Bureau of Labor Statistics in the Department of Labor (Ewan Clague, Commissioner), Current statistics on employment, earnings, man-hours, labour turnover, industrial accidents, work stoppages, wage rates; collective bargaining agreements; construction; industrial productivity; wholesale prices, retail prices and urban consumers' price indexes; income and expenditures of urban families.

(3) Statistical Reporting Service and Economic Research Service in the Department of Agriculture. Statistics on crop and livestock production and inventories; crop forecasts; food processing and food consumption; farm population, labour and wages; farm management; farm ownership values, transfers, taxation and finance; prices farmers pay and receive; farm income.

(4) National Office of Vital Statistics in the Public Health Service, Department of Health, Education and Welfare (Halbert L. Dunn, Chief). Current statistics on births, deaths, marriages and divorce.

(5) Bureau of Mines in the Department of the Interior (Marling J. Alkeny, Director). Statistics on production, consumption and stocks of metals and minerals, and on injuries in mineral industries.

Other agencies in which statistics are an important by-product of regulatory or other administrative functions include: Social Security Administration in the Department of Health, Education and Welfare; Bureau of Internal Revenue in the Treasury Department; Federal Power Commission; Federal Trade Commission; Interstate Commerce Commission, and the Securities and Exchange Commission.

Among the more important statistical publications of a fairly general nature are:

*Statistical Abstract of the United States*, published by the Bureau of the Census, Department of Commerce. Annual. Important summary statistics on the industrial, social, political and economic organization of the USA, with a representative selection from most of the important statistical publications. *Survey of Current Business*, published by the Office of Business Economics, Department of Commerce. Monthly. Interpretative text and charts reviewing business trends, etc.; official estimates of national income. *Economic Indicators*, prepared by the Council of Economic Advisers and published by the Congressional Joint Committee on the Economic Report. Monthly. Tables and charts presenting current data on the total output of the economy; prices; employment and wages; production and business activity; purchasing power; money, banking and federal finance. *Monthly Labor Review*, published by the Bureau of Labor Statistics, Department of Labor. *Federal Reserve Bulletin*, published by the Board of Governors of the Federal Reserve System. Monthly. Current data on money and banking and selected other economic series. Federal Reserve indexes of industrial production, etc.; international financial statistics. *Treasury Bulletin*, published by the Office of the Secretary, Department of the Treasury. Monthly. Current coverage of federal fiscal statistics; international capital movements. *Minerals Yearbook*, published by the Bureau of Mines, Department of the Interior. Annual. *Agricultural*

*Statistics*, published by the Department of Agriculture. Annual. *Crops and Markets*, published by the Bureau of Agricultural Economics in the Department of Agriculture. Monthly. Crop report and market statistics. *Foreign Agriculture*, published by the Office of Foreign Agriculture Service, Department of Agriculture. Monthly. Monthly and Annual. Natality and mortality data tabulated by place of occurrence, with supplemental tables for Hawaii, Puerto Rico and the Virgin Islands; and tabulated by place of residence.

An annotated bibliography of about 100 periodical statistical publications is included in *Statistical Services of the United States Government*, a pamphlet issued by the Division of Statistical Standards, Bureau of the Budget, describing the general organization of the statistical system of the USA and the principal types of economic statistics.

Figures for the revenues and expenditures of the various states are those of the Federal Bureau of the Census, which takes the original state figures and arranges them on a common pattern so that those of one state can be compared with those of any other. The Council of State Governments now uses the Bureau's figures exclusively.

Official publications of the various states and insular possessions are listed in the *Monthly Check-List of State Publications*, issued by the Library of Congress since 1910. Their character and contents are discussed in J. K. Wilcox's *Manual on the Use of State Publications* (1940). Of great importance bibliographically are the publications of the Historical Records Survey and the American Imprints Inventory, which record local archives, official publications and state imprints. These publications supplement those of state historical societies which usually publish journals and monographs on state and local history. An outstanding source of statistical data is the material issued by the various state planning boards and commissions, to which should be added the *Financial Statistics of State and Local Governments* issued by the US Bureau of the Census.

# ALABAMA

**GOVERNMENT.** Alabama, settled in 1699 as part of the French Province of Louisiana, and ceded to the British in 1763, was organized as a Territory, 1817, and admitted into the Union on 14 Dec. 1819. The present constitution dates from 1901; it has had 211 amendments. The legislature consists of a Senate of 35 members and a House of Representatives of 106 members, all elected for 4 years. The Governor and Lieut.-Governor are elected for 4 years.

The state is represented in Congress by 2 senators and 8 representatives. Alabama requires voters to pay a poll tax for 2 years. Applicants for registration must take an 'anti-communist oath' and fill out a questionnaire to the satisfaction of the registrars. In 18 of the 67 counties Negroes constitute 50% or more of the population. In the 1960 presidential election Kennedy polled 318,303 votes, Nixon, 237,981.

Montgomery is the capital. The state is divided into 67 counties.

## ALASKA

**GOVERNMENT.** Discovered in 1741 by Vitus Bering, its first settlement, on Kodiak Island, was in 1784. The area known as Russian America with its capital (1806) at Sitka was ruled by a Russo-American fur company and vaguely claimed as a Russian colony. Alaska was purchased by the United States from Russia under the treaty of 30 March 1867 for $7·2m. It was not organized until 1884, when it became a 'district' governed by the code of the state of Oregon. By Act of Congress approved 24 Aug. 1912 Alaska became an incorporated Territory; its first legislature in 1913 granted votes to women, 7 years in advance of the Constitutional Amendment.

Alaska officially became the 49th state of the Union on 3 Jan. 1959. It has the largest area of any state, being more than twice the size of Texas.

An important provision of the Enabling Act is that the state has the right to select 103·55m. acres of vacant and unappropriated public lands in order to establish 'a tax basis'; it can open these lands to prospectors for minerals, and the state is to derive the principal advantage in all gains resulting from the discovery of minerals. In addition, certain federally administered lands at present reserved for conservation of fisheries and wild life are being transferred to the state. Special provision is made for federal control of land for defence in areas of high strategic importance.

The constitution of Alaska was adopted by public vote, 24 April 1956. The state legislature consists of a Senate of 20 members and a House of Representatives of 40 members. The state sends 2 senators and 1 representative to Congress. The franchise may be exercised by all citizens over 19 years of age.

The capital since 1906 has been at Juneau.

In the 1960 presidential election Nixon polled 30,953 votes, Kennedy, 29,809.

*Governor:* William A. Egan (D.), 1962–66 ($25,000).
*Secretary of State:* Hugh J. Wade (D.) ($18,000).

**AREA AND POPULATION.** The gross area (land and water) is 586,400 sq. miles; the land area is 571,065 sq. miles, of which 98·8% was in federal ownership in 1961. Census population, 1 April 1960, was 226,167, including military personnel, an increase of 75·8% over 1950. Estimated population, 1 July 1962, 246,000. Births, 1962, were 7,762 (31·6 per 1,000 population); deaths, 1,304 (5·3); infant deaths, 273 (35·2 per 1,000 live births); marriages, 2,117 (8·6); divorces, 907.

Census population: 1880, 33,426; 1900, 63,592; 1910, 64,356; 1940, 72,526; 1950, 128,643; 1960, 226,167.

The white population in 1960 numbered 174,546 (101,194 males and 73,352 females); Indians, Aleuts and Eskimos, 38,332; Negroes, 6,771; Japanese, Chinese and Filipino, 1,769.

The largest town is Anchorage, which had a 1960 census population of 44,237; other towns are Fairbanks, 13,311; Spenard, 9,074; Juneau, capital, 6,797; Ketchikan, 6,483. There are altogether 38 incorporated towns with an assessed valuation, 1959, of $343m.

**RELIGION.** In Alaska are many religious missions representing the Russian Orthodox, Roman Catholic, Episcopalian, Presbyterian, Methodist and other denominations. The Society of Friends had 1,727 members in 1957.

**EDUCATION.** During 1961 there were 117 rural schools (including 'Johnson–O'Malley' schools) (6,468 pupils), 29 incorporated district schools (32,043), 8 military-base schools (8,550). The Bureau of Indian Affairs maintained 79 elementary day schools (5,552 pupils) and 2 boarding and vocational schools (934 pupils); this agency also handles the medical and general care of the native population. The University of Alaska (founded in 1922) had (1961) 206 faculty members and 1,280 students.

**WELFARE.** Old-age assistance was established under the Federal Social Security Act, and 1,401 persons received an average of $81.68 per month in Dec. 1962; 1,229 families with 3,284 dependent children received an average of $120.46 monthly per family; 102 blind persons received an average of $78.08 per month.

In 1961 there were 22 hospitals, with 1,710 beds, recognized by the American Hospital Association; one mental hospital had 217 beds.

Alaska is the only state where women, by legislative Act, are guaranteed equal pay for equal work.

**FINANCE.** In addition to federal income tax, there is a state income tax on individuals and corporations (equal to 16% of the federal income tax for individuals and 18% of the federal income tax for corporations).

General revenue for the year ended 30 June 1962 (US Census Bureau figures) was $108,937,000 ($36,524,000 from taxation, $44·38m. from federal aid). General expenditure was $104,301,000 (including $33,216,000 for education, $29,528,000 for highways and $4,928,000 for public welfare).

Net long-term debt on 30 June 1962 was $16,476,000.

*Per capita* income (1962) was $2,667.

**PRODUCTION.** *Agriculture.* In some parts of the state the climate during the brief spring and summer (about 100 days in major areas and 152 days in the south-eastern coastal area) is not unsuitable for agricultural operations, thanks to the long hours of sunlight, but Alaska is a food-importing area. There are an estimated 65,000 sq. miles of tillable land and 35,000 sq. miles of grazing land (of the latter 1·62m. acres are leased and 6·5m. acres were being grazed in 1960). In 1960 there were 367 farms with a total cultivated acreage of 15,520; the average farm was of approximately 33 acres, compared with 80 acres in 1950. Total value of land and buildings in 1960 was $15,826,500. In 1960 there were 750 horses, 7,320 cattle, 1,000 hogs and 15,000 sheep; tractors numbered 607. Farm production in 1960 was valued at $5,406,410 (milk, $2,162,500; grain crops, $825,000; potatoes, $713,600; poultry, $42,200; other produce, $1,663,110).

There are 49,000 reindeer in western Alaska, of which 7,000 are located on Nunivak Island and administered by the Bureau of Indian Affairs; the balance of 42,000 are owned by individual Eskimo herders.

The government-owned fur-seal herd of the Pribilof Islands comprises about 85% of the fur seals of the world. Production of sealskins, 1960–61, was valued at $2,839,682 and of other furs, about $700,000. Under the terms of the 1958 Enabling Act, the state receives from the federal government 70% of the proceeds derived from the sale of fur-seal skins and sea-otter skins.

*Forestry.* In south-eastern and south-central Alaska timber fringes the shore of the mainland and all the islands extending inland to a depth of 5 miles. The estimated stand is about 84,760m. bd ft (set aside in the 2 national forests), of which 73% is Western hemlock, 21% spruce and 6% Western red and Alaska cedar. Alaska has 2 national forests: the Tongass of 16·08m. acres and the Chugach of 4·81m. acres. A total of 351m. bd ft was cut from national forests in 1960. The value of timber products (1961) amounted to $44·7m. Alaska has 2 large pulp-mills at Ketchikan and Sitka, each with a capacity of 480 tons daily.

*Fisheries.* The chief resource industry of Alaska is fishing, with the value of production for 1961 estimated at $120m.

*Mining.* Production (1962): Crude petroleum (1961), 6,326,000 bbls; natural gas, 2,184m. cu. ft; sand and gravel, 5·73m. short tons, bituminous coal (1961), 737,000 short tons; gold, 165,259 troy oz.; mercury, 3,719 flasks (of 76 lb.). Total value of mineral production, 1961, $36,566,000. By 1961, 606,415 acres of the state had been leased for oil and natural gas exploitation. Alaska receives 90% of all proceeds, collected from oil, gas and coal leases; these bonuses amounted to $20,298,289 in fiscal year 1961–62.

*Labour.* Total employed labour force (1960) was 90,923 (military 32,692; commodity producing industries, 12,127; distributive industries, 42,517).

**COMMUNICATIONS.** *Shipping.* Regular shipping services to and from the US are furnished by 2 steamship lines and several barge lines operating out of Seattle and other Pacific coast ports. Two Canadian companies also furnish a regular service from Vancouver, B.C.

A 450-mile ferry system for motor cars and passengers (the 'Marine Highway') operates from Prince Rupert (British Columbia) to Juneau, Haines (for access to the Alaska Highway) and Skagway.

*Railways.* There is a railway of 111 miles from Skagway to the town of Whitehorse (in the Canadian Yukon region). The government-owned Alaska Railroad runs from Seward to Fairbanks, a distance of 471 miles.

*Roads.* Alaska's highway and road system, 1961, totalled 5,898 miles, of which 2,629 miles were primary roads (50% paved) connecting the major cities; secondary roads totalled 3,269 miles. Registered motor vehicles, 1961, 86,640.

The Alaska Highway extends 1,523 miles from Dawson Creek, British Columbia, to Fairbanks, Alaska. It was built by the US Army in 1942, at a cost of $138m. The greater portion of it, because it lies in Canada, is maintained by the Canadian Government.

*Aviation.* In 1961 the state had 373 airports, of which 228 were general. Passengers by air to and from Alaska (1961) numbered 211,838.

## ARIZONA

**GOVERNMENT.** Arizona was settled in 1752, organized as a Territory in 1863 and became a state on 14 Feb. 1912. The state constitution (1910, with now 50 amendments) placed the government under direct control of the people through the Initiative, Referendum and the Recall. ## CONNECTICUT

**GOVERNMENT.** Connecticut was first settled in 1635 and has been an organized commonwealth since 1637. In 1639 a written constitution was adopted which, it is claimed, was the first in the history of the world formed under the concept of a social compact. This constitution was confirmed by a charter from Charles II in 1662, and replaced in 1818 by a state constitution, framed that year by a constitutional convention, and remained in force until 1 Jan. 1955. A constitutional amendment was passed 22 June 1953, incorporating the 47 amendments in the constitution of the state without other amendment, effective 1 Jan. 1955. Connecticut is one of the original 13 states of the Union.

The General Assembly consists of a Senate of 36 members and a House of Representatives of 294 members. Members of each House are elected for the term of 2 years. Legislative sessions are biennial. The Governor and Lieut.-Governor are elected for 4 years. All citizens (with necessary exceptions and the usual residential requirements) have the right of suffrage provided that they can read the constitution in English.

The state is represented in Congress by 2 senators and 6 representatives (one elected by the voters of the entire state).

In the 1960 presidential election Kennedy polled 657,055 votes, Nixon 565,813.

## DISTRICT OF COLUMBIA

**GOVERNMENT.** The District of Columbia, organized in 1790, is the seat of the Government of the US, for which the land was ceded by the state of Maryland to the US as a site for the national capital. It was established under Acts of Congress in 1790 and 1791. Congress first met in it in 1800 and federal authority over it became vested in 1801.

Local government, from 1 July 1878, has been that of a municipal corporation administered by a board of 3 commissioners, of whom 2 are appointed from civil life by the President, and confirmed by the Senate, for a term of 3 years each. The other commissioner is detailed by the President from the Engineer Corps of the Army. Congress alone enacts legislation and appropriates money for the municipal expenses. A proposal to grant local self-government was discussed by Congress in 1950 and 1951, and legislation to that end was passed by the Senate in 1955 and 1958 but failed to pass the House. A constitutional amendment conferring the right to vote in national elections passed Congress in 1960 and has been ratified by the requisite number of states.

*Secretary to the Board of Commissioners:* G. M. Thornett.

## HAWAII

**GOVERNMENT.** The Hawaiian Islands, formerly known as the Sandwich Islands, were discovered by Capt. James Cook in Aug. 1778. The islands formed during the greater part of the 19th century an independent kingdom, but in 1893 the reigning Queen, Liliuokalani (died 11 Nov. 1917), was deposed and a provisional government formed; in 1894 a Republic was proclaimed, and in accordance with the request of the people of Hawaii expressed through the Legislature of the Republic, and a resolution of the US Congress of 6 July 1898 (signed 7 July by President McKinley), the islands were on 12 Aug. 1898 formally annexed to the US. This was due to the energetic efforts of American capital (mainly from New England) vested in the Hawaiian sugar industry, which was threatened with exclusion from the American market in the early 1890s. On 14 June 1900 the islands were constituted as the Territory of Hawaii.

Efforts to persuade Congress to grant statehood to Hawaii were finally successful, 11 and 12 March 1959, when an Enabling Act was passed. The constitution, ratified in Nov. 1950, took effect on 21 Aug. 1959.

The Legislature consists of a Senate of 25 members elected for 4 years, and a House of Representatives of 51 members elected for 2 years. The constitution provides for annual meetings of the legislature with 60-day general sessions in odd-numbered years and 30-day budget sessions in even-numbered years. The Governor and Lieut.-Governor are elected for 4 years. The registered voters, 1962, numbered 221,650.

The state sends to Congress 2 senators and 2 representatives.

In the 1960 presidential election Kennedy polled 92,410 votes, Nixon 92,295.

## ILLINOIS

**GOVERNMENT.** Illinois was first discovered by Joliet and Marquette, two French explorers, in 1673, and settled in 1720. In 1763 the country was ceded by the French to the British. In 1783 Great Britain recognized the title of the US to Illinois, which was organized as a Territory in 1809 and admitted into the Union on 3 Dec. 1818. The present constitution dates from 1870; 14 amendment have been adopted. The Legislature consists of a Senate of 58 members elected for 4 years (about half of whom retire every 2 years), and a House of Representatives of 177 members elected for 2 years. Sessions are biennial. The Governor, Lieut.-Governor and Secretary of State are elected for 4 years. Electors are citizens 21 years of age, having the usual residential qualifications.

The state is divided into districts, in each of which 1 senator and 3 representatives are chosen; for the election of the latter each elector has 3 votes, of which he may cast 1 for each of 3 candidates or 1½ for each of 2, or all 3 for 1 candidate. Illinois is represented in Congress by 2 senators and 24 representatives.

In the 1960 presidential election Kennedy polled 2,377,846 votes, Nixon 2,368,988.

The capital is Springfield. The state has 102 counties.

The Justices of the Supreme Judicial Court give their opinion upon important questions of law and upon solemn occasions when required by the Governor, Council, Senate or House of Representatives. The suffrage is possessed by all citizens, 21 years of age, who can read English and write their own names; paupers and persons under guardianship have no vote. Indians residing on tribal reservations and otherwise qualified have the vote in all county, state and national elections, but retain the right to elect their own tribal representative to the legislature.

In the 1960 presidential election Nixon polled 240,608 votes, Kennedy 181,159.

The state sends to Congress 2 senators and 2 representatives.

The capital is Augusta. The state is divided into 16 counties.

## MASSACHUSETTS

**GOVERNMENT.** The first permanent settlement within the borders of the present state was made at Plymouth in Dec. 1620, by the Pilgrims from Holland, who were separatists from the English Church, and formed the nucleus of the Plymouth Colony. In 1628 another company of Puritans settled at Salem, forming eventually the Massachusetts Bay Colony. In 1630 Boston was settled. In the struggle which ended in the separation of the American colonies from the mother country, Massachusetts took the foremost part, and in 1780 adopted its present constitution (81 amendments since adopted) and on 6 Feb. 1788 became the sixth state to ratify the US constitution.

The legislative body, styled the General Court of the Commonwealth of Massachusetts, meets annually, and consists of the Senate with 40 members, elected biennially, and the House of Representatives of 240 members, elected for 2 years in 160 districts, each of which returns 1, 2 or 3 representatives according to the number of legal voters. The Governor and Lieut.-Governor are elected for 2 years. The state sends 2 senators and 12 representatives to Congress.

At the 1960 presidential election Kennedy polled 1,487,174 votes, Nixon 976,750.

Electors are all adult citizens, with the usual residential qualifications, who can read and write the English language; excluded are paupers and those under guardianship.

The capital is Boston. The state has 14 counties, 39 cities and 312 towns.

*Governor:* Endicott Peabody (D.), 1963–65 (salary, $20,000).
*Lieut.-Governor:* Francis X. Bellotti (D.) ($16,000).
*Secretary of the Commonwealth:* Kevin H. White (D.) ($11,000).

## NEBRASKA

**GOVERNMENT.** The Nebraska region was first reached by white men from Mexico under the Spanish general Coronado in 1541. It was ceded by France to Spain in 1763, retroceded to France in 1801, and sold by Napoleon to the US as part of the Louisiana Purchase in 1803. Its first settlement was in 1847, and on 30 May 1854 it became a Territory and on 1 March 1867 a state. In 1882 it annexed a small part of Dakota Territory, and in 1908 it received another small tract from South Dakota.

The present constitution was adopted in 1875; it has been amended 69 times. By an amendment adopted in Nov. 1934 Nebraska has a single-chambered legislature (elected for 2 years) of 43 members—the only state in the Union to have one. The Governor and Lieut.-Governor are elected for 2 years. Amendments adopted in 1912 and 1920 provide for legislation through the initiative and referendum and permit cities of more than 5,000 inhabitants to frame their own charters. **GOVERNMENT.** From the time of its first settlement in 1598 until 1771 New Mexico was the Spanish kings' 'Kingdom of New Mexico'. In 1771 it was annexed to the northern provinces of New Spain. When New Spain won its independence in 1821, it took the name of Republic of Mexico and established New Mexico as its northernmost department. When the war between the US and Mexico was concluded on 2 Feb. 1848 New Mexico was recognized as belonging to the US, and on 9 Sept. 1850 it was made a Territory. Part of the Territory was assigned to Texas; later Utah was formed into a separate Territory; in 1861 another part was transferred to Colorado, and in 1863 Arizona was disjoined, leaving to New Mexico its present area. New Mexico became a state in Jan. 1912. The constitution of 1912 is still in force with 55 amendments. The state Legislature, which meets biennially, consists of 32 members of the Senate, elected for 4 years, and 66 members of the House of Representatives, elected for 2 years. The Governor and Lieut.-Governor are elected for 2 years. The state sends to Congress 2 senators and 2 representatives.

In the 1960 presidential election Kennedy polled 156,027 votes, Nixon 153,733; other candidates, 1,253.

The state capital is Santa Fé. For local government the state is divided into 32 counties

During this period the Spanish-American rural-farm economy underwent considerable disintegration, with resulting migration into urban areas in New Mexico and other states. Although still the largest single cultural group in New Mexico, the so-called 'Hispano' group finds difficulty in adjusting to a commercial and quasi-industrialized economy.

## NEW YORK STATE

**GOVERNMENT.** From 1609 to 1664 the region now called New York was claimed by the Dutch; then it came under the rule of the English, who governed the country till the outbreak of the War of Independence. On 20 April 1777 New York adopted a constitution which transformed the colony into an independent state; on 26 July 1788 it ratified the constitution of the US, becoming one of the 13 original states.

The present constitution dates from 1894; a later constitutional convention, 1938, is now legally considered to have merely amended the 1894 constitution, which has now had 127 amendments. The Senate consists of 58 members, and the Assembly of 150 members, both elected every 2 years. The Governor and Lieut.-Governor are elected for 4 years. The right of suffrage resides in every adult who has been a citizen for 90 days, and has the usual residential qualifications; new voters must establish, by certificates or test, that they have had at least an elementary education.

The state is represented in Congress by 2 senators and 41 representatives. In the 1960 presidential election Kennedy polled 3,830,085 votes, Nixon 3,446,419.

The state capital is Albany. For local government the state is divided into 62 counties, 5 of which constitute the city of New York. New York leads in state parks and recreation areas, covering 3,300,520 acres in 1957.

*Governor.* Nelson Rockefeller (R.), 1963–67 ($50,000).
*Lieut.-Governor:* Malcolm Wilson (R.) ($20,000).
*Secretary of State:* Mrs Caroline K. Simon (R.) ($20,486).

Cities are in 3 classes, the first class having each 175,000 or more inhabitants and the third under 50,000. Each is incorporated by charter, under special legislation. The government of New York City is vested in the mayor, elected for 4 years, and a city council, whose president is elected for 4 years and members for 2 years. The council has 25 members, each elected from a state senatorial district wholly within the city. The mayor appoints all the heads of departments, except the comptroller, who is elected. Each of the 5 city boroughs (Manhattan, Bronx, Brooklyn, Queens and Richmond) has a president, elected for 4 years. Each of these boroughs is also a county, bearing the same name except Manhattan borough, which, as a county, is called New York, and Brooklyn, which is Kings county.

## OKLAHOMA

**GOVERNMENT.** An unorganized area in the centre of the present state was thrown open to white settlers on 22 April 1889. The Territory of Oklahoma was organized in 1890 to include this area and other sections, opened to white settlements by runs or lotteries during the next decade. On 16 Nov. 1907 Oklahoma was combined with the Indian Territory and admitted as a state. The present constitution, dating from 1907, provides for amendment by initiation petition and legislative referendum; it has had 52 amendments.

The Legislature consists of a Senate of 44 members, who are elected for 4 years, and a House of Representatives elected for 2 years and consisting of from 120 to 123 members. The Governor and Lieut.-Governor are elected for 4 years. Electors are (with necessary exceptions) all citizens 21 years or older, with the usual residential qualifications. Indians are qualified as voters.

The state is represented in Congress by 2 senators and 6 representatives. In the 1960 presidential election Nixon polled 533,039 votes, Kennedy 370,111.

The capital is Oklahoma City. The state has 77 counties.

*Governor:* Henry Bellmon (R.), 1963–67 ($25,000).
*Lieut.-Governor:* Leo Winters (D.) ($9,000).
*Secretary of State:* James M. Bullard (D.) ($12,000).

In 1949 the legislature enacted a law by which Negroes are admitted to institutions of higher education.

In the autumn of 1962 there were 319,000 pupils enrolled in elementary schools (kindergarten through grade 6) and 244,000 pupils in secondary schools; in 1963, 12,075 teachers in elementary schools had an average salary of $5,125 and 9,300 teachers in secondary schools had an average salary of $5,250.

On the other hand, small-scale farming also exists; 14,103 farms were of less than 50 acres, and, of the commercial farms, 8,215 sold products valued at less than $2,500.

Soil erosion is serious—wind and water erosion in the western part and water erosion in the eastern. Of the total surface (44,526,881 acres) 7% in 1954 was found seriously eroded (75% or more of the top-soil gone), 34·8% was moderately eroded (having lost from 25 to 75% of the top-soil) and 58·2% was free or nearly free from erosion. Other minerals produced include gypsum, zinc and salt. The total mineral output in 1961 was valued at $786m. (of which petroleum accounted for $558m.).

*Industry.* Petroleum refining is the chief industry; 15 refineries were operating on 1 Jan. 1960 with a capacity of 397,200 bbls of oil per day. In 1961, manufacturing establishments (numbering 2,367 in 1958) had 59,000 production workers earning $254m.; value added by manufacture, $811m.

Marriage between members of the 'Caucasian' and 'African' races is forbidden; children may be adopted only by persons of the same race.

The prison system, 31 Aug. 1962, held 12,166 men and women. In 1962 there were 6 persons executed for murder (by electrocution) and 3 persons for other crimes. Total executions from 1930 through 1962 have been 288.

Texas has adopted 11 laws governing the activities of trade unions. An Act of 1955 forbids the state's payment of unemployment compensation to workers engaged in certain types of strikes.

Large-scale commercial farms, highly mechanized, dominate in Texas; farms of 1,000 acres or more numbered 20,106 in 1959, a number far exceeding that of any other state; 29,101 farms sold produce valued at $20,000 or more. But small-scale farming persists; in 1959, 45,392 farms were under 50 acres.

Soil erosion is serious in some parts. For some 97,297,000 acres drastic curative treatment has been indicated and for 51,164,000 acres, preventive treatment. About 97% of the state's area has been drawn into soil-conservation districts.

Texas leads in production of cotton (4·68m. bales from 6·44m. acres in 1962, preliminary); yield was 349 lb. per acre compared with the average of 455 lb. for all cotton states. It also frequently leads in pecans (12m. lb., 1962, preliminary) and always in grain sorghum (201,006,000 bu., 1962, preliminary). Other important crops, 1962 (preliminary), were maize (32·61m. bu.), winter wheat (83·69m. bu.), oats (25,932,000 bu.), rice (15·8m, bags of 100 lb.), potatoes, sweet potatoes, peanuts (224·75m. lb.), vegetables, oranges (80,000 boxes), grapefruit (200,000 boxes) and peaches.

A large proportion of the country's helium comes from the plants at Amarillo and Exell (production, 1961, 173,066,000 cu. ft). Total value of mineral fuel products (excluding asphalt and coal, undisclosed), 1961, was $3,924·5m. (32% of US total).

Other minerals include cement (26·3m. bbls of 376 lb. in 1962), salt (5·55m. short tons), crude gypsum (1·12m. short tons), granite, sandstone and native asphalt.

Total value of mineral products in 1961, $4,224·9m., leading all states (23·3% of the US total).

*Industry.* The 1958 Census of Manufactures showed 10,343 manufacturing establishments with 343,000 production workers earning $1,454m.; value added by manufactures was $5,045,000. Chemical industries along the Gulf Coast, such as the production of synthetic rubber and of primary magnesium (from sea-water), are increasingly important. Steel plants, on 1 Jan. 1959, had a capacity of 2,381,000 net tons of ingots and steel for castings.

**COMMUNICATIONS.** The state maintained (1963) some 64,876 miles of roads; local roads, about 139,743; municipal, about 39,715. The railways (1960) had a total mileage of 14,678 (main lines). The port of Houston, connected by the Houston Ship Channel (50 miles long) with the Gulf of Mexico, is the largest inland cotton market of the world. Airports, 1962, numbered 808, of which 342 were private.

## COMMONWEALTH OF PUERTO RICO

**GOVERNMENT.** Puerto Rico, by the treaty of 10 Dec. 1898 (ratified 11 April 1899), was ceded by Spain to the US. The name was changed from Porto Rico to Puerto Rico by an Act of Congress approved 17 May 1932. Its territorial constitution was determined by the 'Organic Act' of Congress (2 March 1917) known as the 'Jones Act', which ruled until 25 July 1952, when the present constitution of the Commonwealth of Puerto Rico was proclaimed. Puerto Rico has representative government, the franchise being restricted to citizens 21 years of age or over, residence (1 year) and such additional qualifications as may be prescribed by the Legislature of Puerto Rico, but no property qualification may be imposed. Women were enfranchised in 1932 (with a literacy test) and fully in 1936. Puerto Ricans do not vote in the US presidential elections, though individuals living on the mainland are free to do so subject to the local electoral laws. The executive power resides in a Governor, elected directly by the people every 4 years. Eight heads of departments form the Governor's advisory council, also designated as his Council of Secretaries. The legislative functions are vested in a Senate, composed of 27 members (2 from each of the 8 senatorial districts and 11 senators at large), and the House of Representatives, composed of 51 members (1 from each of the 40 representative districts and 11 elected at large). To give proportional representation to the minority parties, 5 additional senators and 13 representatives at large are serving. Puerto Rico sends to Congress a Resident Commissioner to the US, elected by the people for a term of 4 years. But he has no vote in Congress, and under the doctrine of 'no taxation without representation' Puerto Rico is not subject to US taxes, including income tax. Males, however, are subject to conscription.

On 27 Nov. 1953 President Eisenhower sent a message to the General Assembly of the UN stating 'if at any time the Legislative Assembly of Puerto Rico adopts a resolution in favour of more complete or even absolute independence' he 'will immediately thereafter recommend to Congress that such independence be granted'.

For an account of the constitutional developments prior to 1952, *see* THE STATESMAN'S YEAR-BOOK, 1952, p. 742. The new constitution was drafted by a Puerto Rican Constituent Assembly and approved by the electorate at a referendum on 3 March 1952. It was then submitted to Congress, which struck out on 28 May Section 20 of Article 11 covering the 'right to work' and the 'right to an adequate standard of living'; the remainder was passed on 1 July and proclaimed by the Governor of Puerto Rico on 25 July 1952.

At the election on 6 Nov. 1960 the Popular Democratic Party, headed by Muñes Marín, polled 457,887 votes (58·3% of the total); the Independentista Party (full independence by constitutional means), 24,122; Estadista or Statehood party (advocates of US statehood and affiliated with the Republican Party on the mainland), 252,462; the Christian Action Party, 51,295.

*Governor:* Luis Muñoz Marín, 1961–65 ($10,600; his fourth successive term; the legislature raised the salary to $20,000; but the Governor declined to accept it; it remains available to the next holder of the office).

*Secretary of State:* Roberto Sánchez Vilella ($15,000).

## VIRGIN ISLANDS OF THE UNITED STATES

**GOVERNMENT.** The Virgin Islands of the United States, formerly known as the Danish West Indies, were purchased by the United States from Denmark for $25m. in a treaty ratified by both nations and proclaimed 31 March 1917. Their value was wholly strategic, inasmuch as they commanded the Anegada Passage from the Atlantic Ocean to the Caribbean Sea and the approach to the Panama Canal. Although the inhabitants were made US citizens in 1927, the islands were, constitutionally, an 'unincorporated territory', and are included among the non-self-governing territories under the jurisdiction of the United Nations.

The Organic Act of 22 July 1954 gives the US Department of the Interior full jurisdiction; some limited legislative powers are given to a single-chambered legislature, composed of 11 senators elected for 2 years (5 represent 3 legislative districts; 6 are elected by all voters).

The Governor is appointed by the President, with the consent of the Senate, for an indefinite term; a proposal that he be elected is under consideration.

*Governor:* Ralph Paiewonsky ($19,000).
*Government Secretary:* Cyril King ($15,962).
*Comptroller:* Peter Bove ($12,500).

For administration, there are 10 executive departments. The Government Secretary, *ex officio*, handles 2 departments; each of the others is under a commissioner.

The franchise is vested in residents who are citizens of the United States, 21 years of age or over. In 1960 there were 10,678 voters, of whom 7,659 participated in the local elections that year. They do not participate in the US presidential election and have no representative in Congress.

The capital is Charlotte Amalie, on St Thomas Island.

**AREA AND POPULATION.** The Virgin Islands group, lying about 40 miles due east of Puerto Rico, comprises the islands of St Thomas (32 sq. miles), St Croix (82 sq. miles), St John (19 sq. miles) and about 50 small islets or cays, mostly uninhabited. The total area of the 3 principal islands is 133 sq. miles (344·5 sq. km), of which the US Government owns 10,082 acres (12%).

The population, according to the census of 1 April 1960, was 32,099, an increase of 5,434 or 20·4% since 1950; density was 243 per sq. mile. Population had slowly declined since 1835, when it stood at 43,000, but began to recover in the 1940s. Of the 1960 population, males numbered 15,930 and females, 16,169. Whites numbered 5,373; Negroes, 20,634; mixed and other races, 6,092. Births, 1961, were 1,185 (35·3 per 1,000 population); deaths, 322; infant deaths, 45 (38 per 1,000 live births); marriages, 385 (10·1 per 1,000 population); divorces, 152.

The 1960 population of St Thomas was 16,201; St Croix, 14,973; St John, 925. There is one city, Charlotte Amalie, on St Thomas, with a population (1960) of 12,740, and 2 towns, both on St Croix, Christiansted with 5,088 (in 1960) and Frederiksted with 1,925 (in 1950).

**RELIGION.** There are churches of the Protestant, Roman Catholic and Jewish faiths in St Thomas and St Croix.

**EDUCATION.** Education is compulsory between the ages of 5½ and 16 years, inclusive. Total enrolment, 1960, in 29 public schools (ranging from 7 kindergartens to 2 junior–senior high schools) was 6,849; the school budget, 1959–60, was $1,622,000. In 1963 the College of the Virgin Islands opened with 46 full-time and 200 part-time students.

**FINANCE.** Under the 1954 Organic Act finances are provided partly from local revenues—customs, federal income tax, real and personal property tax, trade tax, excise tax, pilotage fees, etc.—and partly from Federal Matching Funds, being the excise taxes collected by the federal governments on such Virgin Islands products transported to the mainland as are liable. The US provides a separate fund to be expended for emergency purposes and essential public works. Total revenue for fiscal year ending 30 June 1963 including federal income taxes, Matching Funds and the federal grant-in-aid, $12m.

**PRODUCTION.** The population census of 1960 showed 315 farms in St Croix, 128 in St Thomas and 58 in St John, a total of 501. The average farm was of 87·9 acres; total value of land and buildings, $64,289,529.

An extensive homesteading programme is under way in St Croix; chief industries of St Croix are sugar cultivation, cattle raising, vegetable growing and the manufacture of rum.

St Thomas is the leading port in the Virgin Islands; its industries are fuel bunkering and servicing of ships, manufacture of rum and bay rum, truck gardening, cattle raising, deep-sea fishing, handicrafts and tourism.

The island of St John is noted for its bay-leaf oil, but the industry is now dormant; other resources are limited farming and cattle-raising, production of charcoal, servicing winter residents and tourists. Income from tourism in 1963 exceeded $41m. from 331,000 visitors.

The Virgin Islands offer liberal tax exemptions to persons, firms or companies prepared to invest $10,000 in new industries or in the promotion of tourism.

Exports, 1962, totalled $21,183,000, of which $20,144,000 were to US; imports, $61,738,000, of which $40,528,000 were from US.

Trade between the US Virgin Islands and UK (British Board of Trade returns, in £ sterling):

**COMMUNICATIONS.** There is a daily air-mail and passenger service between St Thomas and St Croix, and a daily boat service—mail and passengers—between St Thomas and St John; there are cable offices in St Thomas and St Croix. St Thomas–St John have 90 miles of highway and 3,500 motor vehicles; St Croix, 180 miles and 2,420 vehicles. Four newspapers, 1959, had a total circulation of about 3,500. There were 5 post offices and 4,659 telephone instruments in 1962, all government-owned.

**MONEY AND BANKING.** United States currency became legal tender on 1 July 1934. Banks are the Virgin Islands National Bank with, on 31 Dec. 1960, total assets of $21,033,692 and the West Indies Bank and Trust Company (owned by Chase Manhattan Bank); there is a branch, in Charlotte Amalie, of the First Federal Savings and Loan Association of Puerto Rico.

There is a British Vice-Consul at St Thomas.

## GUAM

Guam is the largest and most southern island of the Marianas Archipelago, in 13° 26′ N. lat., 144° 43′ E. long. Magellan is said to have discovered the island in 1521; it was ceded by Spain to the US by the Treaty of Paris (10 Dec. 1898). The island was captured by the Japanese on 10 Dec. 1941, and retaken by American forces 21 July–10 Aug. 1944. Guam is of great strategic importance; substantial naval and air force personnel occupy about one-third of the usable land. Its constitutional status is that of an 'unincorporated territory' of the US.

*Government.* From 1899 until 1949 the Governor was always a naval officer appointed by the President. In 1949 the President transferred the administration of the island from the Navy Department to the Interior Department; the transfer was completed by 1 Aug. 1950, when the Organic Act came into effect; it conferred full citizenship on the Guamanians, who had previously been 'nationals' of the US.

*Governor:* Manuel F. L. Guerrero (D.) ($19,000), appointed March 1963.

The Governor and his staff constitute the executive arm of the government, and the unicameral Guamanian Legislature of 21 members, which meets annually, forms the legislative branch; the latter's powers are similar to those of an American state legislature. Following the general election of Nov. 1962, the Democratic Party (formerly the Popular Party) held all 21 seats. All adults 18 years of age or over, including women, are enfranchised.

*Area and Population.* The length is 30 miles, the breadth from 4 to 8½ miles, and the area about 209 sq. miles (540 sq. km). Agaña, the seat of government is about 8 miles from the anchorage in Apra Harbour. The census on 1 April 1960 showed a population of 67,044, an increase of 7,546 or 12·7% since 1950; those of Guamanian ancestry numbered about 30,000; density was 321 per sq. mile. The 1961–62 census showed a total local population of 43,798, while transient residents connected with the military were estimated at 30,000. The Malay strain is predominant. The native language is Chamorro; English is the official language and is taught in all schools.

*Religion.* About 95% of the Guamanians are Roman Catholics; others are Baptists, Episcopalians and Seventh Day Adventists.

*Education.* Elementary education is compulsory. There were, Nov. 1962, 19 elementary schools, 1 combined elementary junior high school, 1 junior high school, 2 junior–senior high schools and 1 trade and technical school with a total of 545 classroom teachers and a total enrolment of 13,718 students. Budget of the school system, 1962–63, was $4,753,394. The College of Guam (a 4-year accredited institution) had, 1962–63, an enrolment of 1,464 students.

*Newspapers.* There is one daily newspaper and 5 weekly publications (3 of which are of military or religious interest only).

*Justice.* The Organic Act established a District Court with jurisdiction in matters arising under both federal and territorial law; the judge is appointed by the President subject to Senate approval. Misdemeanours are under the jurisdiction of the 'Island court' and the police court. The Spanish law prevailing was superseded in 1933 by 5 civil codes based upon California law, drafted by the then Governor.

*Production.* The major products of the island are maize, sweet potatoes, taro, cassava, bananas, and citrus and truck crops, including breadfruit, coconuts and sugar-cane. In 1962, 88 farms averaged 36 acres. Livestock included 584 carabao, 3,887 cattle, 1,809 goats, 5,232 swine, 105 horses, 63,755 chickens and 2,000 ducks. Commercial sales of fruit and vegetables amounted to $115,813 in 1962; fish caught, 115,000 lb.; egg production averaged 53,807 doz. ($40,893) per month.

*Trade.* Guam is unique in being the only American territory which is completely 'free trade'; no customs duties are levied upon imports. In the year ending 30 June 1961, imports into Guam totalled 107,143 tons valued at $24,667,985, of which 85,318 tons ($20,368,953) came from the US; exports, 48,045 tons ($8,120,907), of which 17,238 ($4,264,331) went to the US.

*Communications.* Two commercial airlines handle air traffic between Guam, US, Japan and the Philippines.

On 15 Sept. 1962 a Presidential Executive Order of 1941 was revoked, which had required all persons entering Guam to undergo security investigation by the Navy. Entry of US citizens is now unrestricted; foreign nationals are subject to normal regulations. The port is now open to foreign vessels.

There are 183 miles of paved and 47 miles of improved roads.

Overseas telephone and radio dispatch facilities are available. On 1 Jan. 1963 there were 16,418 telephones.

There is a commercial radio station and a television station on the island.

## AMERICAN SAMOA

The Samoan Islands were first visited by Europeans in the 18th century; the first recorded visit was in 1722. On 14 July 1889 a treaty between the USA, Germany and Great Britain proclaimed the Samoan islands neutral territory, under a 4-power government consisting of the 3 treaty powers and the local native government. By the Tripartite Treaty of 7 Nov. 1899, Great Britain and Germany renounced in favour of the US all rights over the islands of the Samoan group east of 171° long. west of Greenwich, the islands to the west of that meridian being assigned to Germany (now the State of Western Samoa, *see* p. 531). The islands of Tutuila and Aunu'u were ceded to the US by their High Chiefs on 17 April 1900, and the islands of the Manu'a group on 16 July 1904. Congress accepted the islands under a Joint Resolution approved 20 Feb. 1929. Swain's Island, 210 miles north-north-west of the Samoan Islands, was annexed in 1925 and is administered as an integral part of American Samoa.

*Government.* American Samoa is constitutionally an unincorporated territory of the US; its indigenous inhabitants are US nationals and are classified locally as citizens of American Samoa with certain privileges under local laws not granted to non-indigenous persons; native customs (not inconsistent with US laws) are respected. All official publications are printed in both English and Samoan.

The harbour at Pago Pago, which nearly bisects the island of Tutuila, is the only good harbour for large vessels in Samoa. Fagatogo is the seat of the Government.

The islands are organized in 14 counties grouped in 3 districts, these counties and districts corresponding to the old Samoan political units. On 25 Feb. 1948 a bicameral legislature was established, at the request of the

Samoans, to have advisory legislative functions. With the adoption of the Constitution of American Samoa, effective 17 Oct. 1960, the legislature was vested with limited law-making authority. The lower house, or House of Representatives, is composed of 17 members elected by universal adult suffrage; under the new constitution this membership may be increased to not more than 24. The upper house, or Senate, is composed of 15 members elected, in the traditional Samoan manner, in open meetings.

*Governor:* H. Rex Lee.
*Secretary of American Samoa:* Owen S. Aspinall.

*Area and Population.* The total area of American Samoa is 76·1 sq. miles (197 sq. km); census population, 1960, 20,051, nearly all Polynesians or part-Polynesians. The island of Tutuila, 80 miles from Apia, has an area of 42·5 sq. miles, with a census population (1960) of 17,250 (including the island of Aunu'u). Ta'u has an area of 15 sq. miles, and the other islets (Ofu and Olosega) of the Manu'a group have an area of about 3·5 sq. miles with a population of 2,695 in 1960. Swain's Island, circular in shape, has an area of 0·9 sq. mile and a population, 1960, of 106. Rose Island (uninhabited) is 0·4 sq. mile in area.

*Education.* Education is compulsory between the ages of 7 and 15. The Government (1963–64) maintains 47 elementary schools, 7 junior high schools, 1 senior high school, 1 high school technical department, 1 teachers' training school and 1 school for nurses. Total enrolment, 6,869. Six private schools had 1,307 students. The public schools employed 372 teachers; the private schools, 40.

*Health.* The Medical Services Department provides the only medical and dental care in American Samoa. It operates a general hospital (154 beds), 3 dispensaries, a leprosarium (20 beds; on Tutuila) and 2 dispensaries in the Manu'a group.

*Justice.* Judicial power is vested in a High Court and 5 district courts. Except for the Chief Justice and Associate Justice, who are Americans appointed by the Secretary of the Interior, all judges are Samoans.

*Finance.* Revenue comes from federal grants, customs duties, a 1% tax upon freehold property, licences for business, a 2% export tax and the sale of utilitys ervices. During the fiscal year ended 30 June 1963, the government operated under a direct federal appropriation of $236,600 and a federal grant-in-aid of $12,807,400. Receipts from local sources were $1,685,209 and disbursements were $12,395,189.

In 1962–63 American Samoa exported goods valued at $12,707,373 and imported goods valued at $6,384,008. Chief exports are canned tuna, copra, pandanus mats and handicrafts. Mats woven from laufala leaves (for floor and wall coverings) are being exported in increasing quantities.

*Production.* There are virtually no public lands in American Samoa. Nearly all the land is owned by Samoans and, with a few exceptions, cannot be sold except to persons having at least one-half Samoan blood. Of the 48,640 acres of land area, 12,000 acres are suitable for tropical crops, 1,500 acres for most temperate vegetables, 8,000 acres only to such crops as coconut and cacao with good conservation practice, 5,000 acres to controlled forestation and about 22,500 to indigenous and introduced forest with strict conservation measures. The 1950 census showed 1,490 farms.

Principal crops are copra, taro, breadfruit, yams, bananas, coconuts, arrowroot, oranges and papayas. Principal livestock are poultry, swine and cattle.

*Communications.* There are about 33 miles of main roads and 26 miles of secondary roads, mainly on Tutuila. A commercial radiogram service is available to all parts of the world through 3 principal trunks, Hawaii, Fiji and Western Samoa. Commercial phone services are available to US and Canada *via* Oakland (Cal.) and to Australia and New Zealand. Number of telephones (1 Jan. 1963), 550.

There are weekly air services from the continental US (*via* Honolulu), from Australia and from New Zealand (*via* Fiji); Polynesian Airlines operate a daily service between American Samoa and Western Samoa. By sea, there is a monthly service from New Zealand; ships of the Matson line call every 3 weeks en route to the US, and freighters from the US with limited accommodation also call from time to time.

*Banking.* The Bank of American Samoa, with total resources of $12·6m., does all types of commercial banking business.

# TRUST TERRITORY OF THE PACIFIC ISLANDS

UNDER the Treaty of Versailles (1919) Japan was appointed mandatory to the former German possessions north of the Equator. In 1946 the US agreed to administer the former Japanese-mandated islands of the Caroline, Marshall and Mariana groups (except Guam) as a Trusteeship for the United Nations; on 18 July 1947 the trusteeship agreement came into effect. In 1951 all the islands passed under the care of the US Department of the Interior, but in 1953 responsibility for civil administration of the Northern Marianas (except Rota) was transferred back to the Department of the Navy. On 7 May 1962 Saipan and the islands of the Northern Marianas were transferred back to the Secretary of the Interior, so that the whole area is now under one administration.

The Trust Territory extends from 1° to 20° N. lat. and from 130° to 172° E. long. The area is generally known as Micronesia, or 'land of the small islands'; more than 2,000 islands (of which 96 are inhabited) cover less than 700 sq. miles (1,813 sq. km) in some 3m. sq. miles (8m. sq. km) of ocean.

The population of the 6 administrative districts as of 30 June 1963 was: Truk, 23,344; Ponape, 17,707; Marshall Islands, 17,363; Palau, 10,280; Mariana Islands, 10,062; Yap, 6,021; total, 84,777. The administrative centre is Saipan, Mariana Islands. Nine different languages are spoken, each with variations; English is used in the schools and is the official language.

Law and order is maintained by the armed, uniformed and trained 'Insular Constabulary' in each district; the local district community court judges, sheriffs and deputy sheriffs are all Micronesians. Local customs are respected in law and practice. Forty-three of the 102 municipalities have been chartered. Elected councils function in all districts. Membership in some of these includes hereditary leaders as well as elected representatives, although the trend is towards all-elective bodies. The Council of Micronesia, an elected advisory council to the High Commissioner, meets annually. In 1962 a Territorial Legislative Committee was established.

*High Commissioner:* M. W. Goding.

Living standards are being improved through the introduction of higher standards of subsistence and exportable agricultural and marine products.

Fourteen co-operative societies and 22 credit unions have been chartered. Copra leads in exports, with fish second. Cacao, black pepper and ramie are being developed. In 1962–63 imports totalled $5,029,208; exports, 2,161,473.

In 1963 there were 172 public elementary schools (13,596 pupils), 7 public junior high schools (1,323 pupils), 6 public high schools (300 pupils), 23 mission elementary schools (4,083 pupils), 12 mission junior high schools (1,316 pupils) and 4 mission high schools (195 pupils); total, 224 schools (20,813 pupils). In 1963 there were 410 students attending institutions of higher education abroad.

The public health system, which includes 9 hospitals and 108 field dispensaries, is carried on by a staff consisting chiefly of trained Micronesian medical and dental officers and assistants under senior US medical officers. There is a school of nursing in the Mariana Islands and a school of dental nursing in the Marshall Islands.

# PACIFIC ISLANDS UNDER U.S. CONTROL

*Administration.* Under Article III of the Japanese peace treaty (effective 28 April 1952) the United States has 'the right to exercise all and any powers of administration, legislation and jurisdiction' over the Ryukyu Islands (south of 29° N. lat.) including the Daito Islands, the Bonin Islands and Marcus Island, Rosario Island, the Volcano Islands and the island of Parece Vela. Residual sovereignty rests with Japan, which will concur in any proposal of the USA to the United Nations to place these territories under its trusteeship system with the US as the sole administering authority. Up to April 1964 the US has made no such proposal.

In 1953 the Amami–Oshima group (the northernmost group of the Ryukus) was returned to Japan.

The **Ryukyu Islands** extend some 500 miles south-west of Japan between Kyushu and Formosa. The islands total 848 sq. miles with an estimated population (Dec. 1963) of 908,000. The repatriation of about 140,000 persons from Japan and elsewhere raised the population from 590,027 in 1944 to 698,827 in 1950.

Responsibility for administration has, by Executive Order, been assigned to the Secretary of Defense and delegated to the Department of the Army. Powers are exercised by a civil administration, headed by a high commissioner who is an active-duty member of the US armed forces; his senior assistant is a civilian. The local government includes a 29-member unicameral legislature, elected for a 3-year term; a chief executive, appointed by the high commissioner on nomination by the legislature; and a system of both lower and appellate courts. Acts of the legislature are subject to the veto of either the chief executive or high commissioner; the latter rarely exercises this function. The strength of the parties in the legislature after the elections of 13 Nov. 1960 was: Liberal Democratic Party, 18; Socialist Masses Party, 7; Okinawa Peoples Party, 1; Independent, 2; Okinawa Socialist Party, 1.

The largest and most important island is Okinawa (area, 454 sq. miles); population (1960), 759,000. Naha City, the capital and headquarters of civil administration and local government, has a population of 250,832; other large towns are Koza (46,695), Nago (18,288) and Itoman (33,580).

*High Commissioner:* Lieut.-Gen. Paul W. Caraway.
*Civil Administrator:* Gerald Warner.
*Chief Executive:* Seisaku Ota.

In 1961–62 the Ryukyu Islands had 265 primary schools, including 28 kindergartens (169,933 pupils), 185 secondary schools (77,313), 9 technical schools (7,916), 5 teacher-training and other special schools, and 2 universities (3,890).

The economy of the islands is affected favourably by the presence of the US forces. About 13% of the local labour force is employed by the US forces, their contractors and American personnel. In 1961 only 45% of the population were engaged in agriculture, compared with about 74% before the Second World War. Chief crops are sugar-cane, sweet potatoes, rice, pineapples, fresh vegetables and soybeans. Fishing is increasing in importance, the catch for 1961 was estimated at 15,300 metric tons. The major industry is food-processing. Exports in 1962 totalled $43·5m.; imports totalled $60·9m. There are about 13,700 civilian telephones. The currency consists of US dollars.

The **Daito Islands** (area 1·8 sq. miles; population, 1950, 2,691) form the easternmost group of the Ryukyus, about 200 miles east of Okinawa.

The **Bonin Islands** (Ogasawara Gunto) (27° 45′ N. lat., 140° E. long.) lie about 800 miles east of the Ryukus and comprise 27 islands, in 3 main groups—Bailey Islands, Beechey Islands and Parry Islands. The largest, Chichi Jima, is the site of a US naval base. Land area, 40 sq. miles (104 sq. km): population (1960), 213. **Marcus Island** (Minami Tori Shima) (26° 32′ N. lat., 142° 10′ E. long.) is a volcanic island with an area of 1 sq. mile. **Rosario Island** (Nishino Shima) (27° 15′ N. lat., 140° 53′ E. long.) lies to the west of the Bonins.

The **Volcano Islands** (Kazan Retto) (24° 47′ N. lat., 141° 20′ E. long.) comprise 3 islands of 11 sq. miles (28 sq. km), including Iwo Jima, on which there is a US air base. The island of Parece Vela (20° 24′ N. lat., 136° 02′ E. long.) lies some 400 miles south-west of Iwo Jima.

The Bonin and Volcano Islands and Marcus Island are administered by the US Navy. The Commander-in-Chief, US Pacific Fleet, with headquarters at Pearl Harbor, Hawaii, is the military governor; his deputy is the Commander, Naval Forces, Marianas, with headquarters on Guam.

# AFGHÁNISTÁN

Doulat i Pádsháhí ye Afghánistán

**REIGNING KING. Mohammed Záhir Sháh,** born at Kábul in 1914; married on 7 Nov. 1931 to his cousin, Umairah, daughter of Sirdar Ahmed Sháh Khán; succeeded his father, Mohammed Nádir Sháh, who was assassinated on 8 Nov. 1933. Surviving offspring, 5 sons and 2 daughters. The heir apparent is Prince Ahmad Sháh (born 1934).

**GOVERNMENT.** The Government of Afghánistán is a constitutional monarchy, in which the supreme legislative power is vested in the Parliament consisting of the King, a Senate and a National Assembly. The Senate consists of 50 members, who are nominated for life by the King. The National Assembly consists of 171 elected members. It is in session between May and Oct., and may be summoned at any time.

There is also a Grand Assembly (*Loe Jirgeh*), which is summoned at irregular intervals to consider major questions of policy referred to it by the King. The last meetings were in 1941 and 1955. In 1963 a commission was set up to draft a new constitution, the findings of which will be submitted to a meeting of the *Loe Jirgeh* for ratification.

There are ministries of Defence, Foreign Affairs, Internal Affairs, Education, Commerce, Justice, Public Works, Finance, Health, Mines and Industries, Communications, Agriculture, Planning, and Press and Information, each in charge of a minister; and the department of Tribal Affairs under a president. Ministers and the president are all members of the cabinet.

The country is divided into 7 major provinces of Kábul, Mazár, Kandahár, Herát, Kataghan, Nangrahar (formerly Eastern Province) and Paktya (formerly Southern Province), and 11 minor provinces, Badakhshán, Faráh, Ghazni, Parwan, Girishk, Maimana, Shibarghan, Ghorat, Taleqan, Bamian, and Uruzgan. Each province is under a governor (called in major provinces *Naib-ul-Hukumeh* and in minor provinces *Hákem-i-'Ala*).

*National flag:* Black, red, green (vertical); with a white device in the centre.

**AREA AND POPULATION.** Afghánistán is situated between parallels 29° and 38° 35′ N. lat., and 60° 50′ and 71° 50′ E. long., with a long narrow strip extending to 75° E. long. (Wákhán). For the boundaries, *see* The Statesman's Year-Book, 1925, pp. 654–55. A new boundary agreement with the Soviet Union was signed in Moscow in June 1946; a joint commission completed the demarcation in Sept. 1948. A border treaty with China was signed in 1963; demarcation of the frontier is scheduled for 1964.

The area is 250,000 sq. miles (657,500 sq. km). Population, according to the latest Afghan estimate, is 13·8m., of which some 2·5m. are nomadic tribes. This estimate would mean a population density equal to that of USA and twice as large as that of Iran. More cautious estimates arrive at 7–8m.

The official languages are Persian and Pushtu.

Estimates of population of municipalities (and, in brackets, of provinces) in 1962 were as follows: Kábul, 224,000 (1·61m.); Kandahár, 115,000 (1m.); Herát, 62,000 (980,000); Mazár-i-Sharif, 40,000 (490,000); Jalálábád, 44,000 (Nangrahar, 1·28m.); Gardez, 46,000 (Paktya, 78,000).

**RELIGION.** The predominant religion is Islam, mostly of the Sunni sects though there is a minority of about 1m. Shiah Moslems.

**EDUCATION.** The number of elementary schools is rapidly increasing, but secondary schools exist only in Kábul and provincial capitals. Both elementary and secondary education are free. There are 2 training schools for teachers in Kábul. Technical, art, commercial and medical schools exist for higher education. The Kábul University was founded in 1932 and has 9 faculties (medicine, science, agriculture, engineering, law and political science, letters, economics, theology, pharmacology).

In 1963 the Prime Minister stated that illiteracy was over 90%.

*Cinemas.* There are about 20 cinemas in the country.

**JUSTICE.** The law is partly based on the *Shariat* or Islamic law. Lower courts (*Mahákima-i-Ibtidáia*) are established in each district, and higher courts (*Makákima-i-Muráfaah*) in each provincial capital. A high court (*Mahkama-i 'Ali Tamiz*) is attached to the Ministry of Justice, and the supreme court (*Ryasat-i-Tamiz-i-'Ayan*) to the Senate. A special procedure is provided for the impeachment of Ministers.

Revision of the judicial system is taking place concurrently with the revision of the constitution.

**FINANCE.** The budget for the year ending 21 March 1964 provided for 4,888m. afghánis revenue and 5,033m. afghánis expenditure. The main items of revenue are indirect taxes (1,649m.), government monopolies (740m.) and direct taxes (423m.). The expenditure is divided into ordinary (3,012m.) and development (2,021m.); 1,498m. of the latter is to be supplied by foreign loans and grants.

**DEFENCE.** The Army is recruited by annual calls to the colours for a 2-year period (1 year for officers). Conscription is compulsory for a percentage of the male population, chosen by local arrangement, from 22 to 42 years of age, including service in the reserve. Officers are recruited for long-term service, and some are conscripted; a reserve of officers is maintained.

The peace strength of the Army is about 80,000–90,000. It is organized in 4 army corps (Kábul, Kandahár, Jalálábád, Gardez) and 6 other divisions, located in the provinces, all now being reorganized after the receipt of Russian arms and equipment. In addition, there is the Royal Bodyguard of brigade strength. In the event of war, besides the reserve, it is capable of support by a considerable number of warlike tribesmen armed with rifles. The army is largely mechanized.

A military academy for the training of cadets was opened in Kábul in 1932. There is a military college where about 2,800 students are prepared for the Military Academy and the police. Some officers receive technical training abroad, hitherto mainly in Turkey, but now in USA and chiefly in the USSR. A new military training school (infantry, artillery) was opened in 1957.

The Air Force is being modernized. Equipment includes about 100 Soviet-built MiG-17 jet-fighters, a few Il-28 jet-bombers and helicopters. Headquarters is at Kábul; one fighter base is at Mazár-i-Sharif; a new base, completed in 1960, at Bagram, has facilities for the largest jet airliners and bombers. A Russian-built air-base at Shindand was completed in 1963. An air academy, opened in 1958, is training about 400 cadets.

The gendarmerie, about 21,000 strong, is administered by the Ministry of Internal Affairs.

**PRODUCTION.** A 5-year plan, providing for expenditure on communications, agriculture, mines and industries, education and health, was announced in 1956, and a Ministry of Planning was formed. The second 5-year plan was launched in March 1962.

*Agriculture.* Although the greater part of Afghánistán is more or less mountainous and a good deal of the country is too dry and rocky for successful cultivation, there are many fertile plains and valleys, which, with the assistance of irrigation from small rivers or wells, yield very satisfactory crops of fruit, vegetables and cereals. It is estimated that there are 14m. hectares of cultivable land in the country, of which 7·8m. hectares are being cultivated (5·31m. hectares of this being irrigated land). Afghánistán is virtually self-supporting in foodstuffs. The castor-oil plant, madder and the asafœtida plant abound. Fruit forms a staple food (with bread) of many people throughout the year, both in the fresh and preserved state, and in the latter condition is exported in great quantities. The fat-tailed sheep furnish the principal meat diet, and the grease of the tail is a substitute for butter. The wool (annual production, about 10,000 tons, of which about 7,000 tons are exported) and skins provide material for warm apparel and one of the more important articles of export. Persian lamb-skins (Karákulis) are one of the chief exports.

Cotton production, 1960–61, was estimated at 54,000 tons, of which about 11,000 were exported, mainly to the USSR.

*Mining.* Most of the mineral resources of the country are undeveloped. Northern Afghánistán is reputed to be tolerably rich in copper, and lead and iron are found in many parts. Coal of poor quality is found in the Ghorband valley and near the Lataband, but rich seams of coal exist on the northern slopes of the Hindu Kush; production of coal in 1960–61 was 68,000 tons. Crude petroleum has been discovered near Herát and in northern Afghánistán; Russian and Rumanian technicians are helping to exploit the oil reserves. Unexploited silver mines exist in Panjshír valley. Iron is smelted in small quantities in Kataghan. Gold is obtained from Kandahár and also from several rivers in the north. Badakhshán is said to be the only area in the world to produce first-quality lapis lazuli. Raw asbestos has been discovered in Jidrán district and a mica mine in the Panjshír valley. Sulphur deposits have been found in the province of Maimana and chrome ore in the Logar valley and the neighbourhood of Herát. There are reservoirs of natural gas in the north, for the exploitation of which an agreement was signed with the USSR in Oct. 1963.

*Industry.* At Kábul there are factories for the manufacture of matches, buttons, leather, boots, marble-ware, furniture, glass, bicycles and plastics. A large machine shop has been constructed and equipped by the Russians, with a capability of manufacturing motor spares. There is a wool factory at Kandahár and another at Kábul, cotton ginning plants at Qunduz and Lashkargah, a small cotton factory at Jabal-us-Seráj and a larger one at Pul-i-Khumri, for which machinery was originally supplied by a British firm, but this is now being replaced by German machinery. Germans have also built and equipped a large modern textile factory at Gulbahar.

An ordnance factory manufactures arms and ammunition, boots and clothing, etc., for the Army. This also includes a mint. There is a beet-sugar plant at Baghlan and a fruit-canning factory in Kandahár. A hydro-electric plant has been constructed at Sarobi on the Kábul River, and another, at Naghlu, is due to come into operation in 1967. Large cement factories have been built at Jabal us-Seráj and Pul-i-Khumri.

Industrial and commercial projects are financed by the Afghan National Bank and its subsidiary companies. In 1951 an Industrial Department, closely linked with the Afghan National Bank, was set up to secure from abroad the equipment and machinery required for various industrial development schemes. Under a redistribution of monopolies, early in 1951, a new government department, the Riyásat-i-Inhisárát-i-Daulati (Government Monopoly Department) was set up and granted the monopoly for the import of all motor vehicles (though in fact certain makes are represented by other agents), the import and export of petrol and the import and sale of sugar (formerly the monopoly of the Sugar and Petrol Company). Sugar production within the country, however, remains the concern of the Shirkat-i-Qandsázi. Important monopolies unaffected by the redistribution are the Shirkat-i-Umúmi-Barq (generation of electricity and import of electrical goods), Shirkat-i-Ittahádia Shimáli (joint-stock company of the north engaged in trade in wool, skins, fruit and miscellaneous goods), Shirkat-i-Watan (Kandahár company dealing in miscellaneous goods, especially wool), the Shirkat-i-Hajjári-wa-Najjári (stone cutting and carpentry monopoly), the Shirkat-i-Nassáji (Textile Company) and the Afghan Raw Cotton Company.

The American Export-Import Bank has granted a $39m. credit for irrigation and agricultural development projects in the Helmand valley area.

A United Nations technical aid mission has, since April 1950, been assisting the Government in technical projects and particularly in its fight against malaria, rinderpest and venereal diseases, in survey and mapping work and in rural development projects.

Aid in long-term credits and grants to Afghánistán from the Soviet Union has now reached a total of some $400m., that from the USA $230m. and that from West Germany DM 200m. (as a credit not all of which has yet been taken up).

**COMMERCE.** Trade is supervised by the Government through the Ministry of Commerce and the Da Afghánistán Bánk. 80% of the trade used to go through Pakistan, but since the Afghan–Soviet 5-year transit agreement of 28 June 1955, 50% or more of Afghan trade is now going through the Soviet Union. In 1962 a transit agreement was also concluded with Iran. Of the imports from India and Pakistan the chief items are cotton goods, sugar, hardware, live animals, leather goods, tea, paper and cement. The exports to India and Pakistan include spices, fruits, karakul skins, carpets, cotton and raw wool.

A commercial treaty with the USSR includes a barter agreement which is revised annually. Principal imports from the USSR are petrol, cement and cloth, while Afghan exports are mainly wool, cotton and fruit. Similar treaties exist with China and other communist countries.

In the year ended 21 March 1961, imports (c.i.f.) totalled 4,459m. afghánis; exports (f.o.b.), 2,402m. Of the exports, 751m. went to USSR, 452m. to USA, 391m. to UK, 251m. to West Germany and 231m. to India. The main importing countries were USSR (2,367m.), USA (851m.), India (354m.), Japan (225m.), West Germany (162m.), Czechoslovakia (151m.) and Pakistan (101m.).

Main export commodities were karakul skins (686m.), dried fruit and nuts (393m.), carpets (387m.), raw cotton (374m.) and wool (274m.). Main items imported were petroleum products (332m.), cotton fabrics (228m.), sugar (224m.) and wheat (189m.).

Total trade between Afghánistán and UK (in £ sterling, British Board of Trade returns):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK | 2,493,846 | 3,681,486 | 3,701,410 | 4,205,485 | 5,019,333 |
| Exports from UK | 481,229 | 640,587 | 450,128 | 775,228 | 760,378 |
| Re-exports from UK | 13,672 | 13,824 | 2,690 | 13,431 | 5,957 |

**COMMUNICATIONS.** *Roads.* Access to Afghánistán from Pakistan is mainly through passes in the mountains at the north and south, where peaks rise to a height of over 20,000 ft. On the north-west frontier of Pakistan the best-known pass is the Khyber Pass, connecting Kábul with Peshawar, an important Pakistan railhead; the Kojak–Bolan–Sibi series of passes from Kandahár to the south, and the Gomal, Tochi and Kurram passes from Ghazni.

The road network is constantly being improved. The Americans have asphalted the Kandahár–Chaman road, are asphalting the 200-mile-long road between Kábul and Torkham and the Pakistan frontier, and the Kábul–Kandahár road; they are also surveying the road from Herát to the Iranian frontier. The Russians have agreed to asphalt the road from their frontier at Kushk through Herát to Kandahár and are building the Salang tunnel road through the Hindu Kush, which will shorten the old northern route by 120 miles and is to be completed in Aug. 1964. All provincial capitals are connected with Kábul by motor roads. But merchandise is still transported to a great extent on camel or pony back. Motor vehicles, registered in 1961, included 7,744 lorries, 1,048 buses and over 5,000 passenger cars.

*Railways.* There are no railways in the country but, under the terms of the Tehran agreement of 1963, Pakistani railways may be extended into Afghánistán at Torkham and/or Chaman.

*Shipping.* There are practically no navigable rivers in Afghánistán, and timber is the only article of commerce conveyed by water, floated down the Kunar and Kábul rivers from Chitral on rafts. A port has been built at Qizil Qala on the Oxus; barge traffic is increasing on the Oxus.

*Post.* Telephones, installed in most of the large towns, numbered 6,000 in 1962. There is telegraphic communication between all the larger towns and between Kábul and Kandahár and Peshawar and Chaman. A wireless installation connects Kábul with Europe, Bombay, the Far East, America and other parts of the world. Kábul Radio broadcasts in Pushtu, Persian, Urdu, English, French, Russian, German and Arabic. The telecommunication system is being expanded slowly, mainly with German assistance.

*Aviation.* On 29 June 1956 Afghánistán signed an agreement with the USA for the provision of up to $14·56m. for the development of civil aviation, including the construction of the international airport at Kandahár. Of the total amount, $5m. would be a loan and $9·56m. on grant. Kábul airport has been expanded with Russian assistance. New runways at Kábul and Kandahár airports have been completed. Provincial all-weather airports have been constructed at Herát, Qunduz, Jalálábád and Mazar.

**CURRENCY AND BANKING.** The monetary system is on the silver standard. The unit is an *afgháni*, weighing 10 grammes of silver 0·900 fine, which is subdivided into 100 *puls*. The currency consists of: (*a*) Afgháni rupee (silver); (*b*) krán ($\frac{1}{2}$ rupee) (silver); (*c*) pul ($\frac{1}{100}$ rupee) (copper and nickel); (*d*) 2 puls ($\frac{1}{50}$ rupee) (copper and nickel); (*e*) 5 puls ($\frac{1}{20}$ rupee) (copper and nickel); (*f*) 10 puls ($\frac{1}{10}$ rupee) (copper and nickel); (*g*) 20 puls ($\frac{1}{5}$ rupee) (copper); (*h*) 25 puls ($\frac{1}{4}$ rupee) (copper). Coins of 25 puls ($\frac{1}{4}$

afgháni), 50 puls (½ afgháni), 1, 2 and 5 afghánis and currency notes of 10, 20, 50, 100, 500 and 1,000 afghánis are in circulation, amounting to 2,136m. afghánis in 1961.

Official rates of exchange, except for certain Government transactions, are £1 = 95 afghánis; $1 = 28 afghánis. But these have little significance today, and the free rates prevailing in Nov. 1963 were £1 = 135–140 afghánis, $1 = 47–50 afghánis, both fluctuating.

The Afghan State Bank (*Da Afghánistán Bánk*) has supplanted the *Bánk-i-Melli Afghán* as the leading bank in the country: it holds the exclusive right of note issue (the first notes were issued in Nov. 1955). Total assets of the leading banks at the end of the 1958–59 financial year: Da Afghánistán Bánk, 5,113·8m. afghánis; Bánk-i-Melli, 940·9m. afghánis; Pashtani Tejarati Bánk, 347·3m. afghánis; Construction Bank, 107·2m. afghánis; Industrial Credit Fund, 119·2m. afghánis; Agricultural Bank, 99·4m. afghánis.

**WEIGHTS AND MEASURES.** Weights and measures used in Kábul are: Weights: 1 *khurd* = ¼ lb.; 1 *pao* = 1 lb.; 1 *charak* = 4 lb.; 1 *seer* = 16 lb.; 1 *kharwár* = 1,280 lb. or 16 maunds of 80 lb. each. Long measure: 1 yd or *gaz* = 40 in. The metric system is in common use by the bigger cloth merchants in Kábul. Square measures: 1 *jarib* = 60 × 60 kábuli yd or ½ acre; 1 *kulbá* = 40 jaríbs (area in which 2½ kharwárs of seed can be sown); 1 jaríb yd = 29 in.

Local weights and measures are in use at Kandahár, Herát and Jalálábád.

# ALBANIA

## Republíka Popullóre e Shqipërísë

**HISTORY.** After the death of George Kastriota—popularly known as Skanderbeg—in 1467 Albania passed under nominal or actual Turkish suzerainty until 1912. The independence of Albania was proclaimed at Vlónë (Valona) on 28 Nov. 1912, and the London conference of ambassadors, decided upon its frontiers and nominated as its ruler Prince William of Wied, who arrived at Dúrrës (Durazzo) on 7 March 1914 but on 3 Sept. 1914 left the country which fell into a state of anarchy. By the secret Pact of London of 26 April 1915 provision was made for the partition of Albania; but this arrangement was repudiated by Italy on 3 June 1917, when the Italian C.-in-C. in Albania proclaimed at Gjirokástër (Argyrocastro) the independence of Albania. In Jan. 1925 the country was proclaimed a republic and on 1 Sept. 1928 a monarchy. Ahmed Beg Zogu, President of the Republic since 31 Jan. 1925, reigned as King Zog till April 1939, when, on the occupation of the country by the Italians, he fled to England. After the liberation he was formally deposed *in absentia*, on 2 Jan. 1946. During the years 1939–44 the country was overrun by Italian and German military forces. The official Albanian date of the liberation is 29 Nov. 1944.

On 10 Nov. 1945 the British, US and USSR Governments recognized the Provisional Government under Gen. Enver Hoxha, on the understanding that it would hold free elections. The elections of 2 Dec. 1945 resulted in a Communist-controlled assembly, which on 11 Jan. 1946 proclaimed Albania a republic.

In 1946 Great Britain and the USA broke off relations with Albania and vetoed its admission to the United Nations. Albania was finally admitted on 15 Dec. 1955, the USA abstaining from voting.

**CONSTITUTION AND GOVERNMENT.** Albania is ruled by the Communist 'Albanian Labour Party', founded 8 Nov. 1941. The Party had 53,659 members in Feb. 1961. The supreme governing body, of both the Party and the State, is the Politburo; it consists of 11 full members and 4 candidate members.

During the 22nd Congress of the Communist Party of the USSR in Moscow (17–31 Oct. 1961) the Albanian regime was openly attacked for adhering to the Stalinist ideology; only the Chinese Premier Chou En-lai defended Albania. Diplomatic relations with the USSR were broken off in Dec. 1961.

*Titular Head of State: Chairman of the Presidium of the People's Assembly:* Maj.-Gen. Haxhi Lleshi, former Chairman of the Control Committee of the Labour Party; elected July 1953.

In March 1964 the chief Party and Government posts were filled as follows:

*First Secretary of the Central Committee of the Party:* Army-Gen. Enver Hoxha. *Chairman of the Council of Ministers:* Col.-Gen. Mehmet Shehu. *First Deputy-Chairmen of the Council of Ministers:* Col.-Gen. Beqir Balluku (Minister of Defence), Spiro Kolcka and Manush Myftiu (Minister of Culture and Education). *Secretaries of the Central Committee:* Hysni Kapo, Mrs Rita Marko, Ramiz Alija, Haki Toska. Lieut.-Gen. Kadri Hazbiu (Minister of the Interior and Security) and Koço Theodhosi (Deputy-Chairman, Council of Ministers, and Chairman, State Planning Commission) are candidate members of the Politburo; the Foreign Minister, Behar Shtylla, is not in the Politburo.

The constitution of March 1946, amended in July 1950, provides for a single chamber elected for 4 years, and extends the franchise to all men and women over 18 years of age, excepting those who collaborated with the Italians or Germans.

On 3 June 1962 elections took place for the People's Assembly; 208 deputies, one for every 8,000 inhabitants, were elected on the single list of the Albanian Democratic Front.

*National flag:* Red, with a black double-headed eagle and a red, gold-edged 5-pointed star above it. *Mercantile flag:* red, black, red (horizontal).

*National anthem:* Rreth Flamúrit te per bashkuar (The flag that united us in the struggle).

**AREA AND POPULATION.** The area of the country is 28,738 sq. km (11,097 sq. miles). By the peace treaty Italy restored the island of Sazan (Saseno) to Albania. The population (census of 2 Oct. 1960) was 1,625,000 (51·3% males, 48·7% females); density, 56 per sq. km. Estimate, 30 June 1961, 1,665,000. The capital is Tirana (estimated population 136,000). Other large towns are Shkódër (43,000), Vlónë (41,000), Dúrrës (40,000), Kórçë (39,000) and Elbasan (30,000).

The natural increase of the population was 31·9 per 1,000 in 1961, the biggest in Europe.

The country was administratively re-divided in 1949, 1953, 1956 and 1958. It now comprises 27 districts (*rreth*, pl. *rráthe* or *rráthët*), one of them being the capital. The districts are subdivided into 'localitets'. For economic purposes the country is divided into 5 economic regions (*see* map in The Statesman's Year-Book, 1962).

| Regions and districts | Area (sq. km) | Population (1958) |
|---|---|---|

| 26. Pogradéc | | |

The districts are for the greater part named after their capitals; exceptions: 5, chief town, Bajram Curri; 10, Burrel; 11, Rrëshen; 18, Çorovodë.

The Albanians are divided into two principal language groups—the Ghegs, north of the river Shkumbin, and the Tosks in the south. Many places therefore have two names: Vlónë (Gheg), Vlórë (Tosk), etc.

**RELIGION.** There is no state religion. The population is distributed according to the following estimates: Moslems, 688,280; Orthodox Christians (the Orthodox Church of Albania), 212,233; Roman Catholics, 104,184. The Gheg Christians in the north are for the most part Roman Catholics, formerly under 2 archbishops, 3 bishops and 1 mitred abbot; there is now only one vicar capitular, the administrator of the Púlati diocese. In Aug. 1951 a new status for the Albanian Catholic Church was introduced, severing all relations with the Vatican. Any relations with religious or cultural bodies outside Albania have to be conducted through government channels.

The Tosk Christians in the south are members of the Albanian Autocephalous Orthodox Church, under the rule of the Holy Synod (constituted 18 Feb. 1929) with a primate and 3 bishops; it was recognized as autocephalous by the Oecumenical Patriarchate on 17 March 1937. Head of the Church (elected Aug. 1949) is Païssi, Metropolitan of Tirana and Dúrrës, Archbishop of All Albania.

The Moslems are organized in 4 zones (Tirana, Shkódër, Kórçë, Gjirokástër), each under a grand mufti, with a supreme head (Hafëz Suljeman Myrto, from 1955).

Albania is also the seat of the head of the independent Islamic Bektashi sect under the 'World Grandfather'.

**EDUCATION.** Primary education is nominally compulsory for children between the ages of 6 and 13. There were, in 1956, 303 infant schools; 2,095 primary schools with 185,000 pupils; 25 secondary schools with 2,762 pupils. Secondary technical education is provided in 13 technical high schools. Higher educational institutions are: a university in Tirana (opened 16 Sept. 1957), a polytechnic, an agricultural college, a medical school, a teachers' training college (in Shkódër), and an institute of science.

The higher institutions had, in 1959–60, a total of 3,890 students (18% women); another 700 students were being educated in the USSR and other communist countries. In Dec. 1960 a total of over 275,000 pupils and students at all levels was claimed.

*Cinemas* (1958). There were 160 cinemas.

**JUSTICE** is administered by People's Courts. On 1 Sept. 1952 a new Penal Code became effective, modelled on the Soviet law, but with more severe penalties. All persons who have reached the age of 14 are fully penally responsible. For crimes against the state, for sabotage of state property and for economic sabotage, even 12-year-old children are fully responsible. Clause 83 extends the crimes against the state also to offences against the Soviet Union.

**FINANCE.** Budget estimates for 1964: Revenue 29,850m. leks; expenditure, 29,650m. leks, of which 57·7% is earmarked for national economy, 26·5% for social and cultural services, 9·5% for national defence and 6·3% for administration. 1963 revenue, 29,300m. leks; expenditure, 29,100m. leks.

Financial aid by the USSR up to 1960 is estimated to have been about 1,000m. old roubles. China, in 1959 and 1961, granted about 555m. old roubles for the purchase of industrial equipment. The revenue estimates for 1961 had to be scaled down by about 25% as 'some credits from abroad failed to materialize'.

**DEFENCE.** The Albanian Army, in 1962, numbered 25,000 in 3 divisions, each with a tank battalion of 40 tanks. Security police ('SSSh') had a strength of 10,000, divided into 4 security battalions, and 5 battalions of frontier-guards.

The Navy consists of 2 fleet minesweepers, 4 submarine chasers, 6 inshore minesweepers, 14 motor torpedo-boats, 2 coastal minelayers, 3 minesweeping boats, 3 submarines, a submarine support ship, a degaussing ship, an oiler and 16 district patrol craft.

The Air Force, controlled by the Army, is equipped with 2 squadrons of MiG-15 and MiG-17 jet-fighters and various Russian-built transports, trainers and helicopters.

There is compulsory military service for men from 19 to 35 years of age: 2 years in the Army, and 3 years in the Air Force, Navy and the motorized, armoured and frontier units. Service in the second reserve extends from 35 to 55 years of age. The officers' training school was renamed 'Mehmet Shehu Military Academy' on 24 Jan. 1963, in defiance of the Russian campaign against Stalin's 'cult of personality'.

Albania was excluded from the meeting of the Warsaw pact countries held n Prague in Jan. 1962.

**PRODUCTION.** *Planning.* Albania's first 5-year plan (1951–55) envisaged by 1955 total investments of 21,000m. leks. The actual investments were about 17,200m. leks.

The second 5-year plan (1956–60) envisaged investments of 21,900m. leks. The 1958 investments were planned at 9,700m. leks, but reached only 8,536m.; the 1959 plan envisaged 13,600m. leks.

The third 5-year plan (1961–65) is to raise the value of industrial output to 53·4% of Albania's total production.

Yugoslav and Soviet experts have been replaced by Chinese.

*Agriculture.* In 1941 about 90% of the population were engaged in agriculture, 25% exclusively in crop production and 65% in animal husbandry. Before the Second World War only 6% of the total area of 2·7m. hectares was under cultivation of field crops, another 6% of unspecified crops, trees and bushes, about 30% consisted of meadows and permanent pastures, while about 60% was forests, swamps and waste. In 1955 the arable land comprised 376,000 hectares; in 1959, 470,000 hectares.

In Feb. 1962, 85% of the cultivated land and 75% of peasant farms were socialized. Tractors (Nov. 1960) were grouped in 25 stations and numbered 4,280 (in 15-h.p. units).

The country for the greater part is rugged, wild and mountainous, the exceptions being along the Adriatic littoral and the Kórçë (Koritsa) Basin, which are fertile. The average yearly yield of the main crops (in 1,000 metric tons) are maize, 164 (1963: 12·3); wheat, 113; sugar beet, 77; cotton, 11·4; rice, 7·2; tobacco, 6·1 (1963: 9·3). The wool (annual production, greasy, averages 2,200 tons) is made up into coarse and heavy cloth.

Livestock, 1958: Horses, 49,000; mules and asses, 69,000; 1960: cattle, 427,000; sheep, 1,549,000; goats, 1,104,000; pigs, 130,000; poultry, 1·5m.

*Forestry.* There are vast tracts of forest land composed of oak, walnut and chestnut trees, as well as beeches, pines and firs. Between 1945 and 1960, 18,000 hectares are said to have been afforested, and 60,000 hectares of denuded forest to have been improved.

*Fisheries.* The catch in 1957 was 2,737 metric tons.

*Mining.* The mineral wealth of Albania is considerable but undeveloped. The copper-mines in the Pukë district are being exploited. The salt-pits at Vlónë are said to be of commercial importance, and Selenicë bitumen-mines are also worked successfully.

*Industry.* The principal industries are those connected with agriculture, such as flour-milling, olive-pressing and cheese-making. There are 2 cement factories, one in Shkódër, and a brewery in Kórçë. An engineering plant in Stalin was completed in July 1963. Iron ore from the Pishkash iron–nickel mine is being exploited by Czechoslovakia. In July 1963 work started, with Chinese assistance, on a fertilizer plant in Lezhë, a cement plant in Krujë and a paper-mill in Lushnjë. A copper-smelting plant is being built in Kukës. Industrial workers (Nov. 1960), 140,000.

*Oil.* Oil is produced chiefly at Kuçovë near Berat. The refinery capacity is over 300,000 metric tons annually after the completion of the Çerrik refinery ('Stalin oil combine'). A pipeline connects Kuçovë with the port of Vlónë.

*Power.* There are 4 hydro-electric power plants, at Selitë, on Mount Daita near Tirana, the Karl-Marx plant on the Mati River (with a capacity of 25,000 kw.) and the Friedrich Engels plant at Shkopeti. Electric power production in 1960 was 194m. kwh.

# ALGERIA

## République Algérienne Démocratique et Populaire

**LIBERATION.** On 1 Nov. 1954 the National Liberation Front (FLN), founded on 5 Aug. 1951, went over to open warfare against the French administration and armed forces. In Sept. 1958 a free Algerian government was formed in Cairo with Ferhat Abbas as provisional president.

A referendum was held in Metropolitan France and Algeria on 6–8 Jan. 1961 to decide on Algerian self-determination as proposed by President de Gaulle. His proposals were approved by 15,200,073 against 4,996,474 votes in Metropolitan France, and by 1,749,969 against 767,546 votes in Algeria. In Metropolitan France 20·2m. out of 27·2m. registered voters went to the polls; in Algeria 2·5m. out of 4·5m. registered voters.

Long delayed by the terrorism, in Metropolitan France as well as Algeria, of a secret organization (OAS) led by anti-Gaullist officers, a cease-fire agreement was concluded between the French Government and the representatives of the Algerian Nationalists on 18 March 1962; but OAS terror acts continued for some months. On 7 April a provisional executive of 12 members was set up, under the chairmanship of Abderrhaman Farès.

On 8 April 1962 a referendum in Metropolitan France approved the Algerian settlement with 17,505,473 (90·7%) against 1,794,553 (9·3%) and 1,102,477 invalid votes; 6,580,772 voters abstained. On 1 July 1962, 5,975,581 Algerians voted in favour of, 16,534 against the settlement.

On 25 Sept. the National Assembly met and elected Ferhat Abbas President of the Republic and Ben Bella Prime Minister.

**PRODUCTION.** There exists a small area of highly fertile plains and valleys near the coast, mainly owned by self-management committees and some Europeans, which is cultivated scientifically, and where profitable returns are obtained from vineyards, cereals, etc., but the greater part of Algeria is of limited value for agricultural purposes. In the northern portion the mountains are generally better adapted to grazing and forestry than agriculture, and a large portion of the native population is quite poor. In spite of the many excellent roads built by the Government, a considerable area of the mountainous region is without adequate means of communication and is accessible only with difficulty.

*Agriculture.* The soil is, under various systems, held by proprietors, by farmers and by *métayers* or *khammés.* The area under cultivation is about 6·7m. hectares. The chief crops in 1960 were wheat (15·1m. quintals), barley (8·4m. quintals) and oats (490,000 quintals); maize, potatoes, artichokes, beans, peas and tomatoes. Timber is cut for firewood, also for industrial purposes, for railway sleepers, telegraph poles, etc., and for bark for tanning. Considerable portions of the forest area are also leased for tillage, or for pasturage for cattle and sheep.

# ANDORRA

## LES VALLÉES D'ANDORRE—VALLS D'ANDORRA

THE co-principality of Andorra is situated in the eastern Pyrenees. The country consists of gorges, narrow valleys and defiles, surrounded by high mountain peaks varying between 880 and 1,800 metres. Its maximum length is 30 km and its width 20 km; it has an area of 465 sq. km (190 sq.

miles) and a population of about 5,000, scattered in 6 villages. Catalan is the language spoken.

The political status of Andorra was regulated by the *Paréage* of 1278 which placed Andorra under the joint suzerainty of the Comte de Foix and of the Bishop of Urgel. The rights vested in the house of Foix passed by marriage to that of Béarn and, on the accession of Henri IV, to the French crown. The sovereignty is exercised jointly by the President of the French Republic and the Bishop of Urgel. The co-princes are represented in Andorra by the 'Viguier de France' and the 'Viguier Episcopal'. Each co-prince has set up a Permanent Delegation for Andorran affairs; the Prefect of the Eastern Pyrenees is the French Permanent Delegate.

The valleys pay every second year a due of 960 francs to France and 460 pesetas to the bishop.

*National flag:* Blue, yellow, red (vertical).

A 'General Council of the Valleys' submits motions and proposals to the Permanent Delegations. Its 24 members are elected for 4 years; half of the council is renewed every 2 years. The council nominates a First Syndic (*Syndic Procureur Général*) and a Second Syndic from outside its members.

Judicial power is exercised in civil matters in the first instance, according to the plaintiff's choice, by either the *Bayle Français* or the *Bayle Episcopal*, who are nominated by the respective co-princes. The judge of appeal is appointed alternately by each co-prince; the third instance (*Tercera Sala*) is either the supreme court of Andorra at Perpignan or the ecclesiastical court of the Bishop at Urgel. Criminal justice is administered by the *Tribunal des Corts*, consisting of the 2 Viguiers and the judge of appeal.

During the summer tourism is the main industry of the principality.

A good road connects the Spanish and French frontiers by way of Sant Julia, Andorre-la-Vieille, les Escaldes, Encamp, Canillo and Soldeu: it crosses the Col d'Envalira (2,400 metres). Another road connects Andorre-la-Vieille with Ordino. French and Spanish currency are both in use.

Exports from the UK: 1959, £14,089; 1960, £32,667; 1961, £42,939; 1962, £34,771; 1963, £31,435. Imports to the UK: 1959, nil; 1960, £29; 1961, nil; 1962, £116; 1963, £59. Re-exports: 1959, £42; 1960, £1,418; 1961, £1,222; 1962, £1,649; 1963, £201 (British Board of Trade returns).

# ARGENTINA

## República Argentina

**HISTORY.** In 1515 Juan Díaz de Solís discovered the Río de La Plata. In 1534 Pedro de Mendoza was sent by the King of Spain to take charge of the 'Gobernación y Capitanía de las tierras del Río de La Plata', and in Feb. 1536 he founded the city of the 'Puerto de Santa María del Buen Aire'. In 1810 the population rose against Spanish rule, and in 1816 Argentina proclaimed its independence. Civil wars and anarchy followed until, in 1853, stable government was established.

**CONSTITUTION AND GOVERNMENT.** Until 16 March 1949 the Constitution of the Argentine Republic was that of 1853, with modifications of 1860, 1866 and 1898. On the date mentioned a new constitution drafted by the Perón government and passed by the Constitutional Convention elected 5 Dec. 1948 came into force giving the Government great powers over the national economy. At a National Constituent Assembly held in Sante Fé Sept.–Nov. 1957 it was decided to revert to the 1853 constitution as amended up to 1898. The President and Vice-President are elected by popular vote (through electoral colleges); their term of office is 6 years and the President may not be re-elected unless a period of 6 years intervenes. The Vice-President presides over the Senate, but has otherwise no political power. The President is C.-in-C. of the Army, Navy and Air Force and appoints to all civil, military, naval and judicial offices, in certain cases with the approval of the Senate, and has the right of presentation to bishoprics; he is responsible with the Cabinet for the acts of the executive; both President and Vice-President must be Roman Catholics and Argentine by birth.

The National Congress consists of a Senate and a House of Deputies. The Senate numbers 46, 2 from the capital and from each province, elected by popular vote for 9 years (one-third retiring every 3 years). An Act passed in July 1951 provided that 10 seats in the lower house (2 each from the provinces of Buenos Aires, Córdoba, Entre Ríos and Santa Fé, and from the federal capital) will be assigned to the second largest party. The deputies are elected for 4 years, one-half retiring every 2 years. A law of Dec. 1953 re-arranged the number of deputies from each province to accord with the respective populations. The two chambers meet annually from 1 May to 30 Sept.; the lower house receives the budget and initiates fiscal legislation. Since 1912, voting has been free, secret and obligatory. Women were enfranchised on 9 Sept. 1947; beginning with the presidential election on 11 Nov. 1951, all women 18 years of age or older must vote. Equal suffrage was confirmed by a revisionary law of Aug. 1961.

The elections, held on 7 July 1963, gave Dr Arturo Illía (Unión Cívica Radical del Pueblo) 270 out of the 476 votes of the electoral college.

*President of the Republic:* Dr A. Illía was installed on 12 Oct. 1963.
*Vice-President:* Dr Carlos H. Perette.
*Foreign Minister:* Dr Miguel Angel Zavala Ortiz.

The Cabinet, appointed by the President, consists of 8 ministers (Interior, Foreign Affairs and Worship, Economy, Education and Justice, National Defence, Social Assistance and Public Health, Labour and Social Security, Public Works and Services). The Minister of Economy has subordinate Secretaries of State, responsible respectively for Agriculture and Livestock, Treasury, Finance, Commerce, Industry and Mining, Power and Fuel. Under the Minister of National Defence there are Secretaries of State for War, Marine, Air; and under the Minister of Public Works and Services, Secretaries of State for Public Works, Communications, Transport.

*National flag:* Sky-blue, white and sky-blue (equal, horizontal); with a rising sun on the white band.

*National anthem:* Oid, mortales, el grito sagrado Libertad (words by V. López y Planes, 1813: tune by J. Blas Parera).

Local Government. The governors of the various provinces are elected for terms of 6 years. The provinces elect their own legislatures, and have general control over such affairs as are not usually under the jurisdiction of the central government. In April 1962 direct federal 'interventors' were temporarily appointed, instead of governors.

[1] Total area claimed was 2,808,602 sq. km (1,084,120 sq. miles).

[2] The official census made the total 15,896,774, including a new territory, called 'Antarctic Sector', and stated to comprise the 'Malvinas' (*i.e.*, Falklands), South Orcadas (*i.e.*, Orkneys), South Georgias, South Sandwich Islands and the 'sovereign territories of Argentina in the Antarctic'; pop. 3,300.

Estimated population (excluding 'Antarctic Sector'), 31 Dec. 1961, consisted of 10,773,613 men and 10,473,807 women; total, 21,247,420.

On 27 July 1955 the 5 Territories of Formosa, Neuquén, Chubut, Río Negro and Patagonia (previously Santa Cruz) became full provinces, though as yet without full constitutions.

The 1947 census showed 8,145,175 men and 7,748,652 women. The Federal District had (1947) 1,449,406 males and 1,533,174 females. Women are everywhere in the minority except in the Federal capital and 4 of the smaller provinces. The urban population, *i.e.*, in communities of 2,000 or more inhabitants, was 61·4% of the total; 8 cities of 100,000 or more inhabitants accounted for 39·3% of the total.

Crude birth rate, 1960, was 22·5 per 1,000 population; crude death rate, 8; crude marriage rate, 6·8; infantile mortality rate (1954), 61·9 per 1,000 live births (registration incomplete outside the chief cities).

The population is overwhelmingly European in origin (principally from Italy and Spain) with little mixture with the aborigines. The dwindling Indian population is estimated at from 20,000 to 30,000. Immigration was, under the Perón Constitution, restricted to white persons, exception being made for the relatives of non-white persons (Japanese, etc.) already resident. In 1957 aliens were estimated at 1,585,200 males and 1,278,400 females.

**RELIGION.** The Roman Catholic religion is supported by the State, but its constitutional status, following the overthrow of President Perón, seemed uncertain; in June 1955 supervision of religious bodies was transferred from the Foreign Office to the Ministry of the Interior. All are liable to taxation since May 1955. All other creeds enjoy freedom of worship, but broadcasting of Protestant services is not allowed. There are 2 cardinals, 9 archbishops and 30 bishops. For the clergy there are 8 seminaries. In 1888 civil marriage was established in the republic. Divorce was made legal in Dec. 1954, but ceased to be so by a decree of 1 March 1956.

Argentina is one of 6 Latin-American states which retain 'National Patronage' over the Church, *i.e.*, bishops are appointed by the President from a panel submitted by the Senate; papal bulls and decrees must be proclaimed by the President and sometimes be incorporated in an act of the legislature.

**EDUCATION.** Education is free (subsidized by the central and provincial governments), secular and compulsory for children from 6 to 14 years of age. In 1951 the 15,874 primary schools had 2,446,138 pupils and

101,646 teachers. In 1952, 2,101 secondary, normal and special schools had 355,683 pupils and 46,470 teachers, and 1,132 incorporated secondary schools had 153,926 pupils. Of the 11·25m. registered voters in Argentina on 31 Dec. 1961, 10·18% were illiterate (highest rate, 30·66% in Corrientes; lowest, 1·3% in the Federal Capital).

There are national universities at Córdoba (founded 1613), with, 1951, 9,355 students; Buenos Aires (1821), with 41,325 students; La Plata (1897), with 17,409 students; Tucumán (1914), with 3,191 students; the National University of the Litoral, in Santa Fé, with branches in Rosario (1920), and in Corrientes (1922), with 16,325 students, and the National University of Cuyo, with 2,596 students. Total, at all universities, 1950, 90,201. In 1956 the Technological Institute in Bahía Blanca was raised to the status of 'Universidad del Sud'.

*Cinemas* (1955). Cinemas numbered 2,308, with seating capacity of 1·3m.

*Newspapers* (1958). Daily newspapers numbered over 400, with an aggregate daily circulation of 3,250,000; 75% of this was shared by the dailies of Buenos Aires.

**WELFARE.** Free medical attention is obtainable from public hospitals. Many trade unions provide medical, dental and maternity services for their members and dependants. Welfare services are scanty in places distant from urban centres. A Federal Housing Administration was set up in 1961.

**JUSTICE.** Justice is administered by federal and provincial courts. The former deal only with cases of a national character, or in which different provinces or inhabitants of different provinces are parties. The chief federal court is the Supreme Court, with 7 judges at Buenos Aires. Other federal courts are the 5 appeal courts, one with 5 judges at Buenos Aires, and with 3 each at La Plata, Paraná, Córdoba and Rosario (Santa Fé), and courts of first instance in each of the provinces and territories. Each province has its own judicial system, with a Supreme Court (generally so designated) and several minor chambers. Trial by jury is established by the Constitution for criminal cases, but never practised, except occasionally in the provinces of Buenos Aires and Córdoba.

The police force is centralized under the Federal Security Council.

**FINANCE.** The financial year commences on 1 Nov. Budget estimates of total ordinary receipts and expenditures in 1m. paper pesos (18 pesos = US$1):

| | *1959* | *1960* | *1961* | *1962* | *1963* | *1964* |
|---|---|---|---|---|---|---|
| Revenue . | 53,700 | 83,982 | 149,017 | 180,260 | 126,500 | |
| Expenditure . | 103,900 | 87,530 | 138,947 | 180,260 | 171,000 | |

Proposed government expenditure for 1962 includes: Education, 11,728·5m.; defence, 23,882·7m.; public works, 6,247·1m.; economy, 3,497·7m.; health and welfare, 3,304·4m.

Extra-budgetary expenditure brought the 1957 total up to 61,265m. pesos, that of 1962 up to 325,503m.

The Government decided in 1957 that the assets of ex-president Perón, amounting to 150m. pesos ($8·3m.), should be seized: his salary and allowances from June 1946 to Sept. 1955 totalled 818,280 pesos.

The internal national debt, 31 Dec. 1955, was 71,966m. pesos, including

28,000m. owed to the country's banking system (moneys advanced for imports), compared with 9,160m. at the end of 1945 (Perón took over in June 1946). It was estimated on 31 Aug. 1961 to be 189,374m.

Total foreign investments at 31 Dec. 1959 were estimated at US$1,991m. including USA, 31·1% and UK, 20%. Further important investments in chemicals, motor vehicles, oil refineries, and the manufacture of machinery have taken place since then, totalling over US$286m.

The national foreign debt at 30 Nov. 1962 totalled US$2,753m.; the estimated private debt, US$532m.

**DEFENCE.** *Army.* The Army is a National Militia, service in which is compulsory for all citizens from their 20th to their 45th year. Naturalized citizens are exempt for a period of 10 years. For the first 10 years the men belong to the 'active' Army, or first line. After completing 10 years in the first line the men pass to the National Guard, and serve in it for another 10 years, finishing their service with 5 years in the Territorial Guard; the latter is mobilized only in case of war. The period of continuous service, or training in the ranks with the permanent forces, is for 1 year for the Army or Air Force, and 2 years for the Navy. The reservists can be called out for training periodically.

The territory of the republic is divided into 5 military districts for administrative purposes. The Army is organized in 6 divisions, 4 cavalry brigades and 2 mountain detachments; it consists of 31 infantry regiments, 15 cavalry regiments, 10 artillery regiments, engineer and communication battalions, and specialized artillery units.

In 1960 the army was 85,000 strong, of whom 65,000 were National Service men and the remainder, an officer corps of 5,000 and 15,000 n.c.o.s, all of whom were career regulars. Current modernization and reorganization will result in a reduction to an overall total of about 75,000.

The trained reserve numbers about 250,000, of whom 200,000 belong to the National Guard and 50,000 to the Territorial Guard. The territorial reserve numbers 100,000 men.

*Navy.* Principal ships of the Argentine Navy:

There are also 9 destroyers, 4 frigates, 2 submarines, 3 corvettes, 2 motor torpedo-boats, 5 minesweepers, 4 surveying vessels, 1 repair ship, 2 training ships, 7 transports, 6 oilers, 12 landing ships, 3 landing craft, an icebreaker, 1 salvage vessel and 14 tugs.

On 20 Dec. 1961, the Chamber of Deputies authorized up to 22,000m. pesos for a 1962–72 naval rebuilding programme, but the scheme was postponed in June 1962.

The active personnel of the Navy comprises about 1,500 officers and 20,000 men (including about 5,000 conscripts), who have to serve 2 years. There is a corps of coast artillery of 450 men, a naval school and a school of mechanics.

The Naval Aviation Service, formed on 17 Oct. 1919, has some 250 pilots, who man 4 squadrons of aircraft. Aircraft include 20 Grumman Panthers (jet), 62 Corsairs and navalized Harvard trainers, of which only the two latter types can be launched from the aircraft carrier with existing equipment; Catalina, Mariner and Neptune maritime patrol aircraft; and various training, transport and general purpose aircraft, including helicopters.

*Air Force.* The Air Force, inaugurated on 8 Sept. 1912 and autonomous since 4 Jan. 1945, comprises an Air Defence Command of 2 fighter groups with HQ at Buenos Aires, Tactical Air Command of 1 fighter-bomber group with HQ at Paraná, and Air Transport Command of 2 transport groups with HQ at Buenos Aires. The operational units form 5 air brigades. There is a Military Aviation College at Córdoba; the main flying school is at El Palomar. Equipment includes 28 US-built F-86F Sabre jet-fighters, but the remainder of the aircraft, including Lincoln bombers, are mostly piston-engined. New types are under development in the national aircraft factory at Córdoba, which is also assembling Mentor trainers of US design and Paris light jet tactical combat, liaison and training aircraft of French design. Total strength of the Air Force is about 300 pilots and 150 operational aircraft.

**PRODUCTION.** Argentina has an area of about 670,251,000 acres, of which about 41% is pasture land, 32% woodland and 11% (73,730,000 acres) cultivated. An agricultural census was taken in Nov. 1952. It was estimated (1958) that 25m. hectares were cultivated by the country's 75,000 tractors.

The gross national income, at 1950 prices, in 1m. pesos, has been: 1950, 62,249; 1955, 68,550; 1956, 139,100; 1957, 71,510; 1958, 73,254; 1960, 73,005; 1961, 77,179; 1962, 74,126. Income *per capita* (in 1950 prices) rose from 2,991 pesos in 1943 to a peak of 4,041 in 1948, falling to 3,584 in 1958 and 3,404 in 1959.

Argentina's wealth is based on her great livestock industry, supplemented in recent decades by the raising of large cereal crops for export. With 44·5m. cattle she ranks fourth (eclipsed by India, 160m.; US, 96m., and USSR, 70m.), but as an exporter of raw meat (excluding Denmark's exceptional trade in bacon) she has long led the world (pre-war average, 662.000 metric tons. In 1961 exports amounted to 444,663 metric tons carcase weight.

Of the total slaughterings, 1958, 76% were consumed within the country (only 66% in 1937). Until 1959 Argentina's *per capita* consumption was the highest in the world (240 lb. in 1957 compared with 160 lb. in US and 119 lb. in UK).

The livestock census (11 Nov. 1952) showed: Cattle, 45,262,995 (1960 estimate: 43·3m.); sheep, 54,683,731 (48m. in 1960); pigs, 3,989,188 (3·9m.); horses (5·5m); goats (5m.). The Province of Buenos Aires has 38% of the cattle. Wool production, 1963, was estimated at 179,000 tons. Exports in the wool year ending 30 Sept. 1963, 167,375 tons. Butter production (1962), 49,011 tons; casein (1962), 28,712 metric tons; cheese (1962), 140,684 metric tons.

Wheat production, both hard and soft, expanded with the railways, reaching exports of 1m. metric tons in 1895. Production usually exceeds

6m. metric tons, ahead of Australia but well behind Canada and US. Other cereals and linseed are also important.

Crop statistics with area (in 1,000 hectares) and production (in 1,000 metric tons) are shown as follows:

| | Annual average, 1935–40 | | 1961–62 | | 1962–63 | |

On 31 Dec. 1960 there were 110,600 tractors, 59% being of local manufacture. In 1961, 14,716 tractors were produced in Argentina.

The total grain and meat exports, in metric tons:

| | Wheat | Maize | Barley | Meat |
|---|---|---|---|---|
| 1960 | 2,485,756 | 2,569,913 | 299,901 | 437,600 |
| 1961 | 1,065,531 | 1,730,146 | 128,683 | 435,700 |
| 1962 | 2,832,336 | 2,931,028 | 178,208 | 570,200 |

Argentina's meat exports are calculated in terms of actual weight; converted into 'carcase weight', as is the international practice, the 1958 exports would equal 646,000 metric tons.

Cotton, potatoes, sugar, vine, tobacco, citrus fruit, olives, rice, soya, tung and yerba maté (Paraguayan tea) are also cultivated. There are 36 cane-sugar mills and 1 beet-sugar factory. Potato harvest, 1962–63, amounted to 1,453,700 metric tons. The area under tobacco production, 1962–63, was 46,600 hectares; output, 38,400 metric tons. Production of yerba maté, 1956, was 91,800 metric tons. Production of cotton in 1957–58 amounted to 168,000 metric tons of fibre (108,000 tons in 1961–62) and 200,400 tons of seed; cotton fibre exports, 1962, 53,089 metric tons valued at US$24,035.

Before the Second World War the country was the largest grower and shipper of linseed (flaxseed), but, preferring to convert it into oil, virtually no linseed was exported from 1946 until April 1950, when it was resumed. Output, 1962–63, of linseed, 838,600 metric tons; exports 1962, 264,096 tons; value US$58,772,334. Sunflower seed, first grown by Russian immigrants in 1900 and now furnishing the country's most popular edible oil, amounted to 470,000 metric tons in 1962–63. Exports of tung oils, 1962, 16,422 metric tons; value US$10,931,868; 50% went to USA. There are more than 10m. olive trees, of which 48% are in Mendoza. Production in 1958 was 7,372 tons. 380,000 tons of groundnut oil were produced in 1961–62 (mainly in Córdoba), a 45% increase over any previous year. Argentina's 20 quebracho extract factories produced 218,100 tons of extract in 1951; exports, 1951, 217,900 metric tons; production 1958, 139,200 metric tons, with 126,584 tons exported. Argentina is the world's largest source of tannin.

Flour-milling ranks second to refrigeration. In 1957. 184 mills produced 2,197,800 tons of flour; exports of flour and products, 1958, 18,190 tons out of a production of 2,288,700 tons.

*Mining.* Mining is of mainly local importance. Since 1954 it has been under state control. Argentina produced 342,602 tons of coal in 1961 (Río Turbio, with reserves of 300m. tons, etc.); she produced 7m. cu. metres of oil in 1959 and imported about 17·3m. Gold (201 fine oz., 1960), silver (1,318,150 fine oz. in 1962) and copper are worked in Catamarca, where there are also 2 tin-mines, and gold and copper in San Juan, La Rioja and the south-western territories. Iron ore (118,000 long tons in 1961), tungsten (1,800 short tons of ore in 1962), beryllium (660 short tons in 1962), mica (45 short tons in 1958), lead (31,700 short tons in 1962), barites (16,870 short tons in 1958), zinc (33,300 short tons in 1962), manganese (22,000 short tons in 1962) and limestone are produced. 55·77m. bags (of 50 kg) of cement were produced in 1961.

During 1958 production of petroleum was 4·4m. metric tons, of which about 88% came from government oilfields and the remainder from private companies' oilfields. Six new oilfields have been discovered. Development is in the hands of the Instituto Nacional del Petróleo set up in 1962. Production of crude oil in 1959 was 7·1m. metric tons; imports of all grades (1961), 3·9m. cu. metres; in 1960 production was 10·2m. cu. metres and in 1961, 13·4m., although consumption is also increasing, the country was said in 1962 to be self-sufficient.

*Industry.* On 30 July 1954 a census of manufacturing, mining, commerce and construction was taken. It showed 621,329 firms, of which 181,763 (employing 1,536,530 men and women) were in manufacturing and mining, 417,423 (employing 1,230,466) were in commerce and 22,143 (employing 163,916) were in construction. Of the total employed in this non-agricultural sector, 2,355,546 were men and 565,366 (19%) were women. The census in preparation in 1961 envisaged sampling 119 industries.

Cotton yarn produced in 1959 amounted to 87,000 tons. Cement output, 1959, was 2,367,000 metric tons. Pig-iron, steel ingots and castings, 1961, 706,000 short tons; steel ingots alone rose from 277,045 tons in 1960 to 441,487 tons in 1961. Electric power production, 1960, reached 9,600m. kw.

**Trade Unions.** Most trade unions are in theory affiliated to a General Confederation of Labour. About 2·5m. workpeople are organized. They are in membership unless they specifically contract out. Legal status, which confers authority to negotiate wage agreements, and other privileges, is granted by the Government to the most representative union in each industry or activity. Real wages in Feb. 1961 were stated to be below the 1958 level, despite wage increases of 15–20%.

**COMMERCE.** After measures imposed by the dwindling of gold and foreign reserves, the control of imports by permits and quotas was abolished on 30 Dec. 1958. All imports have to be paid for at the free rate of exchange, and mostly are subject to *ad valorem* surcharges.

Import values include charges for carriage, insurance and freight; export values are on a f.o.b. basis. Real values of foreign trade (in US$1m.), exclusive of coil and bullion:

**COMMUNICATIONS.** From 1 Nov. 1948 all land, sea, river and air transport was under the control of the Ministry ot Transport.

*Shipping.* The merchant fleet, 31 Dec. 1954 (registered with Lloyds), consisted of 400 vessels (over 100 gross tons) of 1,070,995 gross tons; the tanker fleet had 56 vessels of 340,421 gross tons. The total was 1·23m. GRT in April 1962.

The state-owned ocean and river fleet (1953) included 5,219 vessels of 1,167,298 GRT. In 1956, 1,035,000 metric tons of cargo were carried, and 2,385 vessels of 10·5m. net tons entered Argentine ports. In 1957, 2,620 vessels of 11m. entered.

*Railways.* On 1 March 1948 Argentina became the owner of her entire railway system, consisting of 18 different railways with a total length of 46,000 km. (Sole exception was a railway, 900 km of metre-gauge line, belonging to the Province of Buenos Aires, not nationalized until 20 Aug. 1951.) The amalgamation brought together 7 government railways (mostly small) with 8,347 miles (and some 12% of the aggregate revenue), 3 French-owned railways (2,660 miles and 7% of the revenue) and 8 British-owned railways (15,561 miles and 80% of the revenue). Legal formalities were completed on 5 May 1949. For details *see* THE STATESMAN'S YEAR-BOOK, 1949, p. 746. The railways are stated to be in bad shape with renewals of rolling stock some 25 years in arrears. Their financial deficit in 1960 was estimated at 10,000m. pesos.

Goods traffic on the railways has declined since 1945 (total, 1954, 39·5m. tons; 1955, 36·9m. tons; 1958, 28,450,000), but passenger traffic rose from 188m. in 1942–43 to 579m. in 1954–55 and 550m. in 1958.

*Roads.* In 1960, 570,400 km of national and provincial highways were open. The 4 main roads constituting Argentina's portion of the Pan-American Highway were opened to traffic in 1942. Motor vehicles are produced at some 11,000 per month, and in 1960 there were on the roads 425,000 cars and 425,000 lorries and buses; by 1962 their total was estimated over 1m.

*Post.* In 1949 the telephone service was nationalized; instruments numbered 1,399,565 (1962). of which 731.658 were in Buenos Aires (Federal District). Privately owned exchanges operated 93,513 instruments. There were, in 1945, 4,382 post offices. There are 63 broadcasting stations and one television station with 1·1m. viewers. Cable service to other Latin-American countries and US is provided by All-America Cables.

*Aviation.* Commercial airlines flew a total of 34,743,000 km in 1958, carrying 956,000 passengers and 956·5 tons, of which air-mail was about 818 tons. The Government on 3 May 1949 nationalized the 4 domestic airlines.

**MONEY.** The monetary system is on a gold-exchange standard, the unit for foreign transactions being, nominally, the *peso oro* (gold peso) and for domestic transactions, the *peso moneda nacional* (paper peso), legal tender for all domestic debts.

The gold peso weighs 1·6129 grammes of gold 0·900 fine: it is divided into 100 *centavos.* The monetary law of 5 Nov. 1881 authorized the coinage of 5- and 2½-peso gold pieces. The 5-peso gold piece (the *Argentino*) weighs 8·0645 grammes, 0·900 fine, and therefore contains 7·25805 grammes of fine gold, but gold is not in circulation. Circulation consists chiefly of paper notes (issued since 1897) ranging from 10,000 down to 25 pesos. The coins actually circulating, 1962, were steel–nickel, 10, 5, 1 peso, 50 and 20 centavos, copper–nickel, 10 and 5 centavos.

Gold may be privately owned, and it may be bought and sold freely.

On 27 Oct. 1955 the Argentine peso was devalued to 18 pesos = $1 or 1 peso = 5·55 cents US. The black market was made legal and is now operating as a free market. As from 1 Jan. 1959, following consultations with the IMF, the official exchange rate was discontinued and there is now an uncontrolled free market for all transactions. The free rate fluctuated considerably between 63 = US$1 in Jan. 1959 and 83 in July 1959, since when it held around 83, the rate at which IMF computations were also made; but after the elections of March 1962 it reached 100, and was about 125 from May. On 12 Nov. 1962 the rate of exchange of the £ sterling was 426 pesos.

Monetary circulation, 196,579m. pesos on 28 Dec. 1963. Gold and foreign-exchange reserves were $378·8m. on 30 Sept. 1963.

**BANKING.** A law promulgated 25 March 1946 nationalized the Central Bank (established in 1935), originally as an autonomous institution, but later, in Oct. 1949, placed under the Minister of Finance, who became president. Six decree-laws of Oct. 1957 have brought back a greater elasticity to the structure, especially as regards the deposits and loans of the private banks, which have regained their autonomy. The Central Bank continues the normal functions of a national institution.

On 31 July 1948 there were 44 banks, each with capital of 1m. paper pesos or over (including the Banco de la Nación, with 36% of the total assets of the banking system), consisting of 9 provincial banks, 25 domestic banks and 10 foreign banks, all of which are shareholders in the Central

Bank. The Banco de la Nación (founded in 1891) has 306 branches and agencies, including one at Asunción, Paraguay. There are 5 Stock Exchanges.

**WEIGHTS AND MEASURES.** Since 1 Jan. 1887 the use of the metric system has been compulsory.

# AUSTRIA

## Republik Österreich

**CONSTITUTION AND GOVERNMENT.** Austria recovered its sovereignty and independence on 27 July 1955 by the coming into force of the Austrian State Treaty between the United Kingdom, the United States of America, the Soviet Union and France on the one part and the Republic of Austria on the other part (signed on 15 May).

On 12 March 1938 Austria was forcibly absorbed in the German Reich until it was liberated by the armies of the United Nations in spring 1945. Already in the Moscow Declaration of Oct. 1943, Great Britain, the USA and the USSR had resolved upon the re-establishment of a free and independent Austria.

On 27 April 1945 Dr Karl Renner set up a provisional government which restored the Republic of Austria in the spirit of the Constitution of 1920/29, and was recognized by the Four-Power Allied Control Council on 20 Oct. 1945. The last occupation forces left Austria in Sept. 1955.

*President of the Republic:* Dr Adolf Schärf. (Socialist, elected 5 May 1957 by 2,258,255 against 2,159,604 votes; re-elected 28 April 1963 by 2,473,349 against 1,990,771 votes).

On 18 Nov. 1962 the elections were held for the National Assembly, which returned 81 People's Party (79 at the elections of 10 May 1959), 76 Socialists (78), 8 Freedom Party (8).

The caretaker coalition government was in March 1964 composed as follows:

*Chancellor:* Dr Alfons Gorbach (APP).
(*Chancellor-designate:* Dr Josef Klaus (APP).)
*Vice-Chancellor:* Dr Bruno Pittermann (Soc.).
*Minister of Foreign Affairs:* Dr Bruno Kreisky (Soc.).
*Minister of the Interior:* Franz Olah (Soc.).
*Minister of Finance:* Dr Franz Korinek (APP).
*Minister of Justice:* Dr Christian Broda (Soc.).
*Minister of Education:* Dr Heinrich Drimmel (APP).
*Minister of Agriculture and Forestry:* Eduard Hartmann (APP).
*Minister of Commerce and Reconstruction:* Dr Fritz Bock (APP).
*Minister of Defence:* Dr Karl Schleinzer (APP).
*Minister of Social Welfare:* Anton Proksch (Soc.).
*Minister of Communications and Power:* Otto Probst (Soc.).

*National flag:* Red, white, red (horizontal).

The official language is German.

LOCAL GOVERNMENT. The Republic of Austria comprises 9 provinces (Vienna, Lower Austria, Upper Austria, Salzburg, Styria, Carinthia, Tirol, Vorarlberg, Burgenland). There is in every province an elected Provincial Assembly.

Every commune has a Council, which chooses one of its number to be head of the Commune (burgomaster) and a committee for the administration and execution of its resolutions.

*Industry.* On 26 July 1946 the Austrian parliament passed a government bill, nationalizing some 70 industrial concerns. As from 17 Sept. 1946 ownership of the three largest commercial banks, every oil-producing and refining company, and the principal firms in the following industries devolved upon the Austrian state: River navigation; coal extraction; non-ferrous mining and refining; iron-ore mining; pig-iron and steel production; manufacture of iron and steel products, including structural material, machinery, railroad equipment and repairs, and shipbuilding; electrical machinery and appliances. Six companies supplying electric power were nationalized in accordance with a law of 26 March 1947.

In 1956 the percentage of the production of nationalized industries in relation to total production was as follows: Copper ore, lead–zinc ore, chemical fertilizers, 100%; pig-iron, 99·9%; iron ore, 99·6%; raw steel, 95·8%; coal, 93·2%; rolled steel, 92·2%; electrical energy, 82·8%; aluminium, 73·5%.

## ROYAUME DE BELGIQUE—KONINKRIJK BELGIË

**HISTORY.** The kingdom of Belgium formed itself into an independent state in 1830, having from 1815 been part of the Netherlands. The secession was decreed on 4 Oct. 1830 by a provisional government, established in consequence of a revolution which broke out at Brussels, on 25 Aug. 1830. A National Congress elected Prince Leopold of Saxe-Coburg King of the Belgians on 4 June 1831; he ascended the throne 21 July 1831.

By the Treaty of London, 15 Nov. 1831, the neutrality of Belgium was guaranteed by Austria, Russia, Great Britain and Prussia. It was not until after the signing of the Treaty of London, 19 April 1839, which established peace between King Leopold I and the King of the Netherlands, that all the states of Europe recognized the kingdom of Belgium. In the Treaty of Versailles (28 June 1919) it is stated that as the treaties of 1839 'no longer conform to the requirements of the situation', these are abrogated and will be replaced by other treaties.

**KING.** **Baudouin**, born 7 Sept. 1930, succeeded his father, Leopold III, on 17 July 1951, when he took the oath on the constitution before the two Chambers; married on 15 Dec. 1960 to Fabiola de Mora y Aragón, daughter of the Conde de Mora and Marqués de Casa Riera.

*Father of the King.* Leopold III, born 3 Nov. 1901, son of the late King Albert (died 17 Feb. 1934) and of Queen Elisabeth, Duchess of Bavaria, Princess of Belgium; married (1) on 4 Nov. 1926 to Princess Astrid of Sweden, died 29 Aug. 1935, and (2) on 11 Sept. (civil marriage, 6 Dec.) 1941, to Mlle Marie Lilian Baels, Princess de Rethy, daughter of Hendrik Baels, formerly Minister of Agriculture. Leopold III succeeded to the throne on 23 Feb. 1934; on 20 Sept. 1944 parliament elected Prince Charles, Count of Flanders, Leopold's brother, as Regent of the Kingdom. The Regency ended on 22 July 1950; but King Leopold delegated his powers to Prince Baudouin on 11 Aug. 1950, and abdicated on 16 July 1951.

*Brother and Sister of the King.* (1) Josephine Charlotte, Princess of Belgium, born 11 Oct. 1927; married to Prince Jean of Luxembourg, 9 April 1953; (2) Albert, Prince of Liège born 6 June 1934; married to Paola Ruffo di Calabria, 2 July 1959; *offspring:* Prince Philippe, born 15 April 1960; Princess Astrid, born 5 June 1962. *Half-brother and half-sisters of the King.* Prince Alexandre, born 18 July 1942; Princess Marie Christine, born 6 Feb. 1951; Princess Maria-Esmeralda, born 30 Sept. 1956.

*Uncle and Aunt of the King.* (1) Prince Charles, Count of Flanders, born 10 Oct. 1903. (2) Princess Marie-José, born 4 Aug. 1906, married to Prince Umberto (King Umberto II of Italy in 1946) on 8 Jan. 1930.

The King has a civil list of 36m. francs. The Queen Mother and Prince Charles, the former Regent, each receive an annual grant of 4m. francs. The Royal family have an additional allowance of 6m. francs per annum.

**CONSTITUTION AND GOVERNMENT.** According to the constitution of 1831, Belgium is 'a constitutional, representative and hereditary monarchy'. The legislative power is vested in the King, the Senate and the Chamber of Representatives. The royal succession is in the direct male line in the order of primogeniture. By marriage without the King's consent, however, the right of succession is forfeited, but may be restored by the King with the consent of the two Chambers. No act of the King can have effect unless countersigned by one of his Ministers, who thus becomes responsible for it. The King convokes, prorogues and dissolves the Chambers. In default of male heirs, the King may nominate his successor with the consent of the Chambers. If the successor be under 18 years of age, the two Chambers meet together for the purpose of nominating a regent during the minority.

*National flag:* Black, yellow, red (vertical).

*National anthem:* Après des siècles d'esclavage (La Brabançonne: words by Jenneval, 1830; tune by F. van Campenhout, 1830).

Both French and Flemish are official languages.

Those sections of the Belgian Constitution which regulate the organization of the legislative power were revised in Oct. 1921. For both Senate and Chamber all elections are held on the principle of universal suffrage.

The Senate consists of members elected for 4 years, partly directly and partly indirectly. The number elected directly is equal to half the number of members of the Chamber of Representatives. The constituent body is similar to that which elects deputies to the Chamber; the minimum age of electors is 21 years, and the minimum length of residence required is 6 months. Women were given the suffrage at parliamentary elections on 24 March 1948. In the direct elections of members both of the Senate and Chamber of Representatives the principle of proportional representation was introduced by law of 29 Dec. 1899.

Senators are elected indirectly by the provincial councils, on the basis of 1 for 200,000 inhabitants. Every addition of 125,000 inhabitants gives the right to 1 senator more. Each provincial council elects at least 3 senators. There are at present 46 provincial senators. No one, during 2 years preceding the election, must have been a member of the council appointing him. Senators are elected by the Senate itself in the proportion of half the preceding category. The senators belonging to these two latter categories are also elected by the method of proportional representation. All senators must be at least 40 years of age. They receive 240,000 francs per annum. Sons of the King, or failing these, Belgian princes of the reigning branch of the royal family, are by right senators at the age of 18, but have no voice in the deliberations till the age of 25 years; this prerogative is hardly ever used.

The members of the Chamber of Representatives are elected directly by the electoral body. Their number, at present 212 (law of 18 May 1949), is proportional to the population, and cannot exceed one for every 40,000 inhabitants. They sit for 4 years. Deputies must be not less than 25 years of age, and resident in Belgium. Each deputy has an annual allowance of 300,000 francs. Senators and deputies have also free railway passes.

The Senate and Chamber meet annually in November and must sit for at least 40 days; but the King has the power of convoking extraordinary sessions and of dissolving them either simultaneously or separately. In the latter case a new election must take place within 40 days and a meeting of the chambers within 2 months. An adjournment cannot be made for a period exceeding 1 month without the consent of the Chambers.

Parties in the Senate, elected 26 March 1961: Christian Social, 47; Socialist, 45; Liberal, 11; Flemish People's Union, 2; Communist, 1.

Parties in the Chamber elected 26 March 1961: Christian Social, 96; Socialist, 84; Liberal, 20; Communist, 5; Flemish People's Union, 5; independents, 2.

The Liberal Party, founded in June 1846, on 8 Oct. 1961 changed its name to that of Party of Freedom and Progress.

The Executive Government (Christian Social and Socialist), formed on 25 April 1961, was composed as follows:

*Prime Minister:* Théo Lefèvre (CS).

*Vice-Premier and Minister of Foreign Affairs:* Paul-Henri Spaak (S).

*Justice:* Pierre Vermeylen (S). *Defence:* Paul Willem Segers (CS). *Finance:* André Dequae (CS). *Agriculture:* Charles Héger (CS). *Economic Affairs and Power:* Antoine Spinoy (S). *Social Security:* Edmond Leburton (S). *Interior:* Arthur Gilson (CS). *Public Works:* Joseph Bohy (S). *Foreign Trade and Technical Assistance:* Maurice Brasseur (CS). *Education and Culture:* H. LOCAL GOVERNMENT. The 9 provinces and 2,663 communes of Belgium have a large measure of autonomous government. According to the law of 15 April 1920, all Belgians over 21 years of age without distinction of sex, who have been domiciled for at least 6 months, have the right to vote in communal elections. Proportional representation is applied to the communal elections, and communal councils are to be renewed every 6 years. In each commune there is a college composed of the burgomaster as the president and a certain number of aldermen.

It applies to all workers and is administered by the Central National Office of Social Security (ONSS), which collects from employers and employees all contributions referring to family allowances, health insurance, old age insurance, holidays and unemployment. These sums are distributed by the Central Office to the various institutions concerned with these benefits. Insurance against unemployment is organized through a common fund, which also undertakes to re-train the unemployed for another employment while providing for their families. Since 1944 further laws have increased allowances, made fresh provisions for housing (1945), injuries while working, professional illnesses, etc. (1948).

Apart from private charity, the poor are assisted by the communes through the agency of the *bureaux de bienfaisance*, whose duty it is to provide outdoor relief, and by the governing bodies of the *hospices civils*. Provisions of a national character have been made for looking after war orphans and men disabled in the war. Certain other establishments, either state or provincial, provide for the needs of deaf-mutes and the blind, and of children who are placed under the control of the courts. The State is sole holder of the ordinary shares of SNCB, which carry the majority vote at General Meetings. The State also retains a control over fares, freight rates, borrowing and the construction of new lines, and appoints the Board of the company. The length of railway operated on 31 Dec. 1962 was 4,568 km of main lines. Revenue (1962), 13,556m. francs; expenditure, 13,306m. francs.

*Post.* On 31 Dec. 1962 there were 1,914 post offices. The gross revenue of the post office in the year 1962 amounted to 3,362·2m. francs.

A régie of telegraphs and telephones for running the services on business lines was created by the law of 19 July 1930, effective 1 Nov. 1930. There were 13,091,099 km of telephone line in service, including 9,796,147 km of local line, 1,957,797 km of inter-urban and 2,237,155 km of international lines. *Aviation.* The national Belgian airline Sabena (Société anonyme belge d'exploitation de la navigation aérienne) was set up in 1923. Its capital is 750m. francs. In addition to its European network, Sabena operates different routes to the Congo *via* Tripoli, Rome, Geneva, Lisbon, Frankfurt, Cairo, Beirut, Athens and Casablanca, with through connexions to South Africa; and services to New York and Israel. In 1962 its airfleet comprised 68 aircraft, 6 helicopters and 21 training machines. In 1962 SABENA flew 31,061,000 km, carrying 1,384,359,000 revenue passengers, 35,218,000 ton/km of freight and 4,185,000 ton/km of mail.

[1] Belgian shipping returns are given in the official 'Moorsom tons', which may be converted into net tons by deducting 19·85% from the Moorsom total.

**MONEY.** The *franc*, containing 0·01777 gramme of fine gold, is the unit of currency.

No gold has been minted since 1882 (save only 5m. francs struck in 1914). New silver coins of 20, 50 and 100 francs have been issued since 15 Oct. 1948.

**BANKING.** The bank of issue in Belgium is the National Bank, instituted 1850. It is the cashier of the state, and is authorized to carry on the usual banking operations. The note circulation on 28 Dec. 1962 amounted to 137,590m. francs. The articles of association of the National Bank of Belgium were modified on 13 Sept. 1948 so as to strengthen public control.

The popular savings bank in Belgium is mainly concentrated in the Caisse Générale d'Epargne et de Retraite, at Brussels. The Caisse d'Epargne is a mixed company with legally regulated functions and operates under the supervision of the Minister of Finance. It co-operates with the Belgian postal service, thus obviating any need of a postal-savings system. During the year 1962 deposits amounted to 22,799m. francs and withdrawals to 20,717m. francs.

# BHUTÁN

## DRUK-YUL

*History.* In 1774 the East India Company concluded a treaty with the ruler of Bhután, but repeated outrages on British subjects committed by the Bhután hillmen led from time to time to punitive measures, usually ending in the temporary or permanent annexation of various *duars* or submontane tracts with passes leading to the hills. Under a treaty signed in Nov. 1865 the Bhután Government was granted a subsidy of Rs 50,000 a year (increased to Rs 100,000 in 1910 and to Rs 200,000 in 1942). By an amending treaty concluded in Jan. 1910 the British Government undertook to exercise no interference in the internal administration of Bhután, and the Bhután Government agreed to be guided by the advice of the British Government in regard to its external relations.

*Government.* The form of government in Bhután, which existed from the middle of the 16th century until 1907, consisted of a dual control by the clergy and the laity as represented by Dharma and Deb Rájás. In 1907 the Tongsa Penlop (the governor of the province of Tongsa in eastern Bhután), Sir Ugyen Wangchuk, GCIE, KCSI, was elected as the first hereditary Maharaja of Bhután. He was succeeded by his son, Sir Jigme Wangchuk, KCSI, KCIE (1926–52), and his grandson, Jigme Dorji Wangchuk, who was installed as Maharaja on 27 Oct. 1952.

The Government of India concluded a fresh treaty with Bhután on 8 Aug. 1949. Under this treaty the Government of Bhután continues to be guided by the Government of India in regard to its external relations, and the Government of India have undertaken not to interfere in the internal administration of Bhután. The subsidy paid to Bhután has been increased to Rs 500,000, and the Government of India agreed to retrocede to Bhután an area of about 32 sq. miles in the territory known as Dewangiri, which was annexed in 1865.

*Area and Population.* Bhután is situated in the eastern Himalayas, between 26° 45′ and 28° N. lat. and between 89° and 92° E. long., bordered on the north and east by Tibet and India, on the west by Sikkim and on the south by India. Extreme length from east to west 190 miles; extreme breadth 90 miles. Area about 16,000 sq. miles (41,400 sq. km); population estimated at between 700,000 and 800,000. The capital is at Thimphu. The language is Dzongkha, akin to Tibetan.

*Religion.* The majority of the people are Mahayana Buddhists of the Druk Kargue or 'Red hat' sect. Tashi-Cho Dzong, the chief monastery in Bhután, contains over 1,000 priests.

*Defence.* Bhután has an army for protection of her borders. District administration is based on Dzongs (literal meaning fort). A Dzong contains administrative offices and also the monastery.

*Production.* The chief products are rice, Indian corn, millet, lac, wax, handloom cloth, musk, elephants, ponies and yaks. Extensive and valuable forests abound. Large deposits of limestone and gypsum have been found. Surveys for hydro-electric power are being carried out.

The Government of Bhután has drawn up 5-year development plan with the active co-operation and financial support of the Government of India.

It was inaugurated about the end of 1961. Educational facilities are being expanded and medical facilities are being provided. Forest and mineral wealth is to be exploited. About 800 miles of new roads are to be built.

*Commerce.* Trade with India is considerable. Bhután imported from the UK in 1963 goods valued at £60.

*Diplomatic Relations.* His Highness keeps an agent at Calcutta. The Political Officer in Sikkim represents the Government of India in Bhután.

# BOLIVIA

## República de Bolivia

**CONSTITUTION AND GOVERNMENT.** The Republic of Bolivia was proclaimed on 6 Aug. 1825; its first constitution was adopted on 19 Nov. 1826. The present constitution—the fourteenth—was adopted in 1961. Executive power is vested in a President, elected for 4 years by direct popular vote, and eligible for immediate re-election. In the event of his death or failure to assume the office, the Vice-President, elected at the same time, assumes the presidency, and after him, the President of the Senate. The Congress of 2 chambers (Senate and Chamber of Deputies) meets annually on 6 Aug. at La Paz. It consists of 27 senators and 72 deputies, elected in proportion to the political districts; the department of La Paz has 3 senators. One deputy represents about 40,000 electors. The electorate comprises all men over 21 years and women over 21 if single or 18 years of age if married. Since 1952, when the literacy test was abolished, the potential electorate has risen to more than 2·5m.

La Paz is the actual capital and seat of the Government, but Sucre is the legal capital and the seat of the judiciary.

The following is a list of presidents since 1931 and the dates on which they took office:

Dr Daniel Salamanca, 5 March 1931 (resigned Nov. 1934).
Luis Tejada Sorzano, 27 Nov. 1934 (deposed 17 May 1936).
Col. José David Toro, 17 May 1936 (deposed 13 July 1937).
Lieut.-Gen. German Busch, 13 July 1937 (committed suicide 23 Aug. 1939).
Gen. Carlos Quintanilla (provisional), 23 Aug. 1939–12 March 1940.
Gen. Enrique Peñaranda, 12 March 1940 (deposed 20 Dec. 1943).
Maj. Gualberto Villaroel, 20 Dec. 1943 (deposed and lynched 21 July 1946).
Dr Néstor Guillén (27 July–14 Aug. 1946, provisional).
Chief Justice Monje Gutiérrez (15 Aug. 1946–9 March 1947).
Dr Enrique Hertzog (10 March 1947–23 Oct. 1949).
Dr Mamerto Urriolagoitia (24 Oct. 1949–15 May 1951).
Gen. Hugo Ballivián Rojas (15 May 1951–8 April 1952).
Dr Victor Paz Estenssoro (16 April 1952–6 Aug. 1956).
Dr Hernán Siles Zuazo (6 Aug. 1956–6 Aug. 1960).

*President:* Dr Víctor Paz Estenssoro became president again on 6 Aug. 1960, following a general election in June in which his party, the Nationalist Revolutionary Movement (in power since 9 April 1952), won decisively.

*Minister of Foreign Affairs:* José Fellman Velarde.

The Cabinet consists of the President and 14 Ministers.

*National flag:* Red, yellow, green (horizontal).

*National anthem:* Bolivianos, el hado propicio (words by I. de Sanjinés; tune by B. Vincenti).

The republic is divided into 9 departments, established in Jan. 1826, with 87 provinces administered by sub-prefects, and 940 cantons (the number varies) administered by corregidores. The supreme authority in each department is vested in a prefect appointed by the President.

**AREA AND POPULATION.** Bolivia is a landlocked state with an area of some 424,160 sq. miles (1,098,580 sq. km). In the series of disastrous wars in the 19th and early 20th centuries its territorial losses to each of 5 neighbouring nations reduced its area from an estimated 1·16m. sq. miles.

Until 1884, when Bolivia was defeated by Chile, she had a strip bordering on the Pacific which contains extensive nitrate beds and at that time the port of Cobija (which no longer exists). She lost this area to Chile; but in Sept. 1953 Chile declared Arica a free port and, although it is no longer a free port for Bolivian imports, Bolivia still has certain privileges.

The following table shows the area and population of the departments (the capitals of each are given in brackets):

| Departments | Area (sq. km) | Estimated 1962 | Census Aug.–Sept. 1950 | Per sq. km 1962 |
|---|---|---|---|---|
| La Paz (La Paz) | 133,985 | 1,140,300 | 948,446 | 8·64 |
| Cochabamba (Cochabamba) | 55,631 | 545,900 | 490,475 | 9·89 |
| Potosí (Potosí) | 118,218 | 609,200 | 534,399 | 5·24 |
| Santa Cruz (Santa Cruz) | 370,621 | 314,300 | 286,145 | 0·88 |
| Chuquisaca (Sucre) | 51,524 | 315,400 | 282,980 | 5·97 |
| Tarija (Tarija) | 37,623 | 141,500 | 126,752 | 3·79 |
| Oruro (Oruro) | 53,588 | 260,700 | 210,260 | 4·95 |
| Beni (Trinidad) | 213,564 | 157,700 | 119,770 | 0·76 |

| Total | 1,098,581 | 3,509,000 | 3,019,031 [1] | 3·20 |

[1] An official estimate allowing for under-enumeration; the total actually recorded was 2,704,165.

Of the total population in 1950, 33·5% was urban.

Population (1962) of the principal towns: La Paz, 352,912; Cochabamba, 92,008; Oruro, 86,985; Santa Cruz, 72,708; Sucre, 54,270; Potosí, 55,233; Tarija, 20,851; Trinidad, 14,505; Cobija, 2,537.

Crude birth rate, 1958, 20·8 per 1,000 population; crude death rate, 6·8; crude marriage rate, 4; infantile mortality (1955), 88·5 per 1,000 live births.

The language of the educated classes is Spanish, that of the Indians, Aymará, Quechua and Guaraní.

**RELIGION.** The Roman Catholic is the recognized religion of the state; the free exercise of other forms of worship is permitted. The Catholic Church is under 2 archbishops (in Sucre and La Paz), 8 bishops (Cochabamba, Santa Cruz, Oruro, Potosí, Coroico, Riberalta, Tarija and Corocoro) and 8 vicars apostolic (titular bishops resident in Cueva, Trinidad, San Ignacio de Velasco, Riberalta and Rurrenabaque). Protestants numbered 43,135 in 1962.

By a law of 11 Oct. 1911 all marriages must be celebrated by the civil authorities. Divorce is permitted by a law enacted on 15 April 1932.

**EDUCATION.** Primary instruction is free and obligatory between the ages of 6 and 14 years. Estimates for 1962 show 808,100 children between 6 and 14 years, of whom 500,755 (62%) attend school; these comprise 363,645 in urban and 444,465 in rural areas. All illiterates between 15 and 50 years are obliged to attend literacy classes. This meant in 1962, 1,020,553, or 60% of the group numbering 1,710,950. In 1962 instruction in the towns was given by: 52 public and 55 private kindergartens, with 18,826 pupils and 451 teachers; 660 public and 209 private elementary schools, with 282,613 pupils and 8,195 teachers; 141 public and 93 private secondary schools, with 52,756 pupils and 2,955 teachers; 5 state teachers' training colleges, with 2,267 students and 158 teachers. Rural instruction was given at 4,039 public elementary schools, with 223,098 pupils and 5,871 teachers. Details of rural secondary schools are not available. There are (1962) 10 public rural teachers' schools with 1,933 pupils and 132 teachers; and 2 private with 115 pupils and 15 teachers. Also there are 398 public rural literacy courses with 10,704 pupils and 250 voluntary literacy courses with 4,500 pupils. At Sucre, Oruro, Potosí, Cochabamba, Santa Cruz, Tarija and La Paz are universities; La Paz is the most important of them while the San Francisco Xavier University at Sucre is one of the oldest in America, having been founded in 1624.

*Cinemas* (1962). Cinemas numbered 84, with seating capacity of 42,918.

*Newspapers* (1962). There were 13 daily and 6 weekly newspapers with an aggregate daily circulation of about 100,000.

**JUSTICE.** Justice is administered by the Supreme Court, superior district courts (of 5 or 7 judges) and the courts of local justices. The Supreme Court, with headquarters at Sucre, is divded into two sections, civil and criminal, of 4 justices each, with the Chief Justice presiding over both. Members of the Supreme Court are chosen on a two-thirds vote of Congress. They nominate the district judges and largely administer the judiciary budget.

**FINANCE.** The foreign-exchange revenue is derived mainly from sales of tin and other non-ferrous metals (furnishing about 92% of export revenue in 1962), but oil production and exports are of increasing importance. Estimated revenue and expenditures in 1,000 *pesos bolivianos* were as follows:

| | *1959* | *1960* | *1961* [1] | *1962* [1] | *1963* [1] |
|---|---|---|---|---|---|
| Revenue | 368,875,821 | 414,610,678 | 430,000,000 | 476,000,000 | 510,000,000 |
| Expenditure | 368,875,821 | 425,458,106 | 430,000,000 | 491,000,000 | 510,000,000 |

[1] Estimated.

Attempts to manage the tin industry on state-created moneys severely inflated the currency. On 31 Dec. 1954 the deficit of the state-owned mining corporation, Comibol, was Bs 14,747m. and that of the Banco Minero (which buys the ore from the smaller private mines) was Bs 6,223m.

The fiscal history of Bolivia until 1956 was one of constant deficits arising from extraordinary expenditures outside the budget. On 15 Dec. 1956 a currency stabilization programme abolished artificial exchange rates, import licensing and price subsidies.

Chief items of expenditure proposed in the 1963 budget were (in Bs 1m.):

Education, 76,500; national defence, 65,900; government and immigration, 40,000; rural affairs, 42,117; labour and social security, 19,500; foreign affairs, 16,951; public health, 17,760. Aid from the USA in 1962 was expected to amount to $10m.

The total public debt of Bolivia (internal and external) on 31 Dec. 1962 was equal to $200,875,021.

**DEFENCE.** Bolivia is divided into 7 military districts, with divisional headquarters in Viacha, Oruro, Villa Montes, Camiri, Roboré, Riberalta; regional HQ are located at La Paz, Sucre, Tarija, Potosí, Trinidad and Cobija.

The law of 1943 provided for a permanent force of 15,000 men, including the police force and the frontier carabineers, but the standing army numbers 8,000 to 10,000 men. Military service is compulsory for all males from the 19th to the 49th year. Those from 19 to 25 years of age serve not more than 2 years with the standing army; those from 19 to 25 years are employed in depot service; 25 to 32 in the ordinary reserve, returning at some time for 3 months' service; 32 to 40, with the 'extraordinary' reserve; and from then until 49 with the Territorial Guard.

The Bolivian Air Force, established in 1923, is organized into 4 groups, and comprises staff, bomber, fighter, transport, training, reconnaissance, maintenance and supply commands. Equipment, of US manufacture, is obsolescent, the most effective machines being 4 F-51D Mustang piston-engined fighters bought in 1960.

**PRODUCTION.** Two-thirds of the population depend upon agriculture and only 60,000 (less than 2%) on mining. Development programmes for agriculture and industry are being undertaken with the financial and technical aid of the US Government and the United Nations. A British tropical agriculture mission began work at the end of 1962.

*Agriculture.* The extensive and undeveloped region of Bolivia lying east of the Andes comprises about three-quarters of the entire area. It is estimated that about 4·94m. acres are under cultivation, but rubber, quinine, cattle and hides are the principal products and agriculture is in a backward condition.

Basic foodstuffs, including wheat, rice and sugar, have still to be imported, but self-sufficiency in the latter two commodities may be attained by 1965. Output in metric tons in 1963 was estimated at: Sugar-cane, 1,161,600; refined sugar, 60,000; rice, 40,000; coffee, 3,150; maize, 260,000; potatoes, 700,000.

Bolivia ranks as the second rubber-exporting country in South America, next to Brazil; exports, 1961, being 1,507 metric tons, worth US$948,264. Tropical forests with woods ranging from the 'iron tree' to the light palo de balso await exploitation. In 1962 the Forestry Service announced proved reserves of 46·3m. hectares, plus a like amount available for immediate development. The public lands of the state have an area of about 245,000 sq. miles, of which 104,000 sq. miles are reserved for special colonization. In 1961, 130 concessions produced 9·1 m. sq. ft; 11,237 tons of sleepers and lumber, valued US$393,982, were exported.

A colony of Jewish refugees was established in 1940 at Buen Tierra, 60 miles east of La Paz, and, more recently, Japanese and Okinawan settlements in the region of Santa Cruz.

*Mining.* Mining is the most important industry. Bolivia normally produces 15% of the total tin output of the world and ranks third in the production of this metal. Tin mines are at altitudes of from 12,000 to 18,000 ft, where few except native Indians can stand the conditions; transport is costly. Bolivian tin is extracted by shaft-mining, frequently very deep; the ore yields only 3·5% or less of tin and is very refractory; tin is exported in concentrates called *barrilla*, through Pacific ports for refining, chiefly at Liverpool.

A decree of 31 Oct. 1952 nationalized the mining companies of the Patiño, Hochschild and Aramayo groups, which were responsible for about 60% of Bolivia's mineral output. Provisional compensation proposed was: Patiño, $7·5m.; Hochschild, $9·25m.; Aramayo, $4,976,324. Agreements were concluded during 1953 for the gradual payment of compensation on a sliding scale based on prices received for Bolivian tin abroad, but a final settlement has still to be negotiated. The state industry is being run by the Corporación Minera de Bolivia. Co-operative mines at Tipuani produce over 100 kg of gold per month.

There are petroleum deposits in the area between the Argentine frontier and the north-west territory bordering Peru. Output of crude oil by the state oil concern, 1961, 430,257 cu. metres; 1962, 413,792 cu. metres. Following the completion of a pipeline from the Camiri field to the refinery at Cochabamba, Bolivia slowly reached (in Jan. 1954) a volume of supplies making her self-sufficient, with a surplus for export to neighbouring countries, especially Argentina.

Several foreign oil companies are engaged in exploration; one (Gulf Oil) has found appreciable deposits of petroleum and natural gas near Santa Cruz. A pipeline is to be built from Caranda to the Pacific Coast to carry about 25,000 bbls daily.

The miners are organized in trade unions; these have their own militia and are an important political force.

*Industry.* The president of the National Chamber of Industry in mid-1962 reported that of 1,600 industrial plants in 1955, only 898 remained; production had fallen by 36%, and less than 47% of machinery installed was being used. Leather-working, cement, glass, timber, furniture and building materials are most important.

*Power.* Electric power production is expanding; output in 1961 was estimated at 545·4m. kwh.

**COMMERCE.** The value of imports and exports in US$ has been as follows:

| | *1958* | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|
| Imports . . . | 79,592,482 | 64,985,642 | 71,476,639 | 73,217,000 | 93,176,000 |
| Exports . . . | 64,736,775 | 77,666,766 | 67,827,931 | 76,136,000 | 76,735,000 |

Tin ore has until recent years constituted in value about 75% of Bolivia's exports. Total exports, 1962, of minerals, in concentrates, ingots or solder, in metric tons were valued at US$70,212,525, of which: Tin, 21,837 (US$54m.); wolfram, 1,523 ($1·6m.); lead, 18,601 ($3·4m.); copper, 2,399 ($1·4m.); zinc, 3,647 ($0·9m.); antimony, 6,643 ($2·3m.); silver, 116 ($3·9m.); gold, 1,090 kg ($1·2m.); bismuth, 295 ($0·8m.). Large deposits of salt are found near Lake Poopó and in the south of Bolivia.

Bolivia having no seaport, imports and exports pass chiefly through the ports of Arica and Antofagasta in Chile, Mollendo and Matarani in Peru, through La Quiaca on the Bolivian–Argentine border and through river-ports on the rivers flowing into the Amazon. The chief imports are sugar, lard, rice, flour, cooking oil, iron and steel products, mining machinery, motor vehicles, pharmaceuticals, paper products and textiles. In 1961 imports (in US$) were 32,759,586 from USA; from Germany, 9,493,647; from Argentina, 6,599,775; from Great Britain, 3,842,546; from Japan, 5,768,403; from Netherlands, 3,105,176; from Chile, 3,105,003.

Import and export licensing, and price subsidies and controls were abolished on 15 Dec. 1956; but in 1963 a measure of import control was reimposed.

Total trade between UK and Bolivia (British Board of Trade returns) for 5 years (in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . | 13,592,016 | 11,792,310 | 12,511,837 | 12,416,521 | 11,962,370 |
| Exports from UK . | 890,882 | 1,120,887 | 1,081,095 | 1,580,131 | 1,384,932 |
| **Re-exports from UK.** | **13,566** | **33,764** | **26,774** | **31,328** | **26,459** |

**COMMUNICATIONS.** *Shipping.* Traffic on Lake Titicaca between Guaqui and Puno is carried on by the steamers of the Peruvian Corporation. About 12,000 miles of rivers, in 3 main systems (Beni, Pilcomayo, Titicaca–Desaguadero), are open to navigation by light-draught vessels.

*Roads.* A motor highway, 312 miles, was completed in Dec. 1953 (with the aid of a $28·7m. loan (plus $4·7m. for asphalting) from the Export-Import Bank) from the highlands of Cochabamba to the lowland farming region of Santa Cruz. Economically this road, laboriously constructed through a most difficult section of the Andes, is Bolivia's most important, for it assists towards the abolition of costly food imports. Of other main highways (unmetalled) there is one from La Paz through Guaqui into Peru, another from La Paz, *via* La Quiaca, into Argentina, passable throughout the year except at the height of the rainy season, and others from Villazon to Villa Montes *via* Tarija, and from Potosí to Sucre, passable during the dry season. The total length of the road system is about 15,848 km (1962). Motor vehicles registered in 1962, 28,165 (10,046 lorries and pick-up trucks, 7,270 cars and taxis, 9,788 jeeps and 1,061 buses).

*Railways.* The total length of railway open in 1962 was 3,745 km, of which 2,361·2 km were stated-owned. The principal line is the Antofagasta (Chile) and Bolivian Railway, with a total length in Bolivia of 707·83 km. The Arica–La Paz line (447·4 km, of which 238·2 km are in Bolivia) is state-owned. The railway (680 km) from Santa Cruz to Corumbá (Brazil) was completed in Dec. 1953, the bridge over the Rio Grande in 1962. Four other new lines are under construction, including 500 km from Santa Cruz to Yacuiba (Argentina); this was almost complete at the end of 1963.

*Post.* In Bolivia there were, in 1962, 201 post offices, 591 telegraph and telephone offices, 88 for public service; and 321 state-owned wireless offices. There is telephone service in the towns of La Paz, Cochabamba, Oruro, Potosí and Santa Cruz, with 19,000 telephones. There are 41 broadcasting stations, of which one is state-owned.

*Aviation.* The national airline is Lloyd Aéreo Boliviano; in 1961 a total of 14,001 hours were flown, carrying 175,542 passengers and 13,921 metric tons of freight. Pan American-Grace Airways (PANAGRA) links Bolivia with the USA and nearly all South America. Braniff International Airways runs regular flights between La Paz and Lima, Buenos Aires and North America. In July 1959 Lloyd Aéreo Boliviano opened a regular service between La Paz and Buenos Aires, and now serves Lima and Arica also.

**MONEY.** On 1 Jan. 1963 the *Boliviano* (equalling US$11,865) was replaced by a new currency unit, the *peso boliviano* ($b.) at the rate of Bs1,000 = $b.1. Current exchange rates are $b.11.86 = US$1 and $b.33.20 = £1.

At the end of 1962 reserves of gold and foreign exchange at home and abroad amounted to US$12m.

**BANKING.** The Banco de la Nación Boliviana was inaugurated at La Paz in 1928 as a central bank of issue and in 1939 was taken over by the state. Beginning 1 Jan. 1946, its assets and liabilities were divided between an Issue Department and a Banking or Commercial Department. In Bs 1m., note circulation, 31 Dec. 1961, 419·506; holdings of gold and foreign exchange totalled US$12,249,922, against obligations of US$24,017,351.

Apart from the Central Bank (with 20 branches) there are several domestic banks and Peruvian, Brazilian and Argentine banks.

**WEIGHTS AND MEASURES.** The metric system of weights and measures is used by the administration and prescribed by law, but the old Spanish system is also employed.

## ESTADOS UNIDOS DO BRASIL

**HISTORY.** Brazil was discovered on 3 May 1500 by the Portuguese Admiral Pedro Alvares Cabral, and thus became a Portuguese settlement; in 1815 the colony was declared 'a kingdom', and on 13 May 1822 Dom Pedro, eldest surviving son of King João of Portugal, was chosen 'Perpetual Defender' of Brazil by a National Congress. He proclaimed the independence of the country on 7 Sept. 1822, and was chosen 'Constitutional Emperor and Perpetual Defender' on 12 Oct. 1822.

**CONSTITUTION AND GOVERNMENT.** On 15 Nov. 1889 Dom Pedro II (1825–91) was dethroned by a revolution, and Brazil declared a republic.

[1] Owing to illness did not take office; died 16 Jan. 1919.

The present constitution, adopted on 18 Sept. 1946, restored many features of the old one of 16 July 1934 (*see* THE STATESMAN'S YEAR-BOOK, 1949, p. 782), including a bicameral legislature, the Senate elected for 8 years and the Chamber of Deputies (404 members) for 4 years. The President and Vice-President are elected for 5 years and are not eligible for successive terms.

Freedom of speech and press are not absolute: war propaganda, the teaching of 'subversive doctrines' and the dissemination of race or class prejudices are banned, as also are political parties opposed to democracy, the existing multi-party system or to 'fundamental human rights' which include the right to own private property. The Supreme Electoral Tribune on 7 May 1947 decided by 3 votes to 2 that the Communist Party is illegal and may not appear on the ballot.

A novel provision of the constitution is that no taxation may be levied upon the royalties of authors or the incomes of professors or journalists.

Under the new electoral code the vote is compulsory for men and employed women between the ages of 18 and 65 and optional for unemployed women and persons over 65 and for officers of the armed forces. Enlisted men and illiterates (who comprise 57·4% of the adult population) may not vote. An amendment of 1961 introduced a parliamentary system, which was rejected by a referendum on 6 Jan. 1963. Registered electors, 1960, numbered 18,560,699. Several women hold responsible government offices.

*President of the Republic:* Dr João Belchior Marques Goulart, assumed office 7 Sept. 1961.

*Foreign Minister:* João Augusto de Araujo Castro.

There are Secretaries of State at the head of the following Ministries: Finance; Justice and Interior; Foreign Affairs; Transport, Communications and Public Works; Agriculture; Labour; Education and Culture; Public Health; Industry and Commerce; Mines and Power; and the Military Ministries of War, Marine and Air.

*National flag:* Green, with yellow lozenge enclosing a blue sphere, with 21 white stars, of which 5 form the southern cross, and the motto *Ordem e Progresso.*

*National anthem:* Ouviram do Ipiranga (words by J. O. Duque Estrada; tune by F. M. da Silva).

LOCAL GOVERNMENT. Brazil consists of 22 states, 4 federal territories (Rondônia, Rio Branco, Amapá, Fernando de Noronha) and 1 federal district. Each state has its distinct administrative, legislative and judicial authorities, its own constitution and laws, which must, however, agree with the constitutional principles of the Union. The states may unite or split or form new states. Taxes on interstate commerce, levied by individual states, are prohibited; but state export taxes on products shipped abroad, limited to 5% *ad valorem*, are permitted. The governors and members of the legislatures are elected, but magistrates are appointed and are not removable from office save by judicial sentence.

[5] Including the islands of Trindade and Martim Vaz.

[6] 3,286,000 sq. miles.

Density of census population, 1960, was about 9 per sq. km. Estimated population in Oct. 1963 was 77·5m.

The 1950 total excluded 31,960 questionnaires not received; the UN tables excludes them from the total. The 1950 tables showed 25,885,001 males and 26,059,396 females; also 32,027,661 whites (61·7%), 5,692,657 Negroes (11%), 13,786,742 mulattoes (26·5%), 329,082 Asiatics and 108,255 unknown. Of the 1950 census total of those 15 years of age or older (30,249,423), 11,777,572 were single, 16,371,303 married, 1,992,312 widowed, 40,164 divorced or separated and 68,072 not specified. Of the total population, 50,727,113 were Brazilians by birth, 128,897 naturalized, 1,085,278 aliens and 3,100 unknown. The urban and suburban population comprised 36·2%.

The language is Portuguese.

The new capital, Brasília, was inaugurated 21 April 1960. The federal district (5,814 sq. km) was detached from the west-central state of Goiás, about 1,000 km north-west of Rio de Janeiro. Its population, 1 July 1960, was 141,742.

On 1 Sept. 1960 the census population of the principal cities was: Rio de Janeiro, 3,307,163; São Paulo, 3,825,351; Recife, 797,234; Salvador, 655,735; Pôrto Alegre, 641,173; Belo Horizonte, 693,328; Belém, 402,170; Santos, 265,753; Fortaleza, 514,818; Niterói, 245,467; Curitiba, 361,309; Maceió, 170,134; Manaus, 175,343; João Pessoa, 155,117.

The number of immigrants between 1820 and 1953 was over 5m., but it is estimated that only one-half remained. Immigrants in recent years have numbered:

| | *1958* | *1959* | *1960* | *1961* |
|---|---|---|---|---|
| Portuguese | 21,928 | 17,345 | 13,105 | 15,819 |
| Japanese | 6,586 | 7,123 | 7,746 | 6,824 |

| Others | — | 9,107 | 1,202 | 8,640 |
| Total | 49,839 | 44,520 | 40,507 | 43,589 |

Each nationality has its immigration restricted to 2% per year of the number calculated for the previous 50 years, except that the quota may be increased to 3,000 per annum, providing that 80% of the immigrants are 'farmers or rural technicians'. Settlements of foreigners must include 30% of Brazilians.

**RELIGION.** The population is overwhelmingly Roman Catholic (93% at the census, 1950). In 1889 connexion between Church and State was abolished; it was restored by the 1934 constitution, but again abolished in 1946. Brazil has a representative at the Vatican. In 1957 there were 20 ecclesiastical provinces and archidioceses, and 80 dioceses with 3,805 parishes. In 1950 Protestants numbered 1,741,430 (1962: 4m.); Orthodox Christians, 41,156; Jews, 69,957; Buddhists, 152,572; Spiritists, 824,553; avowed atheists, 274,236.

**EDUCATION.** Elementary education is compulsory. In 1950 (census) there were 18,588,722 persons 5 years of age or over who could read and write; this was 42·6% of that age group; 54·7% of the literates were men.

There were in 1960, 95,938 primary school units with 7,458,000 pupils; 753 elementary school units with 36,395 pupils; 8,081 intermediary units with 1,258,565 (secondary, commercial, industrial, agricultural and normal-school) pupils; and 1,571 higher schools with 102,971 pupils.

The Government undertakes to provide, in part, for higher or university instruction, but some institutions are maintained by the states, and some by private associations, while primary schools are chiefly maintained and supervised, either by the states or by the municipalities and private initiative. There are 24 official universities, including the University of Brazil in Rio de Janeiro (founded on 7 Sept. 1920), the University of Bahia (founded in 1946), the University of Recife (1946), the University of Paraná (1946), the Rural University (1948, State of Rio de Janeiro), the University of São Paulo (1934), the University of Minas Gerais (1927), the University of Rio Grande do Sul (1934) and the University of Brasília (1960). There are also 8 Catholic universities in Rio de Janeiro (1946), São Paulo (1946), Rio Grande do Sul (1948), Pernambuco (1951), Minas Gerais (1958), Bahia, Guanabara and Paraná.

**JUSTICE.** There is a supreme federal Court of Justice at Brasília. It has 11 ministers, but may have more, on its own proposal subject to legislative approval; all are appointed by the President with the approval of the Senate. There are also federal tribunals in each state and the Federal District and in the Territories, as well as 'electoral courts' to protect the elections, and labour tribunals. Justice is administered in the states in accordance with state law, by state courts, but in Brasília federal justice is administered. Judges are appointed for life. There are also 3,238 magistrates and 5,425 justices of the peace. There is no divorce, but there is a form of judicial separation.

**FINANCE.** Receipts and expenditures for the federal government (excluding states, Federal District and municipalities) for calendar years have been as follows in 1m. cruzeiros (paper) (the cruzeiro, beginning 1947, 5·44 cents US; free rate, June 1959, ranged from 123·3 to 126·25 cruzeiros = US$1):

The Bank of England (1955) placed the par value of Brazilian investments held by residents in the UK in 1953 (thus excluding securities repatriated by Brazilians) at £40m. (in 1938, £164m.) on which interest and dividends received, 1953, were, £1·2m. (in 1938, £1·6m.).

**DEFENCE.** *Army.* Under the constitution of 1934, military service is compulsory for every Brazilian man from 21 years of age to 45. The terms of service are 9 years (from the 21st to the 30th years of age) in the Army 'first line' (1 in the ranks, the rest in the reserve) and 14 years (from the 30th to the 45th years of age) in the army 'second line' (7 in the 'second line' and 7 in the reserve of the same). The reservists are called up for training annually for 4 weeks, besides which there is rifle practice once a month. The men in the Territorial Army also have an annual training of 2 to 4 weeks; the peacetime strength is about 200,000 men.

In 1948 the US sent an Army, Navy and Air Force mission to Brazil to establish a college there for training senior officers in combined operations. In May 1953 the National Congress ratified the agreement for US military assistance, signed on 15 March 1952.

The 5 operational groups comprise an interceptor group equipped with Meteor jet-fighters, 2 fighter-bomber groups of F-47D Thunderbolts and 2 light bomber groups with B-25 Mitchells and B-26 Invaders. There are also a maritime reconnaissance squadron with P2V-7 Neptunes and an air/sea rescue squadron with SA-16 Albatross amphibians. Equipment of transport and second-line units is predominantly American in origin, but 6 Avro 748 turboprop transports were bought from Britain in 1962–63 and locally-built Fokker Instructors have superseded older types at flying schools; 30 French MS 760 Paris light jet liaison aircraft were bought in 1961. Total strength is estimated at more than 30,000 personnel and 650 aircraft.

The 4 states of São Paulo, Paraná, Espírito Santo and Minas Gerais are the principal districts for coffee-growing. Large plantations or fazendas with more than 100,000 trees are the rule. Output, 1961, from 4,383,820 hectares, 4,457,409 metric tons (estimate). Exports, 1962, were 982,577 metric tons.

Export of cocoa was nationalized in May 1943, but in 1952 reverted to private enterprise. Bahia furnishes 90% of the output; in 1961 total output was 155,901 metric tons from 474,270 hectares. Two crops a year are grown. The US takes one-half of the crop. Castor-bean output usually exceeds 150,000 metric tons; output, 1960, 203,220 metric tons. The plant grows wild.

Tobacco output was 167,028 metric tons in 1961, of which 48,771 metric tons were exported, and 41,783 metric tons in 1962.

Sugar production, 1961, was 3,354,137 metric tons. Exports, 1962, 445,263 metric tons. Output per hectare (40 metric tons of cane) is low compared with 50, 120 and even 160 metric tons produced elsewhere.

Brazil now ranks second only to the US in production of oranges (estimate, 1961, 1,766,424 metric tons). Output of bananas, 1961, estimate, 5,329,900 metric tons. Cotton lint and seed, estimate 1961, 1,818,445 metric tons from 2·8m. hectares. Exports of cotton lint, 1962, 235,926 metric tons. Brazil formerly furnished only 10% of her own requirements in wheat (average output, 1934–38, 144,000 metric tons); marketed, 1959, 610,884 metric tons; imports, however, remain heavy, 2,191,849 metric tons (1962). Rice is important; output (rough rice), 1961, was 5,392,477 metric tons.

Rubber is another natural product of the country, chiefly in the Acre territory and the states of Amazonas and Pará. Output, 1961, 732,365 metric tons (gross weight); peak reached in 1912 (when rubber realized US$3 a lb.) was 42,510 gross tons. Output of tyres in local factories has risen from 421,765 units (tyres and tubes) in 1940 to 16,586,626 in 1961. Brazilian consumption of rubber for all purposes in 1955 was 46,472 metric tons, of which tyres and tubes would take three-quarters. Brazil is the chief source of carnaúba wax, used for electric insulation and gramophone records, exporting 9,478 tons in 1962. Caroá fibre is grown as a substitute for Indian jute; production, 1961, 3,895 metric tons. Jute output, 1961, estimate, 38,891 metric tons. Plantations of tung trees established in 1930 (4m. trees in 1946) are beginning to yield tung oil in commercial quantities; output of tung, estimate, 1961, 1,517 (1960: 737) metric tons.

Brazil now ranks ahead of Argentina as livestock producer; numbers (in 1,000), 1961, showed 76,176 cattle, 50,051 swine, 11,560 goats, 8,374 horses, 2,256 asses and 4,205 mules. In 1959, 7,489 cattle, 294 calves, 1,453 sheep and lambs, 1,473 goats and 7,109 pigs were slaughtered for meat; total was barely sufficient for domestic needs.

*Fisheries.* The fishing industry (totalling a fleet of 121,271 vessels) is owned by the Government; the catch in 1961 was 330,140 metric tons.

*Mining.* Brazil is the only source of high-grade quartz crystal in commercial quantities; exports in 1962, 1,577 metric tons. It is an important source of industrial diamonds (exports, 1962, 15,171 grammes); the second largest wester producer of chrome ore (reserves of 4m. tons; output, 1961, 15.456; 1962, 9,115 metric tons); fifth in the output of mica (5,129 tons in 1961); third in zirconium, 6,718 tons; she is the largest producer of beryllium, output (1961), 1,528, (1962) 1,497 metric tons; graphite, 1,451 metric tons, titanium ore (1961: 222 tons) and magnesite, 76,702 metric tons. Along the coasts of the states of Rio de Janeiro, Espírito Santo and Bahia are found monazite sands containing thorium; reserves are estimated at 100,000 tons. Manganese ores of high content are important (reserves in the Amapá region alone are estimated at 10m. metric tons); exports, 1962, 759,915 metric tons. Exports of tungsten ore and concentrates, 1962, totalled 750 metric tons. Mine production of lead, (1961) 15,000 (1962) 17,500 short tons. Asbestos production, (1961) 18,700, (1962), 18,750 short tons. Coal deposits exist in Rio Grande do Sul, Santa Catarina, Paraná and São Paulo. Total reserves are estimated at 5,000m. tons; output (1961), 2·39m. metric tons.

Iron is found chiefly in Minas Gerais, notably the Cauê Peak at Itabira. The Government is now opening up what is believed to be one of the richest iron-ore deposits in the world, with estimated reserves of 35,000m. tons, of which half rival the Swedish ores in iron content (about 68·5%) and have lower silica and phosphorus contents. Total output of iron ore, 1961, mainly from the Cia. Vale do Rio Doce mine at Itabira, was 9,781,673 (1962: 9,999,482) metric tons. The National Iron and Steel Co. at Volta Redonda, State of Rio de Janeiro, aims to furnish 59% of Brazil's steel requirements. Brazil's total output included: Pig-iron, (1961) 1,820,710, (1962) 1,496,550 metric tons; ingots and castings, (1961) 1,995,291, (1962) 2,168,330 metric tons. Salt output (1961), 888,942 metric tons. Diamond districts are Diamantine, Grão Mogol, Chapada Diamantina, Bagagem, Goiás, Mato Grosso and other states.

*Industry.* The most important manufacturing industry in Brazil is cotton weaving, which employs about 25% of all industrial workers; nearly 50% of the factories are in São Paulo and another 28% in the Federal District and in Minas Gerais. The 423 mills, 1950, had 3·3m. spindles (27% modern) and 100,000 looms (7% automatic). Output of cotton textiles, 1958, was 2,281m. metres of cloth. Exports of cotton piece-goods, 1958, were 790 metric tons (289 tons in 1957). Rayon yarn output, 1954, was 28,200 metric tons. In all, about 650 textile-mills are working. Local production of machinery, including automobiles (25,352 in 1961) and tractors (1,678 in 1961), is steadily increasing.

Brazil's potential capacity for electric power production is estimated at 14·5m. kw .(19·5m. h.p.) which is the fourth largest in the world. Only 5·1m. kw. had been developed by 1961. Consumption, 1961, 19,630m. kwh. Of the total capital invested in industrial concerns (US$1,779,786,350), 49% was foreign-owned. The entire petroleum industry, including production, importation and refining, was placed under federal control in April 1938; there are, 1963, 9 refineries. The country imports substantial amounts (9,961,213 metric tons in 1962) to supplement its total production. Crude oil output 1961, 34·8m. bbls; consumption, 92·1m.

A big paper-mill, reported to be the largest pulp-and-paper mill in South America, is at Monte Alegre, Paraná. Brazil's output of paper, 1960, was 474,383 metric tons.

**COMMERCE.** In 1957 Brazil modernized her 20-year-old tariff (at present duties are levied mainly on volume and not on values) in order to protect her infant industries and to increase government revenue. Her present tariffs furnish 12% of the Government's revenue (*see* p. 24 under GATT). She ratified the LAFTA Treaty of Montevideo on 3 Feb. 1961 (*see* p. 49).

**COMMUNICATIONS.** *Shipping.* Inland waterways, mostly rivers, are open to navigation over some 21,944 miles. Rio de Janeiro and Santos are the 2 leading ports; there are 13 other large ports. Bolivia and Paraguay have been given free ports at Santos. During 1960, 9,175 vessels with tonnage of 28·41m. entered the ports of Rio de Janeiro and Santos; in 1961, 7,983 vessels, tonnage 28,042,000.

Brazilian shipping, 31 Dec. 1960 (registered with Lloyds), amounted to 497 vessels (over 100 gross tons) of 1,307,944 gross tons. Petrobrás, the government oil monopoly, took over the government tanker fleet of 26 vessels in 1958; total tanker fleet in 1961 was 54 vessels of 472,359 gross tons.

*Railways.* Railway history in Brazil begins in 1854. In 1960 the total length of railways was 38,287 km. The Central Brazil Railway (3,780 km), one of the principal railways, is owned by the State; it joins up the railways of Brazil with those of Uruguay, Argentina and Paraguay, and is being electrified. Four Anglo-Brazilian railways have a length of 3,165·5 miles; 3 of the 4 were purchased in 1949 by the Brazilian Government for £14,235,000. Brazilian railways to-day operate over tracks of 5 different gauges and handle annually only 39m. metric tons or 59% of the 66m. tons of merchandise needing transport. The railways, in 1961, transported 456,563,000 passengers, 41,125,000 tons of freight and 4,092,000 animals.

*Roads.* There are (1961) 499,950 km of highways. In Dec. 1960 Brazil (excluding Brasília) had 1,043,673 motor vehicles, including 646,681 passenger cars and 396,992 commercial vehicles.

*Post.* Of the telegraph system of the country, about half, including all interstate lines, is under control of the Government. There are 2,516 telegraph offices. Telephone instruments in use, 31 Dec. 1962, were 1,152,115. In 1960 there were 735 broadcasting and 15 television stations.

*Aviation.* Twenty-seven companies (11 foreign) furnish air-mail and passenger services. Air mileage, 1960, covered 145,831,901 km; passengers numbered 4,124,047; freight carried amounted to 101,079 metric tons; luggage, 48,074 metric tons, and mail, 3,935 metric tons.

**MONEY.** In 1948 Brazil informed the International Monetary Fund that its exchange rate would be 18·5 cruzeiros to the US$, making the cruzeiro equal to 5·40541 cents. In addition, there are free-market rates for non-trade operations only and official rates for exports and imports.

Beginning 1 Nov. 1942, the original currency unit, the *milreis*, was renamed the *cruzeiro* (Cr.$), composed of 100 *centavos*. Metallic currency, 1956, consists of 1 and 2 cruzeiros and 10, 20 and 50 centavos, all of copper–aluminium–zinc, copper–nickel or (1957) of 99·5% aluminium. Notes are of the value of 1, 2, 5, 10, 20, 50, 100, 200, 500, 1,000 and 5,000 cruzeiros.

Since the devaluation of sterling in 1949, the official rates have become 51·408 cruzeiros (buying) and 52·696 (selling) for £1; free rate, Oct. 1963, 3,301.

**BANKING.** The Bank of Brazil (founded in 1808 and reorganized in 1906, with an authorized capital of 1,200m. cruzeiros) is not a central bank of issue but a closely controlled commercial bank; it had 501 branches in 1962 throughout the republic (and branches in Asunción, Montevideo, La Paz and Buenos Aires). On 31 Dec. 1961 deposits were 409,536m. cruzeiros. The country's note circulation, 31 Dec. 1963, was 888,800m. cruzeiros, compared with 4,971m. at the end of 1939. Since Sept. 1939 gold and dollar supply has risen from US$40m. to US$420m., of which the government's gold was $288m. in May 1961.

Banking institutions numbered 339, with 5,581 agencies in Dec. 1963. All banks (including the Bank of Brazil) had on 31 Dec. 1961 capital and reserves of 90,410m. cruzeiros, deposits of 1,183,434m. (compared with the Bank of Brazil's 409,536m.) and loans of 565,821m. On 31 Dec. 1961 all the domestic banks had total assets of 4,981,976m. and the 43 foreign-owned institutions or agencies, 108,335m.

**WEIGHTS AND MEASURES.** The metric system has been in use in all official departments since 1862. It was made compulsory in 1872, but the ancient measures are still partly employed in remote districts. # BULGARIA

## NARODNA REPUBLIKA BULGARIA

**HISTORY.** The Principality of Bulgaria and the Autonomous Province of Eastern Rumelia, both under Turkish suzerainty, were constituted by the Treaty of Berlin, 13 July 1878. Prince Alexander I of Battenberg (the British branch of the family in 1917 adopted the name of Mountbatten), a Hessian Prince and a nephew of Tsar Alexander II of Russia, became the first ruler (1879–86). In 1885 Rumelia was reunited with Bulgaria. On 22 Sept. (5 Oct.) 1908 Bulgaria declared her independence of Turkey, and Prince Ferdinand of Saxe-Coburg-Koháry, who had been elected prince on 7 July 1887, assumed the title of Tsar of the Bulgarians. This was recognized by the Porte and the Powers in April 1909. Tsar Ferdinand abdicated on 3 Oct. 1918 and was succeeded by his son, Tsar Boris III, who died on 28 Aug. 1943. His son, Simeon II (born on 16 June 1937), lost his throne as a result of the referendum held on 8 Sept. 1946. 3,801,160 votes were cast in favour of a republic, 197,176 votes in favour of the monarchy; 119,168 voting papers were invalid.

**CONSTITUTION AND GOVERNMENT.** The Bulgarian People's Republic was proclaimed by the National Assembly on 15 Sept. 1946.

The constitution of 4 Dec. 1947, last amended in 1961, provides for a single-chamber National Assembly. The highest organ of the state is a collective body called the Presidium, which consists of a chairman, 2 deputy-chairmen, a secretary and 15 members; it is elected by the National Assembly. Supreme power is vested in the National Assembly, which consists of deputies elected by direct, secret and universal suffrage (everybody over the age of 18 being eligible to vote and hold office). One deputy is elected per 25,000 of the population. The Legislature's term is 4 years; it is to meet at least twice every year. The National Assembly also elects the ministers and the Presidium who are responsible to it.

A general election was held on 27 Oct. 1946. The Fatherland Front, composed of the Workers (Communist), Agrarian, Socialist and Zveno Parties, and non-party independents, obtained 364 seats (277 of which went to the Communists) and the opposition 101. On 26 Aug. 1947 the oppositional Agrarian Union was dissolved; its leader, Nicola Petkov, was sentenced to death and hanged on 23 Sept. The Socialist Party was merged with the Workers' Party in Aug. 1948, and the Zveno Party dissolved itself.

The Fatherland Front was transformed, in Feb. 1948, into a unified mass organization with individual memberships. Inside the Fatherland Front, there remain two political parties, namely the Bulgarian Communist Party (484,255 members in June 1958) and the Agricultural People's Union, the latter comprising the remnants of the Agrarian Party.

On 1 Jan. 1961 the membership of the Bulgarian Communist Party was 515,175 (full and candidate); Young Communist League, 974,257; Agrarian Union, 120,000; Fatherland Front, 3,372,320.

At the elections of 25 Feb. 1962, 99·91% of the electorate voted for the candidates of the Fatherland Front; there were no other candidates. The National Assembly consists of 321 deputies.

*Head of State:* Dimiter Ganev, elected 30 Nov. 1958, re-elected 15 March 1962.

The highest policy-making and executive body of the Bulgarian Communist Party is its Politburo, consisting of 9 full members and 3 candidate-members. The Politburo is elected by and from the Central Committee.

The Politburo was in March 1964 composed as follows: FULL MEMBERS: Todor Zhivkov (*1st Secretary, Central Committee, Chairman of the Council of Ministers*), Dimitar Ganev (*Chairman, Presidium of the National Assembly*), Boyan Bulgaranov (*Secretary, Central Committee, Communist Party*), Army General Ivan Mihailov (*Deputy Chairman, Council of Ministers*), Encho Staikov (*Chairman, Executive Committee of the National Council of the Fatherland Front*), Mitko Grigorov (*Secretary, Central Committee; Minister without Portfolio*), Stanko Todorov (*Deputy Chairman, Council of Ministers,* in charge of economic co-operation within the Soviet bloc), Boris Velchev (*Secretary, Central Committee, and Chairman, Committee for Party and State Control*), Zhivko Zhivkov (*1st Deputy Chairman, Council of Ministers*). CANDIDATE MEMBERS: Maj.-Gen. Dimitar Dimov (*Chairman, Control Commission of the Central Committee of the Communist Party*), Pencho Kubadinsky (*Deputy Chairman, Council of Ministers; Minister of Transport and Communications*), Tano Tsolov (*Deputy Chairman, Council of Ministers; Chairman, Council for Industry*).

Important Ministers not in the Politburo are: Col.-Gen. Diko Dikov (*Interior*), Ivan Bashev (*Foreign Affairs*), Col.-Gen. Dobri Dzhurov (*Defence*), Gancho Ganev (*Education and Culture*), Apostol Pashev (*Chairman, State Planning Committee*), Angel Solakov (*Chairman, Committee for State Security*).

The Council of Ministers consists of 16 Communists and 2 Agrarians; one of the latter is Georgi Traikov, 1st Deputy Chairman of the Council of Ministers and Chairman of the Council for Agriculture.

Bulgaria, on 1 March 1941, signed the Three Power Pact, and on 25 Nov. 1941 the Anti-Comintern Pact. On 26 Aug. 1944 Bulgaria asked Great Britain and the USA for an armistice. The USSR formally declared war on Bulgaria on 5 Sept 1944. The new Bulgarian Government of the Fatherland Front, which was established on 9 Sept., immediately asked the Soviet Government for an armistice, which was signed on 28 Oct. 1944 by representatives of the Soviet Union, Great Britain and the USA. The peace treaty was signed in Paris on 10 Feb. 1947.

In March 1948 a 20-year treaty of friendship, co-operation and mutual assistance with the Soviet Union was signed in Moscow. The treaty with Yugoslavia, signed on 27 Nov. 1947, was abrogated on 3 Oct. 1949. However, a commercial and cultural agreement with Yugoslavia was signed in Belgrade on 15 Dec. 1962.

On 25 Oct. 1950 the National Assembly voted a special status for Soviet citizens residing in Bulgaria: they have equal rights with Bulgarian citizens, including the right to hold any public office.

*National flag:* White, green, crimson (horizontal), with the coat of arms of the Republic in the canton.

*National anthem:* Bulgario meela, zemya na geroi (Dear Bulgaria, land of heroes); words by Nikola Furnadzhiev, Mladen Isaev and Elisaveta Bagriana, tune by G. Dimitrov, G. Zlatev-Cherkin and S. Obretenov, 1946.

LOCAL GOVERNMENT. As reconstituted by the People's Councils Law of 27 Feb. 1948 the Regional, Municipal and Rural Councils, elected practically by the whole population for a term of 3 years, are dealing with all economic, social and cultural problems of their area. They also supervise the management of state and publicly owned enterprises on their territory. The Councils' executive organs are Permanent Committees. In 1950 all the Permanent Committess of the People's Councils totalled about 62,000 working people.

**AREA AND POPULATION.** On 8 Sept. 1940 by the treaty of Craiova, Rumania ceded to Bulgaria the Southern Dobrudja, fixing the new frontier on the 1912 line. This runs north of Silistra on the Danube to a point on the Black Sea just south of Mangalia, giving the Bulgarians the two provinces of Durostor and Caliacra.

In April 1941 Bulgaria occupied the Yugoslav part of Macedonia, and the Greek districts of Western Thrace, Eastern Macedonia, Florina and Castoria. The peace treaty of 1947 restored the frontiers as on 1 Jan. 1941.

The land area of Bulgaria is 110,564·8 sq. km; the area of river and offshore islands, 104·1 sq. km; that of territorial waters, 258·8 sq. km; total surface, 110,927·7 sq. km (42,818 sq. miles).

By a decree of 23 Jan. 1959 the country was administratively divided into 30 provinces, which are also economic regions controlling the industries in their area; only a few industrial undertakings of national importance remain directly subordinate to the central authorities. Each province has a provincial people's council. The administrative districts (*okolia*) have been abolished.

The provinces are: (*a*) 27 provinces proper: Blagoevgrad, Burgas, Varna, Vidin, Vratsa, Gabrovo, Dimitrovo,[1] Kolarovgrad, Kiustendil, Kurdzhali, Lovech, Mihailovgrad, Pazardzhik, Pleven, Plovdiv, Razgrad, Russe, Silistra, Sliven, Smolyan, Sofia, Stara Zagora, Tolbubin, Turgovishte, Turnovo, Haskovo, Yambol; (*b*) the 3 biggest towns: Sofia, Plovdiv, Varna There are altogether 119 urban (including the 3 city-provinces) and 893 rural communes.

The population at the census of 1 Dec. 1959 was 7,798,000; of these 34% lived in towns and 66% in villages. Estimate, Jan. 1963, 8·1m.

National minorities were, in 1950, estimated to total 1·1m., including Macedonians, Turks (656,000), Gypsies (150,000), Jews, Armenians and Rumanians. The language estimates were: Bulgarian 88%, Turkish 9·8%.

Principal towns (census 1959): Sofia, 671,192[2]; Plovdiv, 171,391; Varna, 123,830; Russe (former Rustchuk), 91,700; Burgas, 76,100; Pleven, 67,000; Stara Zagora, 62,459; Dimitrovo,[1] 60,800; Sliven, 53,670; Kolarovgrad (former Shumen), 49,153; Tolbuhin (former Dobrich), 46,443; Haskovo, 46,119; Yambol, 45,617; Gabrovo, 45,000.

In 1947, a new town—Dimitrovgrad—was founded; it is becoming one of the new industrial centres of the country. Gorna Dzhumaya, chief town of Bulgarian Macedonia, has been renamed Blagoevgrad.

Vital statistics. 1960: Live births, 140,082; deaths, 63,665; marriages, 68,952; crude birth rate, 17·8 (1961: 17·4) per 1,000 population; crude death rate, 8·1.

**RELIGION.** The national faith is that of the Eastern Orthodox Church. On 10 May 1953 the Bulgarian Patriarchate was revived and Metropolitan Kiril was elected the first Bulgarian Patriarch since 1393. The seat of the Patriarch is at Sofia. There are 11 dioceses, each under a Metropolitan.

The 'Law of the Churches' of 17 Feb. 1949 has disestablished the National Church, though it is officially described as 'the traditional church of the Bulgarian people' and 'in form, substance and spirit a People's Democratic Church'. Freedom of conscience and belief is 'guaranteed'; the use of religion and religious institutions for propaganda against the Government is punishable. Full information regarding organization and finance must be filed with the Ministry of Foreign Affairs. In case of need the state will furnish financial assistance. Only 'honest citizens of good reputation' may be appointed ministers, priests and other officials.

Churches may not maintain schools or colleges, except theological seminaries, or organize youth movements. Their hospitals and relief institutions have been taken over by the State. Relations with churches and missions abroad are subject to the supervision of the Ministry of Foreign Affairs.

In 1934 (latest census) the National Orthodox Church had 5,128,890 members. A 1950 estimate considers that there are 6m. Orthodox, out of the then population of 7·5m. The Communist-sponsored 'Union of Clergy Brotherhood', which had become very influential among Orthodox priests, was disbanded in 1955. An estimate, 1956, puts the Moslems (Turks) at 740,000; Bulgaro-Moslems (Pomaks), 190,000; Roman Catholics, 56,000; Armeno-Greeks, 23,000; Jews, 6,000; Protestants, 28,000.

In March 1949, 15 Protestant church leaders were sentenced to imprisonment and fines for alleged acts of treason and espionage. In Sept. 1952 a Roman Catholic bishop and 3 priests were sentenced to death and 28 others, mostly priests, to long prison sentences on similar charges.

[1] Originally Pernik, reverted to its old name on 19 Jan. 1962.

[2] 1956 census: 725,756.

Moslems are under a Grand Mufti and 9 regional mufti boards; they have 1,260 mosques.

**EDUCATION.** Elementary education is obligatory and free for children between the ages of 7 and 15. In 1946, 23% of the total population were illiterate. Since then their percentage has dropped, but no later figures are available.

Educational statistics for 1960–61: 6,570 kindergartens (298,790 children); 2,408 elementary schools (620,971 pupils, 40,000 teachers); 316 secondary schools (158,004 pupils, 11,064 teachers); 227 vocational schools (91,981 pupils, 5,209 teachers).

In 1962–63 the institutions of higher education, including the universities, had 71,500 students and 4,000 professors and lecturers. An institute of chemistry and technology was opened at Burgas in 1963.

The Academy of Sciences and other research bodies had 92 institutes in 1960.

Of the national minorities, in June 1956, the Turks had 1,116 schools and 3 teachers' training colleges with about 100,000 pupils; the Armenians, in 1950, had 16 schools with 50 teachers and 1,092 pupils.

A new education law of 3 July 1959 proclaimed the need for 'linking education with productive work useful to society', and extended 'basic' education, both elementary and secondary, from 11 to 12 years.

*Newspapers* (1961). Total circulation of the 64 daily newspapers is said to be 2m. copies, of which *Rabotnichesko Delo*, the official Party organ, claims 500,000; *Otechestven Front*, organ of the Fatherland Front, 200,000; *Narodna Mladezh*, organ of the Communist youth organization, 223,000; *Trud*, organ of the trade unions, 110,000.

*Cinemas* (1960). There were 1,400 cinemas with a seating capacity of 300,000.

**SOCIAL WELFARE.** On 1 Jan. 1942 old-age pensions for the peasantry as well as for manual workers were instituted. On 1 Aug. 1956, a new pension scheme came into force, which fixed the minimum old-age pensions at 280 leva per month, and granted a monthly pension of 300 leva to people disabled as a result of labour accidents or professional diseases.

Allowances are paid for all children under 16 years of age supported by their parents. Allowances range from 12 leva per month for 1 child to 370 leva per month for 5.

As from 1 Jan. 1957 pensions were introduced for co-operative farmers of 60 years of age (55 for women). The pension ranges from 100 to 400 leva per month, depending on the person's length of service in the co-operative.

Total number of pensioners in 1959 was 1,119,000.

In 1960 there were 461 hospitals with 36,912 beds.

**JUSTICE.** The constitution of 1947 provides for the election (and recall at pleasure) of the judges by the people and, for the Supreme Court, by the National Assembly. The lower courts include laymen (called 'assessors'), as well as jurists. Certain courts of appeal have been abolished. There are a supreme court, 27 provincial and 3 municipal (city-provinces) courts and 100 people's courts.

In June 1961 'Comrades' courts' were set up for the trial of minor offenders by their fellow-workers.

A new code of criminal procedure, based on Soviet law, was introduced in Feb. 1952. The People's Militia Law of 29 March 1955, amended on 16 Jan. 1959, introduced forced residence and deportation as disciplinary measures.

The Prosecutor General, elected by the National Assembly for 5 years and subordinate to it alone, exercises supreme control over the correct observance of the law by all government bodies, officials and citizens. He appoints and discharges all Prosecutors at courts of every grade. In the exercise of their duties, all Prosecutors are independent from the judges and the Government.

**FINANCE.** The revenue and expenditure of Bulgaria for calendar years were as follows (in 1m. leva, from 1962 in 1m. new leva):

| | *1958* | *1959* | *1960* | *1961* | *1962* | *1963*[1] | *1964*[1] |
|---|---|---|---|---|---|---|---|
| Revenue | 20,693 | 27,024 | 30,666 | 33,156 | 3,330 | 3,627 | 2,940 |
| Expenditure | 20,304 | 26,265 | 29,947 | 32,956 | 3,330 | 3,609 | 2,920 |

[1] Estimates.

Principal items of revenue in 1964 were (in 100m. leva): National economy, 21·7; taxes, 8·7; of expenditure: National economy, 14·5; social and cultural, 8·5; defence, 2·6; administration, 0·7.

The main items of Bulgaria's external debt, outstanding at 30 June 1956, were as follows: £10,072,736; US$16,634,500; 206m. gold francs.

A trade and debt agreement concluded with the UK on 22 Sept. 1955, provides for Bulgarian payments of £400,000 in settlement of UK claims for expropriated property rights and interests; the payments are to be made in annual instalments of 5% from the sterling proceeds of Bulgarian exports to the UK, with effect from 31 March 1956.

An agreement, signed in Sofia on 2 July 1963, settles the outstanding financial questions between Bulgaria and USA. Bulgaria agreed to pay a lump sum of US$3,543,398, *i.e.*, about 75% of the original US demand.

**DEFENCE.** For the (abortive) restrictions imposed by the peace treaty of 1947, *see* The Statesman's Year-Book 1957, p. 853. There is a compulsory service of 2 years.

Army. In March 1964 the Army had a strength of 110,000 men, organized in 8 motorized and 2 tank divisions. There are 3 Army Commands (Military Regions), Sofia, Plovdiv, Sliven. Tanks, mainly T-34s and some T-54s, numbered 2,300. Security police numbered 45,000 (5 brigades of border guards, 8 regiments of security forces).

Navy. The Navy consists of 2 *ex*-Soviet frigates, 3 *ex*-Soviet submarines, 4 patrol vessels, 70 motor torpedo-boats and fast patrol boats, 2 fleet minesweepers, 4 inshore minesweepers, 24 minesweeping boats, 16 landing craft and a training vessel. Personnel, 1963, was 5,000.

Air Force. The Air Force, formed as an Army Aviation Corps during the Balkan war of 1912–13, is still under Army command. It has been reorganized under Soviet supervision, and is equipped with Russian MiG-15 fighter-bombers and MiG-17 and MiG-21 jet-fighters. There is a ground attack regiment with Russian Ilyushin Il-10 piston-engined aircraft. The strength is 20,000 personnel and 200 operational aircraft.

**PRODUCTION.** *Planning.* State economic planning started, under Soviet direction, in 1947. The first Two-Year Plan, voted by the National

Assembly on 1 April 1947, really started after the nationalization of private industry, on 23 Dec. 1947. The private sector immediately dropped from 83·6 to 5% of the number of enterprises, and had, by 1952, virtually disappeared.

At the end of April 1953 it was announced that the first Five-Year Plan (1949–53) had been completed by the end of 1952. In Feb. 1954 the 6th Congress of the Communist Party issued directives for the second Five-Year Plan, 1953–57.

The third Five-Year Plan, 1958–62, was issued at the 7th Party Congress in June 1958. Main targets: 60% increase of industry, 30% increase of farm produce, doubling of power capacity. It is now claimed that, except in agriculture, the plan was completed in all essentials by the end of 1960.

The fourth five-year plan is running from 1961 to 1965. Capital investments in 1962 actually totalled 849m. new leva; the plan for 1963 was 942m. and for 1964, 966·7m.

In Nov. 1962 the Communist Party approved a planning programme up to 1980. This 'perspective' envisages an increase (compared with 1960) of 250% in agriculture and 700% in industry; 500% of consumer goods, 450% of iron and steel, 2,700% of chemicals; annual motor-car production is to rise from nil in 1960 to 120,000 in 1980.

| Industrial production | *1958* | *1959* | *1960* | *1961* | *1962* | *1965* (Plan) |

[1] 3 tons of lignite = 1 ton of hard coal (thermic value). Output of hard coal (in 1,000 metric tons) was 385 in 1957, 380 in 1958, 503 in 1959, 580 in 1960.

*Agriculture.* The total area of Bulgaria is 10,314,620 hectares; of this 4,870,000 hectares are arable.

According to the census of 1934, 80% of the active population (2,744,927) were engaged in agriculture, most of them being small proprietors holding from 1 to 6 acres. Since 1945 land ownership has been limited to 20 hectares (49·4 acres). About 165,000 hectares have been taken away from monasteries and private owners and divided among landless peasants and co-operative farms. In 1946, 22·7% of the farms had no draught animals and 18·7% not even a plough. There were in Nov. 1960, 932 co-operative farms, with a total of 3·68m. hectares of cultivated land, and 67 state farms with 290,000 arable hectares. In Dec. 1961 there were 225 machine-tractor stations with 44,200 tractors (in 15-h.p. units), 6,000 combines and 5,000 threshers.

Five large dams, including the Vassil Kolarov dam (completed 1951) and the Stalin dam (completed 1956, in Jan. 1962 renamed Iskar dam), irrigated, in 1963, 900,000 hectares.

For the sown areas and yields of crops, 1948–56, *see* THE STATESMAN'S YEAR-BOOK, 1958, p. 866. *Oil.* Oil was discovered in 1951 near Tulenovo, in the Balchik district on the Black Sea. Production started in 1954. Prospecting is being done in the Varna and Popovo districts. Crude oil production in 1963 was 200,000 tons. Good-quality oil was struck at Dolni Dubnik near Pleven in 1962, sufficient to ensure an output of about 60 tons a day. The oilfield will supply the new Burgas oil refinery, which started operations in 1963 with an annual capacity of 2m. tons (to be expanded to 5m. by 1966).

*Industry.* On 23 Dec. 1947 the whole of the country's industry was brought under national ownership and control.

A chemical combine, largely for the production of fertilizers (yearly capacity: 70,000 tons), and a thermo-electric station are operating in Dimitrovgrad. The first large thermo-electric station, 'Maritsa-East', went into operation in 1961 with, initially, a generating capacity of 150,000 kw. Two superphosphate plants were inaugurated in Oct. 1957 at Dimitrovgrad and Devniya.

A lead–zinc works near Plovdiv has an annual output of 30,000 tons of zinc, 40,000 tons of lead and 60,000 tons of sulphuric acid. The new Kremikovtsi iron and steel combine has an annual capacity of 1·12m. tons of pig-iron, 1·3m. tons of steel and 1m. tons of rolled products.

In 1962 (and 1961), 243m. (226m.) metres of cotton fabrics, 18m. (17m.) metres of woollen fabrics and 11m. (10m.) metres of silk fabrics were produced. Leather shoe production (1962), 11·9m. pairs.

In 1963 Bulgaria bought wheat from Canada ($33m.) and USA ($9m.), tobacco from USA ($8m.) and Canada (1·75m.) and 300,000 tons of iron ore from Brazil.

In 1963 the fishing port of Burgas was expanded into an important oil-port, open to tankers of 20,000 tons. Goods traffic in Burgas and Varna was 2·2m. tons and in the Danube ports 1·6m. tons in 1960. Sea and river traffic in 1962 was 3·6m. tons.

Shipyards, especially the Georgi Dimitrov shipyard in Varna, are building ships mainly for export to the USSR, Czechoslovakia and Albania.

*Roads.* In 1959 there were 26,796 km of roads, including 1,996 km of motor roads. In Dec. 1959 the number of licensed motor vehicles was: Cars, 8,500; lorries, 19,600; buses, 2,200. In 1962 lorry and bus services carried some 60m. tons of freight and 441m. passengers.

*Railways.* In 1963 Bulgaria had 5,760 km of railway, including 434 km of narrow gauge. The electrification of the lines Sofia–Plovdiv (156 km) and Russe–Gorna Oryahovitsa (115 km) was completed in 1963.

In 1961, 34·5m. passengers and 2·14m. tons of freight were carried.

*Post.* There were, in 1961, 2,020 post offices. Length of telegraph line, 158,826 km. Number of telephones (1963), 176,000, of which 63,500 were in Sofia. There are 7 broadcasting stations. Radio receiving sets in 1962, 920,000. Television was inaugurated in Nov. 1959.

*Aviation.* TABSO (Bulgarian Airline) serves Sofia (airport: Vrajdebna), Plovdiv, Burgas, Varna, Gorna Oryehovitsa, Haskovo, Russe, Stara Zagora and Turnovo. On 9 Oct. 1954 the USSR relinquished its share in TABSO. With the Czech and Hungarian airlines, TABSO shares a service linking Sofia with Budapest, Warsaw, Prague, Belgrade (where BEA connects with London) and Vienna (shared with Austrian Airlines). TABSO operates direct services with Amsterdam, Athens, Berlin, Copenhagen, Frankfurt, Düsseldorf and the Middle East. The Soviet airline Aeroflot connects Moscow with Sofia *via* Kiev and Bucharest. In 1962 TABSO carried 300,000 passengers.

**MONEY.** A currency reform of May 1952 linked the Bulgarian currency (unit: the *lev*, pl. *leva*) to the Soviet rouble. A new *lev*, equalling 10 old leva, was introduced on 1 Jan. 1962. The parity (clearing value) is 1 (new) rouble = 1·30 (new) lev. The official rate of exchange is £1 = 3·20 leva; US$1 = 1·17 leva; 100 Swiss francs = 27·09 leva.

**BANKING.** The Act of 27 Dec. 1947, nationalizing all banks, gave the National Bank complete autonomy, freeing it from any responsibility for state debts. Its capital is unlimited and its deposits consist, primarily, of the surpluses of the state and local authorities and the nationalized enterprises. Its chief task is to safeguard the purchasing power of the currency and the foreign exchange value of the *lev*. The only other important bank is the Bulgarian Investment Bank (formerly the Mortgage Bank of Bulgaria), whose capital includes the capital and reserves of the Mortgage Bank plus the investment funds of all those banks which have been nationalized.

A decree of 7 July 1956 ordered the Investments Bank to grant long-term credits to co-operative farms and to convert and postpone the repayment of loans for farms in distress.

On 31 Dec. 1959, 5m. people had savings deposits totalling 5,700m. leva.

**WEIGHTS AND MEASURES.** The metric system is in general use. On 1 April 1961 the Gregorian calendar came into force in Bulgaria.

# BURMA

PYEE-DAUNG-SU MYANMA-NAINGGAN-DAW

**HISTORY.** The Union of Burma came formally into existence on 4 Jan. 1948. On this day, Sir Hubert Rance, the last British Governor, handed over authority to Sao Shwe Thaike, the first President of the Burmese Republic; the Cabinet took the oath of office, and Parliament ratified the treaty with Great Britain providing for the independence of Burma as a country not within His Britannic Majesty's dominions and not entitled to His Britannic Majesty's protection. This treaty was signed in London on 17 Oct. 1947 and enacted by the British Parliament on 10 Dec. 1947.

For the history of Burma's connexion with Great Britain *see* THE STATESMAN'S YEAR-BOOK, 1950, p. 836.

**CONSTITUTION.** From Independence Day until 1958 Burma was a parliamentary democracy, having 2 houses, the Chamber of Deputies and the Chamber of Nationalities. The latter comprised 125 members, 62 of whom represented the central unit, 63 the states and special areas. The Chamber of Deputies had twice as many members. Both were elected for 4 years. The Head of State was the President, elected for a 5-year term, by both Chambers of Parliament in joint session.

On 29 Oct. 1958, Gen. Ne Win, the Army Chief of Staff, took over the government. The elections to the lower house of parliament, held in Feb. 1960, gave the Pyidaungsu (Union) Party led by U Nu, 161 out of 250 seats.

On 2 March 1962 Gen. Ne Win again overthrew the government of U Nu and replaced it by a Revolutionary Council. Parliament and the state councils were dissolved; the latter were reformed as 'state supreme councils' under appointed chairmen.

The Council declared on 2 March 1962 that it had assumed all power in the State. It is still the supreme body. But the Council announced on 8 March 1962 that it had 'conferred on its Chairman all legislative, judicial and executive powers with effect from 2 March 1962'. Laws are promulgated by Gen. Ne Win in his own name. His judicial functions are delegated to the courts (and to special tribunals). His executive functions are normally exercised through the council of ministers, usually called the Revolutionary Government.

Members of the Revolutionary Government:

*Chairman, Council of Ministers; National Planning and Defence:* Gen. Ne Win.

*Trade Development:* Col. Chit Myaing. *Agriculture and Forests, Supplies and Co-operative, Land Nationalization:* Brig. Tin Pe. *Education, Health:* Col. Hla Han. *Foreign Affairs, Public Works, Housing and Rehabilitation:* Thi Han. *Home Affairs, Immigration and National Registration,* *Democratization of Local Administration and Local Bodies, Religious Affairs, Judicial Affairs:* Col. Kyaw Soe. *Information, Union Culture:* Col. Saw Myint. *Transport and Communications:* Col. Ba Ni. *Industry, Labour, Mines:* Col. Than Sein. *Finance and Revenue:* Brig. San Tu. *Relief, Resettlement and National Solidarity, Social Welfare:* Lieut.-Col. Maung Levin.

All Ministers except Thi Han, Col. Ba Ni and Lieut.-Col. Maung Levin are members of the Revolutionary Council.

*Chairman of State Supreme Councils:* Tun Aye (Shan), Ding Ratan (*Kachin*), Dr Saw Hla Tun (*Karen*), A Mya Lay (*Kayah*), San Kho Lian (*Chin Affairs*).

*National Flag.* Red, with a canton of dark blue; in the canton, a 5-pointed large white star with 5 smaller stars between the points.

*Language.* The official language is Burmese; the use of English is permitted.

**AREA AND POPULATION.** The total area of the Union is 261,789 sq. miles (678,000 sq. km). Some small rectifications of the border with China were agreed upon in 1960 and with Pakistan in 1964. The population in 1963 was estimated at 23,735,000 (11,648,000 males, 12,087,000 females). The leading towns are (1963): Rangoon, the capital (687,708), Mandalay (212,873) and Moulmein (115,931).

The Burmans belong to the Tibeto-Chinese (or Tibeto-Burman) family.

**RELIGION.** The Revolutionary Government, having repealed the amendment of 1961 which made Buddhism the state religion, recognizes 'the right of everyone freely to profess and practice his religion'.

**EDUCATION.** After the attainment of independence the Government has adopted a centralized system of control of schools which are graded as primary, middle and high school. The medium of instruction in all state schools is Burmese; English is taught as a compulsory second language in secondary schools.

Education is free in the primary, junior secondary and vocational schools; fees are charged in senior secondary schools and universities.

In 1962 there were 281 state high schools, 548 state middle schools with 252,837 pupils and 12,009 state primary schools with 1,602,261 pupils; the total teaching staff was about 50,000.

There were also 382 private high schools and 215 private middle schools with 63,635 pupils and 222 private primary schools with 101,161 pupils.

The University of Rangoon is composed of the following faculties: Art, science, engineering, law, education, agriculture, medicine, forestry and social sciences. In 1958–59 arts students numbered 7,638 and science students, 6,568. The Intermediate College, Mandalay, was on 1 June 1958 raised to the status of the University of Mandalay (with 3,000 students). The Intermediate Colleges at Moulmein and Bassein have also been raised to university status.

There are also intermediate colleges at Taunggyi, Magwe and Myitkyina, and several technical and agricultural institutes at higher and middle level. 2,678 teachers were being trained in 6 training colleges in 1963.

*Cinemas* (1961). There were about 200 cinemas.

**JUSTICE.** The Chief Court has supervision over all courts in the Union. It is presided over by the Chief Judge and 5 other judges, and has superseded the Supreme Court and the High Court, whose powers and functions it exercises by authority of a directive from the Revolutionary Council effective from 1 April 1962. District courts operate unchanged under the Revolutionary Government, together with district army courts.

**FINANCE.** The budget estimates (in K.1m.) for fiscal years 1 Oct.–30 Sept. were as follows:

| | *1958–59* | *1959–60* | *1960–61* | *1961–62* | *1962–63* | *1963–64* |

| Expenditure | 1,350·3 | 1,039·1 | 1,046·9 | 1,066·0 | 3,902 | 8,202 |

The largest items, in 1962-63, of revenue were customs (355m.) and income tax (321m.); of expenditure, defence (349m.), police (120m.) and education (119m.).

Public debt, in 1960–61, was K.3,891·1m., including K.3,227·7m. treasury bills and K.70m. American loan.

In 1953 Burma's financial obligations to the UK were fixed at £7·3m.; of this total, £3·3m. will be settled by Burma's taking over the UK debt to the Union Bank of Burma in respect of currency redemption. The remaining £4m. will be covered by a single down payment to the UK.

In Dec. 1957 Burma received a USA loan of $5·4m. to reclaim land in the delta, and in 1960 a £30m. loan from China to set up 11 specified projects. Loans have also been made by the Agency for International Development and the USSR.

**DEFENCE.** *Navy.* The Navy includes 1 frigate, 1 escort minesweeper, 5 motor torpedo-boats, 4 support gunboats (*ex*-landing craft), 13 motor gunboats and 21 river gunboats. Altogether 37 naval vessels were presented to Burma by the UK and others by the USA. Personnel in 1963: 3,300 officers and ratings, including reserves.

*Air Force.* The Air Force is intended primarily for internal security duties and almost all its equipment is British-built. Two fighter-bomber squadrons are equipped with piston-engined Sea Furies. Training is done with piston-engined Provosts and Vampire jets, both types being fitted to carry light armament for additional security operations. Transport units are equipped with Bristol Freighter, C-47, Otter and Beech D18 aircraft, and Alouette III, Japanese-built Bell 47 and US-built Huskie II helicopters. The Air Force has some 900 personnel and 90 aircraft.

*Army.* The strength of the Army is approximately 100,000; this figure includes 25 battalions of the Union constabulary which were absorbed into the regular Army in Oct. 1962. The Army is organized into 5 major commands, 1 infantry brigade and the Arakan force. Commands deal direct with units, the old division and brigade system having been disbanded in 1961. Equipment is mixed, with British weapons still predominating.

**PRODUCTION.** *Forestry.* The area of reserved forests at the end of 1945–46 was 22,197,324 acres. On 1 June 1948 the Government took over one-third of the concessions held by European and indigenous lessees. On

1 Feb 1949 the European lessees surrendered their concessions. The take-over payments amounted to K.73·54 lakhs.

**COMMUNICATIONS.** *Railways.* The Burma Railway system is entirely of metre gauge (3 ft 3⅜ in.) and its main lines run from Rangoon to Prome (161 miles) to the north-west and Rangoon to Mandalay (386 miles) towards the north, extending to Myitkyina farther north (723 miles from Rangoon). Branch lines extend from Letpadan to Tharrawaw (24 miles) on the west, the delta lines from Henzada to Bassein (82 miles) and Henzada to Kyangin (65 miles). In the Tenasserim Division, the lines are Pegu to Martaban (122 miles)—for Moulmein by bridge—and the Moulmein South to Anin (57 miles), and from Nyaunglebin to Madauk (11 miles). Then there are the branch lines from Pyinmana to Taungdwingyi (67 miles), from Thazi to Myingyan (70 miles), from Mandalay to Madaya (17 miles) and from Ywataung to Alon (71 miles). The Northern and Southern Shan States hill sections connect with the main lines at Myohaung and Thazi. The Ava bridge across the Irrawaddy at Sagaing permits through traffic from Rangoon to Myitkyina. In 1959, 1,858 miles were again made serviceable (1942, 2,059 miles).

In 1963 the railway carried 3m. ton-mileage and 36m. passenger-mileage.

*Roads.* The Department of Highways is in charge of 495 miles of metalled, 2,531 miles of black-topped and 3,673 miles of other roads; district councils maintain another 2,883 miles. A new Rangoon–Mandalay highway is planned.

*Shipping.* Burma has 60 miles of navigable canals. The Irrawaddy is navigable up to Bhamo, 900 miles from the sea, and its tributary, the Chindwin, is navigable for 390 miles. The Irrawaddy delta has nearly 2,000 miles of navigable water. The Salween, the Attaran and the G'yne provide about 250 miles of navigable waters around Moulmein. The Inland Water Transport Board runs services from Bhamo to Myitkyina. The Burma Five Star Line Ltd operates coastal steamer services to the major ports in Burma, India, East Pakistan, Malaya, Japan and Europe.

The port of Rangoon in 1957–58 handled 2·7m. tons of seaborne trade.

*Post.* There were 532 post offices in 1958. Number of telephones was 18,800 in 1963, of which about 16,300 are in Rangoon.

There are 193 telegraph offices, and the internal system of communication is chiefly by wireless. Radio telephone or direct wireless telegraph links exist with most Asian countries, USA, USSR, UK and Switzerland.

*Aviation.* Union of Burma Airways started its internal service in Sept. 1948 and its external service in Nov. 1950. International services were in 1960 maintained between Rangoon and Bangkok, Calcutta, and Chittagong. There were, in 1963, 38 civil aerodromes and landing grounds. In 1962–63 the total ton-mileage was 120·77m. and the passenger-mileage, 24·4m.

**CURRENCY.** The currency unit is now the *kyat* (formerly the Burma rupee) divided into 100 *pyas*; the *kyat* equals 1*s.* 6*d.* (US$1 = K. 4,76).

At the end of 1962 the total circulation of notes (1, 5, 10, 20, 50, 100 kyat) was K.120·1 crores and of coins, K.5·59 crores.

**BANKING.** The Union Bank of Burma was established on 3 Feb. 1948, with an authorized capital of Rs 4 crores. The Union Bank of Burma Act, which came into force on 1 July 1952, gave the Bank the position of a central bank with power to licence and inspect all banks. The Act also transferred the issue of currency from the Burma Currency Board in London to the Union Bank, and at the same time changed the monetary system of Burma.

The balance sheet of the Union Bank as at 30 June 1962 showed the following liabilities: Paid-up capital, K.1,00,00,000; reserve fund, K.4.00.00,000; currency in circulation, K.124 crores; government deposits, K.1,92,01,000; non-government deposits, K.13,66,77,000; total (including other liabilities), K.1,73,58,35,000. The foreign exchange reserve amounted to K.52,55,94,000, government securities to K.75,27,68,000; other assets to K.21,76,08,000.

The State Commercial Bank, owned by the Government, was opened in Aug. 1954; it has 425 branches throughout the country. Its total assets at 30 June 1960 were K.7,817 lakhs.

On 23 Feb. 1963 the whole banking business in Burma was nationalized.

# BURUNDI

*History.* Tradition recounts the establishment of a Tutsi kingdom under successive Mwamis as early as the 16th century. German military occupation in 1890 incorporated the territory into German East Africa. From 1919 Burundi formed part of Ruanda-Urundi administered by the Belgians, first as a League of Nations mandate and then as a United Nations trust territory. Elections supervised by the United Nations in Sept. 1961 resulted in a large majority for the Unité et Progrès National party (UPRONA). Internal self-government was granted on 1 Jan. 1962, followed by independence on 1 July 1962. An agreement, signed with Rwanda under United Nations auspices at Addis Ababa in April 1962, provides for a monetary and customs union.

*Area and Population.* Burundi extends from lat. 2½° to 4½° S. and long. 29° to 31° E., and has an area of 27,834 sq. km (10,747 sq. miles). It lies astride the main Nile–Congo dividing crest (6,000–7,000 ft) bounded on the west by the narrow plain of the Ruzizi River and Lake Tanganyika (2,534 ft). The interior is a broken plateau at an average height of about 5,000 ft, sloping eastwards down to Tanganyika and the valley of the Maragarazi River. The southernmost tributary of the Nile system, the Luvyironza, rises in the south of the country.

The population at the last census in 1959 was 2,213,280; but is now probably 2·75m. There are three ethnic groups—Hutu (Bantu, forming the great majority); Tutsi (Nilotic, less than 15%); Twa (pygmoids, less than 1%). There are some 3,500 Europeans and 2,000 Asians.

In 1962–63, some 20,000 Tutsi refugees from Rwanda were settled in Burundi.

Usumbura (or Bujumbura), the capital, has about 50,000 inhabitants. Kitega (5,000 inhabitants) was formerly the royal residence.

*Government.* Burundi is a constitutional monarchy, executive power being exercised through a Prime Minister and Council of Ministers. There is a Legislative Assembly of 64 members elected by universal suffrage for 6 years. The administrative divisions are: 8 provinces, each under a governor (Bujumbura, Bubanza, Muramvya, Ngozi, Gitega, Muhinga, Ruyigi and Bururi); 18 arrondisements; and 181 communes.

*King of Burundi:* H.M. the Mwami Mwambutsa IV (born 1912, became Mwami in 1916). *Heir Apparent:* H.R.H. Prince Charles (born 1947).

*Prime Minister:* Pierre Ngendandumwe.

*Flag.* White diagonal cross on green and red quarters, with a white panel in the centre enclosing a drum and ear of sorghum.

*Religion.* The population is predominantly Roman Catholic; there is a Roman Catholic archbishop and 3 bishops. The Anglican Missions under a bishop fall within the archdiocese of Uganda.

*Education.* There are state primary schools, providing for 3,400 pupils, and mission schools providing for 107,000 pupils. There are 9 secondary schools, providing for 2,000 pupils, as well as 3 teacher-training colleges (2,000 students) and 2 trade schools. A university college at Usumbura provides a 2-year preliminary course in the arts and sciences.

The local language is Kirundi, a Bantu language. French is also an official language. Kiswahili is spoken in the commercial centres.

*Finance.* There has been a budget deficit since 1954. Estimated expenditure for 1963 is 800m. RB francs, and estimated revenue 600m. RB francs. By the end of 1963 the Government's indebtedness to the central bank was 240m. RB francs.

*Defence.* The national army has an establishment of 61 officers (including a Belgian cadre), 73 n.c.o.s and 818 men.

*Economy.* Economic and technical assistance is provided substantially by Belgium and to a smaller degree by the European Economic Community and the United Nations.

*Agriculture.* The main economic activity of the country is subsistence agriculture, which accounts for well over half of the gross national product. Beans, kassava, maize, sweet potatoes, groundnuts, peas, sorghum and bananas are grown according to the climate and the region.

The Ruzizi plain has an average temperature of 23° C (73° F), the Nile–Congo crest of 17·3° C (63° F), the central plateau of 20° C (68° F). The long dry season lasts from June to August, the long rainy season from February to May. The annual rainfall at Usumbura is 31 in., on the Nile–Congo crest 57 in.

The main cash crop is coffee, particularly arabica. A joint coffee board (OCIRU) manages the grading and export of the Rwanda and Burundi crop, and figures for coffee production are those for the two countries taken together. 23,000 tons were exported in 1962, but adverse conditions in 1963 resulted in only 9,500 tons. Cotton is also grown (9,400 tons exported in 1961, 4,130 tons in 1962).

Cattle play an important traditional role, and there are about 0·5m. head in the country. The quality is poor, but efforts are being made to improve it. There are some 800,000 goats and 300,000 sheep.

There is a small commercial fishing industry on Lake Tanganyika producing over 4,000 tons annually.

*Industry.* Industrial development is rudimentary. In Usumbura there are plants for the processing of coffee and by-products of cotton, a brewery, cement works and small metal workshops.

*Commerce.* Statistics have so far been maintained for Rwanda and Burundi together. In 1962 joint imports amounted to 1,618·4m. RB francs, joint exports to 969m. RB francs.

Trade of Rwanda and Burundi with the UK was as follows (in £ sterling, British Board of Trade returns):

| | *1961* | *1962* | *1963*[1] |
|---|---|---|---|
| Imports to UK . . | 29,280 | 39,341 | 31,532 |

| Re-exports from UK . | 3,164 | 215 | 200 |

[1] Burundi only.

*Communications.* There is a comprehensive interior road network connecting with Rwanda, the Congo and Tanganyika. But only 25 miles are macadamized; and travelling can be difficult in the rainy season. There are lake services from Usumbura to Kigoma (Tanganyika) and Albertville (Congo). The main route for exports and imports is *via* Kigoma, and thence by rail to Dar es Salaam.

Usumbura has an airport of international standard and there are regular services to Europe, the Congo and East Africa.

*Currency.* The currency is administered by the Banque d'Emission de Rwanda et Burundi. The official rate (for essential imports and all exports) is 140 francs RB = £1. There is also a free market where the rate during 1963 was about 260 francs RB = £1.

*Ambassador in London:* Charles Baranyanka (resident in Brussels).

*British Ambassador:* J. S. Bennett, CVO, CBE (resident in Kigali). *Second Secretary:* A. P. Fabian.

# CAMBODIA

**HISTORY.** The recorded history of Cambodia starts at the beginning of the Christian era with the Kingdom of Fou-Nan, whose territories at one time included parts of Thailand, Malaya, Cochin-China and Laos. The religious, cultural and administrative inspirations of this state came from India. The Kingdom was absorbed at the end of the 6th century by the Khmers, under whose monarchs was built, between the 9th and 13th centuries, the splendid complex of shrines and temples at Angkor. Attacked on either side by the Vietnamese and the Thai from the 15th century on, Cambodia was saved from annihilation by the establishment of a French protectorate in 1863. Thailand eventually recognized the protectorate and renounced all claims to suzerainty in exchange for Cambodia's north-western provinces of Battambang and Siem Reap, which were, however, returned under a Franco-Thai convention of 1907, the terms of which were confirmed in the Franco-Thai treaty of 1937. In 1904 the province of Stung Treng, formerly administered as part of Laos, was attached to Cambodia.

A nationalist movement began in the 1930s, and anti-French feeling strengthened in 1940–41, when the French submitted to Japanese demands for bases in Cambodia and allowed Thailand to annex Cambodian territory. On 9 March 1945 the Japanese suppressed the French administration and the treaties between France and Cambodia were denounced by King Norodom Sihanouk, who proclaimed Cambodia's independence. British troops occupied Phnôm-Penh in Oct. 1945, and the re-establishment of French authority was followed by a Franco-Cambodian *modus vivendi* of 7 Jan. 1946, which promised a constitution embodying a constitutional monarchy. Elections for a National Consultative Assembly were held on

1 Sept. 1946 and a Franco-Thai agreement of 17 Nov. 1946 ensured the return to Cambodia of the provinces annexed by Thailand in 1941.

In 1949 Cambodia was granted independence as an Associate State of the French Union. The transfer of the French military powers to the Cambodian government on 9 Nov. 1953 is considered in Cambodia as the attainment of sovereign independence. In Jan. 1955 Cambodia became financially and economically independent, both of France and the other two former Associate States of French Indo-China, Vietnam and Laos.

Anti-French guerilla bands had operated in the jungle from 1945, the most important being a nationalist group known as the Khmer Issarak led by Son Ngoc Thanh, the former Japanese puppet premier. By 1953 Communist bands drawn from the Vietnamese minority and controlled by the Vietminh were active, and in 1954 regular Vietminh forces invaded Cambodia. Fighting came to an end with the conclusion on 21 July 1954, at the Geneva Conference, of the agreement on Cambodia. This ensured the withdrawal of French and Vietminh troops, and most of the Khmer Issarak bands then surrendered. There is now complete internal peace and security, although the International Commission composed of Canadian and Polish representatives with an Indian chairman and responsible for the implementation of the Geneva Agreements is still in being.

**AREA AND POPULATION.** Cambodia has an area about 181,000 sq. km (71,000 sq. miles), divided into 17 provinces: Kompong Thom (population 322,000), Kompong Cham (820,000), Battambang (551,860), Kampot (337,879), Siem Reap (313,000), Kompong Chhnang (273,000), Kompong Speu (307,000), Takeo (467,000), Kratié (136,000), Stung Treng (136,000), Svay Rieng (287,000), Prey Veng (492,000), Pursat (180,000), Kandal (population, excluding Phnôm-Penh, 706,000), Ratanakiri (49,400), Mondolkiri (14,300), Koh Kong (38,700), Sihanoukville (11,000) and Kep (7,800).

The total population of 5,748,842 (1962) includes an estimated 500,000 Vietnamese, 300,000 Chinese, 85,000 Chams and 5,000 Europeans. In the uplands and in the north-east live various groups of hillmen, known as Khmer-Loeu.

The chief towns are Phnôm-Penh, the capital (population 403,000), located at the junction of the Mekong and Tonle Sap rivers, Battambang (population 25,000), Kompong Chhnang (population 20,000) and Kompong Cham (population 15,000).

Cambodian (Khmer) is the official language; the secondary language is French.

**GOVERNMENT.** On 6 May 1947 King Sihanouk, who succeeded on 26 April 1941, promulgated a constitution providing for parliamentary government. This did not function well, and in June 1952 the King assumed the premiership. In Jan. 1953 he dissolved parliament and replaced it by a Consultative Assembly. In Feb. 1955 King Sihanouk held a national referendum to decide whether he had successfully completed his mission in leading Cambodia to independence; the referendum was overwhelmingly affirmative. In March he abdicated and was succeeded jointly by his parents, King Norodom Suramarit and Queen Kossamak. Prince Sihanouk then formed a political movement, the Popular Socialist Community, to work for the implementation of reforms to the 1947 constitution. The terms of the Geneva Agreement calling for free elections for all Cambodian citizens, including former resistance elements, were implemented on 11 Sept. 1955, when Prince Sihanouk's movement won all 91 seats in the National Assembly.

This movement under Prince Sihanouk'sto do leadership has continued imnate Cambodian politics. It again obtained all seats at the elections of 23 March 1958 and 10 June 1962.

After the death on 3 April 1960 of King Norodom Suramarit a council of regency held interim office until 20 June when Prince Norodom Sihanouk became head of state without becoming king. His mother, Queen Kossamak, performs the ceremonial functions, but without the power, of the monarchy.

In Oct. 1962 a new government took office, with Prince Norodom Kantol as Prime Minister.

**RELIGION.** The majority of Cambodians practise Theravada Buddhism. There are about 55,000 Roman Catholics in Cambodia, mostly Vietnamese and Europeans.

**EDUCATION.** There were, in May 1962, 3,561 primary schools (566,000 pupils), 159 secondary schools (47,230 pupils) and 7 technical schools (1,725 pupils). There are also 4 teachers' training colleges, Faculties of Law, Medicine and Letters, a Royal School of Administration, a National School of Commerce and a Buddhist University at Phnôm-Penh.

**FINANCE.** The budget for the calendar year 1962 balanced at 5,326m. riels. This figure does not include all foreign aid, given under the United States, French and Chinese aid programmes, the Colombo Plan and by the Soviet Union. The 1963 budget provided for 3,840m. riels of revenue and 5,600m. riels of expenditure, the deficit to be borrowed.

**DEFENCE.** The armed forces consist of about 29,500 officers and men in the 3 services. The country is divided into 5 military regions. The Army has 11 training centres, 1 armoured regiment, 2 parachute battalions, 28 infantry battalions, and various auxiliary support companies.

The Air Force, founded on 1 April 1954, has a strength of about 1,000 men and 30 aircraft. Its equipment includes 2 jet-powered Magister and some MS 733 Alcyon piston-engined light attack aircraft for internal security and training, C-47, Beaver and 2 Il-14 Russian transports, Cessna L-19 observation aircraft and Alouette helicopters and Prince Sihanouk's personal Russian Mi-4 helicopter. Three MiG-17 fighters were received in Feb. 1964.

The Navy, officially founded on 20 April 1954, includes 2 patrol vessels, 1 support gunboat (*ex*-landing ship), 2 landing craft, 3 seaward patrol craft and 54 small craft. Personnel in 1963: Navy, 1,200 officers and men; Marine Corps 150 officers and men.

**PRODUCTION.** *Agriculture.* The overwhelming majority of the population is engaged in agriculture, fishing and forestry. Of the country's total area of 44m. acres, about 20m. are cultivable and over 20m. are forest land. Some 4m. acres are cultivated, well over half being devoted to rice production. The system of small holdings provides the farmers with a subsistence-level existence, and only a small part of the country's production goes to market.

About 1·25m. metric tons of paddy were produced in 1961–62, and 183,252 metric tons of rice were exported in 1962. Rubber production in 1962 amounted to 41,500 metric tons, 36,222 tons of which were exported.

Other products available for export are maize (134,440 metric tons exported in 1962), and, in order of value, livestock, timber, pepper, haricot beans, soya and fish.

*Forestry.* Much of Cambodia's surface is covered by potentially valuable forests, 3·8m. hectares of which are reserved by the government to be awarded to concessionaires, and are not at present worked to an appreciable extent. The remainder is available for exploitation by the local residents, and as a result some areas are over-exploited and conservation is not practised. There are substantial reserves of pitch pine.

*Fisheries.* Cambodia has the greatest fresh-water fish resources in South-East Asia. The annual catch is between 100,000 and 150,000 tons, a drastic drop from earlier years that results from over-fishing, silting and the destruction of plant-life.

*Mining.* Although old reports indicate the existence of substantial deposits of phosphate, they are not borne out by later surveys and further exploration is required before the prospects for commercial exploitation can be determined. High-grade iron-ore deposits (possibly as much as 2·5m. tons) exist in Northern Cambodia, but are not exploited commercially because of transportation difficulties; some experimental quarrying has recently been undertaken by Chinese technicians. Some small-scale gold panning (4,180 troy oz. in 1961) and gem (mainly zircon) mining is carried out by primitive methods.

*Industry.* Cambodian industry is developing, and now includes a motor-vehicle assembly plant, 3 cigarette manufacturing concerns, a modern match factory, several metal fabricating concerns, spinning and weaving mills and distilleries, as well as rice-mills, a paper-mill, a textile-mill, a plywood factory, a cement factory, small tanneries, a few brick and tile kilns and agricultural produce processing industries. Other industrial undertakings, planned under the 5-year plan, include a tyre factory, a jute-mill, a palm-sugar refinery and a general mechanical factory.

**COMMERCE.** Principal imports by order of value (1962) were food products, metals, textiles, motor vehicles, machinery, petroleum, electrical equipment, chemicals and pharmaceuticals.

Principal exports by order of value (1962) were rubber (720m. riels), rice (514·5m.), maize (275·6m.) and timber (44m.).

In 1962 imports totalled 3,583m. riels and exports 1,903m. The UK was the main purchaser of Cambodian rubber and France of Cambodian rice. Most of Cambodia's trade with the sterling area is with Hong Kong and Singapore.

Total trade with UK, in £ sterling (British Board of Trade returns):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . | 9,684 | 117,661 | 610,804 | 484,352 | 179,485 |
| Exports from UK . | 268,066 | 729,494 | 1,299,894 | 793,792 | 1,280,191 |
| Re-exports from UK | 1,045 | 560 | 404 | 1,802 | 1,454 |

**COMMUNICATIONS.** *Roads.* Cambodia had, in 1961, 2,179 km of asphalt roads (including the 'Khmer–American Friendship Highway' from Phnôm-Penh to Sihanoukville, built under the United States aid programme and opened in July 1959), 1,369 km of macadamized roads, and about 1,674 km of improved dirt roads.

*Railways.* A line of 385 km (1-metre gauge), links Phnôm-Penh to Poipet (Thai frontier). In 1962 traffic amounted to 72m. passenger-km and 46m. ton-km. Work is in progress on a line Phnôm-Penh–Sihanoukville *via* Takeo and Kampot, scheduled for completion in 1965.

*Shipping.* The principal port is Phnôm-Penh, which can be reached by the Mekong (through Vietnam) by ships of between 3,000 and 4,000 tons. A new ocean port has been built under the French aid programme at Sihanoukville (formerly Kompong Som) on the Gulf of Siam and is now open to traffic.

In 1961, 433 ocean-going vessels unloaded 268,000 tons of cargo at Phnôm-Penh and 436 vessels loaded 389,000 tons. Some 165,000 tons of cargo were carried by small craft, junks and barges to and from Saigon.

The port of Sinahoukville is being increasingly used by long-distance shipping; in 1961, 21,600 metric tons of goods was received and in 1962, 72,600 tons. The development of the port is hindered to some extent by the navigational difficulties which arise during the monsoon when, for brief periods, a sea swell from the south-west sweeps into the bay of Kompong-Som. The building of a breakwater is being considered.

*Post.* There were 38 post offices functioning in 1956, of which 30 had telegraphic equipment. There are telephone exchanges in all the main towns; number of telephones in 1962, 3,527. Phnôm-Penh is linked to Saigon (Vietnam), Hong Kong, Paris and Tokyo by radio-telegraph and by teletype. The telephone service includes Shanghai and San Francisco; extensions of the teletype to Bandung, Singapore, New Delhi, London and Moscow are in hand.

*Aviation.* Pochentong airport, 10 km from Phnôm-Penh, gives direct services to Saigon, Bangkok, Vientiane, Djakarta, Rangoon, Calcutta, Hong Kong, Singapore, Rome, Prague and Paris. A twice-weekly service connects Phnôm-Penh with Siemreap (Angkor-Wat). The airport accepts aircraft up to the Boeing 707.

In 1961, 906 planes with 15,345 passengers and 194 tons of freight arrived at, and 886 planes with 16,264 passengers and 110 tons of freight departed from Pochentong.

The airport at Siemreap can accept DC4s and there is a number of fair-weather landing strips for light aircraft elsewhere.

**MONEY AND BANKING.** Under the Paris agreements of 29 Dec. 1954, between the Associate States and France, the parity of the Cambodian *piastre* (henceforth to be known as a *riel*) is to be maintained for the time being at 10 francs = 1 riel. On 31 Dec. 1954 the quadripartite Institut d'Emission ceased operations and a new Cambodian National Bank became responsible for the issue of currency. In Nov. 1955 Vietnamese and Laotian bank-notes ceased to be legal tender in Cambodia.

By 30 June 1964 all private banks, domestic and foreign, had to close down; their functions were taken over by a new governmental commercial bank.

The National Bank showed, as at 30 May 1963, gold and foreign exchange assets of 3,399m. riels. Note circulation was 4,048m. riels.

The rates of exchange are £1 = 98 riels; US$1 = 35 riels; 1 new French franc = 10 riels.

## República de Chile

**HISTORY.** The Republic of Chile threw off allegiance to the crown of Spain, constituting a national government on 18 Sept. 1810, finally freeing itself from Spanish rule in 1818.

**CONSTITUTION AND GOVERNMENT.** By the constitution of 18 Oct. 1925 legislative power is vested in the National Congress, consisting of the Senate and the Chamber of Deputies, both of which are elected by direct popular vote. The Senate consists of 45 members, elected for 8 years, who represent 9 provincial groups, each of which elects 5 senators. One-half of the Senate is renewable every 4 years. The Chamber of Deputies consists of members elected for 4 years by departments or groups of departments, 1 member for every 45,000 inhabitants or fraction of not less than 15,000. There are 147 in the Congress elected 1957. The Belgian system of proportional representation prevails. Electors are all citizens of 21 years of age or over, who are able to read and write; electorate (1 Sept. 1958) numbered 1,497,902, including 508,666 women. Women were fully enfranchised in Jan. 1949. Congress sits from 21 May (Navy Day) to 18 Sept. (Independence Day), excluding extraordinary sessions.

The President is elected for 6 years, by direct popular vote, but is not eligible for re-election; he must be Chilean-born and over 30 years of age. Normally there is no Vice-President, but the President may appoint one temporarily, when ill or out of the country. He has a modified veto; a bill which he has vetoed may, by a two-thirds vote of the members of both Chambers (a majority of the members being present), be sustained and become law.

The validity of all elections of president, deputies and senators is determined by a special body called *Tribunal Calificador*, consisting of 5 members chosen by lot from past-presidents or vice-presidents of the Chamber and Senate, members of the Supreme Court, of the Court of Appeal of the city where Congress meets.

The capital is Santiago, founded on 12 Feb. 1541.

*National flag:* White, blue, red, with a white star in the blue strip.

*National anthem:* Dulce patria, recibe los votos (words by E. Lillo, 1847; tune by Ramón Carnicer, 1828).

The following is a list of the presidents since 1927:

LOCAL GOVERNMENT. For the purposes of local government the republic is divided into provinces, presided over by *Intendentes*, and the provinces into departments, with *Gobernadores* as chief officers, appointed by the President. The departments constitute one or more municipal districts, each with a council or municipality of 5 to 15 members, elected for 3 years. Foreign residents may vote in municipal elections; in April 1950, 5,678 foreigners were on the electoral registers.

**AREA AND POPULATION.** Chile is divided into 25 provinces. All provinces except 3 extend from the Pacific to the international boundary, while the inter-provincial boundaries in most cases now follow watersheds instead of rivers, thus confining within one province the waters of a single system and avoiding jurisdictional disputes.

Many islands to the north, west and south belong to Chile, including Easter Island (Isla de Pascua; 63·9 sq. miles), discovered in 1722. The coastline is about 2,485 miles in length; the average width of the country, 110 miles. Area, 741,767 sq. km or 286,397 sq. miles.

In 1940 Chile declared, and in each subsequent year has reaffirmed, its ownership of the sector of the Antarctic lying between 53° and 90° W. long.; and asserted that the British claim to the sector between the meridians 20° and 90° W. long. overlapped the Chilean by 27°. Three Chilean bases were established in Antarctica in 1947, 1948 and 1951. A law promulgated 21 July 1955 put the Intendente of the Province of Magallanes in charge of the 'Chilean Antarctic Territory'.

Three thinly-settled southern provinces of Magallanes, Chiloé and Aysén, and the northern province of Arica are known as 'free zones', for the severe restrictions on imports prevailing elsewhere are modified in respect of those areas.

The total population at the census of 29 Nov. 1960 was 7.339,546. Density per sq. km, 1959, was 10·1; average annual increase, 2·5%.

The areas of the provinces and their populations in 1960 are as follows:

| Provinces | Area: sq. km | Population 29 Nov. 1960 | Provinces | Area: sq. km | Population 29 Nov. 1960 |
|---|---|---|---|---|---|

Vital statistics (1961): Revised birth rate 34·6 per 1,000 population; death rate, 11·7; marriage rate, 7·2; infantile mortality rate, 116 per 1,000 live births.

The great majority of the population is mixed or *mestizo*, due to the free inter-marriage between the early Spaniards and women of indigenous tribes; language and culture remain of European origin. The indigenous inhabitants are of three branches: The *Fuegians*, mostly nomadic, living in or near Tierra del Fuego; the *Araucanians* (130,747) in the valleys or on the western slopes of the Andes; the *Changos*, who inhabit the northern coast region and work as labourers.

The three leading cities, with estimated population in 1960, are Santiago, 1,169,481; Valparaíso, 259,241; Concepción, 167.468. Other towns with census population in 1952 are: Viña del Mar, 88,000; Antofagasta, 62,272; Talca, 55,059; Talcahuano, 54,782; Chillán, 52,576; Temuco, 51,497; Valdivia, 45,138; Osorno, 40,120; Rancagua, 39,972; Iquique, 39,576; La Serena, 37,618; San Bernardo, 37,221. Punta Arenas, on the Straits of Magellan, with a population of 34,440, is the southernmost city in the world. The Antarctic Territory proper is now stated to be 1·25m. sq. km, with a population (1961) of 202.

**RELIGION.** The Roman Catholic religion was disestablished in 1925; it remains, however, a national Church in a state wherein 89·5% of the population are Catholics. There are 3 archbishops, 16 bishops and 2 vicars apostolic. The census of 1952 showed 5,313,473 Roman Catholics, 240,856 Protestants and 11,496 Jews.

**EDUCATION.** Education is free and, since 1928, compulsory for all children between the ages of 7 and 15. In 1958 the public primary schools had 752,275 pupils; secondary schools had an enrolment of 164,019. University education is provided in the state university of Chile (founded in 1842), the Catholic University at Santiago (1888), the University of Concepción (1919), the Catholic University at Valparaíso (1928), the Universidad Técnica Federico Santa María at Valparaíso (1949), the Universidad Técnica del Estado (1952), Universidad Austral, Valdivia (1954) and Universidad del Norte, Antofagasta (1957) with a total student population of 22,000 in 1957–58.

*Newspapers* (1963). There were 48 daily newspapers with an aggregate daily circulation of about 520,000.

*Cinemas* (1963). Cinemas numbered 435 with seating capacity of 326,300; 98 of them are in Santiago.

**JUSTICE.** There are a High Court of Justice in the capital, 10 courts of appeal distributed over the republic, tribunals of first instance in the departmental capitals and second-class judges in the sub-delegations. The police force had (1959) 17,700 officers and men; it is organized and regulated by the President of the republic.

**FINANCE.** Revenue and expenditure were as follows (1,000 Escudos):

| | *1959* | *1960* | *1961* | *1962* | *1963* | *1964* |
|---|---|---|---|---|---|---|
| Revenue | 667,032 | 835.998 | 726,200 | 899.954 | 1,082.836 | 1.267.000 |
| Expenditure | 620,148 | 811.141 | 673,875 | 854,059 | 1,040,084 | 1.267,000 |

Since 1957 the estimates have consisted of a local currency budget (as above) plus a foreign-exchange budget (in US$1m.). The 1964 expenditures envisage E.163m. and E.11·7m. for defence, E.233·1 for education, E.38·8m. for agriculture and E.25·7m. for public works.

Expressed in US$, total external debt on 31 Dec. 1960, carrying Government guarantee but excluding Ministry of Defence obligations, amounted to US$813·9m. Of this 35·7% was in the fiscal sector; 21·6% semi-fiscal public enterprises; 16·2% private organizations, and 24·7% the Central Bank. US$231m. of amortization and interest payments fall due by 1964, of which US$85m. in 1960, together with US$16·5m. of private suppliers' credits not covered by Government guarantee.

The estimate of total foreign investment in 1960 was US$1,000m., of which more than 80% was of US origin.

**DEFENCE.** Chile on 9 April 1952 signed the Military Assistance pact with the US, promising access to raw materials and armed support in defence of the Western Hemisphere.

Army. The Chilean Army is a national militia in which all able-bodied citizens are obliged to serve. Liability extends from the 20th to the 45th year, inclusive. In many cases exemption can easily be obtained as the supply exceeds the number that can adequately be trained. The annual intake has varied up to 20,000. Recruits are called up in their 20th year, and are trained for 12 months. After this training they pass into the reserve, which is estimated at 300,000.

The Army is organized in 6 divisions, a cavalry division and an armoured troops division. Total strength averages 1,500 officers and 8,000 permanent corps, supported by 10,000 conscripts and a military labour force (also conscripted) of 2,000; total, 21,500.

NAVY. The principal ships of the Chilean Navy are as follows:

| Completed | Name | Standard displacement Tons | Armour Belt In. | Armour Guns In. | Principal armament | Torpedo tubes | Shaft horse-power | Speed Knots |
|---|---|---|---|---|---|---|---|---|
| | | | | *Cruisers* | | | | |

[1] Ex-*Nashville* and ex-*Brooklyn*, purchased from USA in 1951.

There are also 4 destroyers, 2 frigates, 3 corvettes, 2 submarines, 1 sail training ship, 2 transports, 3 patrol vessels, 3 landing ships, 3 landing craft, an antarctic patrol ship, 3 oilers and 5 tugs. Two modern destroyers were built in Britain, *Almirante Williams* and *Almirante Riveros*, commissioned in 1960 and 1962 respectively.

Navel personnel in 1963 totalled 900 officers and 12,880 men, including marines and coastal artillery.

AIR FORCE. The Chilean Air Force was in 1963 composed of some 8,000 officers and other ranks. It is organized in 4 brigades, primarily for transport and training duties, but with 1 combat group of jet fighters and light bombers. Its strength includes about 50 jets (F-86F, F-80C, T-33A, T-37 and Vampire T-55); 32 light bombers (B-26); 10 transports (C-47); 88 trainers (reciprocating); 56 other types (various).

**PRODUCTION.** Chile's national income in 1962 was 6,453m. escudos, compared with 5,423m. in 1961 and 3,911m. in 1960; but the *per capita* national income has increased only 1% in the last 10 years.

There are four zones in Chile—the arid 'desert' zone in the north, which for many years furnished the world's entire supply of natural nitrate of soda, 90% of its iodine and 18% of copper consumed; the agricultural 'Mediterranean' zone in the centre; the 'forest' zone to the south; and the 'Atlantic' zone in the extreme south, barren on the Pacific side, but with rich sheltered pampa on the Atlantic side.

The Chilean Development Corporation (CORFO) materially assists industry, power and agriculture.

*Agriculture.* Agriculture and forestry contribute one-ninth of the national product, although one-third of the population take part in it. Total area of potential agricultural land (1955) was 27·4m. acres; of forest land, 52·7m. acres; pasture land, 48·9m. acres. While population between 1945 and 1959 increased 45%, food production increased by only 8%. Chile has to import annually about US$50m. of foodstuffs. For 1962 the authorities authorized imports (in 1,000 tons) of meat (54), edible oil (10), maize (10) wheat (420), butter (4) and powdered milk (209).

Some principal crops and exports were as follows:

| Crop | Area sown, hectares |  | Production, 1,000 metric tons |  | Exports, 1,000 metric tons |  |
|---|---|---|---|---|---|---|
|  | *1961–62* | *1963–63* | *1961–62* | *1962–63* | *1961* | *1962* |

| Peas | 16,500 | 18,000 | 9·2 | 9·9 | 0·5 | 1·1 |
| Onions | 4,900 | 4,500 | 123·0 | 101·3 | 27·6 | 30·4 |

There are over 300 large farms, each with more than 12,250 acres, while 500,000 peasants live on less than 4 acres per family.

In the Magallanes pampa region and Tierra del Fuego there are about 2·8m. high-grade sheep (chiefly Romney Marsh and Corriedales). Output of wool is about 20,000 metric tons; exports in 1962, 5,957 metric tons, valued at US$5,794,000.

*Forestry.* Extensive natural forests are found, the largest in the provinces of Valdivia, Llanquihue and Chiloé. A forest census, 1953, showed 277·7m. pine trees, 22·1m. eucalyptus and 4·8m. others. Timber production in 1960 was 26·3m. cu. ft (exports, 1·39m. cu. ft). Paper production, 1962, was 108,879 tons; cellulose production started in 1959, with nearly 30,000 tons in the first year.

*Fisheries.* Chile's whale catch in 1958 amounted to 2,317 whales; catch of fish in 1959 was 272,512 metric tons, of which shell fish, 44,073 tons. In 1961, 42,623·5 metric tons of fishmeal were exported, value US$3,587,148.

*Mining.* The wealth of the country consists chiefly in its minerals, especially in the northern provinces of Atacama and Tarapacá.

Copper is the most important source of Chile's foreign exchange (over 60%) and Government revenues (over 30%). Reserves represent 40% of the world total. Production in 1963 amounted to 507,430 metric tons, of which 89% came from the United States owned mines; the Government proposes legislation that these should increase production by 15% every 3 years.

Nitrate of soda is found in the Atacama desert. Once Chile's principal export, production has declined to 1·3m. metric tons in 1962 (exports 1962, 0·9m. tons). Iodine is a by-product: 1962 exports totalled 2,278 metric tons (US$3·7m.). The use of solar evaporation as a means of reducing costs has developed the production of potassium salts as an additional by-product.

Iron ore, of which high-grade deposits estimated at over 1,000m. tons exist in the province of Atacama and Coquimbo, is rapidly overtaking nitrate as Chile's second mineral. Production in 1962 amounted to 7·88m. metric tons.

Coal reserves exceed 2,000m. tons, partially low in thermal unit. Net 1962 production was 1·06m. metric tons compared with 1·6m. tons in 1961; and exports 1,000 tons (70,650 in 1959). Petroleum was discovered in 1945 in Magallanes, with a potential annual output estimated at 4·3m. metric tons. This state-owned industry is developing fast: from 1950 to 1960 annual production of crude oil increased from 100,200 to 1,149,000 cu. metres. The Concón refinery produced in 1960, 694,430 cu. metres of petrol, 93% of the country's needs; production rose to 1,500m. in 1961 and 1,900m. cu. metres in 1962.

Other minerals include gold of which the major part is from copper production (1,633 fine kg. in 1961), silver (2,184,271 troy oz. in 1962), molybdenum (5·3m. lb. in 1962), cobalt, zinc, tungsten, manganese (51,800 short tons in 1962), borate, salt, sulphur and lead (1,830 short tons in 1962).

*Industry.* A nationally-owned steel plant, representing an investment of US$112m. of foreign exchange, has been established at Huachipato, near Concepción. Output, 1961, 327,600 metric tons of pig-iron and 257.500 metric tons of steel.

The textile industry consumes 70% of the wool clip of the country, or about 14,000 metric tons. In 1955, 50 factories produced 90m. metres of cotton cloth.

*Electricity.* In 1960, installed electric capacity was, thermal 548,000 kw., and hydro 593,800 kw.; of which public utilities owned 32%; mines. 28%, and an American company, 25%. Production is said to have increased 4% in 1961 and about 14% in 1962.

**Labour.** In 1962 the 'economically active' numbered 2.356.000 (including 518,200 women). Professional and 'white-collar' workers numbered 488,500; agriculture employed 632,100; manufacturing, 524,500; mining, 57,300, and transport, 77,700.

Trade unions began in the middle 1880s. On 1 Jan. 1960 there were 616 industrial unions (149,711 members), 20 agricultural unions (1,656 members) and 1,116 professional syndicates (110,933 members).

**COMMERCE.** Imports and exports (including re-exports and excluding bullion and specie) in US$1m.:

**COMMUNICATIONS.** *Shipping.* The mercantile marine had, in Oct. 1960, 74 ships of over 100 tons, totalling 168,470 GRT and owned by 23 companies. Valparaíso is the chief port. The free ports of Magallanes, Chiloé and Aysén serve the southern provinces. Tonnage handled in the 10 main Chilean ports was 7·4m. tons in 1961.

There are 2,185 km of navigable rivers.

*Roads.* In 1961 there were in Chile 56,976 km of highways, of which 2,442 first-class paved, 21,840 second class and 31,694 earth. There were in 1960, 75,903 automobiles and 64,772 trucks and buses.

*Railways.* The total length of railway lines is 8,408 km; of these private railways lines, principally British-owned, amount to 2,168 km. Electrification of the railways is proceeding. A railway from Salta in north-western Argentina to Antofagasta was opened in Dec. 1953.

*Post.* There are 1,147 post offices and agencies. The length of telegraph lines in 1962 was 44,000 km; there were 603 telegraph offices. In 1962 there were 220,163 telephones in use, all (except 1,500) under private companies, of which the largest is American-owned; Santiago had 127,723 telephones.

A chain of wireless stations along the coast for shore-to-ship transmission is operated by the Navy. At the end of 1956 there were 82 small medium-wave broadcasting stations.

*Aviation.* There were, 1958, 8 customs airports, 11 military airports, 20 civilian airports, 89 landing grounds and 13 seaplane bases. In 1960 Chile was served by 10 commercial air companies (2 Chilean, BOAC and Panagra, KLM, SAS, Panair do Brasil, Lufthansa, CPA, Aerolíneas Argentinas). There were 8 international airports. In 1959, 193,936 passengers were carried into and out of Chile on international services; 209,500 passengers were carried and 176m. passenger-km were flown on internal routes. In 1960, 7·5m. ton-km of freight and 254m. ton-km of mail were carried by the national airline, LAN, and they carried 388,000 passengers 429·9m. passenger-km.

**MONEY AND BANKING.** The old monetary unit was the gold *peso*, containing 0·183057 gramme of fine gold with, originally, a par value of 6*d*. sterling gold or 12·7 cents US$ gold (or 20·6 cents new US). From Jan. 1948 to Oct. 1953 the rate of 31 pesos to the dollar was used and from Oct. 1953, 110 pesos; from Dec. 1959 onwards the rate (used to value the gold stock) has been 1·049 escudos (1,049 pesos) to the dollar. For customs purposes imports and exports are still valued in the old 6*d*. gold peso.

Until Jan. 1959 two rates were used for market transactions, one for foreign trade payments and the other for tourists and capital investment which bore no relationship with the 110 pesos = US$1 rate registered with the IMF. In that month the rates were amalgamated, but in 1962 recourse had again to be made to dual rates, the 'bankers' (including foreign exchange) rate was 1·9 escudo and the 'brokers' rate 3·416 escudo to the US$ in Sept. 1963. The International Monetary Fund computes 1·049 escudos per US$.

The currency in circulation is chiefly paper issued by the Central Bank in denominations of 50,000, 10,000, 5,000, 1,000, 500, 100, 10 and 5 pesos. There are also copper–tin–zinc coins of 10 pesos and 1 peso. In Jan. 1960 a new system came into force based on the *escudo* (equivalent of 1,000 pesos) the *centésimo* (10 pesos) and the *milésimo* (1 peso). New notes in these values are gradually replacing the old peso notes, and a new escudo coin of 10 *centésimos* was issued during 1961.

On 31 May 1963 the Central Bank had gold and foreign exchange reserves equal to US$69·6m. compared with US$78·8m. on 31 Dec. 1962. Notes in circulation and deposits in currency were E.883,000 (estimate) at 30 Sept. 1963; total deposits in the commercial banks stood at E.602,120 on 31 May 1963.

Inflation is still severe: the official cost of living index rose 17·3% in 1957, 32·5% in 1958, 33·3% in 1959, 5·4% in 1960, 9·7% in 1961 and 37·7% in 1962. At Sept. 1963 the rise was 53·6 on Sept. 1962.

**WEIGHTS AND MEASURES.** The metric system has been legally established in Chile since 1865, but the old Spanish weights and measures are still in use to some extent.

# CHINA

### CHUNG-HUA JEN-MIN KUNG-HO KUO, *i.e.*, People's Republic of China

**CONSTITUTION AND GOVERNMENT.** In the course of 1949, the Communists obtained full control of the mainland of China and in 1950 also over most islands off the coast, including Hainan.

On 21 Sept. 1949 the 'People's Republic of China' was proclaimed in Peking by the 'Chinese People's Political Consultative Conference'. The Conference elected Mao Tse-tung as chairman of the Central People's Government (which was formally inaugurated on 1 Oct., now a national holiday) and passed a 'Common Programme' of 60 articles. This Programme, together with the 31 articles of the 'Organic Law', became the basis of the Constitution adopted by the First National People's Congress, on 20 Sept. 1954.

The Constitution of the People's Republic of China consists of a preamble and 106 articles. The most important are:

*Art.* 3. The People's Republic of China is a unified, multi-national State. All the nationalities are equal . . . have freedom to use and develop their spoken and written languages, and to preserve or reform their habits and customs.

Regional autonomy shall be applied in areas compactly inhabited by national minorities. National autonomous areas are inalienable parts of the People's Republic of China.

*Art.* 6. The state sector of the economy is a socialist sector, owned by the whole people. It is the leading force in the national economy and the material basis for the socialist reconstruction carried out by the state. All mineral resources and waters, as well as forests, undeveloped land and other resources which the state owns by law are the property of the whole people.

*Art.* 7. The co-operative sector of the economy is either socialist, when collectively owned by the working masses, or semi-socialist, when in part collectively owned by the working masses. Partial collective ownership by the working masses is a transitional form through which individual peasants, individual craftsmen and other individual working people pass to collective ownership by the working masses . . .

The state protects the right of the peasants to own land and other means of production (*Art.* 8), of craftsmen and other non-agricultural individual working people to own means of production (*Art.* 9), of capitalists to own means of production and other capital (*Art.* 10), but, 'the policy of the State towards kulak enterprise is one of restriction and gradual elimination' (*Art.* 8) and 'the policy of the state towards capitalist industry and trade is to utilize, to restrict and to reform them. The state gradually replaces capitalist ownership by ownership by the people' (*Art.* 10).

The National People's Congress is the highest organ of state authority (*Art.* 21) and the sole legislative authority in the country (*Art.* 22). It is composed of deputies elected by provinces, autonomous regions, municipalities directly under the central authority, the armed forces and Chinese resident abroad (*Art.* 23).

According to the Electoral Law, as amended on 3 Dec. 1963, the provinces and autonomous regions elect 1 deputy for every 400,000 persons, but at least 3 deputies from each province; cities, directly under the central authority, industrial cities and industrial districts with populations of 200,000–300,000 elect 1 deputy for every 50,000 persons; the national minorities, 300 deputies; the armed forces, 120; the overseas Chinese, 30 deputies ('to be elected from among the returned overseas Chinese').

The National People's Congress is elected for 4 years and meets at least once a year. It can amend the Constitution with a two-thirds majority vote of all the deputies, enacts laws with an absolute majority vote, elects and has power to remove from office the highest state dignitaries, decides on the national economic plan, on questions of war and peace, etc. The Standing Committee is the permanent body of the Congress, convenes it, conducts the elections, interprets the laws, adopts decrees, supervises the work of the Government, etc. (*Art.* 25–38).

In 1959 the National People's Congress consisted of 1,226 deputies, including 150 women and 179 representatives of national minorities. The Third Congress, to be elected by Sept. 1964, will number about 2,500 deputies.

*Art.* 47–52 deal with the Central People's Government, called the State Council. *Art.* 53–66 deal with local government. There are 3 main administrative levels: (1) Provinces, autonomous regions and municipalities directly under the central authority; (2) *chou*, counties, autonomous counties, cities; (3) *hsiang*, autonomous *hsiang*, and towns. On each level, there are people's congresses and people's councils. *Art.* 67–72 deal with self-government of national minorities in national autonomous areas. *Art.* 73–84 deal with the new judicial system. (*See below* JUSTICE.)

For further details *see* THE STATESMAN'S YEAR-BOOK, 1957, pp. 877–79.

The Government of the People's Republic of China was in March 1964 composed as follows:

*Chairman of the People's Republic of China:* Liu Shao-chi (elected 27 April 1959).

*Deputy-Chairmen:* Soong Ching-ling (Mme Sun Yat-sen); Tung Pi-wu.

The *State Council* consists of the Premier, 14 Deputy-Premiers (of whom 8 are also Ministers), 30 other Ministers or Chairmen of Commissions (with ministerial status) and the Secretary-General. Immediately under the Premier there are 7 central offices to supervise and co-ordinate the ministries and commissions.

*Premier:* Chou En-lai. *Deputy Premiers:* Marshal Lin Piao (*Minister of Defence*), Senior Gen. Lo Jui-ching (*Chief of General Staff*, the former *Minister of Public Security*), Teng Hsiao-ping (*General Secretary of the Central Committee*), Teng Tzu-hui (*Director, Central Office of Agriculture and Forestry*), Marshal Ho Lung (*Chairman, Commission for Physical Culture and Sports*), Marshal Chen Yi (*Foreign Minister*), Ulanfu (*Chairman, Commission of Nationalities Affairs*), Li Fu-chun (*Chairman, State Planning Commission*), Li Hsien-nien (*Minister of Finance*), Marshal Nieh Jung-chen (*Chairman, Science and Technology Commission*), Po I-po (*Chairman, State Economic Commission*), Tan Chen-lin (*Secretary, Central Committee*), Lu Ting-yi (*Secretary, Central Committee*), Hsi Chung-hsun (*Secretary-General, State Council*).

The *Standing Committee of the National People's Congress* consists of the Chairman (Marshal Chu Teh), 15 Deputy-Chairmen (after the flight to India of the Dalai Lama), the Secretary-General (Peng Chen, also one of the Deputy Chairmen) and 66 members.

A 30-year treaty of 'friendship, alliance and mutual aid' between the USSR and the People's Republic of China was signed in Moscow on 14 Feb. 1950. The treaty of 14 Aug. 1945, negotiated with the Nationalist Government, was declared invalid. Further agreements with the Soviet Union were concluded in 1952, 1953, 1954, 1955 and 1959.

*State emblem:* 5 stars above Peking's Gate of Heavenly Peace, surrounded by a border of ears of grain entwined with drapings, which form a knot in the centre of a cogwheel at the base; the colours are red and gold.

*National flag:* Red, with 5 stars.

*National anthem:* The March of the Volunteers (words by Tien Han; tune by Nieh Erh).

The Communist Party of China had, in mid-1961, 17m. members.

The 8th national congress of the Party, which met in Sept. 1956, adopted a new constitution of the Party, which declares that 'Marxism–Leninism is not a dogma but a guide to action'. In March 1964 the Central Committee consisted of 95 full and 82 alternate members and the Politburo of 15 full and 6 alternate members. The first 6 members of the Politburo constitute its Standing Committee: Mao Tse-tung (*Chairman of the Central Committee*); 4 Deputy Chairmen of the Central Committee: Liu Shao-chi (*Chairman of the People's Republic*), Marshal Chu Teh (*Chairman, Standing Committee of the National People's Congress*), Chou En-lai (*Premier*), Marshal Lin Piao (*Deputy Premier, Minister of Defence*); and Teng Hsiao-ping (*Deputy Premier, and General Secretary of the Party*).

**AREA AND POPULATION.** China is composed of 22 provinces (including Taiwan), 5 autonomous regions of nationalities, namely Inner Mongolia, Sinkiang–Uighur, Kwangsi–Chuang, Ningsia-Hui, Tibet (and Chamdo area), and 2 municipalities (Peking, Shanghai) under direct government administration. The capital is Peking.

The total area is estimated at 9,736,000 sq. km (3,768,100 sq. miles). An exchange of some villages along the frontier with Burma was agreed upon in Jan. 1960.

The population is given as 601,938,035. This figure was arrived at as follows: Direct census (30 June 1953), 574,205,940; Taiwan ('yet to be liberated'), 7,591,298; Chinese resident or studying abroad, 11,743,000; Chinese 'in remote border regions', 8,397,477. Urban population, 77·3m. (13·3%); rural population, 505·3m. (86·7%).

Estimated population of mainland China in Jan. 1964 was 735m.

The numbers of Chinese outside China and Taiwan was estimated at 16·34m. in mid-1962, including 3·8m. in Thailand, 3·2m. in Hong Kong, 2·5m. in Indonesia, 2·5m. in Malaya, 1·25m. in Singapore, 237,000 in USA, 52,000 in Canada and 12,000 in the UK.

In Jan. 1961, the 6 'greater administrative areas', which had already existed in 1949–55, were re-established. At the same time, provincial governors, often concurrently first secretaries of the provincial party organizations, became the effective executives of 'the people's democratic dictatorship'.

[1] Formerly Kweisui.

[2] Always regarded by the Peking regime as part of China.

[3] Formerly Canton.

[4] Plus most of the then 3·4m. population of the former province Sikang, incorporated Aug. 1955 in Szechwan province, except the area to the west of Yangtse River (Chamdo) which was united with Tibet.

[5] Formerly Ningsia.

[6] Formerly Tihwa.

Municipalities under direct control of the central government, with estimated population: Shanghai (end of 1957), 6·9m.; Peking (March 1958), 5·42m. (with an area of 8,770 sq. km. from 20 Oct. 1958).

Other large towns, with population at the end of 1957: Tientsin, 3·22m.; Shenyang (formerly Mukden), 2,411,000; Wuhan (the former 3 towns: Hankow, Wuchang and Hanyang), 2,146,000; Chungking, 2,121,000;

Kwangchow (formerly Canton), 1,840,000; Harbin, 1,552,000; Lü-ta (formerly Port Arthur–Dairen, afterwards Lushun-Talien), 1,508,000; Nanking, 1.419,000; Sian, 1,310,000; Tsingtao, 1,121,000; Chengtu, 1,107,000; Taiyuan, 1,020,000; Fushun, 985,000; Changchun, 975,000; Anshan, 805,000; Tongshan, 800,000.

**Manchuria** no longer exists as an administrative unit. The Sino-Soviet treaty of Feb. 1950 gave the USSR a share in the administration of the Changchun Railway and certain interests in the port of Dairen and provided for the transfer to China of the naval base of Port Arthur immediately upon the conclusion of a peace treaty with Japan or not later than 1952. The railway was returned to China at the end of 1952, and in 1955 the Soviet transferred to the Chinese the installations in the Port Arthur naval base.

**Inner Mongolia** was, in May 1947, constituted an autonomous region. The People's Government has repeatedly altered its boundaries. It comprised, in 1950, the northern part of the former province of Chahar with parts of (former) western Manchuria. In June 1954 Suiyan province, and in Aug. 1955 parts of Jehol province, were incorporated in the Inner Mongolian Autonomous Region. It is divided into 7 *meng* ('tribal leagues'), Bayin Chor, Ulan Chap, Hulunbir, Cherim, Chao Uda, Chahar and Silingol.

**Tibet**, now claimed as an integral part of China, is classed as an autonomous region (like Inner Mongolia, Sinkiang, Uighur, Ningsia and Kwangsi Chuang); *see* p. 1470.

**RELIGION.** Three faiths have long been established in China, viz., Confucianism, Buddhism and Taoism. Confucianism has no ecclesiastical organization like the other two, and so appears rather as a philosophy of ethics and government. It has usually dominated the governmental administration from 136 B.C. to A.D. 1905. Buddhism and Taoism present a very gorgeous ceremonial, Taoism—of Chinese origin—having copied Buddhist ceremonial soon after the arrival of Buddhism 1,900 years ago. Buddhism in return adopted many Taoist magical beliefs and practices. Buddhists in China number perhaps 150m. and Taoists 30m.

Ceremonies of reverence to ancestors have been observed throughout the country by the whole population regardless of philosophical or religious beliefs.

Moslems are found in every province of China, being most numerous in Yunnan, Shensi, Kansu, Hopei, Honan, Shantung, Szechwan, Sinkiang and Shansi. The total is estimated at 5% of the population.

Roman Catholicism has had a footing in China for more than 3 centuries; it has about 3m. adherents. In 1957 the Chinese Roman Catholics, under the Archbishop of Shenyang, declared their independence of Rome.

Protestant Missions date from 1807. Attached to Protestant Missions in 1934 were 19 colleges of university standing and 267 middle schools. Protestant Chinese number about 700,000. By Sept. 1952 all foreign Christian foundations had lost their identity in a reorganized university system.

By the end of 1955 only 1 Protestant and 12 foreign Roman Catholic missionaries seem to have been at work.

**EDUCATION.** In 1958 there were 86·4m. pupils in elementary schools, 8·5m. in secondary schools and 1·47m. in secondary technical schools. 227 institutes of higher education had 660,000 students.

The 'new-policy' educational system distinguishes full-time, part-study and part-work, and spare-time institutions. Full-time primary and secondary education takes 6 years each; college education, 4–6 years; secondary technical education, 3–4 years. All secondary and college students have to do a month's manual work every school year.

The Academy of Sciences, with some 15 provincial branches, had, in 1957, 68 research institutes with 5,500 scientific workers. By the end of 1958, 848 special research institutes throughout the country claimed 32,500 research workers in science and technology.

Institutes of higher learning included in 1957: 15 universities, 48 engineering colleges, 31 agriculture and forestry colleges, 5 schools of economics, 5 schools of law and political science, 43 teachers' colleges, 37 medical schools, 16 art schools; 6 of these colleges are reserved for national minorities.

In 1963–64 there were the following 15 universities: People's University of China, Peking (founded 1912 by Dr Sun Yat-sen; reorganized 1950; about 3,000 students); Peking University, Peking (1898, enlarged 1945; about 10,000 students); Amoy University, Fukien (1921 and 1937); Futan University, Shanghai (1905); Inner Mongolia University, Huhehot: Lanchow University, Lanchow (Kansu Prov.); Nankai University, Tientsin (1919); Nanking University, Nanking (1888 and 1928); People's University of North-East China, Changchun (Kirin Prov.); North-Western University, Sian (Shensi Prov.); Shantung University, Tsingtao (1926); Sun Yat-sen University, Kwangchow (formerly Canton; founded 1924 by Dr Sun Yat-sen); Szechwan University, Chengtu (1931); Wuhan University, Wuhan (Hupeh Prov.; 1905 and 1928); Yunnan University, Kunming.

In 1958 a university of science and technology was set up by the Academy of Sciences, the President of the Academy acting as its president; 6,000 students take a 5-year course, the first group of 1,600 graduating in July 1963.

A 30-letter version of the Latin alphabet was adopted in Feb. 1956 to replace gradually the 30,000 characters of the Chinese script.

*Cinemas* numbered 1,386 in 1958.

**JUSTICE.** The People's Government has abolished the judicial system of the Nationalist Government. The Supreme People's Court is now the highest judicial organ, after the abolition of the Ministry of Justice in 1959. The People's Procurator-General's office has the responsibility of seeing that the laws are strictly observed by all government institutions and governmental officials. The term of office of all judges and procurators is 4 years.

The Marriage Law of May 1950 forbids polygamy in any form, child marriage and infanticide, gives property rights to women and institutes legal divorce.

**FINANCE.** Budgets for calendar years (in 1m. new yuans):

| | *1957* | *1958* | *1959* | *1960* |
|---|---|---|---|---|
| Revenue | 31,010 | 41,860 | 54.160 | 70,020 |
| Expenditure | 30,420 | 40,960 | 52,770 | 70,020 |

No later budgets have been published.

The 1960 budget envisaged (in 1m. new yuans): *Revenue:* from state enterprises, 45,300 (64·7%); from taxes, 24,360 (34·8%), including 19,450 from industry and commerce and 3,300 from agriculture. *Expenditure:* Economic construction, 42,910 (61%); social, educational and cultural affairs, 8,620 (12·3%); defence, 5,800 (8·3%); administration, 3,170 (4·5%); repayment of loans, 1,200; aid to foreign countries, 500; additional credit funds to the banks, 5,800 (8·3%); reserve, 1,700 (2·4%).

Internal loans amounted to 600m. yuans in 1956 and 1957 each; the 1958 National Economic Construction Bond issue was to supply 630m. yuans.

All Soviet credits and similar forms of assistance granted to China between 1950 and 1958 had been repaid by Oct. 1963; Soviet loans are to be repaid by 1965.

For foreign and internal loans until 1949 *see* THE STATESMAN'S YEAR-BOOK, 1952, p. 852.

**DEFENCE.** Conscription was introduced in Feb. 1955. Service lasts 3 years in the Army, 4 years in the Air Force and Coastal Service, and 5 years in the Navy. The yearly intake is about 450,000 men of 18 years of age.

In Sept. 1955 the rank of Marshal and a number of military orders and decorations were created on the Soviet model.

*Army.* The Army consists of 120 divisions, including 3 armoured and 1 airborne divisions. The conscript potential is about 700,000 per annum, but only a small proportion are called up to serve 3 years. Estimated total strength at the end of 1963 was 2·25m.

The People's Militia is claimed by the Chinese authorities to have a strength of 125m. men and 75m. women. It is, however, a conscript labour force rather than a military establishment. Of these 200m. people, 5m. at the utmost have had any training with weapons.

*Navy.* Present strength comprises 4 destroyers, 28 submarines, 18 frigates, 24 patrol vessels, 61 motor gunboats, 38 minesweepers, 150 motor torpedo-boats and fast patrol boats, 59 landing ships and landing craft, 49 auxiliaries and 380 service craft.

Active personnel (1963): 81,000 officers and men, including 28,000 marines and 15,000 naval airmen.

There are no naval bases of any importance. Existing dockyards are: Talien, Foochow, Taku, Kiangnan (Shanghai) and Amoy (Fukien).

*Air Force.* In 1963 the Air Force was estimated at 2,000 front-line aircraft, organized in 40–50 regiments of jet-fighters and 20–25 regiments of tactical bombers, plus reconnaissance, transport and helicopter units. Each regiment is made up of 3 squadrons, and 3 regiments form a division.

Equipment is mostly Russian in design and includes MiG-19, MiG-17 and MiG-15 fighters, Il-28 jet-bombers, Tu-4 piston-engined maritime reconnaissance bombers, Il-14 and An-2 piston-engined transports, and Mi-1 and Mi-4 helicopters. The MiG-17 and An-2 are built under licence in a national factory at Shenyang, and other types are assembled there.

Total strength (1963) about 90,000, including 10,000 pilots.

**PRODUCTION.** *Planning.* In Nov. 1952 a State Planning Commission was appointed. The first 5-year plan ran from 1953 to 1957; the second is in force from 1958 to 1962; the third, for 1963–67, was issued in mid-1961 to cater for 'the simultaneous development of industry and agriculture'. A special 10-year programme for agriculture covering the years 1956–67 was adopted in April 1960 (*sic*). No target figures have been published. In Dec. 1963 it was announced that 'serious natural calamities during 3 consecutive years and the perfidious action of those [*i.e.*, Soviet] who unilaterally tore up [some 600] agreements and withdrew [some 1,400] experts' have resulted in 'successfully building socialism by relying on our own efforts'.

By the end of 1958 the peasant population of some 500m. had been organized in 26,578 'People's Communes', roughly corresponding to the former rural districts (*hsiang*), where semi-military living conditions and compulsory military training are enforced. Each commune averages 64,000 *mou* (= 4,300 hectares), 4,637 households and 10,000 able-bodied workers.

*Agriculture.* China is essentially an agricultural country. The distribution of farm tenancy in 1946 was: Owners, 40%; part-owners, 25%; tenants, 35%. The standard of living of the farming population is low.

A law passed on 30 June 1950 decreed the confiscation of land belonging to feudal lords and the requisition of land owned by churches, monasteries, schools and similar institutions; by the end of 1952 land reform was stated to be completed. By the end of 1958 the socialization of agriculture was declared to be complete.

Total arable land in China is estimated at about 192.060 sq. miles. Chinese agriculture is intensive rather than extensive; irrigation is common. Rotation of crops is practised. Horticulture has reached a high state of perfection, and fruit trees are grown in great variety.

According to official data, drought, floods, diseases of crops and insect pests affected 40m. hectares in 1960 and over 60m. in 1961, out of the arable total of 106·7m. hectares.

In 1961 there were in use 100,000 tractors (in terms of 15-h.p. units).

The total grain crops were officially given as follows (in 1m. metric tons): 1955, 184; 1957, 185; 1958, 254; 1959, 270·5; target 1962, 250.

The average yearly production of cotton was 2·855m. bales in 1935–39; estimated production in 1959, 2·41m. tons.

Tea is cultivated exclusively in the west and south; production in 1952 was 82,500 metric tons. Silk culture is one of the oldest industries, but has much deteriorated. The production of silk cocoons is estimated at 3·3m. *piculs*, of which about 40% is produced in the central provinces of Kiangsu, Chekiang and Anhwei. Raw-silk production in 1949 was estimated at 73,000 *piculs*. Jute and hemp production, 1952, was 300,000 metric tons; 1957 (target) 365,000 tons.

The tobacco crop in 1952 was estimated at 202,000 metric tons; planned output for 1957, 390,000 metric tons.

Sugar-cane production, 1952, was 7·14m. metric tons; 1957 target, 13·15m. (plus 2·16m. tons of sugar beet). Sugar output (1,000 metric tons), 1957, was estimated at 850; 1958, 900; 1959, 1,130; target 1962, 2,400–2,500.

Livestock, 1959 (and targets for 1962): Cattle, 65·43m. (90m.); horses, 7·6m. (11m.); sheep and goats, 112·53m. (170m.); pigs, 114m. (250m.).

*Forestry.* The chief forested areas are in Heilungkiang (Manchuria), Szechwan and Yunnan. The most important tree is the tung (*Jatropha Curcas L.*), from which oil is produced; it grows chiefly in Szechwan. Tung-oil production amounted to 115,000 metric tons in 1948–49; exports in 1947 totalled 82,494 tons. Timber output in 1957 was 27·87m.; 1958, 35m.; 1959, 41·2m.; target 1962, 31m.–34m. cu. metres.

The most important timber product is teak, which is used everywhere in China for building, furniture and coffins. In 1957, 3·96m. hectares were afforested; target for 1958, 330,000 sq. km, including 118,000 sq. km in the north-western desert area.

*Manufacture.* An important feature in the development of Chinese industries has been the erection of cotton- and wool-mills, and of silk filatures in Shanghai, Canton and elsewhere. The cotton spinning industry, in 1947, had 3m. spindles operating, compared with 4–5m. pre-war. A large number of Japanese spindles, principally in Shanghai, was taken over as war reparations in 1945. At the large centres flour- and rice-mills are beginning to supersede native methods of treating wheat and rice. At Hanyang, near Hankow, are large iron-works, supplied with ore from mines at Tayeh, about 60 miles distant. Electrical enterprises are making good progress. Water-works have been established in most of the big cities. Big chemical works were built in the mid-1950s in Kirin (north-east China), and 2 existing factories, at Dairen and Nanking, were rebuilt and extended. The tanning industry is being developed principally in Kiangsu, Hopei and Shantung. Cement works number 12. Match manufacturing is centred in Shantung, Kwantung and Kiangsu.

In Sept. 1958 a drive was started to build up, in connexion with the People's Communes, local 'backyard' industries all over China.

*Mining.* Coal, gold, iron, copper, lead, zinc, silver, tungsten, mercury, antimony and tin are all produced in western China. Most of the provinces contain coal; the entire coal resources of China are estimated at 262,941m. metric tons. By 1957, 31 collieries with an annual output of more than 1m. tons each were to be developed; the 'big five' were to produce by 1957: Kailwan, 9·68m.; Fushun, 9·3m.; Fushin, 8·45m.; Huainan, 6·85m.; Tatung, 6·45m.

Iron ores are abundant in the anthracite field of Shansi, in Hopei, in Shantung and other provinces, and iron (found in conjunction with coal) is worked in Manchuria. 300m. tons of ore are estimated to be in Shansi; the principal iron-ore reserves total about 19,840m. tons. The Tayeh iron deposits, near Hankow, are among the richest in the world. Output of iron ore in 1962, 34·5m. metric tons; pig-iron, 19·7m. metric tons; steel ingot and castings, 11·8m. metric tons. The biggest steel bases are at Anshan (in former Manchuria), Wuhan (capital of Hupei province) and Paotow (Inner Mongolia).

Output (in metric tons) of oil was 400,000 in 1954; target for 1957, 1·5m.; claim for 1958, 2·23m.; for 1959, 3·7m.; target 1962, 5m.–6m. (including crude petroleum, crude shale oil, oil from coal carbonization and synthetic crude oil from coal); western estimate for 1963, 7m.

Tin ore is plentiful in Yunnan, where the tin-mining industry has long existed; production of tin in 1949, 4,300 metric tons. Tin, wolfram and antimony used to be the most important mineral exports. Molybdenum ore has been found in Fukien and Kiangsi (production, 1962, 3·3m. lb.): bismuth has also been worked. China is the world's principal producer of tungsten; output, 1962, 20,000 metric tons. Mining from wolfram (tungsten ore) is carried on in Hunan, Kwantung and Yunnan. Output of mercury in 1948 was 290 metric tons. Other metals (1962): Copper, 110,000 short tons; lead, 100,000 short tons; aluminium 110,000 short tons; manganese, 1·1m. short tons; silver, 800,000 fine oz.; graphite, 45,000 tons; bauxite, 400,000 tons; zinc, 110,000 tons; antimony, 18,500 short tons; asbestos, 90,000 tons; phosphate rock, 600,000 tons. Salt output, 1957, 8·27m. tons; 1958, 10·4m.; 1959, 11·04m.; target 1962, 10m.–11m.

On 27 March 1950, 2 Chinese–Soviet joint-stock companies were established for developing oil and non-ferrous metals in Sinkiang province. The Soviet shares were relinquished in 1955.

Industrial production in 1959 (and targets for 1962), in 1m. metric tons: Coal (planned), 335 (230); pig-iron, 20·5; crude steel (planned), 12; cement, 12·27 (12·5); paper, 1·7 (1·6); timber, 41·2m. cu. metres (34); chemical fertilizers, 1·3 (3·2); electricity (1960), 55,000m. kwh. (44,000m.). Cotton yarn, 1958, 6·66m. bales; textiles fabrics (in 1m. metres): cotton, 6,408; woollen, 23·59; silk, over 190.

**Trade Unions** were given a legal status by the Trade Union Law of 1950. Total trade-union membership in Dec. 1957 was 16·3m., representing about 80% of all industrial workers.

**COMMERCE.** The Government has established a National Import and Export Corporation and 13 import and export corporations for tea, silk, minerals, etc. The European office of the Corporation was in 1957 transferred from East Berlin to Bern, Switzerland.

In 1957 the USSR accounted for half, and the whole Soviet bloc for three-quarters of China's foreign trade. Imports from the USSR totalled 2,176m. roubles; exports to the USSR, 2,953m. roubles. Owing to the Soviet–Chinese dissensions, Chinese imports from USSR fell to 735·4m. roubles in 1960 and to 330·6m. roubles in 1961, while Chinese exports to USSR fell to 763·3m. roubles in 1960 and 496·3m. roubles in 1961.

The total imports in 1961 were estimated at US$1,135m., total exports at US$1,212m.

In 1961 and 1962 the Government imported, as an emergency measure, wheat, flour, barley, etc., from abroad. A 3-year contract with the Canadian Wheat Board alone secured 186·7m. bushels of wheat and 46·7m. bushels of barley, at a total cost of $362m. Other large food imports came from Australia, France and the German Federal Republic.

Total trade between UK and China (British Board of Trade returns, in £ sterling):

**COMMUNICATIONS.** Map of the principal roads, all railways and airlines will be found in THE STATESMAN'S YEAR-BOOK, 1956.

*Shipping.* Total shipping under Chinese flag, in 1948, 1,179 vessels of 714,548 tons. The ocean-going vessels are now mainly under control of the Taiwan Government. The first ocean-going ship built in a mainland shipyard, a freighter of 13,400 gross tons, was launched in Nov. 1958.

All questions relating to navigation and port control were, in Aug. 1950, placed under the Bureau of Navigation, with regional centres at Tientsin, Shanghai, Tsingtao, Dairen and Canton. The new southern port of Tsamkong started work in 1957.

Inland waterways total about 150,000 km, of which 40,000 are navigable for steamers. In 1959 inland and coastwise shipping carried 230m. tons of freight.

*Roads.* In 1957 the length of highways was 180,000 km (claim, end of 1958, 400,000 km). Among the principal roads is one from Kunming to Lashio in Burma (the Burma road), 1,130 km long; a motor road connects Szechwan with Sinkiang and runs through that province to the Turkestan–Siberian railway, a distance of 4,000 km from Chungking. A railway and a motor road connect China with Indo-China. Two major roads linking China with Tibet were completed in 1955.

In 1959 road haulage carried 155m. tons of freight.

*Railways.* Chinese railway history begins in 1876, when the Woosung (Shanghai) line was opened. According to official, but often contradictory, statistics from Peking, there were, on 1 July 1950, 21,740 km of railway lines in service. At the end of 1958, 31,193 km were open to traffic.

The principal railways in Dec. 1958 were:

(1) Peking–Canton Railway (over 2,300 km) *via* Chengchow–Wuhan–Chuchow–Hengyang.

(2) Tientsin–Shanghai Railway (1,500 km), *via* Pukow and Nanking.

(3) Eastern Chinese Railway (2,370 km), from Manchouli, through northern Manchuria *via* Harbin, to the Soviet frontier near Vladivostok; the end of the Russian Trans-Siberian, linking Chita and Vladivostok, runs through Chinese territory.

(4) South Manchuria Railway (with branches, 1,120 km; without branches, 705 km), Changchun–Shenyang (formerly Mukden)–Dairen.

(5) Peking–Shenyang (Mukden) Railway, with branches in Manchuria, now double-tracked (1,350 km; without branches, 854 km).

(6) New great north–south trunk lines: (*a*) from Ulan Ude (USSR), *via* Ulan Bator and Chamu Ut (Mongolia), Erhlien and Tsining or Chining (Inner Mongolia) to Peking. This railway shortens the distance between Peking and Moscow by 1,000 km, by comparison with the old Trans-Siberian route, *via* Chita, Manchouli, Harbin; the gauge, like that of the Chinese Eastern Railway, is the Russian standard of 5 ft. (*b*) Tsining–Tatung–Taiyuan–Sian–Paochi (or Paoki). (*c*) Paochi–Chengtu (669 km). (*d*) Chengtu–Kunming (800 km, under construction). (*e*) Laiping–Munankuan (formerly Chennankwan) connects with Hanoi (Vietnam).

(7) New great east–west trunk line: (*a*) Lung–Hai Railway: Lienyun–Hsuchow–Chengchow (on the Peking–Canton line)–Sian–Paochi (on the great north–south trunk line)–Tienshui–Lanchow (1,500 km). (*b*) Lanchow – Sinkiang Railway: Lanchow – Yumen – Hami – Turfan – Urumchi – Suiting (link with USSR, Alma Ata) (2,800 km planned; on 1 Jan. 1960, the section Lanchow–Hami was completed). Surveys have begun for a new 500-km railway, linking the trunk line with the newly discovered oilfield of Karamai in Sinkiang.

(8) Chengtu–Chungking Railway, *via* Neikiang, linking the province of Szechuan (or Szechwan) with its port on the Yangtze River (505 km).

(9) Lanchow–Paotow Railway (991 km), linking north-west China with Inner Mongolia, meeting the great east–west trunk line at Lanchow and the great north–south trunk line at Paotow. The 480-km section from Lanchow was completed in 1958.

In 1959 the railways carried 542m. tons of freight.

*Post.* China has a fairly well-developed telegraph service. Telegraphs connect all the principal cities in the country, and there are lines to all the neighbouring countries. Wireless telegraph stations have been installed at 673 centres. Telephones in use in 1951, 255,000.

Number of post offices of all kinds in 1958 was 67,000.

In 1961 there were some 6m. radio receiving sets; there were also 20 television stations.

*Aviation.* In Dec. 1958 there were 18 interior airlines, connecting Peking with 38 cities and covering 33,000 km. In 1959, Chinese aircraft carried 1·63m. ton/km of freight.

All foreign air services to non-communist countries have ceased.

A Sino-Soviet Civil Aviation Joint-Stock Co. was formed in 1950; it was placed under exclusively Chinese administration on 30 Dec. 1954. It operates lines from Peking to Alma Ata, Irkutsk and Chita.

**CURRENCY AND BANKING.** For the development from 1935 to 1949 *see* The Statesman's Year-Book, 1954. pp. 876–77.

The new legal tender currency on the mainland of China is the 'Jen Min Piao' (People's Bank Dollar) issued by the People's Bank. The Jen Min Piao, usually known by its old name of *yuan*, is divided into 10 *chiao*, the *chiao* into 10 *fen*. On 1 March 1955 new bank-notes were issued; old PB$10,000 = new PB$1. From this date, the official rate of exchange is £1 = PB$6·893; US$1 = PB$2·46; Hong Kong $1 = PB$0·427.

From 1 Dec. 1957 the People's Bank has issued small aluminium coins of 1, 2 and 5 *fen* (= 0·01, 0·02, 0·05 *yuan*) and also a new 10-*yuan* note.

For banking prior to 1950, *see* The Statesman's Year-Book, 1954, p. 876.

On 10 Sept. 1954 the Government established the People's Construction Bank, which is to deal with matters relating to capital equipment, and to issue short-term loans to state-owned building enterprises.

On 12 Nov. 1963 the Agricultural Bank of China was set up to deal with the administration of state investments and agricultural loans.

The People's Government has proclaimed that financial enterprises shall be strictly controlled by the State. Private financial enterprises are to be subjected to state supervision and direction. On 28 Dec. 1950 all assets of the US Government and private American firms were placed under control of the People's Government.

**WEIGHTS AND MEASURES.** Standards of weights, measures and length vary all over the country. However, the People's Government is now introducing the metric system for official use. For the old units *see* The Statesman's Year-Book, 1954, pp. 877–87.

By treaty between Great Britain and China, the *Ch'ih* of $14\frac{1}{10}$ in. has been adopted as the standard, the *Tael*, *Catty* and *Picul* have been fixed at $1\frac{1}{3}$ oz., $1\frac{1}{2}$ lb., $133\frac{1}{3}$ lb. avoirdupois respectively. 1 *Mow* = $\frac{1}{6}$ acre.

## TAIWAN

The island of Taiwan (Formosa) was ceded to Japan by China by the Treaty of Shimonoseki, which was ratified on 8 May 1895, and Japan took formal possession on 2 June of the same year. After the Second World War the island surrendered to Gen. Chiang Kai-shek (Sept. 1945). It is controlled by the remnants of the Nationalist Government under Chiang Kai-shek, who, on 1 March 1950, resumed the presidency of the 'National Republic of China', and was re-elected for his third 6-year presidential term in March 1960. He is concurrently leader of the Kuomintang Party.

*State emblem:* A 12-pointed white sun in a blue sky.
*National flag:* The state emblem in the upper left canton of a crimson flag.
*National anthem:* 'San Min Chu', words by Dr Sun Yat-sen; tune by Cheng Mao-yun.

On 1 Dec. 1954 the USA and the Nationalist Government concluded a mutual security pact pledging American protection of Taiwan and the Pescadores. In Jan. 1955 Congress authorized the President of the USA to include the offshore islands in the protected area.

NTY (1963: 5,741m.).

**DEFENCE.** *Army.* The Army, which embodies the remnants of the forces which escaped to Taiwan with Chiang Kai-shek at the end of the civil war in 1949, now numbers about 400,000. It has been reorganized, re-equipped and trained by the USA. Half the army consists of native Formosans. There is a conscription system for 2 years and reserve liability. Active personnel: 35,000 naval officers and ratings; 27,000 marine officers and men.

*Air Force.* The Nationalist Air Force has been re-equipped with US assistance. It has 2 interceptor wings of F-86F jet-fighters armed with Sidewinder guided missiles, a squadron of F-104A Starfighter interceptors, a squadron of F-86D all-weather fighters, and a fighter-bomber wing equipped with F-100 Super Sabre fighters. Reconnaissance units operate RB-57, RF-101 Voodoo and RF-84F Thunderflash jet aircraft, while the transport squadrons are equipped with C-119s, C-47s and C-46D Commandos. Search and rescue units operate Catalina and Albatross amphibians, and there are large training elements. Total strength is estimated at 80,000 personnel and 900 aircraft.

Each wing has a front-line complement of about 75 aircraft, but the total effective fighting strength is probably no more than 400 aircraft. There are, however, strong elements of the USAF on Taiwan, equipped with jet-fighters and tactical missiles.

**PRODUCTION.** *Agriculture.* The agricultural products are rice (2 crops in the north and centre, 3 crops in the south), tea, sugar, sweet potatoes, ramie, jute, turmeric; camphor is worked in the forests under a government monopoly. Over half of the total population are farmers. The cultivated area was estimated at 2,055,000 acres in 1949. Production (in 1,000 metric tons): Rice, 2,109 (1963); tea, 16·2 (1958); bananas, 129 (1961); pineapples, 180 (1961); sugar, 764 (1962–63); sweet potatoes, 2,400 (1962); tobacco, 16·8 (1958).

Mining is making steady progress, gold, silver, copper and coal being the principal minerals; output (in metric tons) of coal was 4·24m. (1961); aluminium, 11,114 (1962); salt, 359,952 (1957); steel, 227,400 (1958); cement, 1·5m. Output of electricity in 1961 was 4,084m. kwh; total generating capacity (Oct. 1963), 1·04m. kw.

The third 4-year plan, 1961–64, calls for capital outlay of NTY 22,800m. (about US$570m.) for developing mining, power and manufacturing industries; 8,500m. for agriculture; 7,000m. for transport; 4,000m. for commerce and housing; total NTY 45,000m.

Industrial workers numbered 340,000 in 1957.

**COMMERCE.** Total exports, 1961, were valued at US$212m.; 1962, US$238·6m.; 1963, US$358·5m. Imports, 1961, US$322·3m.; 1962, US$327·7m.; 1963, US$230m. (about 30% from each USA and Japan).

**COMMUNICATIONS.** *Railways.* The total length of the Taiwan Railway, which is under provincial control, is 950 km; there are in addition 2,765 km of privately owned railways, most of them owned by the Taiwan Sugar Corporation. Taiwan railways have various gauges, ranging from 3 ft 6 in. to 2 ft. Freight traffic amounted to 11·8m. tons and passenger traffic to 99·5m. passengers in 1959–60.

*Roads.* In 1959 there were 16,200 km of roads. An east–west cross-island highway of 348 km was completed in May 1960. Motor vehicles in 1960 included 7,518 passenger cars, 13,391 buses and trucks, and 22,619 motor cycles.

*Shipping.* The merchant marine, in Oct. 1955, totalled 249,000 gross tons, including 27 ocean-going vessels of 135,000 tons. A modernizing programme aims at replacing 44 old ships (110,000 tons) by 15 new ones (113,000 tons); 4 of these (43,000 tons) were operating in 1961.

Taiwan airlines carried, in 1959, 110,000 passengers and 3,856 tons of freight.

**CURRENCY.** On the return of Taiwan to Chinese sovereignty, the existing currency was converted into notes of the Bank of Taiwan. Taiwan dollars were linked to Chinese national currency at a fixed rate of exchange. When the Gold Yuan entered upon its last phase in early 1949, the Taiwan currency was detached and linked to the US$. The New Taiwan Yuan, however, has also been unable to keep its initial rate of exchange NTY 5 = US$1; on 1 Oct. 1963 the selling rate was fixed at 40·10 and the buying rate at 40 per US$ for all foreign-exchange transactions; £1 = 112·28 (buying rate, 112).

The Nippon Kangyo Bank of Japan opened a branch in Taipei in Sept. 1959; it is the first foreign bank to be established in Taiwan since 1945.

# COLOMBIA

## República de Colombia

**HISTORY.** The Vice-royalty of New Granada gained its independence of Spain in 1819, and was officially constituted 17 Dec. 1819, together with the present territories of Panama, Venezuela and Ecuador, as the state of 'Greater Colombia', which continued for about 12 years. It then split up into Venezuela, Ecuador and the republic of New Granada in 1830. The constitution of 22 May 1858 changed New Granada into a confederation of 8 states, under the name of Confederación Granadina. Under the constitution of 8 May 1863 the country was renamed 'Estados Unidos de Colombia', which were 9 in number. The revolution of 1885 led the National Council of Bogotá, composed of 2 delegates from each state, to promulgate the constitution of 5 Aug. 1886, forming the Republic of Colombia, which abolished the sovereignty of the states, converting them into departments, with governors appointed by the President of the Republic, though they retained some of their old rights, such as the management of their own finances. A decree of May 1928 abolished their right to borrow abroad without the sanction of the central government.

**CONSTITUTION AND GOVERNMENT.** The legislative power rests since 1962 with a Congress of 2 houses, the Senate, of 98 members, elected for 4 years, and the House of Representatives, of about 184 members, chosen for 2 years. During the period of control by the armed forces, beginning June 1953, it was superseded by a 'National Constituent and Legislative Assembly' with limited powers. The word 'Constituent' reflects the fact that it was originally appointed to revise the constitution but evolved into a legislature. By the Act of 1945 the senators had been elected (1 for each 190,000 inhabitants) by direct vote of the electorate instead of, as previously, indirectly by departmental assemblies; the representatives are chosen by the people in each department (1 for every 90,000). Voters at the 1941 elections numbered 1,933,345, or 46·16% of the electorate. The Congress meets annually at Bogotá on 20 July. Women were given the vote, which is now open to citizens of either sex, over 21 years of age, in 1954.

The President is elected by direct vote of the people for a term of 4 years, and is not eligible for re-election until 4 years afterwards. Congress elects, for a term of 2 years, one substitute to occupy the presidency in the event of a vacancy during a presidential term. There are 13 Ministries. A National Economic Council, functioning since May 1935, went through several transformations, becoming in 1954 a Directorate of Planning.

The following is a list of presidents since 1918:

Dr Marco Fidel Suárez, 7 Aug. 1918–11 Nov. 1921.
Gen. Jorge Holguín, 11 Nov. 1921–7 Aug. 1922.
Gen. Pedro Nel Ospina, 7 Aug. 1922–7 Aug. 1926.
Dr Miguel Abadia Méndez, 7 Aug. 1926–7 Aug. 1930.
Dr Enrique Olaya Herrera, 7 Aug. 1930–7 Aug. 1934.
Dr Alfonso López Pumarejo, 7 Aug. 1934–7 Aug. 1938.
Dr Eduardo Santos, 7 Aug. 1938–7 Aug. 1942.
Dr Alfonso López Pumarejo, 7 Aug. 1942–resigned in July 1945.
Dr Alberto Lleras Camargo, 7 Aug. 1945–7 Aug. 1946.
Dr Mariano Ospina Pérez, 7 Aug. 1946–7 Aug. 1950.

Gen. Gustavo Rojas Pinilla, 13 June 1953–May 1957.
Dr Alberto Lleras Camargo (Lib.) 8 May 1958–Aug. 1962.

*Vice-President:* Dr Carlos Lleras Restrepo (since Aug. 1960); being a substitute elected by Congress (Liberal).

The peace effective varies between 12,000 and 15,000 men, according to the conditions established by the General Staff at each conscription period; the war effective is about 300,000 men, excluding the Territorial Army which would raise the figure to about 500,000. Number of national police, about 10,000.

Colombia was the only Latin-American country participating in the Korean war. A regiment of 1,000 men (three times relieved) was continuously in action; it returned to Colombia on 30 Nov. 1954.

**NAVY.** Colombia has 2 destroyers built in Sweden in 1958; 1 destroyer acquired from the USA in 1961; 2 frigates; 5 small transports; 3 oilers; 5 river gunboats; 2 tenders; 4 coastguard vessels; 14 patrol motor launches and 12 tugs. Personnel, 7,000 officers and men. The Navy has also a battalion of marines with 800 officers and men. There are American and British Naval Missions.

**AIR FORCE.** Formed in 1922, the Air Force has been independent of the Army and Navy since 1943, when its re-organization began with US assistance. In 1963 it had about 100 aircraft, comprising a combat group of 6 Canadian-built Sabre jet-fighters and piston-engined F-47D Thunderbolt fighter-bombers, a transport group equipped with C-47s and a small number of C-54s, Otter, Beaver and Porter light transports, and a maritime reconnaissance and rescue unit with Catalina flying-boats and helicopters. Training aircraft include the primary T-34 Mentor and the T-33A jet advanced trainer.

**PRODUCTION.** *Agriculture.* Very little of the country is under cultivation, but much of the soil is fertile and is coming into use as roads improve. The range of climate and crops is extraordinary; the agricultural colleges have different courses for 'cold-climate farming' and 'hot climate farming'. Some 6m. acres are described as arable, 96m. pasture and 148m. forest; about 15,000 tractors were in use in 1961.

Colombia is the second largest producer of coffee and ranks first in the output of mild coffee, demand for which is unaffected by over-production in Brazil. Crops are grown by smallholders, and are picked all the year round. Quality is carefully guarded: the coffee census of 1935 showed 150,000 plantations with 532·2m. producing trees. Coffee output exceeds 5m. bags (of 60 kg). Exports in 1962 were 6·56m. bags; in 1963, 6·13m. bags. Exports of bananas, in 1961, were 9,913,100 stems.

Cotton output, 1960, was 68,732 metric tons; export, 1961, 18,264 tons.

Rice, for domestic consumption, is increasingly important; output, 1960, 430,700 metric tons. Sugar plantations now cover 172,960 hectares (427,216 acres). Unrefined brown sugar, known as panela, is consumed locally; output, 1960, of refined sugar, 302,061 tons; in 1962, 65,738 metric tons were exported, mainly to USA. Output (in metric tons) of maize in 1961 was 865,700; other important crops are potatoes (653,300), plantain

(1,255,400; from 268,000 hectares), yuca (741,200), wheat (142,250), barley (125,382) and tobacco (24,859).

The rubber tree grows wild, and its cultivation has begun; output is a few hundred tons. Fibres are being exploited, notably the 'fique' fibre, which furnishes all the country's requirements for sacks and cordage; output about 12,000 tons. Tolu balsam is cultivated, and copaiba trees are tapped but are not cultivated. Tanning is an important industry, 3·7m. hides being exported in 1956.

Livestock in 1961 was estimated at 16m. cattle, 2m. pigs, 1·3m. horses, 860,000 sheep, 604,000 goats, 454,000 mules and 348,000 asses.

*Fishery.* In Sept. 1963 a *Departamento administrativo de la pesca* was set up. It extended territorial waters to 200 nautical miles.

*Mining.* Colombia is rich in minerals; gold is found chiefly in Antioquia and moderately in Cauca, Caldas, Tolima, Nariño and Chocó; output in 1962, 396,826 fine oz., highest in South America. Foreign concessions produce about 60% of the gold.

Other minerals are silver (131,581 troy oz. in 1962), copper, lead, mercury, manganese, emeralds and platinum (first discovered in Colombia in 1735 and the largest deposit in the world); export of platinum, 1958, 16,036 troy oz. The working of the government-controlled emerald mines has been resumed; the stones are cut in the workshops of the Banco de la República. The chief mines are those of Muzo (government-owned) and Chiver (American-owned).

Sulphur produced by the Puracé mines was 8,960 metric tons in 1959.

A uranium plant with a refining capacity of 30 tons a day is being installed in the Department of Santander in 1959.

The country also has coal (output, 1959, about 2·5m. metric tons, but reserves are estimated at 40.000m. tons), iron (543,000 long tons in 1958), limestone, sand and fireclay deposits. Cement production in 1962 was 1,719,186 metric tons. The 'National Steel Mill', launched in 1940 to develop an iron and steel industry in the Paz del Río region, was denationalized in Dec. 1955 and sold to the Banco de la República, which is to sell it to private industry within 10 years. It turned out 123,000 metric tons of steel ingots and castings in 1961 (of a national total of 175,994); its capacity is to be raised to 220,000 tons by 1965.

The extraction of salt from the remarkable mines in Zipaquirá (several hundred feet thick and covering several hundred sq. miles) and the evaporation at the numerous salt pans along the Caribbean coast are a government monopoly, leased to the Banco de la República; output of salt in 1961 was 336,000 metric tons.

Petroleum production in 1962 was 51·9m. bbls, of which about one-quarter were refined in the country, chiefly at Barrancabermeja; fuel oil, 8·8m. bbls; gas oil, 3·7m. bbls; gasoline, 10·1m. bbls; propane gas, 52,088 tons. Investments in the petroleum industry (1951) amounted to $257·44m., of which American hold 85% and British about 15%. In 1957 oil companies in the country paid 27·3m. pesos in royalties and 2·6m. in taxes.

*Industry.* Value of industrial output (located mainly in the Departments of Antioquia, Cundinamarca and Valle) by 237,848 production workers in 10,572 establishments in 1959 was 10,429m. pesos. These are 69 reassembly plants, apart from the motor industry.

*Power.* Capacity of electric power (1962) is: 459,700 kw. from 408 hydro-electric stations, 210,230 kw. from 416 thermal stations and 230,000 kw.

from private installations. Electric power consumed in 1962, 2,159m. kwh. Natural gas has long been used in some parts.

In Oct. 1954 the Department of Valle del Cauca established a local power corporation closely modelled on the Tennessee Valley Authority.

**Trade Unions.** The left-wing Colombian Federation of Labour (CTC) had, in 1947, 109,000 members out of a total of 165,000 organized workers. The Jesuits in 1946 established a Catholic trade union, *Unión de Trabajadores Colombianos.* In May 1963, 8·6% of the 449,000 workmen in Bogotá were unemployed.

**COMMERCE.** For the 'Charter of Quito' trading agreement in 1948 between Colombia, Ecuador, Panama and Venezuela, *see* THE STATESMAN'S YEAR-BOOK, 1956, p. 882. Colombia's entry into the Latin American Free Trade Area was ratified on 29 Sept. 1961.

**COMMUNICATIONS.** *Shipping.* Venezuela, Colombia and Ecuador formed the Greater Colombia Merchant Marine (*Flota Mercante Grancolombiana*) on 8 June 1946, with headquarters in Bogotá and sectional boards in Caracas and Quito. The corporation has an authorized capital of $20m., of which Venezuela and Colombia subscribed 45% each and Ecuador 10%. Venezuela withdrew from the group in 1953. The *Flota* in 1958 had 35 vessels.

Vessels entering Colombian ports in 1961 had a net registered tonnage of 8,934,912. The Colombian merchant fleet in 1956 amounted to 56,316 tons. On 2 May 1962 a contract was signed for 3 cargo ships of 17,000 tons each to be built in Spain.

In 1964–67, 450m. pesos are to be spent on the modernization of the ports.

The Magdalena River is subject to drought, and navigation is always impeded during the dry season, but it is an important artery of passenger and goods traffic. The river is navigable for 900 miles; steamers ascend to La Dorada, 592 miles from Barranquilla. In 1961 they carried 98,469 passengers and 1,979,148 metric tons of cargo.

*Roads.* Owing to the mountainous character of the country, the construction of arterial roads and railways is costly and difficult. The Government has completed 60% of the 1931 programme for the construction of the main roads and railways. The overhead ropeway connecting Mariquita with Manizales is the longest in the world (0·72 km); it carried 38,601 metric tons of freight in 1955. Total length of motor highways, 33.329 km in 1960. Of the 2,300-mile Simón Bolívar highway, which runs from Caracas in Venezuela to Guayaquil in Ecuador, the Colombian portion is complete. Buenaventura and Cali (Carretera al Mar) are linked by a highway. Motor vehicles numbered 111,455 passenger cars, 16,006 buses and 76,985 lorries on 30 June 1962.

*Railways.* There are 17 lines of railway (8 national and state), with a total length of 3,028 km in 1956. Of the total, 2,584 km have a gauge of 3 ft; the rest a metre gauge. There is one British owned line, La Dorada Railway Co. (111 km). The national lines are mostly small disconnected lines serving principally as feeders to the Magdalena River, which is the main traffic route between the Caribbean and the interior. The Pacific Railway connects Bogotá with the port of Buenaventura. The Atlantic line from Bogotá to Sta. Marta was opened in July 1961. Total railway traffic, 1961, was 9,554,456 passengers and 5,169,336 metric tons of freight (not including government goods). Nationalization of all railways was decided upon in Jan. 1954.

*Post.* The length of telephone lines in service is 218,101 km; instruments in use, 31 Dec. 1962, about 350,000, of which 130,000 in Bogotá; 329,000 are under government operation. The All-American Cables Co., Inc., and the Marconi Wireless Company operate. There are 120 broadcasting stations. Television was established in 1959 at Itagüí.

*Aviation.* In civil aviation Colombia ranks perhaps second, after Brazil, among South American countries. There are 209 landing grounds of all kinds. In 1962 the national airlines carried 2,074,909 passengers and 108,246,900 kg of cargo. In Sept. 1954 the Government bought all the airfields in the country from Avianca, the leading airline.

**MONEY.** At the end of Dec. 1962 Colombia established new exchange rates—7·1 pesos per US$ for exchange certificates and 9 for free dollars. The International Monetary Fund continues to treat as the official rate the one previously existing (since 17 Dec. 1948), namely the peso = 51·282 cents

US. When Colombia joined the IMF on 18 Dec. 1946 the peso's rate was 57·143 cents US.

Coins include 50, 20 and 10 centavos (half silver, half copper–nickel–zinc) and 5 and 2 centavos of various combinations of copper–nickel–bronze–steel. There are also notes representing 1, 2, 5, 10, 20, 50, 100, 500 and 1,000 gold pesos.

**BANKING.** On 23 July 1923 the Banco de la República was inaugurated as a semi-official central bank, with the exclusive privilege of issuing banknotes in Colombia; its charter, in 1951, was extended to 1973. Its note issues must be covered by a reserve in gold or foreign exchange of 25% of their value. Gold stock has risen from US$5m., at the start, to $147m. in Jan. 1947, falling rapidly thereafter to $66m. in May 1951, when publication (of the gold figure, separately from foreign exchange) ceased. On 25 Jan. 1964 the Central Bank had gold and foreign exchange valued at US$128m.; note circulation, 2,661m. pesos (26 Dec. 1963).

The Banco Laboral Colombiano was established on 11 Feb. 1964 with an authorized capital of 2m. pesos.

There are 16 domestic commercial banks of importance and 5 foreign banks (English, Canadian, American, French and Franco-Italian); but 70% of all commercial bank deposits are with the 3 largest domestic banks which have branches throughout the country. In Nov. 1950 they were permitted to accept savings deposits, hitherto a government monopoly.

**WEIGHTS AND MEASURES.** The metric system was introduced in 1857, but in ordinary commerce Spanish weights and measures are generally used; according to new definitions by the Ministry of Development, *e.g.*, *botella* (750 grammes), *galón* (5 *botellas*), *vara* (80 cm), *arroba* (25 lb., of 500 grammes; 4 *arrobas* = 1 quintal).

# CONGO

## Rèpublique du Congo

**HISTORY.** Until the middle of the 19th century the territory drained by the Congo River was practically unknown. When Stanley reached the mouth of the Congo in 1877, King Leopold II of the Belgians recognized the immense possibilities of the Congo Basin and took the lead in exploring and exploiting it. The Berlin Conference of 1884–85 recognized King Leopold II as the sovereign head of the Congo Free State.

The annexation of the state to Belgium was provided for by treaty of 28 Nov. 1907, which was approved by the chambers of the Belgian Legislature in Aug. and Sept. and by the King on 18 Oct. 1908. The law of 18 Oct. 1908, called the Colonial Charter (last amended in 1959), provided for the government of the Belgian Congo, until the country became independent on 30 June 1960.

**GOVERNMENT.** The departure of the Belgian administrators, teachers, doctors, etc., on the day of independence left a vacuum which speedily resulted in complete chaos. Neither Joseph Kasavubu, the leader of the Abako Party, who on 24 June 1960 had been elected head of state, nor Patrice Lumumba, leader of the Congo National Movement, who was the prime minister of an all-party coalition government, could establish his authority. Personal, tribal and regional rivalries led to the breakaway of Katanga province under premier Moïse Tshombe. Lumumba found his main support in the Oriental and Kivu provinces. Early in July the Force Publique mutinied and removed all Belgian officers. Lumumba called for intervention by the United Nations as well as the USSR. The Secretary-General dispatched a military force of about 20,000, composed of contingents of African and Asian countries. Lumumba was kidnapped by Katanga tribesmen and, in early Feb. 1961, murdered; his place was taken by Antoine Gizenga who set up a government in Stanleyville.

On 15 Aug. 1961 the United Nations recognized the government of Cyrille Adoula as the central government. United Nations forces, chiefly Irish and Ethiopians, in mid-September invaded Katanga.

On 20 Dec. 1961, Adoula and Tshombe agreed on reconciliation, subject to approval by the Katanga National Assembly. On 15 Jan. 1962 the forces of Gizenga in Stanleyville surrendered to those of the central government, and on 16 Jan. Adoula dismissed Gizenga. United Nations forces, chiefly Ethiopians and Indians, again invaded Katanga in Dec. 1962 and by the end of Jan. 1963 had occupied all key towns; Tshombe left the country.

**CONSTITUTION.** On 30 Sept. 1963 President Kasavubu dissolved parliament, suspended the constitution of Oct. 1962 (*see* THE STATESMAN'S YEAR-BOOK, 1963, p. 914) and (on 1 Oct.) granted Prime Minister Adoula full legislative powers until elections are held and a new constitution has been approved.

*National flag:* A yellow star on a blue background crossed by a red band with a narrow red stripe on either side.

*Prime Minister and Foreign Affairs:* Cyrille Adoula.

*Defence:* Jérome Anany. *Planning:* Cléophas Kamitatu. *Finance:* Emmanuel Bamba. *Interior:* Joseph Maboti.

**AREA AND POPULATION.** The boundaries of the Congo colony were defined by the neutrality declarations of Aug. 1885 and Dec. 1894, and by treaties with Germany, Great Britain, France and Portugal.

On 22 July 1927 Belgium ceded to Portugal territory in the extreme south-west portion of the Belgian Congo, having an area of 3,500 sq. km, in return for a cession by Portugal of an area in the estuary of the Congo, near Matadi, of 3 sq. km. Belgium further undertook the construction of a railway to link up with the Portuguese railway, starting at Lobito; this railway was opened on 1 July 1931.

The area of the republic is estimated at 2,345,409 sq. km (895,348 sp. miles). The population is composed of 3 ethnical groups: Negroes (Bantu, Sudanese. Nilotics), Pygmies and Hamites (in the east). On 1 Jan. 1959, Africans numbered 13,540,182; others included 88,913 Belgians, 5,166 Portuguese, 3,635 Italians, 3,336 Greeks, 2,378 British, 2,315 French, 1,912 Americans, 1,516 Dutch, 896 Swiss.

In 1961 some 150,000 refugees from Angola and in 1962–63 some 60,000 Tutsi refugees from Rwanda arrived in the Congo.

Greater Léopoldville had a white population of 21,568; Elisabethville, 13,863; Stanleyville, 5,015.

The country was divided into the following provinces (with population as at 1 Jan. 1959):

| | Capital | Area (sq. km) | Population<br>*African* | <br>*Others* |
|---|---|---|---|---|
| Léopoldville | Léopoldville | 359,653 | 3,189,286 | 33,578 |
| Equateur | Coquilhatville | 402,120 | 1,801,632 | 6,601 |
| Eastern | Stanleyville | 503,238 | 2,474,633 | 16,376 |
| Kivu | Bukavu | 259,077 | 2,261,822 | 13,756 |
| Katanga | Elisabethville | 496,965 | 1,654,176 | 33,507 |
| Kasaï | Luleabourg | 323,063 | 2,158,633 | 8,935 |

In Oct. 1962 the country was redivided into 21 provinces: Léopoldville, Central, Kwango, Kwilu, Maidombe (former province of Léopoldville); Cuvette, Ubangi, Moyen Congo (former Equateur); Uele, Kibali-Ituri, Haut Congo (former Orientale); Sud-Kivu, Nord-Kivu, Maniema (former Kivu); Lualaba, Nord-Katanga (former Katanga); Luluabourg, Unite Kasaïenne, Sud-Kasaï (former Kasaï).

The capital, formerly Boma, was in 1929 transferred to Léopoldville.

The most important native languages are: Kiswahili or Kingwana in the east, Tshiluba or Kiluba in the south, Lingala along the Congo River and Kikongo in the Lower-Congo.

**RELIGION.** There were, on 31 Dec. 1958, 10,284 missionaries, of whom 7,436 (including 1,532 natives) were Roman Catholic and 2,848 (including 1,195 natives) Protestant. On 1 Jan. 1962 Congolese troops massacred 22 priests at a station in north Katanga.

Roman Catholics in 1962 numbered 5·3m.; Protestants, 1·1m.; Moslems about 115,000 and Jews, 1,520.

**EDUCATION.** The last Belgian school statistics (1959) showed 13,712 'general' schools (from kindergarten to universities) with 1,739,117 pupils, 163 'technical' schools (from vocational courses to academies of art) with 16,630 students, and 33 agricultural schools with 2,178 students. Academic instruction is provided at the State University at Elisabethville (founded 1956; 225 students), the Catholic University 'Lovanium' at Léopoldville–Kimwenza (founded 1954; 339 students) and the University of Stanleyville.

*Cinemas* (1959). There were 270 permanent cinemas.

**JUSTICE.** On 31 Dec. 1958 there were 26 district courts, 25 magistrates' courts, 139 police courts, 6 courts of first instance, 2 courts of appeal (at Léopoldville and at Elisabethville) and 1,552 native courts.

**FINANCE.** Actual revenue and expenditure (in 1m. francs) for calendar years:

# COSTA RICA

### REPÚBLICA DE COSTA RICA

**HISTORY.** The republic of Costa Rica (the 'Rich Coast') has been independent since 1821, although it formed, from 1824 to 1838, part of the Confederation of Central America.

**CONSTITUTION AND GOVERNMENT.** The constitution, promulgated on 7 Dec. 1871, has been modified very frequently, last in 1949. The legislative power is normally vested in a single chamber called the Legislative Assembly, which since 1962 consists of 57 deputies, 1 for every 25,214 inhabitants, elected for 4 years. The President is elected for 4 years; the candidate receiving the largest vote, provided it is over 40% of the total, is declared elected, but a second ballot is required if no candidate gets 40% of the total. By the election law of 18 Jan. 1946 all citizens who are 20 years of age are entitled to vote; married men and teachers, from the age of 18. Women over 21 were enfranchised in 1949. Elections are normally held on the first Sunday in February. Voting for President, Deputies and Municipal Councillors is secret and compulsory for all men under 70 years of age. Independent non-party candidates are barred from the ballot.

*President:* Lic. Francisco J. Orlich Bolmarich, elected Feb. 1962; inaugurated 8 May 1962.
*Vice-Presidents:* Raúl Blanco Cervantes and Carlos Saenz Herrera.
*Minister for Foreign Affairs:* Lic. Daniel Oduber.

Elections for Congress took place on 4 Feb. 1962; National Union Party won 9, Liberation Party 29, Republican Party 18, others 1 seat.

The administration is normally carried on by 11 ministers, appointed by the President. The powers of the President are limited by the constitution, which leaves him the power to appoint and remove at will members of his cabinet. All other public appointments are made jointly in the names of the President and of the minister in charge of the department concerned.

*National flag:* Blue, white, red (horizontal).
*National anthem:* Noble patria, tu hermosa bandera (words by J. M. Zeledón, 1903; tune by M. M. Gutiérrez, 1851).

Zeledón, M. T., *Lecciones de Ciencia constitucional y Constitución política de la República de Costa Rica.* San José, 1945

**AREA AND POPULATION.** The area is estimated at 50,900 sq. km (19,653 sq. miles). The population at the census of 22 May 1950 was 800,875, compared with 471,524 shown in the 1927 census. The estimated population on 31 Dec. 1962 was 1,302,829.

Official estimate of population for 31 Dec. 1962 was as follows:

| Province | | Central Cantons | |
|---|---|---|---|
| San José | 449,156 | San José | 164,241 |
| Alajuela | 241,163 | Alajuela | 57.178 |

The population of European descent, many of them of pure Spanish blood, dwell mostly around the capital of the republic, San José, and in the principal towns of the provinces. Limón, on the Caribbean coast, and Puntarenas, on the Pacific coast, are the chief commercial ports. The

United Fruit Company, who have abandoned their banana plantations on the Atlantic coast in favour of large new plantations on the Pacific coast, have constructed ports at Quepos and Golfito. There are some 15,000 West Indians, mostly in Limón province. The indigenous Indian population is dwindling and is now estimated at 1,200.

Spanish is the language of the country.

Voot, W., *The Population of Costa Rica and its Natural Resources.* Washington, D.C. 1946

**RELIGION.** Roman Catholicism is the religion of the State, which contributes to its maintenance but controls the Church Patronage and insists on lay instruction in history, economics and similar subjects; there is entire religious liberty under the constitution, but religious appeals are forbidden in current political discussions. The Archbishop of Costa Rica has 4 bishops at Alajuela, Limón, San Isidro el General, and Tilarán.

The Episcopal Church in Central America has churches at San José (bishop) and Puerto Limón. The Society of Friends and numerous other sects are represented.

**EDUCATION.** Costa Rica has a very low illiteracy rate. Elementary instruction is compulsory and free; secondary education (since 1949) is also free. Elementary schools are provided and maintained by local school councils, while the national government pays the teachers, besides making subventions in aid of local funds. In 1962 there were 1,730 public primary schools with 8,608 teachers and administrative staff and 221,074 enrolled pupils; there were 76 public and private secondary schools with 31,250 pupils, and 34 technical schools with 5,620 pupils. The University of Costa Rica, founded in San José in 1843, has 391 professors in 13 faculties and 4,419 students. A medical school was opened in 1961. The budget for 1963 provides 85·5m. colones for public education. Since 1944 English has been taught in all secondary schools.

*Cinemas* (1963). Cinemas numbered 132, with seating capacity of 90,000.

*Newspapers* (1963). There were 7 daily newspapers (including 1 English-language paper) all published in San José.

**SOCIAL WELFARE.** The labour code of 1943 provides considerable protection for the workers, while a system of social insurance against sickness covering 108,746 workers in 1963, old age and death covering 48,123, is gradually being extended throughout the country.

**JUSTICE.** Justice is administered by the Supreme Court, 4 appeal courts and the Court of Cassation. There are also subordinate courts in the separate provinces and local justices throughout the republic. Capital punishment cannot be inflicted.

**FINANCE.** The revenue and expenditure (in 1,000 colones) have been as follows ($1 = 6·63 colones) for calendar years:

| | *1958* | *1959* | *1960* | *1961* | *1962* | *1963*[1] |
|---|---|---|---|---|---|---|
| Revenue | 320,338 | 351,714 | 350,972 | 365,498 | 381,141 | 414,629 |
| Expenditure | 321,333 | 351,540 | 356,735 | 408,150 | 433,806 | 414,629 |

[1] Estimate.

The income-tax law of 18 Sept. 1954 raised the maximum rate (for incomes of 500,000 colones and over) from 15 to 30%.

The public debt on 31 Dec 1962 was 627,136,926 colones, including 224,364,145 colones external debt. Arrangements for resuming service on the four dollar debts were agreed in Nov. 1953, and on the sterling debt in Sept. 1955.

**DEFENCE.** The army was abolished in 1948, and replaced by a Civil Guard reputed to be 1,200 strong. There has never been compulsory military service or training.

The republic has also 1 motor launch on the Atlantic coast and 1 on the Pacific coast for revenue purposes, a tug and smaller craft.

**PRODUCTION.** *Agriculture.* Agriculture is the principal industry. The cultivated area (1959) is about 1m. acres; grass lands cover 1·8m. acres; forests and woodlands, 9,855,000 acres. There are thousands of square miles of public lands that have never been cleared, on which can be found quantities of rosewood, cedar, mahogany and other cabinet woods. Soil erosion is serious in some areas. The principal agricultural products are coffee and bananas. Coffee normally accounts for about half the country's foreign-exchange earnings. Cocoa, maize, sugar, tobacco, rice and potatoes are commonly cultivated. The distillation of spirits is a government monopoly.

The following are recent estimates of production (in 1,000 metric tons):

| | *1960* | *1961* | *1962* | | *1960* | *1961* | *1962* |

[1] Exports.

Dairy-farming and cattle-raising are substantial pursuits. In 1957 cattle numbered 800,000 and pigs 115,000.

Costa Rica is the seat of the Inter-American Institute of Agricultural Sciences, with headquarters at Turrialba.

*Mining.* Mining is not very fully developed. Silver output, 1958, 325,278 fine oz. Gold output in 1960 was insignificant. Salt production from sea water is about 10,000 tons annually. Haematite ore was discovered on the Nicoya Peninsula late in 1960.

*Industry.* A Ministry of Industry was formed in 1961, but industry is still on a very small scale, though the Industrial Development and Protection Law of 1959 affords several facilities and advantages. Electricity, derived from water power in the highlands, is increasingly used as motive power. Output, 1962, was 492·3m. kwh. Total capacity in 1963 was 83,000 kw., to be increased by 1966 to 139,000 kw. when the hydro-electric plant at Cachi is complete.

**Labour.** As Costa Rica is still essentially an agricultural country, the organization of labour has made progress only in the larger centres of population, and even there it is not a strong movement. There are two main trade unions, *Rerum Novarum* (anti-Communist) and *Confederación General de Trabajadoros Costarricenses* (Communist). It is estimated that they have under 10,000 members each.

At the 1961 census the labour force totalled 412,406, 55% being agricultural; 11% manufacturing; 8% trade; 8% construction, transport and communications; and 15% in government, finance and services. In 1961 there were 209 trade unions and 34 employers' organizations.

**COMMERCE.** The value of imports into and exports from Costa Rica in 5 years was as follows in US$ (6·63 colones = US$1):

| | *1958* | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|
| Imports . . | 99,325,473 | 102,653,827 | 110,388,494 | 107,160,505 | 113,316,000 |
| Exports . . | 96,900,850 | 79,680,879 | 84,336,616 | 79,781,501 | 86,911,000 |

The value (in US$1m.) of the principal imports in 1962 were: Manufactures, 44·9; machinery, including transport equipment, 29·5; chemicals, 18·2; foodstuffs, 9·5; fuel and mineral oils, 7·6.

Chief exports (in US$1m.) in 1962 were: Coffee, 48·4 (mostly to Germany); bananas (21·1m., virtually all to USA); cocoa, 4·6; sugar, 2·8.

Imports from US were valued at $52·6m. in 1962 and $49·8m. in 1961. Exports to US in 1962 were $48·38m.; in 1961, $45·2m.

Total trade between UK and Costa Rica (British Board of Trade returns) for 6 years (in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| **Imports to UK** . . | 495,148 | 371,378 | 345,836 | 423,262 | 423,939 |
| Exports from UK . . | 1,828,455 | 1,941,875 | 1,684,783 | 1,849,239 | 2,058,510 |
| **Re-exports from UK** . | 19,935 | 18,045 | 15,612 | 13,680 | 14,659 |

**COMMUNICATIONS.** *Shipping.* In 1962, 1,043 ships entered and cleared the ports of the republic (Puerto Limón, Puntarenas and Golfito); combined cargo, 925,300 metric tons. In 1958, the Costa Rican registry of foreign-owned ships was cancelled.

*Railways.* Two railway systems, totalling about 500 miles, connect San José with Limón, the Atlantic port (Costa Rica Railway Company), and San José with Puntarenas, the Pacific port (the state-owned Ferrocarril Eléctrico al Pacífico).

*Roads.* About 3,250 km of all-weather motor roads are open. On the Costa Rica section of the Inter-American highway it is possible to motor to Panama during the dry season. A fairly good all-weather road leads into Nicaragua. Motor vehicles, 31 Dec. 1962, numbered 29,875.

*Post.* A telephone service covering (1962) 18,685 subscribers operates in and between San José and 6 other provincial centres; it is privately owned except for 921 government telephones.

The commercial wireless telegraph stations are operated by Cía Radiográfica Internacional de Costa Rica. The stations are located at Cartago, Limón, Puntarenas, Quepos and Golfito. The Government has 19 wireless telegraph stations in its local network. The principal or central station at San José also maintains international radio-telegraph circuits to Nicaragua, Honduras, San Salvador and Mexico. The Government has 202 telegraph offices and 88 official telephone stations. The official list of broadcasting stations shows 28 long-wave stations and 7 short-wave stations. Television was inaugurated in May 1960.

*Aviation.* Passenger movement in and out of Costa Rica is almost entirely by air *via* the local company, LACSA, Pan American Airways and TACA. LACSA links San José by daily services with all the more important towns. The capital's airfield at El Coco was opened in June 1955; it can handle the most modern planes.

**MONEY.** A new par value of the *colón* came into effect on 1 Sept. 1961 (*see* p. 19). At the same time the official market rate of 5·60 colones per US$ was abandoned, and all foreign payments are to be made at the rate of 6·65 colones = $1. At this time the IMF made available a credit of $15m., the US Treasury agreed to take up colones to a value of US$56m. and the World Bank agreed a loan of $8m.

The currency is chiefly notes. The Banco Central in 1951 printed and placed in circulation new notes for 5, 10, 20, 50, 100, 500 and 1,000 colones, replacing old notes previously issued by the Banco Nacional. Silver coins of 1 colon, 50 centimos and 25 centimos have largely disappeared; in 1935 they were replaced by coins (2 and 1 colones and 50 and 25 centimos) made up of 3 parts copper and 1 part nickel, and given the same value as the subsidiary silver currency. There are copper coins (and chromium stainless steel coins) of 10 and 5 centimos.

**BANKING.** By a law passed on 31 Jan. 1950 a Central Bank was establised for the organization and direction of the national monetary system and of dealings in foreign exchange, the promotion of facilities for credit and the supervision of all banking operations in the country. The bank has a board of 7 directors appointed by the Government, including *ex officio* the Minister of Economy and Finance. On 30 Sept. 1961 it had gold amounting to 14m. colones and foreign exchange of 57·9m. colones compared with 63·8m. in Sept. 1960; circulating media on 31 Dec. 1962 totalled 484·8m. colones.

In June 1948 the 3 small commercial banks were compulsorily nationalized.

The National Insurance Institute (Instituto Nacional de Seguros) is a Government organization, created in 1924, which has a monopoly of new insurance business.

**WEIGHTS AND MEASURES.** The metric system is legally established; but in the country districts the following old Spanish weights and measures are found: *libra* = 1·014 lb. avoirdupois; *arroba* = 25·35 lb. avoirdupois; *quintal* = 101·40 avoirdupois; *fanega* = 11 Imperial bushels.

On 15 Jan. 1921 the republic adopted as its standard time that of the meridian 90° west of Greenwich. Time in San José is therefore 6 hours behind GMT.

## REPÚBLICA DE CUBA

**HISTORY.** Cuba, except for the brief British occupancy in 1762–63, remained a Spanish possession from its discovery by Columbus in 1492 until 10 Dec. 1898, when the sovereignty was relinquished under the terms of the Treaty of Paris, which ended the struggle of the Cubans against Spanish rule. Cuba thus became an independent republic, but the United States stipulated under the 'Platt Amendment' (abrogated by Roosevelt in 1934) that Cuba must enter into no treaty relations with a foreign power, which might endanger its independence. A convention which assembled on 5 Nov. 1900 adopted the first constitution of the republic on 21 Feb. 1901.

The revolutionary movement against the Batista dictatorship, led by Dr Fidel Castro, started on 26 July 1953 (now a national holiday). It achieved power on 1 Jan. 1959 when Batista fled the country.

An invasion force of émigrés and adventurers landed in Cuba on 17 April 1961; the main body was defeated at the Bay of Pigs (Las Villas province) and mopped up by 20 April.

The US Navy blockaded Cuba from 22 Oct. to 22 Nov. 1962.

**CONSTITUTION AND GOVERNMENT.** The constitution of Oct. 1940 provided for a 4-year term for the President (without re-election for two clear terms), a senate of 54 members (9 from each province) elected for 4 years and a lower house of 140, one half being elected every 2 years. Women have the vote. Voters in 1954 numbered about 2·8m. This constitution was suspended from 10 March 1952 to 24 Feb. 1955; and again since Jan. 1959; government is now by decree.

Since the last representative in Cuba of the King of Spain, Gen. Don Adolfo Jiménez Castellanos, handed over the island on 1 Jan. 1899 the following have been at the head of the administration:

*President:* Dr Manuel Urrutia, assumed power on 1 Jan. 1959 after Gen. Batista had fled the country. He resigned on 17 July 1959 and Dr Osvaldo Dorticós Torrado was elected by the Cabinet to take his place.

*Prime Minister and First Secretary of the United Party of the Socialist Revolution* (PURS)*:* Dr Fidel Castro Ruz.

*Minister for Foreign Affairs:* Dr Raúl Roa.

The President appoints the Cabinet, which consists of a Premier, the President's secretary, 12 heads of departments and 3 ministers without portfolios.

Dr Castro on 2 Dec. 1961 proclaimed 'a Marxist–Leninist programme adapted to the precise objective conditions existing in our country'. The provisional *Organizaciones Revolucionarias Integradas* (ORI) were established as an intermediate stage towards a single (communist) party, and have now given way to the *Partido Unido de la Revolución Socialista* (PURS). This was meant to merge the *Partido Socialista Popular*, *Movimiento 26 de Julio*, and (Students') *Directorio Revolucionario*. The Communist Party was outlawed by Batista in 1954, but legally reinstated after the revolution.

*National flag:* 3 blue, 2 white stripes (horizontal); a white 5-pointed star in a red triangle at the hoist.

*National anthem:* Al combate corred bayameses (words and tune by P. Figueredo, 1868).

LOCAL GOVERNMENT. The country is divided into 6 provinces and 126 municipalities. A new plan was announced in Sept. 1963 for a political, administrative and economic division of the country into 44 regions. Local Government is the responsibility of the JUCEI (*Junta de Control, Ejecución e Inspección*).

**AREA AND POPULATION.** The island of Cuba has an area of 44,206 sq. miles (114,524 sq. km); the Isle of Pines has 1,180 sq. miles, and other islands about 1,350 sq. miles. The census population of 28 Jan. 1953 was 5,829,029 (1961 estimate, 6·9m.). The area, population and density of population of the 6 provinces were as follows:

| Province | Area (sq. miles) | Population (28 Jan. 1953) | Population per sq. mile |
|---|---|---|---|
| Pinar del Rio | 5,211 | 448,422 | 86·1 |
| Havana | 3,173 | 1,538,803 | 485·0 |
| Matanzas | 3,259 | 395,780 | 121·4 |
| Las Villas | 8,264 | 1,030,162 | 124·7 |
| Camagüey | 10,169 | 618,256 | 60·7 |
| Oriente | 14,128 | 1,797,606 | 127·2 |
| Total | 44,206 | 5,829,029 | 131·9 |

Crude birth rate, 1953, 25·9; crude death rate, 6·3.

The chief towns (with population, 1960) are: Havana, the capital, 787,765; Marianao, 229,576; Holguín, 226,779; Camagüey, 191,379; Santiago de Cuba, 166,384; Santa Clara, 142,176; Guantánamo, 124,685; Matanzas, 82,619; Cienfuegos, 99,530.

**RELIGION.** There is no state Church, though Roman Catholics predominate. Some of the Spanish priests and nuns were expelled in Sept. 1961. There is a bishop of the American Episcopal Church in Havana; there are large congregations of Methodists in Havana and in the provinces. Protestants numbered 265,000 in 1962. Dr Castro has promised that the State will not interfere with the freedom of religion, but has accused certain sects, notably the Seventh Day Adventists, of being involved in counter-revolution.

**EDUCATION.** Education is compulsory (between the ages of 6 and 14) and free, and now available everywhere. The 1953 census showed that 22·8% of all those over 10 years of age were illiterate, while the proportion among those between 10 and 14 years was 31·8%. It is claimed that the Year of Education (1961), in which higher-education students went out to all parts of the country, reduced this to 3·9%. An increasing number of scholarships is (1963) being granted for study in Havana.

There are 38,569 teachers and 1,262,245 pupils. The 5 universities have 48 faculties, 801 professors and 23,000 students. There are also: 21 secondary high schools; 6 teachers' training schools; 9 professional commercial colleges; 11 domestic science schools; 4 fine arts schools; 3 technical–industrial schools, 6 agricultural schools; 4 civic–military institutes and higher technological centres; 108 junior high schools; 1,824 city primary schools; 4,114 rural primary schools; 1,597 kindergartens. Twenty-seven barracks of the Batista régime were turned into schools as a gesture. 10,000 'country classes' have been created (1959–60). 237·6m. pesos were allocated to education in the 1962 budget.

*Cinemas* (1960). There are 454 cinemas with seating capacity of 402,000.

*Newspapers* (1962). The government-controlled press includes 3 morning and 1 evening newspapers in Havana.

**HEALTH** (1963). There are 33,650 hospital beds in Cuba. In 1962–64 three national campaigns for anti-poliomyelitis vaccination were held.

**JUSTICE.** There is a Supreme Court in Havana and 7 courts of appeal (one in each provincial capital and one in Holguín). The provinces are divided into judicial districts, with courts for civil and criminal actions, with municipal courts for minor offences. The civil code guaranteed aliens the same property and personal rights as are enjoyed by nationals.

The 1959 Agrarian Reform Law and the Urban Reform Law passed on 14 Oct. 1960 have placed certain restrictions on both. Revolutionary Summary Tribunals will have wide powers.

**FINANCE.** Revenue and expenditure (in 1,000 pesos) for fiscal years ending 30 June and for calendar years from 1960 were was follows:

| | *1960* | *1961* | *1962* | *1963*[1] | *1964*[1] |
|---|---|---|---|---|---|
| Revenue | 410,500 | 1,143,000 | 1,657,000 | 2,093,560 | 2,399,007 |
| Expenditure | 410,500 | 1,143,000 | 1,657,000 | 2,093,560 | 2,399,007 |

[1] Estimate.

The 1962 expenditure was allocated thus (in 1m. pesos): Agriculture, forestry and fishery, 117·7; industry, 208·3; commerce, 14·6; communications, 46·1; transport, 88; basic community services, 228; education, 237·6; social security, 168; central, provincial and local administration, 194·5.

The consolidated public debt in 1958 was 1,238·3m. pesos, of which 788·1m. pesos was the external debt. UK investments declined from a par value of US$24m. in 1951 to $1m. in 1953, largely by the Cuban purchase of the United Railways of Havana and are now negligible.

Cuba was the leading Latin-American country for US investments ($919m. in 1929); by 1957 the total had declined to $845m. and are now negligible, owing to nationalization.

During 1960 long-term loans at low interest were negotiated with the following countries (expressed in US$1m.): USSR, 100; China, 60; Czechoslovakia, 40; Rumania, 15; Hungary, 15; Poland, 12; German Democratic Republic, 10; Bulgaria, 5.

Investments (in 1m. pesos) in 4 major sectors have been:

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Industrial building | — | 0·4 | 0·8 | 45·0 | 64 |

| Agricultural installations | 1·9 | 4·1 | 2·4 | 9·3 | 56 |
| Hydr. and irrigation works | — | — | — | 8·9 | 12 |

**DEFENCE.** The chief of the armed forces is *Comandante* Fidel Castro, and his brother *Cdte.* Raúl Castro Ruz, Vice-Premier and Minister of Defence.

On 13 Nov. 1963 conscription was introduced for all men between the ages of 17 and 45; women of the same age groups may volunteer. The term of service is 3 years.

*Army.* The strength was about 43,000 officers and men in 1958. Student, peasant and factory worker volunteers, both men and women, are being organized into armed militia groups, of a strength estimated at 250,000.

*Navy.* The Navy consists of 4 frigates, 2 escort vessels, 6 patrol vessels, 16 motor torpedo-boats, 12 motor gunboats, 3 motor launches and 32 coastguard vessels. Its strength is 600 officers and 5,000 men. The USA is still in possession of the Guantánamo naval base, but the revolutionary government has consistently refused to accept the nominal rent of $5,000 per annum.

*Air Force.* In 1959 the Air Force consisted of 35 officers and 200 men, with 44 aircraft, but it has since been expanded and modernized with Soviet assistance. In 1964 it included about 200 MiG-21, MiG-19 and Mig-17 jet-fighters of Russian design, a squadron of US-built B-26 piston-engined bombers, a few T-33 jet trainers and some helicopters. Soviet medium-range ballistic missiles and Il-28 twin-jet bombers sent to Cuba in 1962 have been returned to the USSR. Surface-to-air and anti-shipping missiles remain in service in Cuba.

**PRODUCTION.** Cuba's 'economically active' population, 1953, numbered 1,972,266, of whom 551,279 were employers or self-employed and 1,420,987 were salaried or wage-earners; agriculture had 818,706, manufacturing, 327,208; mining, 9,618, and trade, 232,323; public services, 8,439. The constitution provides for a yearly 30 days' holiday with pay for all manual workers.

In May 1959 all land over 30 *caballerías* was nationalized and has since been turned into state farms. In Oct. 1963 private holdings were reduced to a maximum of 5 *caballerías* (approximately 166 acres). By 1960, 764 co-operative farms had been formed, and by late 1963 almost 70% of farm land was state-owned, the rest belonging to small farmer-members, controlled by ANAP (National Association of Small Farmers).

*Agriculture.* The staple products are tobacco and sugar, of which latter Cuba is the world's largest producer; with its by-products it furnishes nearly 90% by value of the national exports. The 1963 crop was about 3·8m. tons. There are 160 mills, including 40 of the largest, which were taken over from US interests, and which represent 39% of total capacity. Coffee, cocoa, maize, rice and potatoes are grown, and a considerable trade is done in fruit and minerals.

Recent crop results (with estimates for 1961):

| | *Caballerías* planted[1] | Production 1,000 quintals | Value 1,000 pesos | | *Caballerías* planted[1] | Production 1,000 quintals | Value 1,000 pesos |

[1] 1 *caballería* = about 13·4 hectares or 33 acres.

Tobacco is grown mainly in the Vuelta–Abajo district, near Pinar del Río. Exports (1958) of leaf tobacco were 52·6m. lb.; cigars, 66·4m. units; cigarettes, 39·7m. units. Coffee is grown chiefly in the province of Oriente.

After the devastation caused by hurricane Flora in Oct. 1963, some 40% of the maize crop was thought to be lost, along with heavy damage to fruit production. Reductions of the following order in 1964 crops were expected: Sugar, 25%; coffee, 80%; rice, 50%.

Output of henequén fibre in 1961 was 10,500 tons. A fast-growing fibre, *kenaf*, originally from India, soft in texture, is replacing jute for sacking; the tobacco industry uses *majagua*, another local fibre, while a third fibre, *yarey*, from palms is also used. 310,000 tons of sweet potatoes were produced in 1954. The principal fruits exported are pineapples, citrus fruit, tomatoes and pimentos. Pángola is an increasingly important forage crop (15,000 *caballerías* in 1960).

In 1962, 2,105 *caballerías* were allocated to cotton; production about 1,300 kg per hectare.

In 1961 the livestock included 5·6m. head of cattle; 1·9m. hogs; 412,000 horses (1952); 194,000 sheep, 162,000 goats (1958).

*Fisheries.* The catch was 37·25m. lb., value 5m. pesos in 1958; in 1960, 67,845,500 lb. and 10·3m. pesos. Owing to the closing of the US market, the export of frozen products fell 38·8% in that time.

*Forestry.* Cuba has extensive forest lands. These forests contain valuable cabinet woods, such as mahogany and cedar, besides dye-woods, fibres, gums, resins and oils. Cedar is used locally for cigar-boxes, and mahogany is exported. During the re-forestation campaign of 1959–60 34,000 eucalyptus saplings were planted over 1,120 *caballerías.* Cedars, mahogany, *majagua,* teca, etc., are also being raised and planted out.

*Mining.* Iron ore abounds, with deposits estimated at 3,500m. tons, of which 90% were held as reserves by American steel interests but are now controlled by the Cuban Mining Institute; output, 1958, 145,000; 1960, 15,000; 1961, 10,000 long tons. In 1961, 30,000 tons of steel bars were produced; steel production is to be increased to 500,000 tons by 1965 in connexion with the heavy-industry development near Nipe Bay (Oriente).

Output of refractory chromite suffers from Philippine competition; in 1962 only 22,000 long tons were mined, compared with 354,152 in 1943. Output of copper (1960) was 13,058 short tons; manganese (1960), 16,644 short tons of chemical grade. Other minerals are nickel (1957: 21,600 tons nickel content), cobalt, silica and barytes. Gold and silver are also worked; exports of gold, 1960, 348 fine oz.; of silver, including scrap, 1960, 121,415 fine oz. Cuba has a small output of petroleum (1956: 540,000 bbls from 53 wells); 4 refineries have started up. Salt output from the solar evaporation of sea water was 51,013 metric tons in 1953. Metal exports (in metric tons) in 1957 were: Copper ore, 79,514; chrome ore, 100,977; nickel oxide, 22,779; iron ore, 102,346; manganese ore, (1961) 41,722; (1962) 75,281.

All mineral resources were nationalized in 1960.

*Industry.* Big developments have taken place in recent years. Production in 1957 was: Rayon, 21·6m. lb.; cement, 644m. kg; wheat flour, 141m. lb.; naphtha and gasoline, 2·8m. bbls; fuel oil, 6·5m. bbls; kerosene and lubricants, 0·9m. bbls; asphalt, 0·3m. bbls; gas oil, 3·0m. bbls; 156,966 tyres, 59,251 tubes; shoes, 15m. pairs; paint, 2·1m. gallons; absolute alcohol, 107m. litres; alcohol, 70m. litres; beer, 129m. litres; soft drinks, 576m. units; cigarettes, 611m. pkgs; fertilizers, 600m. lb.

Investments in industry to end-1962 amounted to (in 1m. pesos): Electricity, 241; mining, over 120; bagasse products, 34; telephone services, 62; chemicals and fertilizers, 24; beer, 6·5; concrete and cement, 9; oil refineries, 68; glass, 6; rayon, 4·7; gas, 6; flour-mills, 2.

On 14 Oct. 1960, 382 companies were nationalized, including 105 sugar-mills, 50 textile factories, 16 rice plants, 11 coffee companies, 8 railways, On 5 Dec. 1962 all wholesale and retail businesses of clothing, shoes and household goods were nationalized and 90% of industrial production is now from the state sector. All foreign trade is channelled through state monopolies.

*Electricity* (1962). Installed capacity was 429,143 kw.; this is to be increased to 1,240,843 kw. by 1966.

**Trade Unions.** For a mainly agricultural country, workers are highly unionized. In 1945, of the total of 1,292,786 workers, 440,791 or 33% were in trade unions. In Jan. 1958 the distribution of 1,932,000 employees was: Agriculture, 41%; artisans, factory workers, 16·3%; services, 8·6%; transport, labourers, 7·7%; professional and technical, 9·2%; clerical and sales, 15·9%; others, 1·3%. In 1961 the Government claimed that the number of people totally unemployed was down to 247,000 (650,000 in 1953).

**COMMERCE.** Value of imports and exports (including bullion and specie) for calendar years (in 1,000 pesos; Cuban peso = US$1):

| | *1957* | *1958* | *1959* | *1960* | *1961* [1] | *1962* [1] |
|---|---|---|---|---|---|---|
| Imports | 641,489 | 770,100 | 673,200 | 400,000 [1] | 700,000 | 931,700 |
| Exports | 807,682 | 733,000 | 675,600 | 629,000 | 450,000 | 798,120 |

[1] Estimate.

Cuba's principal exports are sugar, tobacco and fruit; nickel exports are being stimulated. The main imports in 1962 from non-Communist countries were chemicals and engineering and electrical machinery.

Cuba's exports to the USA fell from $555·9m. in 1958 to $30m. in 1961; and her imports from USA from $491·6m. in 1958 to $20m. in 1961.

The USA in 1958 took 72% of the exports and furnished 67% of the imports; since then US trade has sharply declined. West Germany furnished in 1958, 24·3m. pesos of imports and took 7·5m. of exports. Imports from Canada increased rapidly in 1961 ($3m. per month, or double the usual rate).

In 1961 annual trade exchanges were arranged with the following countries (US$1m., in each direction): USSR, 270; China, 117; Czechoslovakia, 30; German Democratic Republic, 25; Poland, 22; Rumania, 11; Hungary, 10; Bulgaria, 7, and by 1963 75% of Cuba's foreign trade was with this group.

Total trade between Cuba and UK (British Board of Trade returns) in £ sterling:

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK | 10,181,639 | 7,918,775 | 5,339,440 | 7,023,994 | 12,395,289 |
| Exports from UK | 15,226,028 | 7,340,123 | 4,416,919 | 2,576,838 | 1,949,296 |
| Re-exports from UK | 94,484 | 62,907 | 309,185 | 26,250 | 122,377 |

**COMMUNICATIONS.** *Shipping.* The coastline is 2,170 miles long and has 15 fine harbours. The merchant marine, in 1963, consisted of 25 seagoing vessels with a deadweight of 135,768 tons.

*Railways.* There are 3,714 miles of public railway—mainly the United Railways of Havana (started by British capital), which Cuba bought in Nov. 1953 for $13m., and the Consolidated Railway of Cuba (American capital). In addition, the large sugar estates have 7,542 miles of lines connecting them with the main lines.

*Roads.* There are 8,291 miles of highways open to traffic, including the Central Highway, traversing the island for 760 miles from Pinar del Río to

Santiago. On 31 Dec. 1958 passenger automobiles numbered 143,828; hire cares, 29,710; coaches and buses 4,306; lorries, 42,480; others, 12,987.

*Post.* There were (1938) 634 post and 358 telegraph offices and 150 radio and radio-telegraph stations (1940), of which 14 were operated by the Government. There are 3,545 miles of public and 8,902 miles of private telegraph wires. Cuba has 80 broadcasting stations and 6 television stations. Wireless receiving sets, 1958, numbered 900,000; television sets, 300,000. The national telephone system (1962) had 217,000 instruments (92% being automatic), of which 148,000 were in Havana.

*Aviation.* The state airline CUBANA operates all internal services, and from Havana to Mexico City and Prague. The other regular foreign services are Soviet, Czech and Spanish.

**CURRENCY.** The Cuban *peso* is equal to US$1, or to 0·8886 gramme of fine gold; accordingly, 1 troy oz. of fine gold = 35 pesos. This parity dates from the law of 7 Nov. 1914, which established that the monetary unit was a gold peso (equal to the US gold dollar) of 1·6718 grammes (1·5046 grammes fine) divided into 100 centavos. The old gold pesos and all US currency are no longer legal tender.

New copper–nickel coins of 40, 20, 10, 5 and 1 cent are issued. Notes are for 50, 20, 10, 5 and 1 peso.

**BANKING.** On 23 Dec. 1948 the president signed the law creating a central bank (with capital of $10m.) and (effective 30 Dec. 1951) a national currency system (with the peso alone being legal tender) replacing the dual system under which the peso and the dollar were both legal tender; the bank began operating on 27 April 1950; in Dec. 1957 it had $136m. in gold and $441m. in foreign exchange; note circulation was $433m. in 1956. In 1959 events made it necessary to bring in measures of exchange control, and import licences on luxury and non-essential goods. Dollar reserves stood at $114m. in Jan. 1960.

On 14 Oct. 1960 all banks were nationalized, except the Royal Bank of Canada and the Bank of Nova Scotia, which were bought out later. All banking is now carried out by the National Bank of Cuba.

**WEIGHTS AND MEASURES.** The metric system of weights and measures is legally compulsory, but the American and old Spanish systems are much used. The sugar industry uses the Spanish long ton (1·03 metric tons) and the similar short ton (0·92 metric ton). Cuba sugar sack = 329·59 lb. or 149·49 kg. Land is measured in *caballerías* (of 13·4 hectares or 33 acres).

# CZECHOSLOVAKIA

### Československá Socialistická Republika

**HISTORY.** The Czechoslovak State came into existence on 28 Oct. 1918, when the Czech *Národní vybor* (National Committee) took over the government of the Czech lands. Two days later the Slovak National Council at Turč. Sv. Martin manifested the desire of the Slovak nation to unite politically with the Czechs. On 14 Nov. 1918 the first Czechoslovak National Assembly met in Prague and formally declared the Czechoslovak State to be a republic with T. G. Masaryk as its first President (1918–35).

By the Treaty of St Germain-en-Laye of 10 Sept. 1919 the Allied and Associated Powers formally recognized the Czechoslovak Republic consisting of the Czech lands of the ancient kingdom of Bohemia, Moravia, parts of Silesia, and Slovakia. To these lands were added as a trust, under the name of the autonomous province of Subcarpathian Ruthenia, several counties of north-eastern Hungary.

The territory of the Czechoslovak Republic was broken up for the benefit of Germany, Poland and Hungary by the decision of the Four Power Conference (Great Britain, France, Germany and Italy) at Munich on 29 Sept. 1938, the Polish occupation of Těšín (Teschen) and certain border areas of Slovakia (10 Oct. 1938) and the Vienna Award (2 Nov. 1938).

On 14 March 1939 the German-sponsored Slovak government proclaimed Slovakia an independent state. Next day German troops invaded Bohemia and Moravia and Hungarians occupied what the Vienna Award left of Subcarpathian Ruthenia. On 16 March 1939 the Reich government incorporated the 'Protectorate of Bohemia and Moravia' as an integral part of the German Reich.

Great Britain, France, the USA and the USSR refused to recognize this new status of the Czech lands as legal, and gave their support to the Czechoslovak Provisional Government, established by Dr Beneš in London in July 1940.

Military liberation by the Red Army and US Forces was completed between Oct. 1944 and 9 May 1945. The independent Slovak state ceased to exist *de facto* in April, the Protectorate of Bohemia and Moravia on 5 May, following the armed rising staged by the Czech *Národní Rada* (National Council) in Prague. Territories taken by Germans, Poles and Hungarians were restored to Czechoslovak sovereignty. Subcarpathian Ruthenia was transferred to the Soviet Union by the treaty of Moscow of 29 July 1945.

Elections were held in May 1946, at which the Communist Party obtained about 38% of the votes. A coalition government under a Communist Prime Minister, Klement Gottwald, remained in power until 20 Feb. 1948, when 12 of the non-Communist ministers resigned in protest against infiltration of Communists into the police. On 25 Feb. a predominantly Communist government was formed by Gottwald. In May elections were held at which the alternatives were to vote for the government list or to cast a blank vote. The results was an 89% majority for the government. President Beneš resigned a week later.

**CONSTITUTION AND GOVERNMENT.** The present constitution, replacing that of 1948, was promulgated on 11 July 1960. It is, after the constitution of the USSR, the first 'socialist' constitution of the Communist countries and may set a precedent for superseding other 'popular democratic' constitutions. The preamble expressly states: 'In completing socialist construction we are moving on to an advanced socialist society', and 'all our efforts are directed towards the creation of the material and spiritual conditions for the transition of our society to communism'.

The Czechoslovak State is a socialist republic. It is a unitary state of two Slav nations, the Czechs and the Slovaks, possessing equal rights. All power is vested in the working people and exercised through their representative bodies: the National Assembly (one chamber), the Slovak National Council, and the regional, district, municipal and local National Committees, from which other state organs derive their authority. The scope of the Slovak National Council is limited to regional economic and cultural matters. Complete unification of Czech and Slovak affairs is to be achieved by 1975.

The electoral law of 26 May 1954 introduced single-member constituencies of about 35,000 voters each for the National Assembly as well as the Slovak National Council. The number of deputies has been fixed at 300 (1960 Constitution). They are elected for a 4-year period on a single list of the National Front. Minimum age of voters is 18, of deputies 21 years.

*President of the Republic:* Antonín Novotný (born 1904), elected 19 Nov. 1957, following the death of President Zápotocký on 13 Nov.

After the Communist *coup* of Feb. 1948 the Communist Party took over the government of the country. Communists head the National Front, incorporating the 3 remaining pro-Communist parties (Czechoslovak Socialist Party, People's Party (Catholics), Slovak National Reconstruction Party) and some mass-organizations (*e.g.*, the Revolutionary Trade Unions; the Union of Czechoslovak Youth). On 1 Oct. 1962 the Communist Party had 1,588,589 members and 92,230 candidates. A number of former party leaders, executed for treason in 1952 (Rudolf Slanský, Vladimir Clementis, etc.), have been rehabilitated; the remains of President Gottwald have been removed from the mausoleum in Prague.

In the general elections held on 12 June 1960 the National Front list received 9,059,838 votes out of a total of 9,085,432 cast.

The highest policy-making organ is the Communist Party Presidium, which consisted in March 1964 of 8 full and 3 candidate members: Antonín Novotný (*President and First Secretary of the Central Committee*); Jozef Lenart (*Prime Minister*); Jaromír Dolanský (*Chairman, Central Committee Commission for Standard of Living*); Alexander Dubček (*First Secretary of the Slovak Communist Party*); Zdeněk Fierlinger (*Chairman of the National Assembly; Chairman, Commission for Agriculture*); Drahomir Kolder (*Chairman, Commission for Industry*); Jiři Hendrych (*Secretary, Czechoslovak Communist Party*); Otakar Šimunek (*Deputy Prime Minister*). Candidate members: Antonín Kapek, Martin Vaculik, Michal Sabolčik (*Deputy Chairman, Slovak National Council; Chairman, Slovak Planning Commission*).

The Government was in March 1964 composed of the President, the Presidium (Prime Minister and 4 Vice-Premiers) and 23 Ministers. The latter included the Deputy Prime Ministers Oldřich Černik (*Chairman, State Planning Commission*) and Jan Piller (*Chairman, State Commission for Capital Construction*), Lubomir Strougal (*Interior*), Václav David (*Foreign Affairs*), Army-Gen. Bohumir Lomsky (*Defence*), Čestmir Císar (*Education and Culture*), František Hamouz (*Foreign Trade*) and Richard Dvořak (*Finance*).

The Slovak National Council consists of 10 members.

*National flag:* White and red (horizontal), with a blue triangle of full depth at the hoist, point to the fly.

*National anthem:* Kde domov můj (words by J. K. Tyl; tune by F. J. Škroup, 1834); combined with, Nad Tatru sa blyska (works by J. Matuška, 1844).

**AREA AND POPULATION.** The former provinces of Bohemia, Moravia and Silesia, and Slovakia were abolished as from 1 Jan. 1949 and replaced by 19 administrative units, called 'regions'. For these, with area in sq. km and population as at 1 Jan. 1957, *see* THE STATESMAN'S YEAR-BOOK, 1960, p. 925.

On 1 July 1960 a new territorial organization reduced the number of regions to the capital city of Prague and 10 regions proper.

**RELIGION.** The majority of the population in the Czechoslovak Republic are Roman Catholic. In 1930 the division according to religion within the present frontiers was: Roman Catholics, 10,762,994; Greek and Armenian Catholics, 224,772; Old Catholics, 22,693; Protestants, 1,051,447; Orthodox, 33,460; Jews, 253,526; without confession, 849,613. In Jan. 1920 part of the Roman Catholic clergy withdrew from the jurisdiction of the Pope and founded a Czechoslovak church, which had, according to the census of 1930, 791,103 adherents. Estimates, 1947: 9·3m. Roman Catholics, 950,000 Czechoslovak Church, 820,000 without confession, 50,000 Jews, 50,000 Orthodox; the last-named numbered over 200,000 in 1950, after the forcible absorption of the Uniate Church of Slovakia. Protestants were estimated (1962) at 1·2m., including 530,000 Reformed (360,000 Czech Brethren, 150,000 Reformed Church of Slovakia), 485,000 Lutherans (435,000 in Slovakia, 50,000 in Silesia), 10,000 Methodists, 10,000 Moravians, 10,000 Unity of Czech Brethren, 5,000 Baptists.

On 14 Oct. 1949 the National Assembly placed the administration of all churches under state control, provided for the payment of the salaries of all practising clergymen by the state and set up a government department for church affairs. By Feb. 1950 over 90% of the Roman Catholic priests had taken the oath of allegiance to the Government. The Roman Catholic archbishop Beran was under detention from 1951 to 1963.

**EDUCATION.** All children receive free education from the ages of 6 to 15, where possible remaining at a single school for the whole 9 years. In 1962–63 there were 12,052 schools with 2,272,790 pupils and 91,939 teachers. Final examinations are held only in Czech (or Slovak), Russian and mathematics.

Subsequent education is of 3 types. First, 3 final years of secondary school (in 1962–63, 385 schools with 5,877 teachers and 77,196 pupils). Secondly, technical, teachers' training and other vocational schools (1962–63, 665 schools with 158,906 students, of whom 55% were girls). Thirdly, university level (87,379 full-time students, including 34,235 girls; and 40,116 part-time and correspondence students, including 12,059 girls); university professors and readers number 2,072; other academic staff, 10,931. There are 48 institutions of higher education, with 107 faculties or departments. These include the 4 old universities—the Charles University in Prague, founded 1348; the Masaryk (now renamed J. E. Purkyně) University in Brno, founded 1919; the Comenius University in Bratislava, founded 1919; the Palacký University in Olomouc, founded 1573—and 4 universities founded in and after 1961; 14 technical universities or institutes; 6 schools of art; and 20 teachers' training colleges.

**HEALTH.** There were, in 1961, 247 hospitals with 104,811 beds, and 52 tuberculosis sanatoria. The number of local health centres, first introduced in 1953, was 2,588 in 1956. The average number of inhabitants per doctor throughout the country was 715. In 1957–58 the average expenditure per head of population was Kčs. 540 on health insurance and Kčs. 550 on pensions.

**JUSTICE.** A new criminal code replacing that of 3 Aug. 1950 came into force on 1 Jan. 1962. The main emphasis in this and in the new criminal procedure law associated with it is on re-education rather than on punishment. Capital punishment is retained only as an extreme measure.

Severer punishment is provided for crimes against socialist and private property and for propagating fascist ideas. A new class of economic crimes has been introduced to cover falsification of economic reports and the like.

Judges in local and district courts are elected by universal suffrage, those in regional courts by the regional local authority, and the bench of the supreme court by the National Assembly.

**FINANCE.** Budget estimates (in 1m. crowns):

| | *1958* | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|---|
| Revenue . . | 94,493 | 96,230 | 103,593 | 112,534 | 123,322 | 125,877 |
| Expenditure . . | 91,621 | 95,913 | 103,406 | 111,915 | 123,201 | 125,815 |

Main items of the 1962 budget revenue were (in 1m. crowns): Socialist sector, 107,066; direct taxes, 12,498; other sources, 3,758. Main items of expenditure: National economy, 64,747; culture, health and social services, 44,831; defence and security, 10,854; administration, 2,769.

On 30 June 1952 the external debt consisted of £1,162,850; $1,957,800; and the following liabilities for debts contracted by the Austro-Hungarian Empire: 5,628,733 gold florins, 2,892,420 kronen, 140,126,271 gold francs, 36,769,266 French francs.

During Oct., Nov. and Dec. 1959, Czechoslovakia defaulted on 3 loans: the 1922 State loan the 1922 City of Prague loan and the 6% First Mortgage Debenture of the Škoda Works, now known as V.I. Lenin Works, Plzen.

Current interest payments, due to British holders of the £ issues of these 3 loans, now amount to some £22,000, while a total of £610,850 of the external debts is due to some 480 British bondholders. The Škoda debenture (some £400,000) is to be redeemed by 1965.

**DEFENCE.** Military service lasts 2 years, after which the soldier passes to the first reserve until he attains the age of 40, when he passes to the second reserve, where he remains until 50. The Army is organized and trained on Soviet lines. There are 2 military districts with headquarters at Prague and Trenčin.

The Army is organized in 14 divisions (2 tank and 12 motorized divisions). The regular army had, in Dec. 1963, a total strength of about 150,000 men and 3,000 tanks.

The Air Force is organized as a tactical air force, under overall army command, and is believed to have a total strength of some 35,000 personnel and 1,500 aircraft. Fighter squadrons are equipped mainly with MiG-17, -19 and -21 jets. Tactical bomber units fly Il-28 jet-bombers, backed up by strong forces of MiG-15 and -17 ground attack aircraft. Transport units have Il-18, Il-14 and An-2 aircraft of Russian design.

The security forces and frontier guards are organized in regiments and brigades respectively; total strength, 35,000.

On 1 Oct. 1950 a new penal code was introduced on the basis of Soviet military law, under which the responsibilities of officers and men in a Communist army were defined. It is obligatory for all soldiers to report to the Communist Party every irregularity and inefficiency.

**PRODUCTION.** *Planning.* A State Planning Office was set up on 22 Feb. 1949.

The first 5-year plan covered the period 1949–53. The percentage rise in industrial production claimed at the end of the plan 77% above 1948; and production in the engineering industry is claimed to have trebled. However, the rise of the manufacturing industries had far outstripped that of the mining and power industries, and agricultural development in terms of production had been virtually at a standstill.

The second 5-year plan, covering the period 1956–60, laid stress on the production of capital goods. Gross industrial production was originally scheduled to increase by 50% during this period; in Oct. 1957 the target was raised to 54·4% above the 1955 level. The 1959 output increased by about 11% over 1958.

The third 5-year plan (1961–65) was to maintain the present annual increase, and emphasis remained on the production of capital goods, particularly for the chemical industry, engineering and metallurgy. The total investments during 1961–65 were to reach Kčs. 312,000m. Because of underfulfilment the plan was suspended in Aug. 1962; in 1963 both agriculture and industry failed to fulfil even their reduced quotas.

*Agriculture.* Agriculture is an important national industry. In 1960, 5,131,000 hectares were arable land; 4,372,000 hectares were forests and 1,968,000 hectares were permanent grass and pastures. During 1963 the cultivated area has declined by 15,000 hectares.

On 1 Jan. 1962 there were 8,784 collective farms with 979,500 members and 84,000 tractors, and 364 state farms with 207,979 employees and 26,550 tractors, including those belonging to 106 machine-tractor stations. The share of land farmed by the 'socialist sector' (collective and state farms together) has risen from 22·1% of the total in 1950 to 88·6% in 1961.

Agricultural production, which was planned to increase by 30% during the second 5-year plan, was in 1956–58 less than before 1939, both in land under cultivation and in production.

Main crop harvest (in 1,000 metric tons) was as follows:

| Crop | *1934–38* [1] | *1958* | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|
| Wheat and rye | 3,091 | 2,283 | 2,398 | 2,593 | 2,560 |

Subsequently all industry and trade, as well as artisans' activities, have been nationalized and incorporated in state or municipal organizations. The koruna is based on a gold content of 0·123426 gramme of pure gold and pegged on the rouble at Kčs. 1·80 = R.1. The International Monetary Fund did not approve this change of the par value, and Czechoslovak membership was terminated at 31 Dec. 1954. At the same date, Czechoslovakia ceased to be a member of the International Bank as she had not paid her subscription. The official rate of exchange for the £ sterling is selling Kčs. 20·10 and buying Kčs. 20·22 for £1; US$1 = 7·20 Kčs; 1 new Soviet rouble = 8 Kčs. ### Kongeriget Danmark

**REIGNING KING.** **Frederik IX,** born 11 March 1899; married 24 May 1935 to Princess Ingrid of Sweden, born 28 March 1910; *offspring:* Princess Margrethe, born 16 April 1940 (heir presumptive); Princess Benedikte, born 29 April 1944; Princess Anne-Marie, born 30 Aug. 1946 (married 1964 to King Constantine of Greece). He succeeded to the throne on the death of his father, King Christian X, 20 April 1947.

*Brother of the King.* Prince Knud, born 27 July 1900; married 8 Sept. 1933 to Princess Caroline-Mathilde of Denmark, his cousin; *offspring:* Princess Elisabeth, born 8 May 1935; Prince Ingolf, born 17 Feb. 1940; Prince Christian, born 22 Oct. 1942.

The crown of Denmark was elective from the earliest times. In 1448 after the death of the last male descendant of Swein Estridsen the Danish Diet elected to the throne Christian I, Count of Oldenburg, in whose family the royal dignity remained for more than 4 centuries, although the crown was not rendered hereditary by right till 1660. The direct male line of the house of Oldenburg became extinct with King Frederik VII on 15 Nov. 1863. In view of the death of the king without direct heirs, the Great Powers signed a treaty at London on 8 May 1852, by the terms of which the succession to the crown of Denmark was made over to Prince Christian of Schleswig-Holstein-Sonderburg-Glücksburg, and to the direct male descendants of his union with the Princess Louise of Hesse-Cassel, niece of King Christian VIII of Denmark. In accordance with this treaty, a law concerning the succession to the Danish crown was adopted by the Diet, and obtained the royal sanction 31 July 1853. Linked to the constitution of 5 June 1953, a new law of succession, dated 27 March 1953, has come into force, which restricts the right of succession to the descendants of King Christian X and Queen Alexandrine, and admits the sovereign's daughters to the line of succession, ranking after the sovereign's sons.

King Frederik IX has a civil list of 3,419,000 kroner. Annuities to other members of the royal house amount to 584,981 kroner.

Subjoined is a list of the kings of Denmark, with the dates of their accession, from the time of election of Christian I of Oldenburg:

**CONSTITUTION AND GOVERNMENT.** The present constitution of Denmark is founded upon the 'Grundlov' (charter) of 5 June 1953.

The legislative power lies with the King and the *Folketing* (Diet) jointly. The executive power is vested in the King, who exercises his authority through the ministers. The judicial power is with the courts. The King must be a member of the Evangelical-Lutheran Church, the official Church of the State. The King cannot assume major international obligations without the consent of the *Folketing*. The *Folketing* consists of one chamber. All men and women of Danish nationality of more than 21 years of age and permanently resident in Denmark possess the franchise and are eligible for election to the *Folketing*, which is at present composed of 179 members; 135 members are elected by the method of proportional representation in 23 districts. In order to attain an equal representation of the different parties, 40 *tillægsmandater* (additional seats) are divided among such parties which have not obtained sufficient returns at the district elections. Two members are elected for the Faroe Islands and 2 for Greenland. The term of the legislature is 4 years, but the King has power to dissolve the *Folketing*.

The *Folketing* must meet every year on the first Tuesday in October. Besides its legislative functions, it appoints every 6 years judges who, together with the ordinary members of the Supreme Court (*Højesteret*), form the *Rigsret*, a tribunal which can alone try parliamentary impeachments. The ministers have free access to the house, but can vote only if they are members.

Folketing, elected 15 Nov. 1960: 76 Social Democrats, 11 Radical Left, 38 Liberals, 32 Conservatives, 11 Socialist People's Party, 6 independents, 1 Slesvig Party (German), 2 Faroe Islands and 2 Greenland representatives; total 179.

The executive (called the State Council (*Statsraadet*) when acting with the King presiding) is a coalition government of Socialists and Radical Left, and was, in Dec. 1962, composed as follows:

*Prime Minister:* J. O. Krag.

*Foreign Affairs:* Per Hækkerup. *Labour:* Erling Dinesen. *Social Affairs:* Kaj Bundvad. *Housing:* Carl P. Jensen. *Interior:* Lars P. Jensen. *Fisheries:* A. C. Normann (Radical). *Defence:* Victor Gram. *Agriculture:* Karl Skytte (Radical). *Finance:* Poul Hansen. *Economic Affairs:* Kjeld Philip (Radical). *Education:* K. Helveg Petersen (Radical). *Cultural Affairs:* Julius Bomholt. *Ecclesiastical Affairs:* Bodil Koch. *Trade:* Hilmar Baunsgaard (Radical). *Justice:* Hans Hækkerup. *Public Works:* Kai Lindberg. *Greenland:* Mikael Gam.

The ministers are individually and collectively responsible for their acts, and if impeached and found guilty, cannot be pardoned without the consent of the *Folketing*.

In 1948 a separate legislature (*Lagting*) and executive (*Landsstyre*) were established for the Faroe Islands, to deal with specified local matters.

The Constitution of 1953 gave Greenland equal status with the other parts of the Kingdom.

*National flag:* White cross on red (Dannebrog).

*National anthem:* Kong Kristian stod ved højen Mast (words by J. Ewald, 1778; tune by J. E. Hartmann, 1780).

*The Constitution of the Kingdom of Denmark Act and the Succession to the Throne Act.* Copenhagen, 1953

Local Government. For administrative purposes Denmark is divided into 25 counties (*amtsrådskredse*), each of which is administered by a governor (*amtmand*) who is a civil servant appointed by the King. Each county has a county council of between 9 and 15 members, superintending the rural municipalities. These number about 1,300; each of them has a parish council of between 5 and 19 members, headed by an annually elected chairman. There are 88 urban municipalities, each with a borough council of between 7 and 25 members, headed by a mayor elected for a 4-year term. Copenhagen forms a district by itself and is governed by a city council of 55 members, elected every 4 years, and an executive (*magistraten*), consisting of the chief burgomaster (*overborgmesteren*), 5 burgomasters and 5 aldermen, appointed by the city council for 8 years. All councils are elected direct by universal suffrage and proportional representation.

**AREA AND POPULATION.** According to the census held on 26 Sept. 1960 the area of Denmark proper was 43,033 sq. km (16,611 sq. miles) and the population 4,585,256. Estimated population, 1 Jan. 1962, 4,636,700.

The instruction in the public schools is mostly free. For higher instruction there are a veterinary and agricultural college of Copenhagen with 253 teachers and about 1,050 students; 101 technical schools with about 71,400 pupils; 29 training colleges for teachers with about 7.750 students; 6 high schools of commerce with about 3,700 pupils; 217 commercial schools with about 58,600 pupils; 32 agricultural or horticultural schools with about 3,200 pupils; 64 *folkehøjskoler* or popular high schools (adult schools) with about 7,500 pupils. The *folkeshøjskoler* are all private, but to them and the agricultural schools the State annually makes a grant of about 24m. kroner. A college of pharmacy (founded 1892) with 61 teachers and 350 students; 2 schools for dentists with 159 teachers and 1,000 students; a royal academy of arts (founded 1754) with 136 teachers and about 700 students; a technical university (founded 1829) with 409 teachers and about 2,100 students. The University of Copenhagen, founded in 1479, has 889 professors and teachers, and about 7,750 students. The University of Aarhus, founded in 1928, and opened on 11 Sept. 1933, has 497 teachers and about 2,900 students.

*Cinemas* (1962). There were 449 cinemas with a seating capacity of 158,428.

*Newspapers* (1963). There were 71 daily newspapers with a combined circulation of 1,598,100; 10 of them (671.200) appeared in Copenhagen.

**SOCIAL WELFARE.** The main body of Danish social welfare legislation is consolidated in 6 acts concerning (1) health insurance, (2) disablement, old-age and widows pensions, (3) employment injuries insurance, (4) employment services and unemployment insurance, (5) social assistance, and (6) child and juvenile guidance.

*Health insurance*, covering nearly 90% of the population, provides free medical care and hospitalization, substantial subsidies for certain essential medicines together with some dental care and a funeral allowance. Wage-earners are granted daily sickness allowances, others can have limited daily sickness allowances. Hospitals are primarily municipal.

*Disablement and old-age pensions* cover the entire population. Old-age pension or folks pension is paid either as a minimum pension or as income-graded pension. Every person over 67 years is entitled to a minimum pension. Income-graded pension can be paid to single women over 62 years and to men and married women over 67 years. Minimum pensions are paid at the same rates throughout the country (in 1962: 1,380 kroner when both spouses are entitled, and 924 kroner to single persons). The income-graded pension is graded according to the income of the recipient. When both spouses are entitled to a pension it amounts to 7,032 kroner annually. A single pensioner is entitled to roughly two-thirds of this amount. If the pensioner has other income exceeding certain limits, reductions are made, but not below the minimum pension. Pension rates are adjusted twice a year according to the cost-of-living index.

The disablement and widows pension schemes are nearly the same as that of the income-graded folks pension.

*Employment injuries insurance* provides for daily sickness allowances, disablement or survivors' pensions and funeral allowances. The scheme covers practically all employees.

*Employment services* are provided partly by regional public employment agencies and partly by the unemployment insurance funds, which have a membership of 756,000. The insurance against unemployment provides daily allowances (including child supplements) plus fuel and rent allowances in cases of prolonged unemployment.

The *Social Assistance Act* deals with the care of the aged (old people's homes), rehabilitation and training of cripples, the blind, etc. The social assistance provisions, moreover, cover cases of need which are not provided for by the insurance schemes.

The *Child and Juvenile Guidance Act* deals with the care of children, including placement of children and juveniles in foster homes or institutional care. Institutions for day-time care of children and some other benefits for children are provided for under this act.

Total social expenditure, including hospital and health services, amounted in the financial year 1960–61 to 4,345m. kroner (13% of the net national income).

**JUSTICE.** The lowest courts of justice are organized in 103 tribunals (*underretter*), where minor cases are dealt with by a single judge. Cases of greater consequence are dealt with by the superior courts (*Landsretterne*); these courts are also courts of appeal for the above-named minor cases. Of superior courts there are two: *Østre Landsret* in Copenhagen with 30 judges, *Vestre Landsret* in Viborg with 20 judges. From these an appeal lies to the Supreme Court (*Højesteret*) in Copenhagen, composed of 15 judges. Judges under 65 years of age can be removed only by judicial sentence.

In 1961, 5,642 men and 517 women were convicted of crimes and delicts. On 31 Dec. 1960, 1,398 men and 35 women were in the state prisons.

**FINANCE.** The budget (*Finanslovforslag*) must be laid before the *Folketing* not later than 4 months before the beginning of a new fiscal year. The annual financial accounts (*Statsregnskab*) must be examined by 4 revisers, elected by the *Folketing.* Their report is submitted to the *Folketing.*

The following shows the actual revenue and expenditure for 3 fiscal years ending 31 March and the estimates for 2 years (in 1,000 kroner):

| | *1960–61* | *1961–62* | *1962–63* | *1963–64* [1] | *1964–65* [1] |
|---|---|---|---|---|---|

| Current expenditure | 6,246,065 | 7,874,396 | 9,110,650 | 10,290,532 | 11,248,409 |

Receipts and expenditures of special government funds and expenditures on public works are excluded.

[1] Estimates.

The 1964–65 budget envisages revenue of 5,365m. kroner from income and property taxes and 6,529m. from consumer taxes (gross).

The central government debt on 31 March 1963 amounted to 7,314m. kroner.

**DEFENCE.** In accordance with the military defence act of 1960, the Danish defence consists of an army, a navy and an air force.

All basic matters concerning the armed forces are treated by a staff committee consisting of the chief of defence, the chief of defence staff and the commanders-in-chief of the Army, Navy and Air Force.

National conscription was introduced in 1849. At the age of 17 years the young recruits are entered upon the conscription rolls, and between the age of 19 and 25 they receive their first military training over a period of about 16 months, which it is planned to reduce to 12–14 months.

*Army.* The Army is organized in regional commands and brigade groups. The men of the latest annual service groups form the troops of the line, while those of the previous years (until their 50th year) form the local defence, the reserve and Home Guard. The annual call-up is about 20,000; the Army Home Guard consists of about 56,000 volunteers.

The Army comprises regular officers, n.c.o.s and reserve officers. The Army has schools for training of officers and n.c.o.s, as well as arsenals for the manufacture of arms and munitions.

*Navy.* The Navy comprises the fleet and the coast-defence forces. It includes 3 frigates, 4 corvettes, 3 submarines, 2 patrol vessels, 8 minelayers, 8 coastal minesweepers, 14 motor torpedo-boats, 6 seaward defence craft, 21 inshore minesweepers, 2 depot ships, the royal yacht (*Dannebrog*), 1 surveying vessel (*Freja*), 4 fishery patrol craft, 10 landing craft, 2 tenders and 4 ice-breakers.

The construction programme includes 2 destroyer escorts, 2 frigates, 4 minelayers, a submarine, 4 motor torpedo-boats, 3 seaward defence craft.

The coast defence includes several permanent fortifications. Naval personnel total about 7,000 officers and men.

The Naval Home Guard consists of about 3,500 volunteers.

*Air Force.* Dating back to 1911, the Air Force comprised separate army and naval air arms until 1 Oct. 1950, when the independent Royal Danish Air Force was formed. Its operational units are controlled by a Tactical Air Command, which is supplemented by a Training Command and Air Material Command. Pilots are being trained in Canada by the RCAF, but the air force trains all other personnel and has an Officer's School at Jonstrup. Air Force HQ is at Vedbaek.

Personnel numbers approximately 8,000, plus 3,000 civilians. There are 3 fighter-bomber squadrons (F-100D Super Sabres), 3 all-weather fighter squadrons (F-86D Sabres), 1 day interceptor squadron (Hunters), 1 reconnaissance squadron (RF-84F Thunderflashes), 1 transport squadron (C-54s and C-47s) and 1 rescue squadron (Catalinas and H-19 helicopters), plus training and general-purpose units.

In 1964, 2 F-86D squadrons are being re-equipped with F-104G Starfighters, and 4 missile units with Nike Ajax and Nike Hercules surface-to-air weapons.

The Air Force Home Guard consists of about 11,700 volunteers.

**PRODUCTION.** In 1955, 21% of the population lived on agriculture, forestry and fishery, 27% on industries and handicrafts, 8% on construction, 13% on commerce, etc., 7% on transportation and communication, and 10% on administration, professional services, etc., while 14% received old-age pensions or had private means.

**Agriculture.** The soil of Denmark is greatly subdivided, owing partly to the state of the law, which forbids the merging of existing farms into larger farms and encourages the parcelling out of the land. In 1961 the total number of farms was 196.520. There were 91,641 small holdings (0·55–10 hectares), 101,086 medium-size holdings (10–60 hectares) and 3,793 holdings with more than 60 hectares.

Whereas the number of farmers has remained almost unchanged, the number of agricultural workers has declined steadily from 306,900 in July 1939 to 86,700 in July 1963.

In July 1963 the cultivated area was utilized as follows (in 1,000 hectares): Grain, 1,542, peas and beans, 9; root crops, 469; other crops, 115; green fodder and grass, 968; fallow, 6; total cultivated areas, 3,110.

MANUFACTURES. Although only very few industrial raw materials are produced within the country, considerable industries have been developed.

According to the census of manufacturing, 2 June 1958, there were 66,300 establishments employing altogether 617,000 persons. The following are some data for the most important industries in 1961. The table covers establishments with more than 5 wage-earners.

POWER SUPPLY. Owing to the concentration of power production, the number of power stations has declined from 371 in 1949–50 to 233 in 1960–61, while the net power production (in 1m. kwh.) has risen from 1,689 in 1949–50 to 4,562 in 1960–61.

On 5 June 1953 Greenland became an integral part of the Danish Realm with the same rights and the same measure of self-governing as the rest of Denmark.

A Danish–American agreement for the common defence of Greenland was signed on 27 April 1951.

Until the beginning of this century, the hunting of land and sea mammals, especially seals, was the main occupation of the population; now fishing is most important.

Considerable coal resources are available, but the calorific value of the coal is relatively small. A deposit of the valuable mineral cryolite is situated at Ivigtut. In 1948 deposits of lead and zinc were discovered at Mestersvig in East Greenland. A Danish company 'Nordisk Mineselskab A/S' (The Northern Mining Company, Ltd) has been granted a concession for further exploitation, and utilization of the ore deposits found, some 1·2m. tons, began in 1956. Shipments (1962) of lead-ore was 2,327 metric tons and of zinc-ore, 10,377 metric tons.

# DOMINICAN REPUBLIC

## REPÚBLICA DOMINICANA

**HISTORY.** On 5 Dec 1492 Columbus discovered the island of Santo Domingo, which he called La Española; for a time it was called Hispaniola. The city of Santo Domingo, founded by his brother, Bartholomew, in 1496, is the oldest city in the Americas and was for long the centre of Spanish power in America. The western third of the island—now known as the Republic of Haiti—was later occupied and colonized by the French, to whom the Spanish colony of Santo Domingo was also ceded in 1795. In 1808 the Dominican population, aided by British troops, expelled the French, and the colony returned to the rule of Spain, from which it declared its independence in 1821. It was invaded and held by the Haitians from 1822 to 1844, when they were expelled, and the Dominican Republic was founded and a constitution adopted. Great Britain, in 1850, was the first country to recognize the Dominican Republic. The country was occupied by American Marines from 1916 until 1924. In 1936 the name of the capital city was changed from Santo Domingo to Ciudad Trujillo; and back again in 1961.

*National flag:* Blue, red; quartered by a white cross.

*National anthem:* Quisqueyanos valientes, alzemos (words by E. Prud'homme; tune by J. Reyes, 1883).

**CONSTITUTION AND GOVERNMENT.** The republic is governed under the provisional constitution proclaimed on 30 Dec. 1961 and amended by the Council of State on 16 Sept. 1962. This provides for the sharing of legislative and executive power between the 7 members of a Council of State, headed by the President of the Republic. An elected Constituent Assembly met early in 1963 to draft a new constitution.

The President is elected for 5 years, by direct vote. In case of death, resignation or disability, he is succeeded by the Vice-president of the Council. There are 12 secretaries of state, a judicial adviser with secretary-of-state rank, and 2 ministers without portfolio in charge of departments.

General elections under a revised constitution at which women voted for the first time, were held on 16 May 1942; 2 women were elected to the chamber and 1 to the senate. Citizens are entitled to vote at the age of 18, or less when married.

Recent Presidents have been: Gen. Rafael Leonidas Trujillo Molina, 1930–38, 1942–52 (assassinated 30 May 1961); Héctor Bienvenido Trujilla Molina, 1952–60; Dr Joaquín Balaguer, 4 Aug. 1960–62; Lic. Rafael Bonelly, 18 Jan. 1962; Professor Juan Bosch, 27 Feb.–25 Sept. 1963 (deposed).

On 26 Sept. 1963 the generals who had overthrown the Government installed a junta of 3 civilians, Dr Emilio de los Santos, Dr Ramón Tatia Espinal and Donald Reid Cabral.

**AREA AND POPULATION.** The Dominican Republic occupies the eastern portion (about two-thirds) of the island of Hispaniola, Quisqueya or Santo Domingo, the western division forming the republic of Haiti. It consists of the National District (containing the capital, Santo Domingo), and 25 provinces. Area is 48,442 sq. km (18,700 sq. miles) with 870 miles of coastline, 193 miles of frontier line with Haiti (marked out in 1936).

The populations of the 25 provinces (with density per sq. km) at the 1960 census were:

In 1961 marriages registered were 10,137; divorces, 877; live births, 102,877; deaths, 25,893.

The population is partly of Spanish descent, but is mainly composed of a mixed race of European, African and Indian blood. The 1950 census showed 600,994 whites, 245,032 Negroes, 1,289,285 of mixed blood and 561 of other races; 2,093,195 spoke Spanish, 25,405 French and 12,140 English. Tax-exempt land has been set aside for the settlement of European refugees, both Jewish and non-Jewish, who are guaranteed full civic rights.

**RELIGION.** The religion of the state is Roman Catholic; other forms of religion are permitted. The 1950 census showed 2,098,474 Catholics, 30,538 Protestants (1962: 43,765), 463 Jews. There is a papal nuncio as well as an archbishop, known as the Primate of the Indies.

**EDUCATION.** Primary instruction (4,920 schools) is free and obligatory for children between 7 and 14 years of age; there are also secondary (75), normal, vocational and special schools, all of which (5,244 in 1959) were either wholly maintained by the state or state-aided; teachers numbered 10,552 and pupils 548,820. The campaign against adult illiteracy dates from 1941; but in 1963 about 70% of the population were still illiterate.

The University of Santo Domingo (founded 1538) had (1960) 11 schools with 3,960 students and 198 teachers.

**WELFARE.** Some progress has been made in sanitation; 61 towns (1960) have complete waterworks. There were, in 1962, 30 hospitals and Social Security clinics (with 1,385 beds) and 108 private clinics (with 1,776 beds).

**JUSTICE.** The judicial power resides in the Supreme Court of Justice, the courts of appeal, the courts of first instance, the communal courts and other tribunals created by special laws, such as the land courts. The Supreme Court consists of a president and 8 judges chosen by the Senate, and the procurator-general, appointed by the executive; it supervises the lower courts. Each province forms a judicial district, as does the *Distrito Nacional,* and each has its own procurator fiscal and court of first instance; these districts are subdivided, in all, into 72 municipalities and 18 municipal districts, each with one or more local justices. The death penalty was abolished in 1924, but is imposed in war-time for treason or espionage.

**FINANCE.** The receipts and disbursements for calendar years, in 1,000 Dominican gold pesos (RD$), equal to the US$, were:

Income tax, established in 1949, was replaced in 1950 by an identity-card tax, known as the 'cédula tax', but re-introduced in 1962.

Chief source of revenue in 1960 was import duties and other taxes, RD$119,785,000. Chief items of expenditure in 1960 were: Armed Forces, RD$25,110,490; works and communications, RD$14,204,432; finance, RD$13,995,998.

Under the Alliance for Progress a credit of US$22m. was allocated in Jan. 1962.

**DEFENCE.** The armed forces are under the command of the President of the Republic, acting through the Secretary of State for the Armed Forces.

The total defence budget for 1963 is RD$32·8m.

*Army.* The Army has a strength of about 12,000 all ranks.

*Navy.* The Navy includes 2 destroyers (HMS *Fame* and *Hotspur* acquired in 1948–49 and now renamed *Duarte* and *Sánchez*), 2 frigates, the presidential yacht (*ex*-frigate), 5 corvettes, 5 patrol vessels, 3 landing craft, 4 coastguard vessels, 3 motor launches, 2 oilers, 3 auxiliaries, 5 tugs. Personnel: 3,500 officers and men.

One is equipped with F-51D Mustang piston-engined interceptors; the other with jet-powered Vampire Mk. 1 fighter-bombers. Total strength is about 110 aircraft and 3,500 personnel.

**PRODUCTION.** *Agriculture.* Agriculture is the chief source of wealth, sugar cultivation being the principal industry. Of the total area, 9,900 sq. miles are cultivable, and about 3,700 are under cultivation. 50% is under subsistence farming—small-holdings each of 15 *tareas* (2½ acres) or less. The Trujillo family used to own 7m. *tareas*, and 500 peasant families, to begin with, have been settled on a part. 150 Japanese families were brought in to engage in coffee growing and the fisheries in 1958, but many of them left in 1961, disappointed at their treatment.

Livestock in 1960 (estimated): 1m. cattle, 1·2m. pigs, 252,700 horses, mules and asses, 800,000 goats and 67,860 sheep. Slaughterings in 1961, sufficient for exports to neighbouring countries especially Puerto Rico, included 122,727 cattle and 160,906 pigs.

The largest sugar estates are in the south-eastern part of the republic. Sugar production, 1962, was 950,000 metric tons (1,111,651 in 1960), of which 800,000 tons were sold to USA (US$96·9m.) and 8,000 tons to UK. Export of refined sugar was 33,949 metric tons in 1960. Two companies (one American-owned, the other expropriated after the downfall of the Trujillo family) produce four-fifths of the total, but in all there are 16 sugar 'centrals'. At times cane has been shipped to Puerto Rico, where it was ground and the sugar shipped, duty-free, to USA.

Coffee, grown originally for the French market, is making headway in USA, which takes 20,000 metric tons per annum. Output, 1961, 44,500 metric tons. Exports in 1960, 29,239 metric tons (valued at RD$22,573,911), largely to USA. Production of rice for home consumption and export is fostered; output, 1960, 119,500 metric tons. Cocoa is the second principal crop and covers 2m. *tareas* (340,000 acres); exports in 1960 were 26,129 metric tons, all to USA; output in 1961, about 38,000 metric tons. Other principal exports are leaf tobacco (15,194 metric tons in 1960) and molasses (250,441,137 litres). There are useful crops of maize (100,600 metric tons) and groundnuts (61,683 metric tons) for local consumption. Scientific growing of bananas and of tobacco is progressing.

*Mining.* Various minerals are found, principal among which are gold (513 troy oz. in 1959) and copper. Iron is produced in the Hatillo area in the form of black magnetic oxide of iron (about 60–80% pure); production in 1961, 138,000 long tons. Silver and platinum have been found, and near Neiba there are several hills of rock salt (production 1960, 66,306 short tons).

The Aluminium Company of America sent its first shipment of bauxite for smelting, to Texas on 13 Jan. 1959. Output in 1962 was 706,000 long tons.

*Industry.* In 1960, 2,427 industrial establishments employed 81,891 men and women, who earned RD$39m. Output was valued at RD$262,839,422. Important produce are textiles, cement, glass bottles, paper and matches. Production of cement, 1960, was 190,000 metric tons.

In mid-1962 it was estimated that there were 400,000 totally unemployed, out of a labour force of about 1m.

*Power.* The electricity production capacity in 1963 was 72,000 kw.

**COMMERCE.** Total imports and exports in RD$1,000 (equal to US$):

At Elías Piña the road joins the Haitian road to Port-au-Prince. The journey between the Haitian and Dominican capitals is now possible by motor in 9 hours. Total highway system in 1963, was 4,250 km first- and 2,000 km second-class roads; there were 647 bridges. Road transport is the chief means of travel. Motor vehicles, 1959 (excluding official), were 17,920, including 9,444 passenger cars and 8,054 commercial vehicles.

The telephone system is mainly operated by an American company. The telegraph has a total length of about 5,000 km, privately owned; they have been leased to All-America Cables, Inc., which also controls submarine cables connecting, in the north, Puerto Plato with Puerto Rico and New York, and in the south, Santo Domingo with Puerto Rico, Cuba and Curaçao.

There are 28 broadcasting stations in Santo Domingo, 40 in Santiago and 7 other towns; this includes the 3 government stations. There are 4 television stations, 2 of which in Santo Domingo.

In 1961 internal traffic accounted for 4,145 passengers, external for 26,359.

**MONEY.** In Oct. 1947 the *peso oro*, equal to the dollar, was formally made the unit of currency, replacing the USA gold dollar, which had been the standard since 1 July 1897. The new bank-notes were backed by $4m. in gold and by $48,215,000 in US bank-notes and deposits in New York banks. Both currencies circulate, but only the peso was legal tender from 1947 until Dec. 1960. From then until 30 May 1962 the transferability of the Canadian dollar was also prescribed, but never put into effect. There are silver coins for 50, 25 and 10 centavos, a copper–nickel 5-centavo piece and a copper 1-centavo piece.

**BANKING.** On 24 Oct. 1941 a law was passed for the creation of a Dominican commercial bank (government controlled) to be known as the Banco de Reservas de la República Dominicana, with a capital of RD$1m., now increased to RD$20m. This bank, starting with branches purchased from the National City Bank of New York, opened for business on 27 Oct. 1941 and now has 11 branches covering the country. It is authorized to perform all customary banking transations. On 31 Jan. 1962 its assets and liabilities totalled RD$75,129,354. There are 3 foreign banks—the Royal Bank of Canada with 5 branches, the Bank of Nova Scotia and the First National City Bank of New York. An agricultural and mortgage bank, with paid-up capital of RD$500,000, was established in 1945; in 1950 its capital was increased to RD$5m.; in 1952 steps were begun to raise it to cover a 5-year programme of agricultural expansion; it stood at RD$100m. in Nov. 1962.

In 1947 the Central Bank of the Dominican Republic was launched; its balance sheet on 31 Dec. 1962 showed gold and foreign exchange reserves of RD$15·2m. Chief liability was note circulation, chiefly bank-notes of 1, 5 and 10 pesos (RD$55·6m.); total assets and liabilities were RD$186·6m. The reserves of foreign exchange was US$18·9m. at 31 Oct. 1963, plus US$3m. gold.

A new Banco Popular Dominicano, with an authorized capital of RD$5m., opened in Jan. 1964.

**WEIGHTS AND MEASURES.** The metric system was nominally adopted on 1 Aug. 1913, but English and Spanish units have remained in common use in ordinary commercial transactions; on 17 Sept. 1954 a more drastic law requiring the decimal metric system was passed.

# ECUADOR

## REPÚBLICA DEL ECUADOR

**HISTORY.** The Spaniards under Francisco Pizarro founded a colony after their victory at Cajamarca (16 Nov. 1532). Their rule was first challenged by the rising of 10 Aug. 1809. Marshal Sucre defeated the Spaniards at Pichincha in 1821, and in 1822 Bolívar persuaded the new republic to join the federation of Gran Colombia. The Presidency of Quito became the Republic of Ecuador by amicable secession 13 May 1830.

**CONSTITUTION AND GOVERNMENT.** Under the constitution promulgated 6 March 1945 the President was elected directly by the people for a term of 4 years, eligible for re-election after an interval of 4 years; he had to be a native Ecuadorean at least 40 years of age and not related by blood or marriage to the retiring President. Congress consisted of a Chamber of Deputies, elected for 2 years by provinces on a population basis, and a Senate elected similarly for 4 years. In addition, special Senators were elected by professional, cultural, business and racial groups. Voters were all literate Ecuadoreans, men and women, over 18 years of age. Women voted for the first time in 1939.

Following a military *coup d'état* on 11 July 1963, the constitution was suspended.

*National flag:* Yellow (2), blue (1), red (1), horizontal.

*National anthem:* Salve, oh patria! (words by J. L. Mera; tune by A. Neumann, 1866).

The following is a list of the presidents and provisional executives since 1940, with the date on which they took office:

- Carlos Alberto Arroyo del Río, elected 12 Jan. 1940; resigned 30 May 1944.
- Dr José María Velasco Ibarra, elected by Constitutent Assembly, Aug. 1944; re-elected 11 Aug. 1946, but deposed 24 Aug. 1947.
- Col. Carlos Mancheno, seized power 24 Aug. 1947; deposed 3 Sept. 1947.
- Mariano Suárez Veintimilla (Vice-President), 3–15 Sept. 1947.
- Carlos Julio Arosemena Tola (provisional) 15 Sept. 1947–31 Aug. 1948.
- Galo Plaza Lasso, 1 Sept. 1948–31 Aug. 1952.
- Dr José María Velasco Ibarra, 1 Sept. 1952–31 Aug. 1956.
- Dr Camilo Ponce Enríquez, 1 Sept. 1956–31 Aug. 1960.
- Dr José María Velasco Ibarra, 1 Sept. 1960–8 Nov. 1961 (withdrew).
- Dr Carlos Julio Arosemena Monroy, 8 Nov. 1961–11 July 1963 (deposed).

The military junta in power since July 1963 consists of Rear-Adm. Ramón Castro Jijón as president, Gen. Luis Cabrera Sevilla, Gen. Marcos Gándara Enríquez and Col. Guillermo Freile Posso.

*Minister for Foreign Affairs:* Dr Neftalí Ponce Miranda.

LOCAL GOVERNMENT. The country is divided politically into 20 provinces; 4 of them comprise the 'Región Oriental' and one the Archipelago of Galápagos, officially called 'Colón', situated in the Pacific Ocean about 600 miles to the west of Ecuador and comprising 15 islands. The provinces are administered by governors, appointed by the Government; their subdivisions, or cantons, by political chiefs and elected cantonal councillors; and the parishes by political lieutenants. The Galápagos Archipelago is administered by the Ministry of National Defence.

**AREA AND POPULATION.** Ecuador is bounded on the north by Colombia, on the east and south by Peru, on the west by the Pacific Ocean. The frontier with Peru has long been a source of dispute between the two countries. The latest delimitation of it was in the treaty of Rio, 29 Jan. 1942, when, after being invaded by Peru, Ecuador ceded the latter over half her Amazonian territories. Ecuador unilaterally renounced this treaty in Sept. 1961. *See* MAP in THE STATESMAN'S YEAR-BOOK, 1942. No definite figure of the area of the country can yet be given, as a portion of the frontier has not been delimited. One estimate shows 455,454 sq. km, including the Archipelago of Colón (the 13 Galápagos Islands) with 7,430 sq. km. The United Nations Statistical Office excludes the 'Región Oriental' and the Galápagos Islands and gives the settled portion of Ecuador as 270,670 sq. km (104,505 sq. miles).

Ecuador has 3 distinct zones: the *Sierra* or uplands of the Andes, consisting of high mountain ridges with valleys, with 2·57m. of the population and high-priced farming land; the *Costa*, the coastal plain between the Andes and the Pacific, with 2·02m., whose permanent plantations furnish cacao, coffee, bananas, sugar-cane and many other crops; the *Oriente*, the upper Amazon basin on the east, consisting of tropical jungles threaded by large rivers.

Whites are estimated to form 10% of the population; Indians, 30%; mixed, 40%; the rest are mulattos, negroes and others. The official language is Spanish. The Indians speak the Quechua language; in the Oriental Region the Jíbaro tribe has a language of its own—'Jíbaro'. The Constituent Assembly of 1944–45 had, for the first time, a representative elected by the Indians.

Ecuador's first census of population was taken on 29 Nov. 1950; it showed a total of 3,202,757 (1,594,803 males and 1,607,954 females). The census was hampered by strong opposition from the Indian villages. The working population was given as 1,236,590, of which two-thirds were agricultural. Estimated population on 31 Dec. 1962, 4·65m.

The population (estimated) was distributed by provinces as follows (capitals in brackets):

| Provinces | Area (sq. km) | Population 1962 | Population per sq. km |
|---|---|---|---|
| Azuay (Cuenca) | 7,799 | 275,758 | 36·0 |

There are 97 cantons, 169 urban parishes and 626 rural parishes. The chief towns are the capital, Quito (348,151, 1962 census), Guayaquil (506,037), Cuenca (60,021), Ambato (52,713), Ríobamba (41,417).

Vital statistics for calendar years: Births, (1956) 172,743, (1957) 184,919, (1958) 185,558; deaths, (1956) 57,778, (1957) 57,885, (1958) 61,250.

**RELIGION.** The state recognizes no religion and grants freedom of worship to all. Civil registration of births, deaths and marriages is obligatory. Divorce is permitted. Under the 1945 constitution illegitimate children have the same rights as legitimate ones with respect to education and inheritance.

The Catholic Church has 3 archbishops and 7 bishops. Since 1895 all state appropriations for the benefit of the Church have ceased. Members of the episcopate should by law be Ecuadorean citizens. A modus vivendi was concluded with the Holy See on 24 July 1937, governing the relations between the Catholic Church and the state. Protestants numbered 11,500 in 1962.

**EDUCATION.** Primary education is free and obligatory. Secondary education is carried on in secondary schools or colleges and higher education in 7 universities at Quito, Guayaquil, Cuenca, Loja and Portoviejo. Private schools, both primary and secondary, are under some state supervision. There were (1962–63) 122 pre-school centres with 12,701 pupils; 5,744 primary schools with 641,525 pupils; 386 secondary schools with 87,758 pupils and 7 universities and 2 polytechnic schools with 11,127 students. The 1950 census showed that 43·7% of those over 10 years of age were illiterate. A campaign against adult illiteracy was started in 1944.

*Cinemas* (1962). Cinemas numbered about 110 with total seating capacity of 22,000.

*Newspapers* (1962). There were 20 daily newspapers with an aggregate daily circulation of 170,000; 5 papers in Quito and Guayaquil have 75% of the circulation.

**JUSTICE.** The Supreme Court in Quito is the highest tribunal and consists of 5 justices and the Minister Fiscal. Of the 8 superior courts, 3 are composed of 6 judges and 5 of 3 judges each. There are numerous lower courts. The popular jury was abolished in 1928, and criminal cases are heard before a 'special jury' consisting of 3 members of the Ecuadorean bar, or '3 citizens of recognized integrity' appointed annually by the superior courts. Capital punishment and all forms of torture are prohibited under the constititution. Likewise imprisonment for debt and contracts involving personal servitude or slavery. Substantial amendments expediting judicial procedure were introduced in 1936, and salaries for all judicial officials replaced remuneration by fees.

**FINANCE.** Revenue and expenditure for calendar years, in 1m. sucres (18·18 sucres = US$1, official rate) balanced as follows: 1958, 1,469; 1959, 1,422; 1960, 1,550; 1961, 1,700; 1962, 2,048; 1963, 1,994.

The characteristic division of the budget under 3 main heads was, for 1963 (in 1m. sucres): Current expenditure, 1,373; capital expenditure, 351·6; state enterprises, 269·2. The 9 Ministries were allocated: Education, 324·2; defence, 267; interior, 93·4; social welfare, 74·1; foreign affairs, 35·3; treasury, 41; development, 27·6; public works, 6·8; commerce and banking, 6·2.

The foreign debt on 30 Nov. 1963 was equal to $38·2m.; internal debt (30 June), 1,235m. sucres. Par values of British investments, end of 1949, were £4,363,609, of which 51·2% were in default. A debt settlement was reached with the London Council of Foreign Bondholders in July 1953; repayment began in April 1955. £45,600 and US$6·6m. were outstanding at 30 June 1962.

**DEFENCE.** Military service is compulsory, with a 2-year period of conscription. The country is divided into 4 military zones, with headquarters at Quito, Guayaquil, Cuenca and Pataza.

*Army.* The Army consists of 6 divisions and some small 'operation detachments'. The divisions are composed of 12 infantry battalions, 3 artillery groups, 3 mechanized squadrons (each with 17 light tanks obtained from USA in 1942), 2 sapper battalions, 2 anti-aircraft battalions, 3 signal companies and several independent infantry companies. A military academy for cadets and a war academy for officers are maintained at Quito.

*Navy.* The Navy consists of 3 frigates (including 2 British 'Hunt' class acquired in 1955), 2 patrol vessels, 6 German-built patrol boats, 2 landing ships and 2 tugs. Naval personnel totals 3,700. In Sept. 1942 naval bases were granted to the US in the Galápagos Islands and on the Santa Elena peninsula.

*Air Force.* The Air Force, formed with Italian assistance in 1920, was re-organized and re-equipped with US aircraft after Ecuador signed the Rio Pact of Mutual Defence in 1947. There are now Meteor FR9 day fighters, F-80C fighter-bombers, Canberra 6 light bombers, C-47 transports, T-6, 33 and 34 trainers, 4 Cessna Skyhook helicopters for search and rescue, and 6 light aircraft.

**PRODUCTION.** *Development Plan.* The 301m. sucres allocated in the 1962 budget included: Agriculture, 25m.; electricity, 1·4m.; roads and transport, 209m.; construction, 31m.

*Agriculture.* Ecuador is divided into two agricultural zones: the coast regions and the lower river valleys, where tropical farming is carried on in an average temperature of from 18° to 25° C.; and the hill country, the foothills and the mountain valleys, adapted to grazing, dairying and the production of cereals, potatoes, and the fruits and vegetables suitable to temperate climes. Some wheat has to be imported.

A tract of rich virgin land, amounting to 124,000 acres, in the Santo Domingo de los Colorados area has been set aside for colonization purposes.

Excepting the two agricultural zones and a few arid spots on the Pacific coast, Ecuador is a vast forest. Roughly estimated, 10,000 sq. miles on the Pacific slope extending from the sea to an altitude of 5,000 ft on the Andes, and the Amazon Basin below the same level containing 80,000 sq. miles, nearly all virgin forest, are rich in dyewoods, cinchona trees and other valuable timber, including balsa wood. Only a third, in the coastal region, is commercially accessible. Ecuador is the world's chief source of balsa supply; the tree (of the *Ochroma* or silk-cotton family) is found on the western coastal lowlands and also in the 'Oriente' region. Exports of balsa (about 4,000 tons a year) were worth $1·2m. in 1962.

The staple export products are bananas, cocoa and coffee. These make up over 80% of her exports; the value of the bananas being rather more than that of cocoa and coffee combined. The production of wheat is increasing (78,170 metric tons in 1961). Sugar is becoming important; production in 1962 was 124,407 metric tons. The main crops, in metric tons, have been:

| | *1961* | *1962* | | *1961* | *1962* |
|---|---|---|---|---|---|
| Cacao | 27,812 | 31,082 | Potatoes | 4,500,000 | .. |
| Coffee | 14,560 | 25,955 | Barley | 1,805,144 | .. |
| Rice | 84,400 | 76,700 | Cotton | 136.809 | .. |
| Sugar | 123,763 | .. | Bananas (stems) | 79,000,000 | 75,334,000 |

Livestock, estimated in 1961: Cattle, 1·54m.; sheep, 1·85m.; pigs, 1·55m.

*Fishery.* Fisheries and fish product exports were valued at US$3·4m. in 1962; of these, shrimps comprised about half.

*Mining.* Ecuador is auriferous, producing usually between 2,000 and 3,000 kg; output, 1962, 20,591 fine oz. In 1962 output of silver was 127,739 troy oz. Production of crude petroleum in 1962 was 108·1m. US gallons; production of derivatives was 165·7m. Ecuador has to import some crude and, owing to lack of refining capacity, some refined products.

The country has some copper (158 short tons in 1962), iron, lead (124 short tons in 1962) and coal; sulphur exists in the Chimborazo district and in the Galápagos Islands, but output has been small. The discovery of coal deposits estimated at 50m. tons in the Biblián area was reported in July 1962. The state salt monopoly was abolished in 1963; output in 1960, 27,299 metric tons.

*Industry.* In 1960, 9 main groups of consumer-goods industries represented 659 factories, with 107,100 workers. Cement output, 1962, from the country's 3 plants was 194,070 metric tons.

*Electricity.* In 1962, total working potential of hydraulic and thermal plants was 159,882 kw.

**COMMERCE.** Imports and exports (excluding minerals, petroleum and currency) for calendar years, in US$1m., were as follows:

| | *1958* | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|
| Imports . . . | 93·7 | 88·4 | 104·9 | 103·4 | 97·8 |
| Exports . . . | 95·0 | 94·9 | 102·7 | 100·9 | 116·9 |

Of the total exports in 1961 (and 1962) the largest items were: Bananas, $53·2m. ($61·7m.); coffee, $14·7m. ($20·7m.); cocoa, $15m. ($15·9m.). Other exports include sugar, castor-oil seed, pharmaceuticals, toquilla straw ('Panama') hats, balsa wood, rice and pyrethrum.

USA furnished 47·6% of imports in 1961 and 50·7% in 1960; and took 61·2% of Ecuador's exports in 1961 and 63·5% in 1960.

Total trade between Ecuador and UK (in £ sterling, British Board of Trade returns):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . | 325,041 | 365,560 | 239.810 | 277,535 | 277,927 |

| Re-exports from UK | 18,616 | 20,405 | 20,253 | 21,294 | 18,111 |

**COMMUNICATIONS.** *Shipping.* Ecuador has 7 seaports, of which Guayaquil is the chief. The merchant navy comprises 24.628 tons of sea-going and 14,278 tons of river craft. In 1962, 217 Norwegian vessels (578,089 gross tons), 256 American (1,112,496), 256 German (647,648) and 83 British (262,615) entered and cleared Guayaquil.

There is river communication, improved by dredging, throughout the principal agricultural districts on the low ground to the west of the Cordillera by the rivers Guayas, Daule and Vinces (navigable for 200 miles by river steamers in the rainy season).

*Roads.* There are now over 10,000 km of roads of all types, but most are narrow, the width of a motor car, and most of them are subject to landslides. A trunk highway through the centre of the coastal plain is planned which will link Machala in the extreme south-west with Santo Domingo and thus to Esmeraldas in the north-west and to the northern section of the Pan-American Highway at Latacunga and Quito. The paving of the main Quito–Guayaquil Highway was completed in 1961, and a new road Quito–Santo Domingo was opened in 1963.

In 1960 there were over 6,500 passenger cars and over 18,000 commercial vehicles. In 1962 it was estimated that there were over 30,000 motor vehicles of all classes.

*Railways.* A railway is open from Durán (opposite Guayaquil) to Quito (288 miles). The Quito–San Lorenzo railway was officially opened in Aug.

1957, opening up two potentially rich provinces. The total length of the 9 Ecuadorean railways in operation is over 1,340 km. In 1958, 504,444 metric tons of freight and 1,565,150 passengers were carried.

*Posts.* Quito is connected by telegraph with Colombia and Peru, and by cable with the rest of the world. The main towns in the country are connected by radio-telephone. There are over 200 radio stations.

In 1963 there were 37,616 telephones in use, 16,000 in Quito and 15,000 in Guayaquil; all were operated by the Government; 98% were automatic. Television was inaugurated in Nov. 1960 in Guayaquil and in May 1961 in Quito.

*Aviation.* The following international lines operate: Air France, Avianca, Braniff, Ecuatoriana de Aviación, KLM, Panagra, Aerolíneas Panameñas and Aerovías Peruanas. They connect Quito with Panama, 4 hours; to Bogotá (Colombia), 1 hour; to Guayaquil, 1 hour, and to New York, 8 hours. All the leading towns are connected by an almost daily air service, but landing fields are small.

**MONEY.** Since 1 Dec. 1950 the unit of account, the *sucre*, formerly equal to 7·40741 cents US, was devalued to 6·66667 cents US; US$1 was revalued in Sept. 1961 to 18·18 sucres. In July 1963 the average buying rate for the dollar in the free market was 21·33 sucres; selling, 21·22.

The sucre is divided into 100 centavos. In circulation are a pure nickel 1-sucre and copper–nickel and copper–zinc 50-, 20-, 10- and 5-centavo pieces. The currency consists mainly of the notes of the Central Bank in denominations of 5, 10, 20, 50, 100, 500 and 1,000 sucres.

**BANKING.** The Central Bank of Ecuador, at Quito, with a capital of 20m. sucres, is modelled after the Federal Reserve Banks of US; through branches opened in 10 towns it now deals in mortgage bonds. On 16 Aug. 1963 the Central Bank had gold and foreign exchange reserves worth 391·5m. sucres compared with 349·9m. sucres a year before. Banks must hold cash equal to 20% of sight, short-term and savings deposits.

All commercial banks must be affiliated to the Central Bank; the commercial banks, 1 Jan. 1963, had capital and reserves of 353m. sucres and total assets of 3,295m. sucres. In circulation, July 1963, 2,279m. sucres.

The Bank of London and Montreal, Ltd, has branches in Quito and Guayaquil.

**WEIGHTS AND MEASURES.** By a law of 6 Dec. 1856 the metric system was made the legal standard, but the Spanish measures are in general use. The quintal is equivalent to 101·4 lb.

The meridian of Quito has been adopted as the official time.

# EL SALVADOR

## República de El Salvador

**HISTORY.** In 1839 the Central American Federation, which had comprised the states of Guatemala, El Salvador, Honduras, Nicaragua and Costa Rica, was dissolved, and El Salvador became an independent republic. Plans for a gradual federation with Guatemala were discussed between the presidents of both countries in March 1945.

**CONSTITUTION AND GOVERNMENT.** The constitution, which came into force in 1950, superseding the 1886 constitution, was abolished by the *junta* on 3 Jan. 1962. Legislative power was vested in a single chamber, the Legislative Assembly, consisting of deputies, elected for 2 years by universal suffrage, 1 for each group of 38,000 inhabitants. Large powers are vested in the President, whose term is for 5 years; normally he cannot succeed himself. He has a cabinet of 10 members. In 1945 women were conceded a limited suffrage, but in 1950 universal male and female suffrage was introduced for the elections of the President and the Constituent Assembly.

President Col. José María Lemus, who was elected 4 March 1956 and assumed office 14 Sept., was deposed on 26 Oct. 1960 by a *Junta*, headed by Col. Miguel Castillo. This *Junta* was overthrown by a coup on 25 Jan. 1961, led by Col. Aníbal Portillo, Chief of Staff of the Army, but resumed power later. Its nominee, Dr Eusebio Rodolfo Cordón Cea, assumed office 25 Jan. 1962 as provisional president.

*President:* Lieut.-Col. Julio Adalberto Rivera, elected 29 April 1962, assumed office 1 July 1962.

*Foreign Minister:* Dr Héctor Escobar Serrano.

*National flag:* Blue, white, blue (horizontal): the white stripe charged with the arms of the republic.

*National anthem:* Saludemos la patria orgullosos (words by J. J. Cañas; tune by J. Aberle).

**AREA AND POPULATION.** El Salvador is the smallest and most densely populated of the Central American states. Its area (including 247 sq. km of inland lakes) is estimated at 21,393 sq. km (8,236 sq. miles), with population (census 1 May 1961) of 2,510,984. The capital is San Salvador (255,744 inhabitants in May 1961).

The republic is divided into 14 departments, each under an appointed governor. Their areas (in sq. km) and populations at 1 May 1961 were:

| Department | Area | Population | Department | Area | Population |
|---|---|---|---|---|---|
| Ahuachapán | 1,222·32 | 130,710 | La Paz | 1,201·85 | 130,659 |
| Santa Ana | 1,988·26 | 259,155 | Cabañas | 1,094·45 | 94,500 |
| Sonsonate | 1,189·28 | 166,932 | San Vicente | 1,206·69 | 112,920 |
| Chalatenango | 2,116·78 | 129,897 | Usulután | 1,974·84 | 207,061 |
| La Libertad | 1,661·65 | 203,480 | San Miguel | 2,166·98 | 231,821 |
| San Salvador | 871·42 | 463,228 | Morazán | 1,724·26 | 119,381 |
| Cuscatlán | 732·08 | 113,042 | La Unión | 1,995·25 | 148,108 |

Important towns (with population in May 1961) are: Santa Ana, 121,095; San Miguel, 82,974; Santa Tecla, 40,817; Zacatecoluca, 40,424; Ahuachapán, 40,359; San Vicente, 34,723; Sonsonate, 35,531; Usulután, 30,465; Cojutepeque, 18,347.

In 1961 births were 124,871 (46·1 per 1,000 population); deaths, 28,471 (10); infantile deaths, 8,737 (70 per 1,000 live births); marriages, 8,938 (3·2).

There has been considerable emigration into nearby states. There are no tribal Indians. The language of the country is Spanish.

**RELIGION.** The dominant religion is Roman Catholicism. Under the 1945 constitution churches are exempted from the property tax; the

Catholic Church is recognized as a legal person, and other churches are entitled to secure similar recognition. There is an archbishop in San Salvador and bishops at Santa Ana, San Miguel, San Vicente, Santiago de María and Usulután. The Society of Friends had about 275 members in 1957.

**EDUCATION.** Education is free and obligatory, but there is a shortage of both schools and teachers. In 1953 in the rural areas only 45,000 children attended school, while 218,000 had no schools. In 1929 the State took over control of all schools, public and private, but the provision that the teaching in government schools must be wholly secular was removed in 1945.

The census of 1961 showed that 52% of those 10 years of age or older were illiterate, but some headway has been made. In 1958 there were 540 centres for adult education. Of the 8,790 marriages in 1958, 3,247 men and 3,672 women were illiterate.

In 1961 there were 2,713 primary schools (state, municipal and private), with 10,055 teachers and 355,175 pupils; in 1958, 122 kindergartens had 450 teachers and 12,353 children; there are 2,237 travelling teachers for the rural districts. Secondary education was given at 346 high schools (29,197 pupils). The national university (in 1961) had 2,556 students and 418 professors.

*Cinemas* (1961). Cinemas numbered 80.

*Newspapers* (1961). There were 13 daily newspapers.

**SOCIAL WELFARE.** A social-security law became effective 1 Jan. 1954, but details are incomplete; employers are to pay 50% of whatever contribution is decided upon, employees 25% and the State 25%.

**JUSTICE.** Justice is administered by the Supreme Court of Justice, 2 courts of third instance (in the capital) and several courts of first and second instance, besides a number of minor courts. All judges are appointed by the Supreme Court, all for a 2-year term. The magistrates are elected by the Legislative Assembly.

An anti-Communist law, effective 13 Dec. 1952, has made the propagation of totalitarian or Communist doctrines an offence punishable by imprisonment; supplementary offences, contrary to democratic principles, are punished by prison terms of from 3 to 7 years.

**FINANCE.** Revenue and expenditure for fiscal years ending 31 Dec., in colones (2·5 colones = US$1):

| | *1960* | *1961* | *1962*[1] | *1963*[1] | *1964*[1] |
|---|---|---|---|---|---|
| Revenue | 163,989,000 | 170,264,000 | 183,359,000 | 194,863,624 | 224,088,000 |
| Expenditure | 180,993,000 | 173,433,068 | 184,854,000 | 191,863,624 | 224,088,000 |

[1] Budget.

The 1964 budget (in 1,000 colones) proposed 50,864 for education, 27,887 for public works, 35,454 for finance, 22,424 for health and welfare, 23,929 for defence.

In 1961 public revenue (in 1m. colones) comprised: Imports, 58; exports, 23; income and local taxes, 20; others, 38.

External debt amounted to 80m. colones on 30 June 1962. It is being serviced at US$6m. annually. Foreign credits granted to the country since the end of the war include: Inter-American Development Bank, 43·3m.

colones; Export-Import Bank, 24·1m.; Development Loan Fund, 4m.; International Bank for Reconstruction and Development, 87·9m.; others, 31·7m.

**DEFENCE.** The Army is organized in 5 divisions of 15 infantry, 1 artillery and 1 cavalry regiments. There is 1 aviation corps, 1 marine corps and the national guard.

The country is divided into 3 military zones of defence, with 15 regions corresponding each to 1 infantry regiment. In Oct. 1954 the US agreed to send a military mission to train the defence forces.

The Navy consists of 2 patrol boats and 3 other small craft.

The small Air Force, which came into being in the early 1920s, consists of a single transport flight equipped with C-47 aircraft and a number of training and combat units, also equipped with machines supplied by the USA, including Corsair piston-engined fighter-bombers.

**PRODUCTION.** *Agriculture.* El Salvador is predominantly agricultural; 71% of its total area is under cultivation. But it is a one-crop country, coffee alone furnishing, in value, about 75% of its exports. Two-thirds of the coffee is of the 'mild' variety. On 28 July 1933 a Coffee Defence Law placed the entire industry, from cultivation to marketing, under the protection of a commission jointly controlled by the coffee growers and the Government. Coffee is sold in bags of 46 kg, but trade statistics use a bag of 69 kg. Exports in 1962 were 104,564 metric tons (valued at 189,160,844 colones), of which over half went to USA. Area devoted to coffee is about 320,000 acres, almost entirely owned by nationals.

Of the production of ginned cotton usually about 50% is consumed at home, by 10 textile mills, including one owned by the Government; in 1962, 60,222 metric tons (valued at 80,663,000 colones) were exported. Rice is important for home consumption; other agricultural products are maize, cacao, tobacco, indigo, henequén and sugar. A little rubber is exported.

In the latest crop-years, the following production has been recorded (in 1m. quintals (of 46 kg):

| | *1959–60* | *1960–61* | *1961–62* | *1962–63* |
|---|---|---|---|---|
| Coffee . . . | 2·1 | 2·0 | 2·7 | 2·1 |
| Cotton . . . | 2·5 | 2·0 | 2·6 | 4·2 |
| Maize . . . | 3·3 | 4·0 | 3·1 | 4·7 |
| Beans . . . | 0·2 | 0·2 | 0·2 | 0·4 |
| Rice . . . | 0·3 | 0·3 | 0·3 | 0·3 |
| Sugar . . . | 1·0 | 1·0 | 1·4 | 1·3 |
| Millet . . . | 1·6 | 1·6 | 1·8 | 2·4 |

Livestock estimate 1958 showed 104,046 horses, asses and mules, 779,309 cattle, 14,665 sheep, 198,563 pigs and 9,888 goats. Milk production in 1959 was estimated to be nearly 500,000 litres per day.

*Forestry.* In the national forests are found dye woods and such woods as mahogany, cedar and walnut. Balsam trees also abound; El Salvador is the world's principal source of this medicinal gum; exports, 1962, 102 tons.

*Mining.* The mineral wealth of the republic includes gold (1960 production, 1,121 troy oz.), silver (75,846 troy oz.), coal, copper, iron, lead, zinc, sulphur and mercury. Production of salt, 1957, 55,000 short tons. An oil refinery is being built at Acajutla.

*Industry.* A 1961 industrial census showed 19,630 industrial establishments employing 85,655 people earning nearly 52m. colones; total product was valued at 813m. colones; 17,120 commercial concerns had 43,483 employees earning 23m. colones. In 1960 the value (in 1,000 colones) of production in main industries was: Food and drink, 28,932; alcoholic drinks, 17,930; textiles and clothing, 29,272; cement and its products, 8,086; sundry (including soap, vegetable oils, cigarettes, hemp, tanned goods and alcohol), 44,953; total, 129,173.

*Electricity.* El Salvador's biggest national enterprise, begun in 1950, is the construction of a 200-ft high dam across the (unnavigable) Lempa River, 35 miles north-east of San Salvador, designed to double the country's electric-power resources, from 31,000 to 75,000 kw. The expanded power plant was inaugurated 21 June 1954. Consumption, 1960, was 94,539m. kwh.

**Labour.** A decree of Aug. 1950 permits the formation of trade unions except among agricultural workers and those engaged in seasonal work such as coffee-milling and sugar-refining; trade-union posts must be filled by natives, not foreigners.

**COMMERCE.** The imports (including parcels post) and exports have been as follows in calendar years in 1,000 colones (2·5 colones = US$):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports . . | 248,842 | 306,007 | 271,770 | 311,986 | 377,200 |
| Exports . . | 283,432 | 291,981 | 297,746 | 340,750 | 383,300 |

Of total exports, coffee furnishes about 50% by weight and 75% by value. Cotton is the second most important export. A US sugar quota recently granted was raised from 10,000 to 10,373 tons for the year 1963.

In 1962 US took 115·1m. colones of exports and furnished 113·8m. colones of the imports. The chief imports are normally wheat, flour, fuel-oil, cement, fertilizers, machinery, vehicles and iron and steel manufactures. Germany, Japan, the Netherlands and the UK are also important trading partners.

Total trade between El Salvador and UK (British Board of Trade returns) for 5 years (in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . . | 807,790 | 246,920 | 47,988 | 105,684 | 30,320 |
| Exports from UK . . | 1,221,290 | 1,492,407 | 1,267,197 | 1,513,538 | 1,782,593 |
| Re-exports from UK . | 8,078 | 11,141 | 5,142 | 4,936 | 4,531 |

**COMMUNICATIONS.** *Shipping.* The principal ports are La Unión, La Libertad and Acajutla, all on the Pacific. Passengers (and some freight) use the Guatemalan port of Puerto Barrios on the Atlantic, reaching El Salvador by rail.

*Railways.* A railway connects the port of Acajutla with Santa Ana, Sonsonate and San Salvador, the capital. It links San Salvador with the American-owned International Railways of Central America, which runs from the eastern to the western boundary of El Salvador, and extends into Guatemala City and Puerto Barrios on the north coast and on the Mexican border. Total length of railway open, about 469 miles, all of narrow gauge.

The railway was built and owned by British interests, but the government took it over and assumed responsibility for its liabilities on 12 Oct. 1962.

*Roads.* There are 7,950 km of national roads in the republic, including 2,682 km suitable for motors, 1,712 km adequate in any weather and 4,374 km of secondary roads. Motor vehicles registered, 1960, 29,644.

*Post.* The telephone and telegraph systems are government-owned; the radio-telephone systems are partly private, partly government-owned. Telephone instruments, 1963, numbered 20,000; 50% are automatic. Two radio transmitting and receiving stations at San Salvador maintain communications with Latin America. El Salvador had, 1957, about 42,686 wireless receiving sets.

*Aviation.* Air traffic, mainly in American hands, is expanding; in 1958 the 6,361 scheduled flights carried 67,707 passengers and 4,581 metric tons of freight. There is a modern airport at Ilopango, near San Salvador, with a lake nearby used by hydroplanes.

**MONEY.** The monetary unit is the *colón* of 100 centavos (*see* p. 19). Its exchange value since July 1934 had been kept at 40 cents US, and on 30 June 1942 the bank's gold stock was revalued, making it exactly equal to the exchange value of 40 cents. The country left the gold standard on 9 Oct. 1931, but until 20 April 1961 there was no control of foreign exchange, not even import licences. The Central Reserve Bank of El Salvador was nationalized on this date by the Military Civic Directory (Decree No. 116), which restricts the transfer of capital abroad. The buying selling rate for the £ is 6 $\frac{15}{16}$ and 7 $\frac{3}{16}$ colones respectively.

The colón is issued in denominations of 1, 2, 5, 10, 25 and 100 colones; 25 and 50 centavos (silver); 1, 5, 10 and 25 centavos (copper–nickel and copper–zinc). US silver 10-cent pieces circulate with the same value as the 25-centavo silver coin.

National gold coins and gold coins of US of all denominations are unlimited legal tender. National and US silver coins are legal tender up to 10% of each payment (except the US 10-cent piece, withdrawn in Dec. 1954), and national nickel coins in amounts up to 2% of each payment.

**BANKING.** There are 8 native commercial banks, including the Banco Salvadoreño (paid-up capital, 6m. colones). The Bank of London and Montreal is the only foreign institution. The Central Reserve Bank of El Salvador was constructed in 1934 out of the Banco Agrícola Comercial. The Central Bank's gold stock increased steadily from US$6·6m. in 1937 to $29·44m. in Oct. 1952; on 31 Dec. 1957 it was $31m. Bank deposits, both term and sight, were 266m. colones in June 1963; 78% of such are said to provide credits for arable and livestock farming and industry. Total gold and dollar reserves of the banking system on 31 March 1963 were: Gold and foreign exchange, 123·7m. colones compared with 95m. in March 1962. A stock exchange was officially opened in Oct. 1962 with the declared intention of promoting investments in Central America.

**WEIGHTS AND MEASURES.** On 1 Jan. 1886 the metric system was made obligatory. But other units are still commonly in use, of which the principal are as follows: *Libra* = 1·014 lb. av.; *quintal* = 101·4 lb. av.; *arroba* = 25·35 lb. av.; *fanega* = 1·5745 bushels.

# ETHIOPIA

### Yaityopya Nigusa Nagast Manguist

**HISTORY.** The ancient empire of Ethiopia has its legendary origin in the meeting of King Solomon and the Queen of Sheba. Historically, the empire developed in the centuries before and after the birth of Christ, at Aksum in the north, as a result of Semitic immigration from South Arabia. The immigrants imposed their language and culture on a basic Hamitic stock. Ethiopia's subsequent history is one of sporadic expansion southwards and eastwards, checked from the 16th to early 19th centuries by devastating wars with Moslems and Gallas. Modern Ethiopia dates from the reign of the Emperor Theodore (1855–68).

Menelik II (1889–1913) defeated the Italians in 1896 and thereby safeguarded the empire's independence in the scramble for Africa. His successful wars against neighbouring kingdoms (Jimma, Kaffa, Harar, etc.) brought the frontiers of Ethiopia to their present extent.

In 1936 Ethiopia was conquered by the Italians, who were in turn defeated by the Allied forces in 1941 when the Emperor returned.

The former Italian colony of Eritrea, from 1941 under British military administration, was in accordance with a resolution of the General Assembly of the United Nations, dated 2 Dec. 1950, handed over to Ethiopia on 15 Sept. 1952. Eritrea thereby became an autonomous unit within the federation of Ethiopia and Eritrea, under the Ethiopian Crown. (For information on Eritrea in general, *see* THE STATESMAN'S YEAR-BOOK, 1952, p. 1158.)

**GOVERNMENT.** *Emperor.* **Hailé Selassié I,** born 23 July 1892; crowned King (Negus), on 7 Oct. 1928, proclaimed Emperor, after the death of the Empress Zauditu, on 2 April 1930, and crowned on 2 Nov. 1930. He married in 1911 Menen, who died on 15 Feb. 1962. There are a son and a daughter surviving. On 25 Jan. 1931 the eldest son, Asfa Wassan, was proclaimed Crown Prince and heir to the throne. He has one daughter by his first marriage and one son and 3 daughters by his second.

The Empire is governed by a Council of Ministers, responsible to the Emperor, and a parliament consisting of a Senate and a Chamber of Deputies. The Chamber of Deputies consists of 250 members; the number of Senators must not exceed half the number of Deputies.

In 1955 a new constitution was promulgated. This provides for universal suffrage for men and women over 21 years old, for greater fiscal control by the Chamber and for a limited degree of ministerial responsibility to parliament. Elections were held in 1957 and 1961.

On 14 Nov. 1962 the Eritrean assembly passed a resolution, by acclamation, abolishing the Federation; the same day an Imperial order terminated the federal status and constituted Eritrea as an integral part of the unitary Empire.

*Prime Minister:* Tsahafi Tiizaz Aklilou Habte-Wold.

*National flag:* Green, yellow, red (horizontal).

*National anthem:* Ityopya hoy dass yiballish (tune by M. K. Nalbandian, 1925).

**AREA AND POPULATION.** The total area of the Empire is approximately 395,000 sq. miles or 1m. sq. km (Ethiopia 350,000, Eritrea, 45,000).

The official estimate of the population is over 20m.

The most important race of Ethiopia, the Amhara, inhabit the central Ethiopian highlands. To the north of them are the Tigréans, akin to the Amhara and belonging to the same Christian church, but speaking a different, though related, language. Both these races are of mixed Hamitic and Semitic origin, and further mixed by inter-marriage with Galla and other races. The Gallas, some of whom are Christian, some Moslem and some pagan, comprise more than one-half of the entire population, and are a pastoral and agricultural people of Hamitic origin. Ogaden, Issa and other Somalis inhabit Harar province, the Somaliland plateau and the south-east. These and most of the Danakil are Moslem. There are also Sidamo, Nilotic and Nilo-Hamitic tribes in the south-west, and the Falashas (of Jewish religion) north of Lake Tana.

Addis Ababa, the capital, has 450,000 inhabitants, Asmara (capital of Eritrea), 120,000; Dire-Dawa, over 50,000. Other important towns, politically or commercially, are Jimma, Dessie, Gondar and Harar, each with 25,000–35,000 inhabitants.

The country (excluding Eritrea) is divided into 13 provinces (*taqlai-gizat*), each under a Governor-General, under the administrative control of the Minister of the Interior. Each province is divided into about 7 sub-provinces (*awradja-gizat*) under a Governor, 87 in 1962. All revenues collected in the provinces are under the control of the Minister of Finance.

The official languages are Amharic and English.

**RELIGION.** Since the conversion of the Amharas to Christianity in the 4th century they have retained their connexion with the Alexandrian Church through the Abuna, or Metropolitan, who was always an Egyptian Copt, and who was appointed and consecrated by the Coptic Patriarch of Alexandria. Both the Egyptian and Ethiopian Coptic Churches are monophysite, rejecting the degrees of the Council of Chalcedon (A.D. 451). After the restoration of the Emperor relations between the Ethiopian and Egyptian churches were strained until the summer of 1948, when an agreement was reached which envisaged the appointment of an Ethiopian Archbishop, and in Jan. 1951 Abuna Basilios was elected Archbishop of Ethiopia. A further agreement in 1959 made the Ethiopian Church autocephalous, and Basilios assumed the rank of Patriarch, with seniority immediately after the Patriarch of Alexandria. The clergy is very numerous and the Church holds a considerable proportion of the land. Christianity is predominant in the following provinces in the north: Tigré, Begemdir, Gojjam, Shoa. Wollo province in the north-east is half Christian, half Moslem. In the southern half of the country the provinces of Harar and Arussi have Moslem majorities, while all the other southern provinces have considerable Moslem minorities. In addition, the province of Gamu Gofa on the Kenya border and parts of Sidamo and Arussi have considerable pagan elements. Eritrea is half Moslem and half Christian. Each province now forms a diocese; about one-half of the population is Christian.

Islam is widely practised in the south and east of the Empire. Moslem minorities are found in Addis Ababa and in other commercial centres. The rite is mainly shafeitic. Harar is the most important Moslem centre. There are mosques and government schools for Moslems in most towns.

**EDUCATION.** In the academic year 1960–61 there were over 1,000 primary schools and 44 secondary schools providing education for over 250,000 pupils. In addition, there are about 10,000 Ethiopian church schools with an unspecified number of pupils. Eleven of the secondary schools are in Addis Ababa. Higher education is co-ordinated under the Hailé Selassié I University, chartered in 1961. The University College, the Engineering, Building and Theological Colleges are in Addis Ababa, the Agricultural College in Harar and the Public Health College in Gondar. Altogether they provide tuition for over 900 students.

The main language of instruction from the secondary level upwards is English.

*Cinemas* (1962). There were 4 cinemas each in Addis Ababa and Asmara with seating capacities of 3,500 and 4,500 respectively, and about a dozen smaller cinemas in the provinces.

*Newspapers.* In Addis Ababa there are 2 English and 2 Amharic dailies, and in Asmara 2 Italian dailies and one part-Tigrinya, part-Arabic. All the papers are government-controlled and have small circulations varying between 1,000 and 5,000.

**JUSTICE.** The legal system is said to be based on the Justinian Code. A new penal code came into force in 1958. New criminal procedure, civil, commercial and maritime law codes have since been promulgated.

The extraterritorial rights formerly enjoyed by foreigners have been abolished, but any person accused in an Ethiopian court has the right to have his case transferred to the High Court, provided he asks for this before any evidence has been taken in the court of first instance. Under the Anglo-Ethiopian agreement of 1944 any British subject or British protected person whose case is before the High Court can insist on being heard by at least one judge with proven judicial experience in other lands. In 1962 the President of the High Court was Maltese.

Provincial and district courts have been established, and High Court judges visit the Provincial Courts on circuit. The Supreme Imperial Court at Addis Ababa is presided over by the Ethiopian Chief Justice.

**FINANCE.** Ordinary revenue and expenditure for financial years (ended 10 Sept. until 1959, 7 July from 1960) were as follows (in $Eth.1m.):

| | *1958–59* | *1959–60* [2] | *1960–61* [1] | *1961–62* [1] | *1962–63* [1] |
|---|---|---|---|---|---|
| Revenue | 146·0 | 133·1 | 196·8 | 192·8 | 203·4 |
| Expenditure | 148·3 | 137·0 | 190·9 | 197·3 | 209·1 |

[1] Estimate. [2] Ten months only.

**DEFENCE.** *Army.* The Army, trained by British officers from 1947 to 1951, comprises 23 infantry and 4 artillery battalions, an armoured squadron, an airborne rifle battalion and ancillary services. In addition, there is the imperial bodyguard, now part of the Army, comprising 9 infantry battalions. Ethiopian officers are trained at the Military Training College at Holletta, near Addis Ababa, and at the Hailé Selassié Military Academy, Harar, established in 1957 under the direction of Indian officers. An American Military Mission arrived in the country in 1954.

*Navy.* The Imperial Navy, with Norwegian naval officers as instructors, in 1962 consisted of a training ship (1,766 tons; *ex*-US seaplane tender), 2 motor torpedo-boats (*ex*-Yugoslav), 5 patrol boats (*ex*-US coastguard motor boats) and 2 small landing craft. The Naval School has been established at Massawa.

*Air Force.* The Imperial Air Force, trained by Swedish and American personnel, has its headquarters at Debre Zeit, near Addis Ababa. It comprises a training school at Bishoftu, a central workshop at Harar Meda, one day-fighter squadron equipped with F-86 Sabres, 2 light-bomber squadrons with obsolescent Swedish Saab-17s and one transport squadron equipped with C-54s, C-47s and Doves. Training aircraft include 5 T-33 jet advanced trainers and 26 piston-engined Saab-91s.

*Police.* In 1948 the regular police force of the capital and some provincial cities was amalgamated with the irregular territorial forces under the provincial governors-general. The total force now numbers 24,000 officers and other ranks in Ethiopia and 3,850 in Eritrea.

The frontier guard—1,200 men recruited from the 3rd Infantry Division in Harar—has 2 Indian police officers.

**PRODUCTION.** The second 5-year plan (1962–67) envisages a total expenditure of $Eth.1,451m., including 376m. for industrial development.

*Agriculture.* Coffee is by far the most important source of rural income. Harari coffee (long berry Mocha) is cultivated in the east; Abyssinian coffee is produced in Kaffa and the surrounding provinces, much of it growing wild.

Teff (*Eragrastis abyssinica*) is the principal food grain, followed by barley, wheat, maize and durra. Pulses and oilseeds are important for local consumption and export. Cane sugar is an important new crop.

Livestock: 20m. sheep, 20m. cattle, 15m. goats; smaller numbers of donkeys, horses, mules and camels. Hides and skins and butter (ghee) are important for home consumption and export. Sheep and chickens are the main providers of meat. The pig is little known.

*Mining.* Ethiopia has little proved mineral wealth. Salt (160,000 tons in 1958) is produced mainly in Eritrea, while a placer goldmine is worked by the Government at Adola in the south. Gold production, in 1961, was about 47,000 troy oz. Small quantities of other minerals are produced. Deposits of potash salts in the Dankali salt plains in the north-east part of the country are to be worked.

German and American companies have been granted oil-exploration concessions in Ogaden and Eritrea respectively.

*Industry.* The most important products of the small but growing industries are cotton yarn and fabrics, cement, sugar, salt, cigarettes, building materials and footwear. Paper and pharmaceutics plants are being built.

**COMMERCE.** Coffee is by far the most important export, followed by pulses, oilseeds, hides, goat skins, sheep skins. Imports are textiles (mainly from Japan), vehicles, machinery, iron and steel goods, and petroleum products. Coffee exports, 1961, were 51,282 metric tons ($Eth.94·4m.).

Imports and exports (in £1m. sterling) for 5 years (ending 9 Dec.):

| | *1958* | *1959* | *1960* | *1961* |
|---|---|---|---|---|
| Imports . . . | 27·7 | 29·8 | 31·3 | 33·7 |
| Exports . . . | 22·4 | 25·6 | 27·5 | 26·9 |

Total trade between Ethiopia (including Eritrea) and UK (British Board of Trade returns, in £ sterling):

**COMMUNICATIONS.** *Roads.* Loans totalling US$20m. were made in 1950 and 1957 by the International Bank for the purpose of improving and extending the road system. The Imperial Highway Authority now maintains some 6,000 km of roads and is engaged in constructing another 850 km of all-weather roads. Chief motor roads: Massawa–Asmara–Sudan; Asmara–Dessie–Addis Ababa; Asmara–Gondar–Gorgora; Addis Ababa–Jimma; Addis Ababa–Lekemti; Addis Ababa–Nazareth; Dire-Dawa–

Hargeisa; Dessie–Assab; Addis Ababa–Adola. Number of motor vehicles (1962): Cars, 12,893; commercial vehicles, 5,236; buses, 1,199; motor cycles, 655.

*Railways.* The Franco-Ethiopian Railway Co., owned by the 2 governments, operates the line from Djibouti in French Somaliland to Addis Ababa. The line is of metre gauge, with a total length of 486½ miles. Trains run three times weekly in each direction, covering the distance in one night and one day.

The Eritrea railway from Massawa to Asmara and Agordat (191 miles, 95-cm gauge) is owned and operated by the Ethiopian Government.

*Post.* The postal system serves 54 points in the empire, mainly by airmail. All the main centres are connected with Addis Ababa by telephone or radio telegraph. International telephone services are available at certain hours to most countries in Europe, North America and India. Number of telephones (1963), 14,812, of which 9,200 in Addis Ababa and 2,400 in Asmara.

*Aviation.* Ethiopian Air Lines, formed in 1946, operates through a management contract with Trans-World Air Lines; it provides services to Cairo, Athens, Frankfurt, Madrid, Khartoum, Lagos, Accra, Monrovia, Nairobi, Djibout, Aden (from Asmara only), in addition to internal services. Other lines operating to Asmara only are Aden Airways, Misr Air Lines, Sudan Airways, Saudi Arabian Air Lines and Ghana Airways.

**MONEY AND BANKING.** The Ethiopian dollar, divided into 100 cents is the unit of currency; it is based on 5·52 grains of fine gold. It consists of notes of $1, 5, 10, 20, 50, 100 and 500 denominations; a silver 50 cents (being withdrawn) and bronze 1-, 5-, 10- and 25-cent coins. Currency is issued by the State Bank, and, as at 31 Dec. 1962, was notes, $Eth.156m.; coins, $Eth.41m. The note issue was backed by the following securities: Gold and silver, 8%; foreign securities and balances abroad, 34%; Ethiopian treasury bills, 58%. The Ethiopian dollar = 40 cents US; $Eth.7 = £1 sterling.

The State Bank is the only institution permitted to deal in foreign exchange. Its total assets (excluding Issue Department) at 31 Dec. 1962 were $Eth. 262m. It was renamed the National Bank of Ethiopia in Oct. 1963, when its commercial activities were transferred to the newly established Commercial Bank of Ethiopia. At the same time another new bank, the Investment Bank of Ethiopia was set up with a capital of $Eth.10m., of which the government holds the majority of shares.

Two Italian banks have branches in Asmara; 2 French and an Italian bank are represented in Addis Ababa.

**WEIGHTS AND MEASURES.** The metric system of weights and measures is officially in use. Native weights and measures vary considerably in the various provinces; the principal ones are: *Frasilla* = approximately 37½ lb.; *gasha*, the principal unit of land measure, which is normally about 100 acres but can vary between 80 and 300 acres, depending on the quality of the land.

# FINLAND

SUOMEN TASAVALTA—REPUBLIKEN FINLAND

**CONSTITUTION AND GOVERNMENT.** Finland is a republic according to the Form of Government Act of 17 July 1919.

Parliament consists of one Chamber of 200 members chosen by direct and proportional election, in which all who are entitled to vote have an equal vote. Every Finnish citizen (man or woman) who has reached the 21st year is entitled to vote. There are 16 electoral districts with a representation proportioned to the population, which is adjusted in the year preceding an election. Each district is divided into voting circuits. The voting system, devised with a view to proportional representation, provides for the formation of voters' associations which prepare lists of candidates. There may, within limits, be compacts between associations, and joint candidates may be entered in competing lists, while any voter may either support an association list or vote for any individual candidate. Every citizen entitled to vote is eligible for Parliament, which is elected for 4 years.

The President is elected for 6 years by an electoral college elected by the votes of the citizens. The Council of State (Cabinet), appointed by the President, must enjoy the confidence of Parliament.

At the elections held on 4–5 Feb. 1962 the following parties were returned: Agrarians, 53; Democratic League (Communists), 47; Social-Democrats, 38; National Coalition Party (Conservatives), 33; Swedish People's Party, 14; Finnish People's Party, 13; Social Democratic League, 2.

*President of Finland:* Dr Urho Kekkonen (elected 15 Feb. 1956; re-elected 15 Feb. 1962); he received 199 votes out of 300 in 1962.

On 18 Dec. 1963 the following non-party Cabinet was appointed:

*Prime Minister:* R. R. Lehto. *Deputy Prime Minister:* A. Nuorvala. *Foreign Affairs:* J. Hallama. *Justice:* H. O. Merimaa. *Interior:* A. V. G. Hannus. *Defence:* K. O. Leinonen. *Finance:* E. J. Rekola. *Education:* R. H. Oittinen. *Agriculture:* M. A. Nirskala. *Trade and Industry:* O. J. Mattila. *Social Affairs:* O. E. Ojala.

*National flag:* Blue cross on white.

*National anthem:* Maamme; Swedish: Vårt land (words by J. L. Runeberg, 1843; tune by F. Pacius, 1848).

Finnish and Swedish are the official languages of Finland.

LOCAL GOVERNMENT. For administrative purposes Finland is divided into 12 counties. The provincial administration is entrusted in each of the counties to a governor, who is appointed by the President. The unit of local government is the commune. Each rural parish and each town forms a commune in which all men and all women of 21 years of age are voters. In all communes a communal council is elected to decide questions of administration and local economy. The executive power is vested in rural communes in a college formed by the head of the commune and 4 or more aldermen elected by the council. In towns the executive authority is the town board, with an appointed official as president and 4 or more members elected by the council. There were, in 1963, 44 towns, 24 market towns and 480 rural communes in Finland. As executive officers of the governors there are the sheriffs of 252 districts.

The autonomous county of Åland has a county council (*landsting*) of one chamber which is elected on the basis of the same suffrage as the Parliament. The county council settles the internal affairs of the county. The executive authority is with the governor and an executive council, of which the *lantråd* is chairman.

[1] Excluding water area, which amounts to an additional 31,613 sq. km (inland waters only).

Of the total on 31 Dec. 1960, 2,142,263 were males and 2,303,959 females; 4,108,269 spoke Finnish, 330,538 Swedish, 2,752 Russian, 1,312 Lapp and 7,415 other languages.

On 30 Nov. 1939 Soviet troops invaded Finland, after Finland had rejected territorial concessions demanded by the USSR. These, however, had to be made in the peace treaty of 12 March 1940, amounting to 32,806 sq. km and including the Carelian Isthmus, Viipuri and the shores of Lake Ladoga.

When on 22 June 1941 the Germans launched their attack on Russia, the Finnish Army co-operated with the Germans. On 19 Sept. 1944 an armistice was signed in Moscow between Finland and the USSR. Finland agreed to cede to Russia the Petsamo area in addition to the cessions made in 1940 (total, 42,934 sq. km) and to lease to Russia for 50 years the Porkkala headland, with a considerable stretch of sea and land, to be used as a military base. (*See* map in THE STATESMAN'S YEAR-BOOK, 1945.) Further, Finland undertook to pay 300m. gold dollars in reparations within 6 years (later extended to 8 years). The peace treaty was signed in Paris on 10 Feb. 1947. The payment of reparations was completed on 19 Sept. 1952. The military base of Porkkala was returned to Finland on 26 Jan. 1956.

An agreement of friendship, non-aggression and mutual assistance between Finland and the USSR was concluded in Moscow on 6 April 1948 for 10 years and extended on 19 Sept. 1955 to cover a period of 20 years.

The growth of the population, which was 421,500 in 1750, is shown as follows:

# THE FRENCH COMMUNITY

## LA COMMUNAUTÉ

THE Constitution of the Fifth Republic 'offers to the oversea territories which manifest their will to adhere to it new institutions based on the common ideal of liberty, equality and fraternity and conceived with a view to their democratic evolution'. The territories were offered 3 solutions: they may keep their status; they may become oversea *départements*; they may become, singly or in groups, member states of the Community (Art. 76).

According to the amendment of the Constitution adopted on 4 June 1960, member-states of the Community may become independent and sovereign republics without ceasing to belong to the Community. The 12 African and Malagasy members availed themselves of this *loi constitutionnelle* and became independent by the transfer of 'common powers' (*compétences communes*).

The territorial structure of the Community and affiliated states is the following (Feb. 1964):

## I. *FRENCH REPUBLIC*

A. *Metropolitan Departments*

## République Française

**CONSTITUTION AND GOVERNMENT.** The constitution of the Fifth Republic, superseding that of 1946, came into force on 4 Oct. 1958.

A referendum held in the French Republic and the oversea departments and territories on 28 Sept. 1958 approved the constitution drawn up by a committee which General de Gaulle had appointed in June. Apart from French Guinea, which voted over 90% against the constitution and for independence, the final result for metropolitan France, Algeria, the oversea departments and territories, and from French citizens living abroad or in trusteeship territories was as follows: Electorate, 45,840,642; voters, 36,893,979; valid votes, 36,486,251; Yes, 31,066,502; No, 5,419,749.

The Constitution consists of a preamble, dealing with the Rights of Man, and 92 articles. Emphasis is placed on the rôle of the President of the Republic. 'He sees that the Constitution is respected; he ensures, through his arbitration, the regular functioning of public powers as well as the continuity of the state. He is the guarantor of national independence' (Art. 5). He nominates and dismisses the Prime Minister and the other members of the government (Art. 8). He can dissolve the National Assembly after consultation with the Prime Minister and the presidents of the assemblies (Art. 12). He appoints to all military and civil offices of the Republic (Art. 13). 'When the institutions of the Republic, the independence of the Nation, the integrity of its territory or the fulfilment of its international commitments are threatened with immediate and grave danger, and when the regular functioning of constitutional public powers is interrupted, the President of the Republic takes the measures demanded by the circumstances, after official consultation with the Prime Minister, the presidents of the assemblies and the Constitutional Council' (Art. 16).

The President of the Republic is chosen by an electoral college which consists of the members of Parliament, the members of the general councils and of the assemblies of the oversea territories, as well as the elected representatives of the municipal councils and the delegates of the member states of the Community (Art. 6). His term of office is 7 years.

'The government determines and conducts the policy of the nation' (Art. 20); 'the government may ask parliament for authority to take, by decrees and within a limited period, such measures as are normally within the province of the law' (Art. 38). Ministers must not be members of parliament (Art. 23). Votes of censure can only be carried by a majority of the members constituting the Assembly (Art. 49). The 2 ordinary sessions in autumn and spring are curtailed to a total of 5 months (Art. 28).

The 'Council of the Republic' has been re-named 'Senate'.

The 'Economic Council' has been re-named 'Economic and Social Council'.

The 'Constitutional Council' has to uphold the fairness of the elections and to act as a guardian of the constitution. It is composed of 9 members, 3 of whom are nominated by the President of the Republic, 3 by the President of the National Assembly and 3 by the President of the Senate. In addition, past Presidents of the Republic are, by right, members of the Constitutional Council (Art. 56).

*National flag:* Blue, white, red (vertical).

*National anthem:* La Marseillaise (words and tune by C. Rouget de Lisle, 1792).

The Senate is composed of 255 members representing Metropolitan Departments, 7 Overseas Departments, 5 Oversea Territories, 6 Frenchmen residing outside France.

The elections for the National Assembly took place on 18 and 25 Nov. 1962. State of parties: Union pour la Nouvelle République (Gaullists), 234; Mouvement Républicain Populaire, 38; Radicals, 44; Independent Republicans, 32; Socialists, 67; Left-wing Socialists, 5; Communists, 41; independents, 19.

*President of the Republic:* Gen. Charles de Gaulle; elected on 21 Dec. 1958 by 62,394 votes against 10,355 for the Communist candidate and 6,721 for a left-wing Radical.

On 3 Feb. 1960, the Chambers approved a bill giving the Government special powers for one year over a wide field of legislation.

The Cabinet, appointed on 6 Dec. 1962, is composed as follows:

*Prime Minister:* Georges Pompidou.

LOCAL GOVERNMENT. For administrative purposes metropolitan France is divided into 90 departments. As from 1 Jan. 1947 the former colonies of Martinique, Guadeloupe, Réunion and Guyane have been given the status of overseas departments.

Algeria was proclaimed independent by Gen. de Gaulle, after a referendum on 1 July 1962 had approved the end of French rule, by 5,975,581 votes against 16,534 (with 25,565 papers spoilt).

The unit of local government is the *commune*, the size and population of which vary very much. There were, in 1962, in the 90 metropolitan departments, 37,962 communes. Most of them (33,730) had less than 1,500 inhabitants, and 23,963 had even less than 500; while 282 communes had more than 20,000 inhabitants. The local affairs of the commune are under a Municipal Council, composed of from 10 to 36 members, elected by universa suffrage, and by the *scrutin de liste* for 6 years by Frenchmen of 21 years o over after 6 months' residence.

Each Municipal Council elects a mayor, who is both the representative of the commune and the agent of the central government. He is the head of the local police and, with his assistants, acts under the orders of the prefect.

In Paris the Municipal Council is composed of 90 members. The 20 *arrondissements* into which the city is subdivided have been grouped in 9 sectors, each of which has its own mayor.

The next unit is the *canton* (3,052 in 1962), which is composed of an average of 12 communes, although some of the largest communes are, on the contrary, divided into several cantons.

The district, or *arrondissement* (313 in 1962), has an elected *conseil d'arrondissement*, with as many members as there were cantons, its chief function being to allot among the communes their respective parts in the direct taxes assigned to each *arrondissement* by the Council General.

*Occupational structure* (census 1962). Out of an economically active population of 18,956,320 persons (18,847,523 in 1954), there are 3,897,960 engaged in fishing and agriculture (5,194,919 in 1954); 311,560 in mining and quarrying (373,303 in 1954); 1,657,320 in building and public works

(1,389,832 in 1954); 5,354,900 in other manufacturing industries (5,103,865 in 1954); 796,980 in transportation (775,378 in 1954); 2,950,620 in business, banking and insurance (2,681,171 in 1954); 1,908,960 in services (1,708,340 in 1954); 2,078,020 in public services, administration and armed forces (1,620,715 in 1954).

**RELIGION.** No religion is officially recognized by the state. Under the law promulgated on 9 Dec. 1905, which separated Church and State, the adherents of all creeds are authorized to form associations for public worship (*associations culturelles*). The law of 2 Jan. 1907 provided that, failing *associations culturelles*, the buildings for public worship, together with their furniture, would continue at the disposition of the ministers of religion and the worshippers for the exercise of their religion; but, in each case, there was required an administrative act drawn up by the *préfet* as regards buildings belonging to the state or the departments, and by the *maire* as regards buildings belonging to the communes.

There are 17 archbishops and 68 bishops of the Roman Catholic Church, with 51,000 clergy of various grades. The Protestants of the Augsburg confession are, in their religious affairs, governed by a General Consistory, while the Reformed Church is under a Council of Administration, the seat of which is in Paris. In 1962 communicant Protestants numbered 722,453.

**EDUCATION.** The primary, secondary and higher state schools constitute the 'Université de France'. The Supreme Council of 52 members has deliberative, administrative and judiciary functions, and a Consultative Committee advise respecting the working of the school system, but the inspectors-general are in direct communication with the Minister. For local education administration France is divided into 17 academic areas, each of which has an Academic Council whose members include a certain number elected by the professors or teachers. The Academic Council deals with all grades of education. Each is under a Rector, and each is provided with academy inspectors, 1 for each department except Nord, which has 2 (1 being for elementary education), and Seine, which has 8 (1 being director of elementary education), besides inspectors of elementary schools, usually 1 for each *arrondissement*, 20 inspectors (male or female) for the department of the Seine.

By decree of 6 Jan. 1959 the whole system of public instruction has been reorganized and the structure of the Ministry of National Education has consequently been modified. The educational stages are as follows:

1. Non-compulsory pre-school instruction for children aged 2–5, to be given in infant schools or infant classes attached to primary schools.
2. Compulsory elementary instruction for children aged 6–11, to be given in primary schools and certain classes of the *lycées classiques et modernes*. It consists of 3 courses: preparatory (1 year), elementary (2 years), intermediary (2 years). Physically or mentally handicapped children are cared for in special institutions or special classes of primary schools.
3. The 'observation stage' (*cycle d'observation*) for children aged 11–13. It forms part of the ordinary curriculum of all secondary schools and is

designed to find out which type of education will suit best the aptitudes and inclinations of the pupils.

4. Five types of schools are open to pupils aged 13–18:

(*a*) a 3-year '*terminal*' course, completing the general education and providing vocational training for agriculture, commerce, industry, etc.

(*b*) a 3-year '*général court*' course, preparing the students for non-technical professions and teachers' training colleges.

(*c*) a 5-year '*général long*' course, with 3 optional streams—classical, modern, technical—provided by the *lycées classiques et modernes* and the *lycées techniques*, and concluded by the *baccalauréat.*

(*d*) a 3-year '*professionnel court*' course, provided by the *collèges d'enseignement technique.*

(*e*) a 4- or 5-year '*professionnel long*' course, provided by the *lycées techniques* or by the technical sections of the other secondary schools.

The names of the various types of schools have been changed as follows: *lycées* and *collèges*, now *lycées classiques et modernes*; *école nationale professionnelle*, now *lycée technique d'Etat*; *collèges techniques*, now *lycées nationaux et municipaux techniques*; *centre d'apprentissage*, now *collège d'enseignement technique*; *cours complémentaire*, now *collège d'enseignement général.*

*Higher Instruction* is supplied by the State in the universities and in special schools, and by private individuals in the free faculties and schools. The law of 12 July 1875 provided for higher education free of charge. This law was modified by that of 18 March 1880, which granted the state faculties the exclusive right to confer degrees. A degree of 28 Dec. 1885 created a general council of the faculties, and the creation of universities, each consisting of several faculties, was accomplished in 1897, in virtue of the law of 10 July 1896.

The faculties are of four kinds: 16 faculties of law (Paris, Aix, Amiens, Bordeaux, Caen, Dijon, Grenoble, Lille. Lyon, Montpellier, Nancy, Poitiers, Rennes, Strasbourg, Toulouse, Alger); 4 faculties of medicine and 4 of pharmacy (Paris, Montpellier, Nancy, Strasbourg); 9 mixed faculties of medicine and pharmacy (Bordeaux, Clermont, Lille, Lyon, Marseille, Nantes, Rennes, Toulouse, Alger); 17 faculties of science (Paris, Besançon, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Marseille, Montpellier, Nancy, Poitiers, Rennes, Strasbourg, Toulouse, Alger); 17 faculties of letters (in the towns last named except for Aix instead of Marseille); 15 at the universities of Bordeaux, Grenoble, Toulouse, Strasbourg, Lyon and elsewhere. One of the major functions of all these institutions in the preparation of entrants for the École Nationale d'Administration in Paris, which, under the supervision of the President of the Council of Ministers, trains the superior civil and foreign services.

The following table shows the year of foundation and the total number of students of the universities in 1961–62:

The other higher institutions under the Ministry of Public Instruction are the Collège de France (founded by Francis I in 1530), which has courses of study bearing on various subjects (literature and language, archæology, mathematical, natural science, psychology and social science, political economy, etc.); the Museum of Natural History, giving instruction in science and natural history; the École Pratique des Hautes Études (history and philology, mathematical and physico-chemical sciences, natural science and theology), having its seat at the Sorbonne; the École Normale Supérieure, which prepares teachers for secondary education and, since 1904, follows the curricula of the Sorbonne without special teachers of its own; the École des Chartes, which trains archivists and paleographers; the École des Langues

Orientales vivantes; the École du Louvre, devoted to art and archæology; the École des Beaux-Arts, and the Bureau des Longitudes, the central meteorological bureau; the Observatoire de Paris; and the French Schools at Athens, Rome, Cairo and Indo-China.

Outside Paris there are 12 observatories (Meudon, Besançon, Bordeaux, etc.). The observatory at Nice belongs to the University of Paris.

There are free faculties in Paris (the Catholic Institute of Paris comprising theology, law and advanced scientific and literary studies); Angers (theology, law, science, letters and agriculture); Lille (theology, law, medicine and pharmacy, science, letters, social science and politics); Lyon (theology, law, science and letters); Marseille (law); Toulouse (the Catholic Institute with theological, literary and scientific instruction).

*Professional and Technical Instruction.* The principal institutions of higher or technical instruction dependent on other ministries are: The Conservatoire des Arts et Métiers at Paris (with 20 evening courses on the applied sciences and social economy), the École Centrale des Arts et Manufactures (847 students in 1960–61), the École des Hautes Études Commerciales (1,246 students), 14 higher schools of commerce (3,042 pupils), under the Ministry of Public Instruction; the National Agronomic Institute at Paris, the veterinary school at Maisons-Alfort, a school of forestry at Nancy, the higher school of colonial agriculture, national agricultural schools at Grignon, Rennes, Montpellier, 44 schools of agriculture, etc., under the Ministry of Agriculture; the École Supérieure de Guerre, the École Polytechnique, the military school at Coëtquidan (formerly St Cyr), the École d'Artillerie at Fontainebleau, the École de Cavalerie at Saumur and other schools under the Ministry of War; the Naval School at Brest under the Ministry of Marine; the School of Mines at Paris, the School of Civil Engineering at Paris, the School of Mines at St Etienne and the Schools of Miners at Alès and Douai; with other schools under the Ministry of Public Works; the École des Beaux Arts, the École Nationale des Arts Décoratifs and the Conservatoire de Musique et de Déclamation under the Department of Fine Arts, which is attached to the Ministry of Public Instruction. The municipal school of Industrial Physics and Chemistry is under the City of Paris. In the provinces there are national schools of fine arts, and schools of music, and several municipal schools, as well as free subventional schools, etc.

*Cinemas* (1961). There were 5,806 cinemas with a seating capacity of 2,785,400.

*Newspapers* (1961). There were 12 daily newspapers in Paris with a combined circulation of 4,159,000 (*France-soir* having 1,341,000); and 9 newspapers in the provinces with a circulation of more than 200,000 each and 11 with a circulation of between 100,000 and 200,000. The combined daily circulation of the 183 daily papers was 12·3m.

**HEALTH.** At the end of 1961 there were 50,529 physicians, 20,235 pharmacists and 16,410 dentists practising. There were 1,883 public hospitals (380,107 beds), 2,739 private hospitals (77,000 beds), 103 mental hospitals (93,000 beds) and 141 maternity homes (4,089 beds).

**SOCIAL WELFARE.** An order of 4 Oct. 1945 laid down the framework of a comprehensive plan of Social Security and created a single organization which superseded the various laws relating to social insurance, workmen's compensation, health insurance, family allowances, etc.

*Social Insurance.* Insured persons are all wage-earners without regard to the amount of their wages or remuneration. However, in the case of yearly salaries exceeding 11,400 new francs, deductions for social insurance are made only in respect to that amount (from 1 Jan. 1964).

Health insurance, which formerly applied only to the insured persons, their spouses and children under 16 years of age, has been extended to children from 16 to 17, if apprenticed, to children from 17 to 20, if pursuing studies, to ascendants and descendants and other relatives who may be attending to household duties or the upbringing of children.

Sickness benefits in kind are supplied without time-limit, benefits in cash may be given for 3 years. Special financial allowances, up to 1 year after these 3 years, are made when vocational re-education or re-adaptation are necessary. The monthly allowance of an insured person is equivalent to half his salary, or two-thirds if he has 3 or more children.

Insurance for invalids has been determined by dividing invalids into 3 categories: (1) those who are capable of working; (2) those who cannot work; (3) those who, in addition, are in need of the help of another person. According to the category, the pension rate varies from 30 to 60% of the average salary for the last 10 years, with a minimum allowance of 3,175·55 new francs per year applicable in Paris for the third category.

*Unemployment benefits* vary according to circumstances (full or partial unemployment), place of work and means test. In Paris full unemployment benefit amounts to 4·80 new francs per day for the head of the family and 2·05 new francs for the spouse or a dependent person.

A collective agreement signed on 31 Dec. 1958 between the national council of employers and certain trade unions has established a system of special allowances for unemployed workers in industry and trade. The costs are shared by employers (0·20%) and employees (0·05%) and the benefits amount to 35% of the wages for 9 months; to be extended for workers of old age and long employment. The system is administered by commissions composed of representatives of employers and employees in equal proportion.

*Family Allowances.* The system comprises: (*a*) Family allowances proper, equivalent to 22% of the basic monthly salary (234 new francs in Paris) for 2 dependent children, and 33% for the third and each subsequent child; a special compensation of 981 francs per month for 2 dependent children, and 1,509 for the third and each subsequent child; a supplement equivalent to 5% of the basic monthly salary for the second and each subsequent dependent child more than 10 years old. (*b*) Single wage-earner allowance (when the wife does not work), according to the number of dependent children. (*c*) Housewife allowance (when a farmer's wife does not work), according to the number of dependent children (at least 3). (*d*) Prenatal allowances of 9 monthly payments. (*e*) Maternity allowances, equivalent to twice the basic monthly salary for the first birth and four-thirds for each subsequent birth (under certain conditions relating to the mother's age and the interval of births).

*Workmen's Compensation.* The law passed by the National Assembly on 5 Oct. 1946 supersedes the Act of 9 April 1898. It is administered by the Social Security Funds, *i.e.*, the insured persons themselves. The Funds can invite employers to take preventive measures, ensure their application by inspectors from the Ministry of Labour and impose fines on employers who fail to comply. They can also grant loans to employers who carry out the required improvements. The law also fixes the conditions in which the victims of accidents or occupational diseases will enjoy free medical attention by a doctor of their own choice, functional re-adaptation, professional re-education and financial compensation.

A law promulgated on 11 Oct. 1946 has created a medical labour service of doctors who will have to hold a diploma of 'industrial health specialists'. These doctors will be entrusted with the control of hygiene and health matters in all industrial undertakings or groups of undertakings. In addition, it will be the duty of this medical service to examine wage-earners when they are engaged, to carry out periodical medical examinations and to ensure the application of the existing rules relating to safety in work.

*Old-age Pensions* for workers were introduced in 1941. They are financed out of the contributions made to the Social Security organization by employers and employees.

As from 1 April 1947 the aged whose resources are insufficient are entitled to an extra allowance. Among the new beneficiaries of the old-age pension scheme are included the mass of agricultural workers, craftsmen, small business men and the liberal professions.

A supplementary allowance has been provided by the law of 30 June 1956 which established a *Fonds National de Solidarité*. It is dependent on a means test and amounts to an annual maximum of 520 new francs.

Complementary retirement allowances have been made permissible by decree of 4 Feb. 1959.

**JUSTICE.** The French judicial system has been reorganized by a number of ordinances and decrees dated 22 Dec. 1958.

Before this reform, the lowest courts were those of the Justices of Peace (*juges de paix*), 1 in each *canton*, who tried less important civil cases. The Tribunals of First Instance (*Tribunaux de Première Instance* or *Tribunaux Civils*), 1 in each *arrondissement*, dealt with more important civil cases and served as Tribunals of Appeal for the Justices of Peace, when their decisions were susceptible of appeal.

Since 2 March 1959, 455 *tribunaux d'instance*, under a single judge each and with increased material and territorial jurisdiction, have replaced the cantonal justices of the peace; and 172 collegiate *tribunaux de grande instance* have taken the place of the 351 *tribunaux de première instance*.

All petty offences (*contraventions*) are disposed of in the Police Courts (*Tribunaux de Police*) presided over by the *Juge d'Instance*. The Correctional Courts pronounce upon all graver offences (*délits*), including cases involving imprisonment up to 5 years. They have no jury. and consist of 3 judges who administer both criminal and civil justice. In all cases of a *délit* or a *crime* the preliminary inquiry is made in secrecy by an examining magistrate (*juge d'instruction*), who either dismisses the case or sends it for trial before a court where a public prosecutor (*Procureur*) endeavours to prove the charge.

The Conciliation Boards (*Conseils des Prud'hommes*) composed of an equal number of employers and employees deal with small trade and industrial disputes. Commercial litigation goes to the Commercial Courts (*Tribunaux de Commerce*) composed of tradesmen and manufacturers elected for 2 years.

When the decisions of any of these Tribunals are susceptible of appeal, the cases go to the Courts of Appeal (*Cours d'Appel*). There are 27 Courts of Appeal, composed each of a president and a variable number of members.

The Courts of Assizes (*Cours d'Assises*), composed each of a president, assisted by 2 other magistrates who are members of the Courts of Appeal, and by a jury of 9 people, sit in every *département*, when called upon to try very important criminal cases. The decisions of the Courts of Appeal and the Courts of Assizes are final; however, the Court of Cassation (*Cour de Cassation*) has discretion to verify if the law had been correctly interpreted and if the rules of procedure have been followed exactly. The Court of Cassation may annul any judgment, and the cases have to be tried again by a Court of Appeal or a Court of Assizes.

A State Security Court has been established by 2 laws dated 15 Jan. 1963. It is usually composed of 3 civilian judges, including the president, and 2 judges of general or field officer rank, and has jurisdiction to deal with subversion in peace-time.

The French penal institutions have been reorganized by the procedural code which came into force on 2 March 1959. They consist of: (1) *maisons d'arrêt* and *de correction*, where persons awaiting trial as well as those condemned to short periods of imprisonment are kept; (2) central prisons (*maisons centrales*) for those sentenced to long imprisonment; (3) special establishments, namely (*a*) schools for young adults, (*b*) hostels for old and disabled offenders, (*c*) hospitals for the sick and psychopaths, (*d*) institutions for recidivists. Special attention is being paid to classified treatment and the rehabilitation and vocational re-education of prisoners, including work in open-air and semi-free establishments.

Juvenile delinquents go before special judges and courts; they are sent to public or private institutions of supervision and re-education.

The population at 1 Jan. 1963 of all penal establishments was 27,269 men and 1,135 women.

**DEFENCE.** The President of the Republic exercises command over the Armed Forces. He is assisted by the research organization of the High Council of Defence (*Conseil Supérieur de la Défense*) and two Committees (*Comité de Défense* and *Comité de Défense restreint*) which formulate directives. The Prime Minister is responsible for the national defence; he exercises his military responsibilities through the General Secretariat of National Defence (SGDN). Under the Prime Minister's authority, the *Comité d'Action Scientifique de Défense* co-ordinates research.

Army, Navy and Air Force are under the authority of the Minister of the Armed Forces, who is assisted by the Chiefs of the Armed Forces General Staff and of the General Staff of the 3 services and the overseas forces, and by a ministerial delegate for armament (construction, production, research).

In 1962 the Armed Forces were reorganized in 3 groups: (1) nuclear strategic force; (2) operational forces; (3) home defence forces.

(1) Completely independent, but may possibly be used within the framework of NATO.

(2) Comprises Army, Navy and Air Force units, namely: (*a*) 5 mechanized divisions and 1 airborne division stationed in Germany under NATO command; national reserves in metropolitan France; troops, chiefly marines, stationed overseas and organized in 4 zones and 3 inter-service high commands; (*b*) a highly mobile naval force based on aircraft carriers, with frigates, escorts, amphibious assault craft, etc.; (*c*) tactical aircraft (Mirage III), helicopters (Frelon), transports (Transall), etc.

(3) Organized in 6 zones, 10 regions and 90 subdivisions, with close co-ordination of the civil and military authorities; also comprising all 3 services.

By 1970, the effective peace-time strength is to be: Army, 440,000; Navy, 84,000; Air Force, 140,000.

ARMY. The Army consists of regular officers and n c.o.s, long-term n.c.o.s and soldiers, and conscripts serving 18 months.

The peace-time units comprise infantry, armoured troops and cavalry, artillery, engineers, pioneers, transport, supply and naval infantry and artillery. In addition, there are the Foreign Legion, mountain and airborne troops and other specialized units.

The *Gendarmerie* is an integral part of the army but also co-operates with the civil administration in maintaining public order.

On 1 Oct. 1963, the effective strength of the Army was 750,000 all ranks, including 64,000 gendarmes.

Higher military instruction is provided in 3 stages: the staff school (*École d'État-major*) for officers of formation staffs; the *École Supérieure de Guerre* for officers destined for the higher command; the *Institut des Hautes Études de Défense Nationale* where high-ranking officers and civilians study together the problems of national defence.

*Army Aviation.* Formed in 1952, the *Aviation Légère de l'Armée de Terre* (ALAT) is a well-equipped force, with more than 600 light aeroplanes and nearly 300 helicopters for observation, reconnaissance, combat area transport, liaison and supply duties.

NAVY. The Navy is under the supreme direction of the Minister of Defence, being administered by the Chief and Deputy Chiefs of Naval Staff.

All naval aircraft and coastal defences are under the control of the Navy, and have been reorganized in 3 coast 'naval frontier' districts (with headquarters in Cherbourg, Brest and Toulon), in relation to the aircraft attached to the active fleet.

The French Navy is manned partly by conscription but mainly by voluntary enlistment. In 1963 the active personnel was 77,000 officers and men.

The following is a summary of the strength of the fleet at the periods shown:

There are also 18 destroyers of 2,750 tons, 37 escorts (frigates) of 1,000 to 2,172 tons (including 7 formerly rated as destroyer escorts, 1 rated as a sloop and 2 rated as surveying vessels), 5 corvettes, 21 submarines, 101 minesweepers (15 ocean, 71 coastal and 15 inshore), 5 surveying vessels, 16 patrol vessels, 28 motor launches, 8 landing ships, 9 landing craft, 2 depot ships, 7 oilers, 6 transports, 12 boom defence vessels, 4 sail training vessels, 17 water carriers, 35 fleet tugs and 30 other vessels.

Three guided-missile frigates and 2 submarines are under construction; a nuclear-powered submarine is projected.

The naval air arm, known usually as *Aéronavale*, has 3 squadrons of nationally-designed Etendard IV-M supersonic fighter-bombers, 1 squadron of Etendard IV-P reconnaissance fighters, 1 squadron of US-built Crusader all-weather fighters, 3 squadrons of Alizé turboprop anti-submarine aircraft, 6 maritime reconnaissance squadrons with Neptune and Marlin aircraft, and 3 anti-submarine and assault squadrons with Sikorsky HSS-1 helicopters. There are also 12 coastal patrol, training and rescue units.

AIR FORCE. Formed as the *Service Aéronautique* in April 1910, the *Armée de l'Air* is organized in 7 major commands. The *Commandement des Forces Aériennes* (FAS) has responsibility for the creation of the French nuclear deterrent force. The *Commandement des Forces Aériennes Tactiques* (FATAC) directs the tactical air forces, commands the air force reserve and is responsible for liaison with ground forces. The *Premier Commandement Aérien Tactique* (1er CATAC) controls tactical aircraft based in eastern France and Germany as part of the NATO air forces; 2me CATAC controls the materiel reserves. The *Commandement de l'Aviation Légère* is responsible for providing observation, light close support and casualty evacuation services for the Army. The *Commandement du Transport Aérien Militaire* (COTAM) is responsible for air transport operations throughout the French Community and for the training and transport of airborne forces. The *Commandement de la Défense Aérienne* (DA) controls air defence forces, serving all regional commands.

The French Air Force is divided territorially among 4 metropolitan air regions (Dijon, Paris, Bordeaux, Aix-en-Provence); and 4 overseas air commands (Dakar, Brazzaville, Tananarive, Djibouti).

The tactical and air defence forces are equipped exclusively with jet aircraft. The FAS has a group of Vautour bomber aircraft (which will be replaced eventually by supersonic Mirage IVs). The 1er CATAC deploys 9 groups equipped with Mirage III-C, Mystère IVA, F-100 Super Sabre, F-84F Thunderstreak and RF-84F Thunderflash aircraft and Nike Hercules surface-to-air missiles. The air defence forces include 3 wings of Super Mystères and 1 of Vautours, which are being replaced by supersonic Mirage IIIs. The COTAM is equipped with 4 wings of Noratlas, Breguet Deux Ponts and DC-6 transports, supplemented by 2 groups of C-47, C-54, C-45, S.O.30P Bretagne, DC-6 and M.S. 760 Paris aircraft. *L'Aviation Légère* is composed of many different types of aircraft, including Fennec (T-28) and AD-4 Skyraider close-support aircraft, Broussard observation and general-purpose monoplanes, and H-34, H-19, Bell 47 and Alouette helicopters.

The total number of personnel in the Air Force was 140,000 in 1961.

# MADAGASCAR

## RÉPUBLIQUE MALGACHE

IN 1863 King Radama II's assassination terminated a short but momentous reign. Succeeding Queen Rànavàlona I in 1861, Radama abolished ordeals and the death penalty and introduced freedom of worship and freedom of trade. The abolition of customs duties, however, damaged his finances, and he incurred the wrath of the British by his inclination towards France.

**HISTORY.** Madagascar was discovered by the Portuguese, Diego Diaz, in 1500. On the return of Diaz to Portugal the King concluded that the island must be Madagascar, about which he had read in Marco Polo's 'Voyages'. Polo, however, had not been there, but believing his Arab informants, ascribed to an island what was really the kingdom of Mogadisho, on the east coast of Africa. Mispronouncing and mis-spelling the name, he coined the word Madagascar, by which name it has been known ever since.

The last native sovereign in Madagascar, Queen Rànavàlona III (born 1861, died 1916), succeeded in 1883. The French claimed a portion of the north-west coast as having been transferred to them by local chiefs, and hostilities were carried on in 1882–84 against the Merina, who refused to recognize the cession. In 1885 peace was made, Diégo-Suarez having been surrendered to France. By the agreement of 5 Aug. 1890 the protectorate of France over Madagascar was recognized by Great Britain; but the native government refused to carry out the clauses of the treaty of 1885, and a French expedition was dispatched in May 1895 to enforce the claims of France, and on 1 Oct. a treaty was signed whereby the Queen accepted the protectorate. In 1896 Diégo-Suarez and the islands of Nossi-Bé on the west coast (130 sq. miles) and Sainte-Marie on the east coast (64 sq. miles) were placed under the authority of the governor-general of Madagascar. By a law promulgated 6 Aug. 1896 the island and its dependencies were declared a French colony.

On 14 Oct. 1958 Madagascar was proclaimed a member state of the Community and on 26 June 1960 became an independent state within the Community. The Republic was admitted to the UN on 20 Sept. 1960.

**CONSTITUTION AND GOVERNMENT.** The constitution of the republic was promulgated on 28 April 1959 and amended in June 1960. It provides for a national assembly of 107 and a senate of 54 members. The government consists of a president, 11 ministers and 9 secretaries of state.

*President of the Republic and Minister of Defence:* Philibert Tsiranana.
*Foreign Affairs:* M. Sylla.

The republic is divided into the 6 provinces of Fianarantsoa, Majunga, Tamatave, Diégo-Suarez, Tuléar and Tananarive. Each province is under the supervision of a specially delegated secretary of state. The provinces are subdivided into prefectures, sub-prefectures and cantons. Each canton comprises a number of communes which correspond to the traditional *fokonolona*.

*National flag:* White (vertical), green and red (horizontal).
*National anthem:* Ry tanindrazanay malala ô!

**AREA AND POPULATION.** Madagascar is situated off the south-east coast of Africa, from which it is separated by the Moçambique Channel, the least distance between island and continent being 240 miles; its length is 980 miles; greatest breadth, 360 miles. The area is 595,790 sq. km (229,975 sq. miles). On 1 Jan. 1962 the population was 5,657,601, of whom 151,865 were French, 40,377 Comorians, 1,365 other members of the French Community and 27,751 aliens.

The Malagasy races or tribes are very numerous, the more important being the Hova (1,367,578), the Betsimisáraka (835,962), the Bétsiléo (679,291), the Tsimihety (386,489), the Sakalava (312,271), the Antaisaka (305,209) and the Antandroy (271,875). Hindus, Chinese, Arabs and other Asiatics carry on small retail trade. The language of the Hova or Merina, allied to the Malayan and Oceanic tongues, is understood over a large part of the island.

# MALI

## RÉPUBLIQUE DU MALI

**CONSTITUTION AND GOVERNMENT.** The Republic of Mali became independent on 22 Sept. 1960, after having been the territory of French Sudan, a member state of the French Community (from 28 Nov. 1958) and, from Jan. 1959 to 22 Sept. 1960, a partner (together with Senegal) of the Federation of Mali. The Republic was admitted to the UN on 29 Sept. 1960.

In Dec. 1960 Mali, Ghana and Guinea decided to co-ordinate their diplomatic representations and economic and monetary policy.

The Republic is administered by a government of 12 members. The national assembly has 70 members, elected by universal suffrage.

*President of the Republic, Prime Minister and Minister of Defence and Foreign Affairs:* Modibo Keita.
*Minister Delegate for Foreign Affairs:* Barema Bocoum.

**AREA AND POPULATION.** The frontiers of the former territory were readjusted in 1904, 1933, 1948 and 1954 (*see* THE STATESMAN'S YEAR-BOOK, 1959, p. 1011). The Republic now covers an area of 1,204,021 sq. km, with a population of 4·1m. in 1960, of whom 7,100 were Europeans. The most densely populated and richest of the 19 districts are those of San, Mopti, Sikasso, Koutiala, Bamako and Ségou. Bamako, the capital (population, 120,000), Kayes (28,500), Ségou (19,400, Mopti (12,500), Sikasso (14,000), San (8,000), Tombouctou (7,000) and Gao (6,500) are important towns.

**EDUCATION.** There were in 1957, 260 elementary schools with 41,205 pupils, 7 secondary schools with 1,444 pupils and 19 technical schools with 981 pupils.

**FINANCE.** The ordinary budget for 1960 balanced at 6,800m. francs CFA.

**PRODUCTION.** A 4-year development plan (1961–65) envisages investments totalling 64,000m. francs CFA. Agriculture is being organized on collective lines as in Israel; its products are to be handled by state buying organizations. Public utilities industry and mining are to become state monopolies.

Production in 1957 included (in 1,000 metric tons) millet and sorghum (700), rice (160), maize (70), groundnuts (130) and cotton (6). In 1956 there were 3·9m. head of cattle, 60,000 horses, 160,000 asses, 5·9m. sheep and goats and 78,000 camels.

Important irrigation schemes have been carried out in the Ségou and Mopti districts on the Niger River, of which the Sansanding Barrage is the centre; 50,000 hectares of cotton and rice lands are being irrigated.

**TRADE.** Imports from the franc area amounted to 83% of the total (118,000m. francs CFA) in 1961 and to 49% of the total (128,000m. francs CFA) in 1962; from the Soviet bloc to 1·5% in 1961 and 28% in 1962. Exports totalled 78,000m. francs in 1961 and 74,000m. in 1962. These statistics, however, are not reliable, although the Chamber of Commerce in Bamako has adjusted the doubtful official figures.

Chief imports are foodstuffs, automobiles, petrol, building material, sugar, salt, beer. Chief exports are groundnuts, karité, gum, dried fish and skins.

There are 13,000 km of roads, not all of which are usable in all seasons; they include 669 km of the metalled road Dakar–Niger (1,250 km). The navigable length of the Niger in Mali is 1,782 km.

Air services connect the Republic with Paris, Dakar and Abidjan. The chief airport is at Bamako. In 1960, 1,820 aircraft disembarked and embarked 24,887 passengers and 859 metric tons of freight and mail.

## TOGO

### République Togolaise

**CONSTITUTION AND GOVERNMENT.** The Republic of Togo became independent on 27 April 1960, after having been a German protectorate (1894–1914, subsequently divided between the French and the British), a mandate of the League of Nations (20 July 1922) and a trusteeship territory of the United Nations (14 Dec. 1946).

On 28 Oct. 1956 a plebiscite was held to determine the status of the territory. Out of 438,175 registered voters, 313,458 voted for an autonomous republic within the French Union and the end of the trusteeship system.

On 14 Nov. 1958 the general assembly of the United Nations accepted unanimously the French–Togolese proposal that the trusteeship should be abolished on the achievement of independence on 27 April 1960.

On 13 Jan. 1963 the President Sylvanus Olympio was murdered, probably by officers of the Ewe tribe and members of the Juvento party. Nicolas Grunitzky, a former prime minister and Olympio's brother-in-law, was appointed President of the Republic and head of government, assuming also the ministries of Interior and Defence. On 17 Jan. (back-dated to 13th) he dissolved the National Assembly and abrogated the constitution.

The Chamber of Deputies consisted of 46 members, elected by universal suffrage for a 5-year term.

Administratively, Togoland is divided into 10 districts, which are named after the principal towns of Lomé, Tsévié, Palimé, Anécho, Atakpamé, Sokodé, Lama-Kara, Bassari, Mango and Dapango.

**AREA AND POPULATION.** Area, about 57,000 sq. km. The population of Togo in 1960 was about 1·4m. The capital is Lomé (population, 66,800, including 700 Europeans). Lomé, Anécho, Palimé, Bassari, Atakpamé, Sokodé and Tsévié are *communes de plein exercice.*

The southern part of Togoland is peopled by tribes using several different languages, of which the principal are Ewe and Mina; these may be regarded as an offshoot of the Bantu peoples. The northern half contains, ethnologically, a totally different population descended largely from Hamitic tribes and speaking a fairly large number of different languages, of which Dagomba, Tim and Cabrais are the most important. The majority of the natives are pagans, but some profess Mohammedanism, while Christianity has been making some progress in the coast districts. By 1955, 145,846 natives had adopted the Roman Catholic and 33,125 the Protestant faith.

**EDUCATION.** In 1959 there were 1,391 primary classes with 78,689 pupils, 74 secondary classes with 1,847 pupils and 25 technical classes with 600 pupils; 134 Togolese scholarship students were studying at French universities.

**FINANCE.** The ordinary budget for 1962 provided for 3,300m. francs CFA of revenue and envisaged expenditures of 3,500m.

**PRODUCTION.** Inland the country is hilly, rising to 3,600 ft, with streams and waterfalls. There are long stretches of forest and brushwood, while dry plains alternate with arable land. Maize, yams, cassava, plantains, groundnuts, etc., are cultivated; oil palms and dye-woods grow in the forests; but the main commerce is based on coffee, cocoa, palm-oil, palm-kernels, copra, groundnuts, cotton, manioc. There are considerable plantations of oil and cocoa palms, coffee, cacao, kola, cassada and cotton.

A Mines Department was set up in 1953 after the discovery of very rich deposits of phosphates and bauxite. Output of phosphate rock, 1961, 278,000 long tons; 1962, 360,000 long tons.

Livestock (1955): Cattle, 117,041; sheep, 302,509; swine, 226,522; horses, 938; asses, 3,552; goats, 252,000.

There were (1956) 17 post offices and 14 postal agencies. Togo is connected by telegraph and telephone with Ghana, Dahomey, Abidjan and Dakar, and by telegraph with Europe.

# GERMANY

**POST-WAR HISTORY.** Since the unconditional surrender of the German armed forces on 8 May 1945 there has been no central authority whose writ runs in the whole of Germany. Consequently no peace treaty has been signed with a government representing the whole of Germany, and the country is virtually partitioned between West Germany (Federal Republic of Germany) and East Germany (German Democratic Republic).

By the Berlin Declaration of 5 June 1945 the governments of the USA, the UK, the USSR and France assumed supreme authority over Germany. Each of the 4 signatories was given a zone of occupation, in which the supreme power was to be exercised by the C.-in-C. in that zone (*see* MAP in THE STATESMAN'S YEAR-BOOK, 1947). Jointly these 4 Cs.-in-C. constituted the Allied Control Council in Berlin, which was to be competent in all 'matters affecting Germany as a whole'. The territory of Greater Berlin, divided into 4 sectors, was to be governed as an entity by the 4 occupying powers. The Allied Control Council, however, soon ceased to co-operate effectively and in March 1948 altogether ceased to function.

At the Potsdam Conference (17 July–2 Aug. 1945) the northern part of the Province of East Prussia, including its capital Königsberg (renamed Kaliningrad), was transferred to the Soviet Union, pending final ratification by a peace treaty; and it was agreed that, pending the final peace settlement, Poland should administer those parts of Germany lying east of a line running from the Baltic Sea immediately west of Swinemünde along the river Oder to its confluence with the Western Neisse and thence along the Western Neisse to the Czechoslovak frontier.

The agreements between the war-time allies concerning the occupation zones (12 Sept. 1944) and control of Germany (1 May 1945) were repudiated by the USSR on 27 Nov. 1958.

# FEDERAL REPUBLIC OF GERMANY

## BUNDESREPUBLIK DEUTSCHLAND

The Federal Republic of Germany became a sovereign independent country on 5 May 1955. A member of EEC, the Council of Europe, Western European Union, NATO, the European Coal and Steel Community, Euratom, the European Payments Union and the Agencies of the UN, the Federal Republic claims to speak and act on behalf of the whole German people.

In June 1948 the US, the UK, and France agreed on a central government for the 3 western zones. An Occupation Statute, which came into force on 21 Sept. 1949, reduced the responsibilities of the occupation authorities. Formally, the Federal Republic of Germany came into existence on 21 Sept. 1949. The Petersberg Agreement of 22 Nov. 1949 freed the Federal Republic of numerous restrictions of the Occupation Statute. In 1951 the USA, the UK and France as well as other states terminated the state of war with Germany; the Soviet Union followed on 25 Jan. 1955. On 5 May 1955 the High Commissioners of the USA, the UK and France signed a proclamation revoking the Occupation Statute. On the same day, the Paris and London treaties, signed in Oct. 1954, came into force and established the sovereignty of the Federal Republic of Germany.

**CONSTITUTION.** The Constituent Assembly (known as the 'Parliamentary Council') met in Bonn on 1 Sept. 1948, and worked out a Basic Law which was approved by a two-thirds majority of the parliaments of the participating Länder and came into force on 23 May 1949.

The **Basic Law** (*Grundgesetz*) consists of a preamble and 146 articles. The first section deals with the basic rights which are legally binding for legislation, administration and jurisdiction.

The Federal Republic of Germany is a democratic and social federal state. The federal flag is black, red and gold. For the time being the Basic Law applies to the Länder Baden-Württemberg, Bavaria, Bremen, Greater Berlin (temporarily suspended), Hamburg, Hesse, Lower Saxony, North Rhine-Westphalia, Rhineland-Palatinate, Saarland and Schleswig-Holstein. The Basic Law decrees that the general rules of international law form part of the federal law. The constitutions of the Länder must conform to the principles of a republican, democratic and social state based on the rule of law. Executive power is vested in the Länder, unless the Basic Law prescribes or permits otherwise. Federal law supersedes Land law.

**The organs of the Federal Republic are:**

The Federal Diet (*Bundestag*), elected in universal, direct, free, equal and secret elections for a term of 4 years.

The Federal Council (*Bundesrat*), consisting of members of the governments of the Länder. Each Land has at least 3 votes. Länder with more than 2m. inhabitants have 4, Länder with more than 6m. inhabitants have 5 votes.

The Federal President (*Bundespräsident*) is elected by the Federal Assembly for a term of 5 years and represents the Federal Republic in international relations. Re-election is admissible only once.

The Federal Assembly consists of the members of the Federal Diet and an equal number of members elected by the popular representative bodies of the Länder according to the principles of proportional representation.

The Federal Government consists of the Federal Chancellor, elected by the Federal Diet on the proposal of the Federal President, and the Federal

Ministers, who are appointed and dismissed by the Federal President upon the proposal of the Federal Chancellor.

The Federal Republic has exclusive legislation on: (1) foreign affairs; (2) federal citizenship; (3) freedom of movement, passports, immigration and emigration, and extradition; (4) currency, money and coinage, weights and measures, and regulation of time and calendar; (5) customs, commercial and navigation agreements, traffic in goods and payments with foreign countries, including customs and frontier protection; (6) federal railways and air traffic; (7) post and telecommunications; (8) the legal status of persons in the employment of the Federation and of public law corporations under direct supervision of the Federal Government; (9) trade marks, copyright and publishing rights; (10) co-operation of the Federal Republic and the Länder in the criminal police and in matters concerning the protection of the constitution, the establishment of a Federal Office of Criminal Police, as well as the combating of international crime; (11) federal statistics.

For concurrent legislation in which the Länder have legislative rights if and as far as the Federal Republic does not exercise its legislative powers, *see* THE STATESMAN'S YEAR-BOOK, 1956, p. 1038.

Federal laws are passed by the Federal Diet and after their adoption submitted to the Federal Council, which has a limited veto. The Basic Law may be amended only upon the approval of two-thirds of the members of the Federal Diet and two-thirds of the votes of the Federal Council.

The foreign service, federal finance, railways, postal services, waterways and shipping are under direct federal administration.

In the field of finance the Federal Republic has exclusive legislation on customs and financial monopolies and concurrent legislation on: (1) excise taxes and taxes on transactions, in particular, taxes on real-estate acquisition, incremental value and on fire protection; (2) taxes on income, property, inheritance and donations; (3) real estate, industrial and trade taxes, with the exception of the determining of the tax rates.

Customs, the yield of monopolies, excise taxes with the exception of the beer tax, the transportation tax, the turnover tax and property dues serving non-recurrent purposes accrue to the Federal Republic. The Federal Republic can, by federal law, claim part of the income and corporation taxes to cover its expenditures not covered by other revenues. The final distribution of the taxes subject to concurrent legislation between the Federal Republic and the Länder must be effected not later than 31 Dec. 1952. Financial jurisdiction is uniformly regulated by federal legislation.

**GOVERNMENT.** The *Federal Diet*, elected on 17 Sept. 1961, is composed of 499 members. In addition, there are 22 members for Berlin, who, however, have no vote.

State of the parties: Christian Democrats (CDU; CSU), 242 (1957, 277); Social Democrats (SPD), 190 (169); Free Democrats (FDP), 67 (41); other parties failed to obtain 5% of the votes, and therefore returned no members.

Bonn on the Rhine is the capital of the Federal Republic.

*Federal President:* Dr Heinrich Lübke (elected 1 July 1959, by 526 out of 1,038 votes).

On 16 Oct. 1963 the Federal Diet elected Professor Ludwig Erhard Federal Chancellor with 279 votes against 180 and 24 abstentions.

The cabinet, a coalition of Christian and Free Democrats, was, in Jan. 1964, composed as follows:

*Debt Settlement.* On 27 Feb. 1953 several agreements were signed in London settling Germany's external pre-war and post-war debts. These agreements entered into force on 16 Sept. 1953.

The claims arising from the post-war economic assistance given to Germany by the UK (£201·8m.), France ($15·79m.) and the USA ($3,014m.) were fixed at £150m., $11·84m. and $1,000m. respectively, of which only the claims of the USA bear interest at 2½%. Up to March 1961 the claims were paid off by regular and premature redemption as follows: Great

Britain except for £67·5m., France except for $5,328,000 and the USA except for $787·37m. In April/May 1961 the *Deutsche Bundesbank* repaid on behalf of the Federal Republic the total claims of Great Britain and France and the amount of $587m. to the USA. The debt still outstanding on 31 Dec. 1962 was $200·37m. On 31 Dec. 1962 the provisional residual claim of the USA under the STEG Agreement (originally $203m.) amounted to $10·59m.

On 31 Dec. 1962 the London Debts Agreement of 27 Feb. 1953 was in force in a total of 51 foreign countries. 90% of all debts were claims of the USA, Great Britain, France and Switzerland.

Of the approximately DM 4,000m. of public pre-war debts, the sum of DM 2,691m. and of the approximately DM 2,200m. of private pre-war debts the amount of DM 569m. had still to be paid back on 31 Dec. 1962. Under these agreements the public and private pre-war and the post-war debts are to be transferred as follows: DM 585m. a year during the first 5 years, DM 737m. thereafter.

In March 1953 the Federal Republic ratified in addition to these settlements the agreement with Israel, signed at Luxembourg on 10 Sept. 1952. According to this agreement, the Federal Republic is to pay DM 3,000m. to the State of Israel and another DM 450m. for the benefit of the 'Conference on Jewish Material Claims against Germany'. DM 400m. had been paid by 31 March 1954, and thereafter 11 annual instalments of DM 250m. each and a twelfth instalment of DM 300m. are being paid.

**CURRENCY AND BANKING.** The circulating Reichsmark notes were exchanged for 'Deutsche Mark' (East) in June 1948. A 'German Bank of Issue' was set up in Berlin and empowered to issue the new notes. This bank is the central institute for the 'Emissions- and Girobanken' established in April 1947 in the 5 Länder of the Soviet Zone. The circulation of notes and coins at 31 Dec. 1962 was DM (East) 4,413m. Since 1 Nov. 1953 the DM (East) currency has been based on gold, the gold content of the DM (East) being fixed at 0·399902 gramme. This fixation (which would mean a relation of £1 = DM 6·22, $1 = DM 2·22) has not been recognized by the International Monetary Fund.

**DIPLOMATIC REPRESENTATIVES.** The German Democratic Republic maintains diplomatic relations with 12 Communist countries and has commercial representatives in 30 'capitalist' countries.

In 1950, 49·5% of the population were peasants, 25% workers and artisans, 10% employees, 8·5% liberal professions, and 7% pensioners and rentiers.

In 1951 cities (*i.e.*, communes of more than 10,000 inhabitants, including Greater Athens) had 2,807,905 inhabitants (37%); towns (*i.e.*, communes with between 2,000 and 9,999 inhabitants), 1,187,135 (15%); villages and rural communities (under 2,000 inhabitants), 3,637,761 (48%).

Mount Athos, the easternmost of the three prongs of the peninsula of Chalcidice, is a self-governing community composed of 20 monasteries. (*See* THE STATESMAN'S YEAR-BOOK, 1945, p. 983.) For centuries the peninsula has been administered by a Council of 4 members and an Assembly of 20 members, 1 deputy from each monastery. The Greek Government on 10 Sept. 1926 recognized this autonomous form of government; Articles 109–112 of the Constitution of 1927 gave legal sanction to the Charter of Mount Athos, drawn up by representatives of the 20 monasteries on 20 May 1924. Article 103 of the 1952 Constitution confirms the special status of Mount Athos.

**RELIGION.** According to the census of 1961, there were 8·118m. adherents of the Greek Orthodox Church, 35,000 Roman and Greek Catholics, 10,200 Armenians including 9,450 Monophysites, 15,000 Protestants, 8,000 Jehovah's Witnesses, 108,000 Moslems (300 mosques) and 5,800 Hebrews.

The Greek Orthodox Church is under an archbishop and 66 metropolitans, 1 metropolitan and 7 bishops in Crete, and 4 metropolitans in the Dodecanese. The Roman Catholics have 3 archbishops (in Naxos and Corfu and, not recognized by the State, in Athens) and 5 bishops. The Exarchs of the Greek Catholics and the Armenians are not recognized by the State.

Complete religious freedom is recognized by the Constitution of 1952, but proselytizing from, and interference with, the Greek Orthodox Church is forbidden.

**EDUCATION.** Elementary education is compulsory and free for all children between the ages of 6 and 12.

In 1960–61, there were 9,227 public day primary schools with 835,232 pupils; 768 private day primary schools with 60,655 pupils; 996 evening primary state schools with 26,280 pupils; 66 evening primary private schools with 4,495 pupils; 837 public and 252 private kindergartens, with together some 40,000 children; 336 public day *gymnasia* with 209,195 pupils; 239 private day *gymnasia* with 37,528 pupils; 25 evening state *gymnasia* with 10,078 pupils; 47 evening private *gymnasia* with 8,177 pupils; 42 commercial schools have been transformed into economic *gymnasia* (7,873 pupils).

In 1960–61 there were 2 universities, at Athens (233 professors, 8,911 students) and Thessalonike (189 professors, 6,307 students), the Athens polytechnic (76 professors, 1,993 students), a fine-arts school (12 professors, 109 students), high schools of commerce (18 professors, 2,120 students) and political science (22 professors, 3,329 students), 2 industrial colleges at Piraeus and Thessalonike (together 46 professors, 2,536 students), an agricultural college at Athens (33 professors, 326 students) and 5 conservatoires.

There are 14 teacher-training colleges with 182 professors and 2,314 students.

Illiteracy in the age groups of 10 years and over declined from 42% of the population in 1928 to 13% in 1961 in the urban centres and 23% in the rural areas.

*Cinemas* (1961). There were 1,033 cinemas with a seating capacity of 700,000.

**HEALTH** (1963). There were 1,085 hospitals and sanatoria with a total of 48,779 beds and a staff of 3,978 doctors. Of the hospitals, 384 are general and 701 are special clinics; 850 are privately owned and 235 state-owned.

**FINANCE.** The estimates of revenue and expenditure for calendar years were as follows (in 1m. drachmai):

| | *1958* | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|
| Revenue | 15,721 | 17,449 | 18,925 | 21,201 | 23,965 |
| Expenditure | 15,835 | 17.514 | 19,089 | 21,201 | 23,965 |

The 1961 revenue included (in 1m. drachmai): Direct taxes, 3,222; indirect taxes, 11,883; customs receipts, 5,278. The investments budget included domestic loans, 1,130; foreign loans, 1,176; Nato special aid, 451. The main items of expenditure were: Investments, 5,055·6; defence, 3,464·4; pensions, 2,192; education, 1,614·9, security forces, 1,234; social welfare, 1,198·8.

The International Financial Commission (composed of delegates from Great Britain and France) established in Feb. 1908 to collect and disburse, with the collaboration of the Finance Minister, such revenues as are available for the service of the external debt is to be superseded by some other arrangement, according to the Anglo-Greek agreement of Jan. 1946. To this Commission are assigned the revenues (for the most part in Old Greece) from certain government monopolies, the stamp duty and the import duties at the port of Piraeus. The German occupation of 1941–44 interrupted the service of the debt.

On 20 Oct. 1962 a debt settlement was agreed upon in New York, covering the gold bonds of 1924, 1925 and 1928 to the amount of US$37m., in default since 1941.

In 1961 the floating debt was 3,016m. drachmai.

**DEFENCE.** In Aug. 1950 the Ministries of War, Marine and Military Aviation were fused into a single Ministry of National Defence. The General Staff of National Defence is directly responsible to the Minister on general defence questions, besides the special staffs for Army, Navy and Air Force. Defence expenditure in 1961 was 3,215m. drachmai (24·1% of the budget).

ARMY. Military service is compulsory and universal. Liability begins in the 21st year and lasts up to the 50th. The normal term of service in the active Army is 24 months for all arms, followed by 19 years in the first reserve of the active Army and 10 years in the second. The normal annual contingent of recruits in peace-time is about 50,000. Every 3 months a quarter of the current year's contingent is called up for service.

Since 1945, the organization and establishment of the Army units have been adapted to British models. In Feb. 1952 an American Mission took over from a British Military Mission the training of the Army.

The Army consists of 11 infantry and 1 armoured division, with a total strength of 120,000 men.

NAVY. The Royal Hellenic Navy includes 8 fleet destroyers, 4 frigates (destroyer escorts), 2 submarines, 7 gunboats, 6 coastal patrol vessels, 5 escort minesweepers (corvettes), 14 coastal minesweepers, 2 coastal minelayers, 2 survey ships, 2 motor launches, 7 oilers, a repair ship, 15 landing ships, 8 landing craft, a depot ship, a salvage vessel, 3 transports, 3 lighthouse tenders, 7 water carriers and 14 fleet tugs. Personnel (1963): 1,800 officers and 17,200 ratings (called up for 18 months, or enlisted).

AIR FORCE. The Royal Hellenic Air Force has a strength of about 23,000 officers and men and some 260 operational aircraft consisting of 6 squadrons of F-84F Thunderstreak fighter-bombers, 2 squadrons of Canadian-built Sabre day interceptors, 2 squadrons of F-86D Sabre all-weather interceptors and a squadron of RF-84F Thunderflash reconnaissance fighters. Fighter and reconnaissance units are being re-equipped with F-104 Starfighter and F-5A aircraft. There are also transport, training and helicopter units, and anti-aircraft units equipped with Nike-Ajax and Nike-Hercules surface-to-air missiles.

The RHAF is organized into Tactical, Training and Material Commands. Training of pilots and ground staff is done in Greece and abroad.

**PRODUCTION.** Greek economy was completely ruined as the result of the occupation of the country by the Italians, Germans and Bulgarians from 1941 to 1944.

*Agriculture.* Of the total area only 26% is cultivable, but it supports 50% of the whole population. The total area under cultivation in 1961 was 3,653,000 hectares, forest area was 2,454,200 hectares (350,000 of which were privately owned).

Farming is concentrated on export crops, such as tobacco and currants, to pay for essential imports, including meat, wheat and flour. Agriculture suffers from soil-erosion and the inadequate use of fertilizers. Wheat yields per acre are the lowest in south-eastern Europe. The use of tractors and other agricultural machinery, imported by UNRRA and under the Marshall Plan, has made considerable progress.

Yield (1,000 metric tons) of the chief crops:

| Crop | *Average 1935–38* | *1956* | *1957* | *1958* | *1959* | *1960* |

| Olives | 36 | 53 | 38 | 40 | 49 | 21 |

Tobacco normally furnishes, by value, 40% of Greece's total exports (52·7m. kg in 1962–63). The harvested area was 93,767 hectares in 1960.

Olives are abundant, about 500,000 hectares being under cultivation.

Rice is cultivated in Macedonia, the Peloponnese, Epirus and Central Greece. Successful experiments have been made in growing rice on alkaline land previously regarded as unfit for cultivation. The main kinds of cheese produced are sliced cheese in brine (commercially known as Fetta) and hard cheese, such as Kefalotyri.

There were, in 1963, 328,000 horses, 224,000 mules, 502,000 asses, 1·11m. cattle, 9·59m. sheep, 5m. goats, 621,000 pigs, 16·3m. poultry.

*Mining.* Greece produces a variety of ores and minerals, including iron (average content 44–52%; annual production about 300,000 tons), iron-pyrites, emery, bauxite (1m. metric tons in 1962), zinc, lead (14,550 short tons in 1962), silver (128,600 troy oz. in 1962), manganese (33,000 short tons in 1962), chromite (88,200 short tons in 1962), antimony, nickel, magnesite ore, baryte, gold (4,823 troy oz. in 1960), sulphur, ochre, bitumen, marble (white and coloured) and various other earths, chiefly from the Laurium district, Thessaly, Euboea and the Aegean islands. There is no coal, only lignite of indifferent quality; reserves are about 10m. tons.

After 25 years exploration oil was struck in Feb. 1963 by British Petroleum at Kleisoura in west central Greece.

*Industry.* The leading products are tobacco, cotton, textiles, petroleum products and refining, shipbuilding, steel and cement. A blast furnace and a nitrogen fertilizer plant are under construction. In 1961, 150,000 short tons of steel ingots and castings were produced.

*Electricity.* In 1954, 4 new power plants (Aliveri, Ladon, Louros, Agras) opened with a total installed capacity of 205,000 kw. and annual production of 1,000m. kwh. In 1960, 2 more power plants began operating (Ptolemais, Tavropos) with an installed capacity of 157,000 kw. and annual production of 750m. kwh. Work on the Acheloos hydro-electric power station at Kremasta was begun in Dec. 1960 (ultimate capacity, 400,000 kw.). Total production in 1961 was 2,461m. kwh.

**Trade Unions.** The status of trade unions in Greece is regulated by the Associations Act 1914. Trade-union liberties are guaranteed under the Constitution, and the right to strike is subject to the Settlement of Collective Labour Disputes Act of 21 Nov. 1935, which, while not making strikes illegal, introduced the principle of compulsory arbitration.

The national body of trade unions in Greece is the Greek General Confederation of Labour.

**COMMUNICATIONS.** *Shipping.* On 31 Aug. 1963 the merchant navy comprised 1,313 vessels of 7·2m. GRT.

There is a canal (opened 9 Nov. 1893) across the Isthmus of Corinth (about 4 miles).

There is (since 1925) in the town and port of Thessaloniki a free zone, covering today a land area of 536 sq. km. In the same port there was established in 1923 and operating since 1929 a Yugoslav free zone with 94 sq. km total area of land and seaway. In 1923 there was created a free zone in the town of Piraeus, covering a land area of 181·5 sq. km.

*Roads.* There were, in 1959, 47,164 km of roads, of which 4,385 were asphalt-carpeted, 1,609 asphalt-surfaced, 14,986 metalled and 13,047 unpaved all-weather roads. Number of motor vehicles in Dec. 1962: 56,893 passenger cars, 51,812 lorries and buses, 37,500 motor cycles.

*Railways.* Total length of the Greek railway system in 1940 was 2,679 km, of which 1,325 km belonged to the State Railways (SEK) and 1,354 to various private companies, the most important being the Piraeus–Athens–Peloponnese Company (SPAP).

During the war the railways suffered great losses, especially during the departure of German troops, who systematically destroyed all the railway installations and equipment. Only 670 km were left fit for use after the liberation in 1944. The state-owned railway system is now fully restored (2,583 km in 1963).

*Post.* In 1962 telephone and telegraph lines had a length of 33,333 km; there were 9,212 telegraph offices, 1,856 post offices and 302,843 telephones.

The agreement under which Cable and Wireless, Ltd, were responsible for Greek telegraph communications since 1866 was terminated by the Greek Government in Jan. 1956, effective at the end of 1956.

*Aviation.* A Greek company connects Athens with all important cities of the country. Twenty-one foreign companies connect Athens with the principal cities of the world. The principal airport is at Athens.

**MONEY AND BANKING.** On 11 Nov. 1944 the Greek currency was stabilized at 1 'new' drachma equalling 50,000m. 'old' drachmai. Further readjustments took place in 1946, 1949 and 1953. A 'new issue' of notes and coins was put into circulation on 1 May 1954, 1 new drachma equalling 1,000 old drachmai (84 drachmai = £1; 30 drachmai = US$1). The 'new issue' comprises notes of 50, 100, 500 and 1,000 drachmai and metal coins of 1, 2, 5, 10 and 20 drachmai and 5, 10, 20 and 50 lepta.

The note-issuing privilege of the National Bank (founded in 1841) was transferred to the new issuing bank, the Bank of Greece (Trapeza tis Ellados), as from 14 May 1928, in accordance with the conditions of the Geneva Protocol of 15 Sept. 1927. On 31 Dec. 1960 bank-notes in circulation amounted to 10,186·9m. drachmai; coins in circulation, 318·2m. drachmai.

In 1953 the National Bank of Greece and the Bank of Athens were amalgamated; in 1957 its name was changed to National Bank of Greece (Ethniki Trapeza tis Ellados). Gold and foreign exchange reserves at 31 Dec. 1961 stood at US$250·5m.

A National Investments Bank, to provide credit for industrial development, was set up in Dec. 1963; of its capital of 180m. drachmai, the National Bank provided 60%.

Post savings bank deposits amounted to 3,130m. drachmai, to the credit of 460,000 depositors at 31 Dec. 1961.

## República de Guatemala

**HISTORY.** From 1524 to 1821 Guatemala was a Spanish captaincy-general, comprising the whole of Central America. It became independent in 1821 and formed part of the Confederation of Central America from 1823 to 1839, when Rafael Carrera dissolved the Confederation.

**CONSTITUTION AND GOVERNMENT.** Following the revolution of June 1954, which overthrew and exiled President Jacobo Arbenz Guzmán and brought Col. Castillo Armas into power, the Constitution of 1945 was replaced in Aug. 1954 by a 'Political Statute'. On 2 Feb. 1956 a new Constitution was signed by the President; it came into force 1 March 1956. Voting is compulsory for men and women over 18 who can read, and optional for illiterate men and women.

*President of the Republic:* Gen. Miguel Ydígoras Fuentes, elected by Congress on 12 Feb. 1958 for a 6-year term beginning 15 March 1958, but on 31 March 1963 was overthrown by a *coup d'état.* He was succeeded by Col. Enrique Peralta Azurdia, who is designated 'Head of Government'. The Constitution was then replaced by a Fundamental Charter of Government.

*Minister of Foreign Affairs:* Alberto Herrarte González.

The administration is carried on, under the President, by the heads of 10 departments. Mayors of municipalities, with their councils, are appointed by the Head of Government.

*National flag:* Blue, white, blue (vertical).
*National anthem:* ¡Guatemala! feliz (words by J. J. Palma; tune by R. Alvarez).

**AREA AND POPULATION.** The area is 108,889 sq. km (42,042 sq. miles). In March 1936 Guatemala, El Salvador and Honduras agreed to accept the peak of Mount Montecristo as the common boundary point.

The population, according to the April 1950 census, was 2,790,868, compared with an estimate of 4,016,624 at 30 June 1962. About 54% are pure Indians, of 21 different groups descended from the Maya-Quiché tribe; most of the remainder are mixed Indian and Spanish (*ladinos*); and these supply the ruling classes. Density of population, 1950, about 30 per sq. km. Crude birth rate, 1960, 49·5 per 1,000 population; crude death rate, 17·5; crude marriage rate 4·4; infant death rate, 91·9 per 1,000 live births. Vital statistics, 1962: Births, 191,420; deaths, 69,287; marriages, 14,659; infant deaths, 17,462.

Guatemala is administratively divided into 22 departments, each with a governor appointed by the Head of Government.

| Departments | Population | Departments | Population |
|---|---|---|---|
| Alta Verapaz | 266,481 | Petén | 23,937 |

| Jalapa | 110,841 | Totonicapán | 133,900 |
| Jutiapa | 213,873 | Zacapa | 103,321 |

The capital is Guatemala City with 417.218 inhabitants (estimate June 1962), almost all *ladinos*. Other towns are Quezaltenango (39,638), Cobán (10,827), Zacapa (12,222), Puerto Barrios (22,929), Mazatenango (16,179) and Antigua (15,606).

Guatemala's claim that British Honduras is Guatemalan territory, though apparently not abandoned, was amicably discussed between the two countries at San Juan (Puerto Rico) in April 1962. Anglo-Guatemalan relations, long disturbed, were normalized and their legations raised to embassy status (25 July 1962). Guatemala broke off diplomatic relations with UK in July 1963.

**RELIGION.** Roman Catholicism is the prevailing faith; but all other creeds have complete liberty of worship. Guatemala has an archbishopric. The leading Protestant churches are the Baptists (76,000 members) and the Iglesia Evangélica (28,000).

**EDUCATION.** In 1962 there were 3.980 primary schools with 10.615 teachers and an attendance of 338.853 pupils; these figures include private schools. Secondary and other schools have 5.229 teachers and an attendance of 36.899 pupils; the autonomous University of San Carlos de Borromeo, founded in 1678, was reopened in 1910 with 7 faculties and schools. All education is in theory free, but owing to a grave shortage of state schools private schools flourish. The 1950 census showed that 71·9% of those 10 years of age and older were illiterate.

*Cinemas* (1963). Cinemas numbered over 100.

*Newspapers* (1963). There are 6 daily newspapers.

**SOCIAL WELFARE.** A comprehensive system of social security was outlined in a law of 30 Oct. 1946. Medical personnel, 1962, included about 800 doctors for the whole republic. There were 45 public hospitals and about 100 dispensaries.

**JUSTICE.** Justice is administered in a supreme court, 6 appeal courts and 28 courts of first instance. Supreme court and appeal court judges are appointed by the Head of Government. Judges of first instance are appointed by the supreme court.

All holders of public office have to show on entering office, and again on leaving, a full acount of their private property and income.

**FINANCE.** The estimates of ordinary revenue and expenditure (years ending 30 June) balanced as follows, in quetzales (1 quetzal = US$1): 1960–61, 102,433,788; 1961–62, 121,028,800; 1962–63, 105·95m.; 1963–64, 114·27m.

The national debt was Q.84,654,400 in June 1962, including Q.22,251,400 of external debt. Total foreign investments in 1954–60 were $238m. American aid up to 1959 totalled $44·8m.

**DEFENCE.** Military service (2 years) is compulsory, but not universal, between the ages of 18 and 50 (from 18 to 30 in the special reserves), and conscripts may be called upon for work in communications, reforestation and agriculture. The Army numbers between 7,000 and 8,000; the Policía Nacional has between 2,000 and 3,000.

There is a small Air Force with a squadron of F-51D Mustang piston-engined fighter-bombers, a squadron of B-26 Invader light bombers, a squadron of C-47 transports and training units.

A Naval force of 1 gunboat and 2 small coastguard units was formed in 1959.

The Head of Government is also Minister of Defence and chief of the armed forces.

**PRODUCTION.** The Cordilleras divide Guatemala into two unequal drainage areas, of which the Atlantic is much the greater. The Pacific slope, though comparatively narrow, is exceptionally well watered and fertile between the altitudes of 1,000 and 5,000 ft, and is the most densely settled part of republic. The Atlantic slope is sparsely populated, and has little of commercial importance beyond the chicle and timber-cutting of the Petén, coffee cultivation of Cobán region and banana-raising of the Motagua Valley and Lake Izabal district.

On 17 June 1952 an 'Agrarian Reform Law' was enacted providing for the expropriation (with eventual compensation) of those parts of landed estates which were not under cultivation. In parcels of about 25 acres these were to be leased to farmers. The US Government in 1953 sent a memorandum protesting against the expropriation of 234,000 acres belonging to the United Fruit Company. Under the new government the expropriation was halted and the 'Agrarian Reform Law' was superseded by a 'Statute' early in 1956, which provided small holdings to several thousand peasant farmers. This distribution of land continues, now under the provisions of the 'Agrarian Transformation Law' of 1962.

*Agriculture.* The soil in general is exceedingly fertile and agriculture is the most important industry. But soil erosion is serious and a single week of heavy rains suffices to cause flooding of fields and much crop destruction.

The principal crop is coffee; there are about 12,000 coffee plantations with 138m. coffee trees on about 338,000 acres, but 80% of the crop comes from 1,500 large coffee farms employing 426,000 workers. Coffee exports in 1962 were valued at Q.68·22m. mainly to USA and Germany.

Bananas are still a most important export crop, but exports have at times been seriously reduced, partly by labour troubles and by hurricanes. Exports 1962, were worth Q.6,204,000.

Cotton has recently become the second most important export; exports in 1962 were valued at Q.15·5m. Sugar, maize, rice, beans and wheat are important domestic crops. 803,300 quintals of wheat flour were produced in 1959. Guatemala is, after Mexico, the largest producer of chicle gum (used for chewing-gum manufacture in USA); exports, 1962, Q.551,000; as in Mexico, latex from the chilte tree is gradually superseding chicle. Nurseries for rubber trees show promise and new rubber development schemes are under way, assisted by US funds. Tobacco output (all for home consumption) is about 5m. lb. grown on 8,300 acres. Guatemala is one of the largest sources of essential oils (citronella and lemon grass); exports in 1962 were valued at Q.2,931,000. Cattle-grounds (*potreros*) occupy about 758,000 acres. It is calculated that there are some 1·2m. head of cattle (mostly beef) in the country.

*Forestry.* The forest area has an extent of 17,784,000 acres. The department of Petén is rich in mahogany and dye woods; exports of fine woods were valued at Q.1,099,000 in 1962.

*Mining.* A new 'petroleum code' (1955) had permitted 29 foreign (mostly United States) and several local companies to start exploration, but most operations have had to be abandoned owing to lack of success. Lead (1962, 577·5 short tons), zinc (1962, 1,392·6 short tons of concentrate, including 0·3% of cadmium) are mined in small quantities. Output of silver, 1962, 48,749 troy oz.; antimony, 66; chrome, 43 short tons.

*Power.* 239m. kwh. of electricity were generated in 1962.

*Industry.* The principal industries are food and beverages, tobacco, chemicals, hides and skins, textiles, garments and non-metallic minerals. New industries include electrical goods, plastic sheet and metal furniture.

*Trade Unions.* Trade unions are small; they were organized in 1950 in a Left-wing national federation, the Guatemalan Autonomous Labor Federation (FLAG), and a federation of farm workers (CNCG). In 1954 the trade unions were ordered to reorganize: there are now 2 main federations—the Autonomous Trade Union Federation (FAS) and the National Trade Union Council (Consejo Sindical Nacional).

Passengers carried, 1960, numbered 2,000,200, and freight carried (1960), 661,000 short tons. The bridge across the Suchiate River between Mexico and Guatemala in 1942 linked the railways of North and Central America, though differences in gauge make it necessary to change trains at Ayutla.

The exchange rate has remained at $1 since 1926. Gold coins have been withdrawn from circulation. Silver–copper coins in active circulation are of 50, 25, 10 and 5 centavos; there are copper–zinc coins of 1 centavo, and paper notes of 100, 20, 10, 5, 1 and ½ quetzales (50 centavos).

(or dollars), mostly deposited with the US Federal Reserve and unchanged since Dec. 1947; total international reserves amounted to Q.54·2m. on 30 Nov. 1963, and exchange control was imposed in Oct. 1962.

There are 11 banks, including the Banco de Guatemala, Instituto Nacional de Fomento de la Producción, which grants loans to stimulate production, the Banco Nacional Agrario, set up in Oct. 1953, to make loans to the peasants who have received land under the Agrarian Reform law, a branch of the Bank of London and Montreal Ltd and a branch of the Bank of America.

# GUINEA

## RÉPUBLIQUE DE GUINÉE

**CONSTITUTION AND GOVERNMENT.** The independent republic of Guinea was proclaimed on 2 Oct. 1958, after the territory of French Guinea had decided at the referendum of 28 Sept. to leave the French Community. The constitution provides for the limitation or renunciation of sovereignty in favour of African unity. This principle found expression in the agreements with Ghana (Nov. 1958) and Ghana–Mali (Dec. 1960).

Co-operation with France in economic and cultural matters was established by a convention signed on 22 May 1963.

The official language is French.

*National flag:* Red, gold, green (vertical).

The constitution of 12 Nov. 1958 declared Guinea 'a democratic, secular and social republic'. The President of the republic is elected for a 7-year term and can be re-elected.

*President and Prime Minister:* Sékou Touré (elected Jan. 1961).

*Foreign Affairs:* Beavogui Lansana.

**AREA AND POPULATION.** The republic lies on the west coast between Portuguese Guinea and Sierra Leone.

The area is 245,857 sq. km (95,000 sq. miles), and the estimated population in 1960 was 2,726,868. Conakry, the capital (112,491 inhabitants), Kankan (29.100), Kindia (25,000), Siguiri (12,700), Labé (12,500) and N'Zérékoré (8,600) are important towns.

The most important ethnic groups are the Peuls (1·02m.), Malinké (525,000), Soussou (250,000) and Kissi (160,000).

In Aug. 1961, the French Roman Catholic Archbishop was expelled because of his objection to the take-over of private schools. Only African priests will henceforth be permitted to function.

**EDUCATION.** There were, in 1959–60, 84,000 pupils in elementary schools and 5,360 in technical and secondary schools. The nationalization of private schools is to be completed by 1962.

There are experimental fruit gardens at Camayenne near Conakry, Kindia and Dalaba, 2 stations for rice selection (Kankan, Koba) and an experimental quinine station at Sérédou. Fouta Djallon contains cattle in abundance. In 1959 there were 1,196.715 cattle and 546,756 sheep and goats.

Agricultural production, 1959 (in 1,000 metric tons): Manioc, 330; rice, 282; bananas, 66·5; coffee, 14·3.

*Mining.* Diamonds are found in the Macenta district (145,000 carats in 1957). Bauxite exists in the Los islands, the Boké district and the Kindia–Telimélé district; output, 1962, 1,369,568 metric tons. Production of iron ore in the Kaloum peninsula was 700,000 metric tons in 1962.

*Power.* Production of electrical energy was 10·6m. kwh. in 1955.

# HAITI

## République d'Haiti

**HISTORY.** Haiti occupies the western third of the large island of Hispaniola which was discovered by Christopher Columbus in 1492. The Spanish colony was ceded to France in 1697 and became her most prosperous colony with a considerable export of sugar and other produce. After the extirpation of the original Indian inhabitants by the Spaniards (by 1533) large numbers of African slaves were imported whose descendants now populate the country. The slaves obtained their liberation following the French Revolution, but subsequently Napoleon sent his brother-in-law, Gen. Leclerc, to restore French authority and re-impose slavery. Toussaint Louverture, the leader of the slaves who had been appointed a French general and governor, was kidnapped and sent to France, where he died in gaol. However, the reckless courage of the Negro troops and the ravages of yellow fever forced the French to evacuate the island and surrender to the blockading British squadron.

The country declared its independence on 1 Jan. 1804, and its successful leader, Gen. Jean-Jacques Dessalines, proclaimed himself Emperor of the newly-named Haiti. After the assassination of Dessalines (1806) a separate régime was set up in the north under Henri Christophe, a Negro general who in 1811 had himself proclaimed King Henry. In the south and west a republic was constituted, with the mulatto Alexandre Pétion as its first President. Pétion died in 1818 and was succeeded by Jean-Pierre Boyer, under whom the country became re-united after Henry had committed suicide in 1820. From 1822 to 1844 Haiti and the eastern part of the island (later the Dominican Republic) were united. After one more monarchical interlude, under the Emperor Faustin (1847–59), Haiti has been a republic. From 1915 to 1934 Haiti was under United States occupation.

**CONSTITUTION AND GOVERNMENT.** The 1950 constitution, under which Dr François Duvalier was elected president on 22 Oct. 1957, provided that no president was immediately re-eligible. The new constitution later in 1957 did not forbid re-election. Like its predecessor it provides that the President is elected by popular franchise for a 6-year period. Women of 21 years of age are enfranchised.

A single-chamber legislature of 58 deputies elected for a 6-year term was established in April 1961.

*President of the Republic:* In April 1961 elections were held for the Legislative Chamber, and afterwards it was announced that Dr Duvalier had been re-elected President for a further 6 years, although the next presidential election was not due until 1963 and there had been neither nominations nor campaign. (For the series of *coups d'état* in 1956–57, *see* THE STATESMAN'S YEAR-BOOK, 1960, p. 1085.)

*National flag:* Blue, red (horizontal); in the centre, the coat of arms on a white square.

*National anthem:* 'La Dessalinienne': Pour le pays, pour les ancêtres (words by J. Lhérisson; tune by N. Geffrard, 1903).

**AREA AND POPULATION.** The area is 27,750 sq. km (10,700 sq. miles), of which about three-quarters is mountainous. The population was estimated in 1961 to be about 4m. (144 per sq. km, highest density in Central America). The country is divided into 5 *Départements*: Nord-Ouest, Artibonite, Nord, Ouest, Sud. The Ile de la Gonave, some 40 miles long, lies in the main gulf of the same name. Among other islands is La Tortue, off the north peninsula. The majority of the population are Negroes, with an important minority of mulattoes and only about 2,000 white residents, almost all foreign. The capital, Port-au-Prince (Ouest) has an estimated population of 250,000; Cap Haitien (Nord), 30,000; Les Cayes (Sud), 14,000; Gonaives (Artibonite), 12,000, and Jérémie (Sud), 12,000; Port de Paix (Nord-Ouest), 6,500. Less than 15% of the population lives in the towns.

Haiti is the only French-speaking republic in the Americas. The standard French of government, parliament and the press is understood by the small literate minority, but the great majority of the people speak only the dialect known as Créole.

**RELIGION.** Since the Concordat of 1860, the official religion is Roman Catholicism, under an archbishop with 5 suffragan bishops. The clergy are mostly French and Canadians, with some 100 Haitians. Other

Christian churches number perhaps 300,000 members. The folk religion is Voodoo.

**EDUCATION.** The school system is modelled after that of France, with the country divided into 36 inspectors' districts (32 rural and 4 urban). The law calls for free and compulsory elementary education in the French language.

In 1957 urban primary schools reported 2,976 teachers and 96,619 pupils; rural schools, including schools for farming. 1,528 teachers and 99,639 pupils; 15 national *lycées*, 20 private secondary schools, 15 professional schools had a total of 9,856 pupils. Agricultural and industrial education was provided for 2,794 students (261 teachers), secondary education for 7,062 students (927 teachers). Higher education (free) is offered at the Faculty of Medicine, the Faculty of Law and the Faculty of Dentistry; in addition, there are the National Schools of Agriculture, Pharmacy, Obstetrics, Ethnology and Polytechnic, all of which constitute the University of Haiti; in 1961 the University had 1,500 students. In addition, there are some schools maintained by the Catholic teaching orders and a small group under Protestant direction. A school of Higher International Studies was founded in Oct. 1958. The founding of a school of Higher Studies in Physics and Chemistry was approved by law in 1959.

A United Nations investigation (1949) found about 85% of the population illiterate, with only one-fifth or one-sixth of the children attending school. A law was passed in Sept. 1958 providing for a 5-year campaign to eliminate illiteracy. In 1957, 14,303 children and adults were attending the 525 educational centres maintained by the Ministries of Education and Labour.

*Cinemas* (1960). There were 20 cinemas and one drive-in cinema with a combined seating capacity of about 10,000.

*Newspapers* (1961). There were 5 daily and 1 (English) weekly newspapers in Port-au-Prince and 1 weekly newspaper in Cap Haitien with a combined circulation not exceeding 14,000.

**JUSTICE.** Judges, both of the lower courts and the court of appeal, are appointed by the President. The legal system is basically French.

**FINANCE.** The major part of the revenue is derived from customs duties and export taxes. A revised income tax, on individuals and companies, became effective 1 Oct. 1961.

Revenue and expenditure (fiscal year ending 30 Sept.) for 6 years, in US$1,000 (5 gourdes = US$1) were:

| | *1957–58* | *1958–59* | *1959–60*[1] | *1960–61*[1] | *1961–62* | *1962–63*[1] |
|---|---|---|---|---|---|---|
| Revenue . | 35,000 | 33,000 | 34,000 | 27,600 | 25,900[2] | 28,800 |
| Expenditure . | 38,100 | 36,600 | 34,000 | 27,600 | 26.800 | 28,800 |

[1] Estimates. [2] Not including range of non-fiscal taxes.

Proposed expenditures for the year 1961–62 (in US$1,000) were: Agriculture, natural resources and rural development, 1,978; finance, 2,946; interior (including army and police), 7,285; education, 3,104; public works and communications, 1,328; international institutions, 3,346; public debt, 2,866; health, 3,240; foreign affairs, 1,319; labour, 371; commerce and industry, 427; justice, 758; information, 391; religion, 275.

The total public debt is approximately US$41m.

For 1963–64 the International Monetary Fund's US$6m. stand-by credit was renewed from the previous year.

**DEFENCE.** An army of 399 officers and 4,815 men has the functions of a gendarmerie. The President is C.-in-C. and appoints the officers. The basic weapons of the armed forces are those of light infantry, but Haiti also possesses four 105-mm. howitzers, four 75-mm. guns and a number of 57-mm. and 37-mm. anti-tank guns, as well as 9 Second World War light tanks and a few scout cars of limited operability.

The Air Corps of 26 officers and 140 men has about 15 aircraft (F-51D Mustang piston-engined fighter-bombers and aircraft for reconnaissance and transport).

The Coastguard of about 300 officers and men has 6 active patrol vessels and buoy-tenders as well as a few smaller craft.

Beyond the forces proper, the President directly commands an additional 1,200 para-military civilian militia, an active reserve of armed government partisans (including women) with nominal military training and organization.

**PRODUCTION.** *Agriculture.* Only one-third of the country is arable and most people own the tiny plots they farm; the resulting pressure of population is the main cause of rural poverty.

The occupations of Haiti are nine-tenths agricultural, carried on in 7 large plains, from 200,000 to 25,000 acres, and in 15 smaller plains down to 2,000 acres. Irrigation is used in some areas. The first unit of the Artibonite Valley project, covering 3,000 acres sown to rice, was completed in Aug. 1955. A dam forming part of the project was finished in 1956. Haiti's most important product is coffee of good quality, classified as 'mild', and grown by peasants. Production in 1960–61 totalled 15,600 metric tons. Second most important crop is sisal (1960–61, 20,000 tons). The cultivation of bananas (brought to Haiti in 1515) is decreasing and exports have almost ceased. Cotton is similarly decreasing, due to the bollweevil. Rice is being developed, especially in the Artibonite Valley. Refined sugar production (42,700 tons) increased during 1960–61, with the rise in US import quota. In crop year 1961–62, coffee was reported to have increased, and yet again in 1962–63. Output of four main crops in 1962 was: Coffee, 725,000 sacks; sugar, 74,000 short tons; cocoa, 2,400 short tons; tobacco, 1,250 short tons.

Rum and other spirits are distilled. Essential oils from lime, vetiver, neroli and amyris are becoming important. Cattle and horse breeding are encouraged.

*Mining.* Haiti possesses undeveloped mineral resources of gold, silver, mirogoane, antimony, tin, sulphur, coal, nickel, gypsum and porphyry. Three foreign companies are engaged in exploitation and exploration for bauxite (263,000 long tons in 1961), copper (artibonite), lignite and manganese. A concession for quarrying marble was granted in 1963.

*Industry.* There are now 2 textile-mills producing cheap denim with a total of 550 looms and 14,000 spindles. One mill, with 450 looms and 12,000 spindles, has been operating for many years; the other was completed in 1955. A soap factory, which was opened in 1954, produces approximately 5,000 cases of 250 11-oz. bars per month. A cement factory located near the capital produces approximately 80,000–100,000 sacks of 42½ kg per month. There are also a pharmaceutical plant, a tannery, a plastics plant, 4 aerated-water plants, a paint-works and a flour-mill located in and near Port-au-Prince. In the north there is a sisal-rope plant. The 1960 survey of industrial enterprises reported 422 units, employing 10,221, mainly in the conversion of agricultural products.

The tourist trade in 1961 earned some $5m., but dropped off in 1962 and 1963 to possibly as little as $2·5m.

**Trade Unions** were recognized in Feb. 1946; in 1954, 56 unions were registered, with an estimated membership of 7,000; there are now (1961) 41, and the Government exercises a strong influence over them.

**COMMERCE.** Imports and exports for fiscal years ending 30 Sept. (in US$1m.):

| | *1957* | *1958* | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|---|

| Exports . . . | 32·9 | 42·1 | 26·0 | 33·0 | 32·0 | 40·8 |

Chief exports from Haiti during the period 1 Oct. 1961–30 Sept. 1962 were (in US$1m.) as follows: Coffee, 20·6; sisal, 2·3; sugar, 1·5; bauxite, 3·7; copper, 2·8; handicrafts, 1·5; essential oils, 1·5.

US is the most important market for Haitian exports (taking 65% in 1961) and the principal supplier of Haitian imports (supplying 35%). Haiti's exports to UK in that period were 0·75% and imports from UK 4·8% of the total.

The leading imports are cotton manufactured goods, foodstuffs, machinery, mineral oils and vehicles.

**COMMUNICATIONS.** *Shipping.* Several lines of steamers (American and Dutch) connect Haiti with New York, Panama and Florida, and others (British, French, German, Japanese and Dutch) with Europe and the Far East. In 1957, 477 steam and motor vessels entered and cleared Haitian ports; of these, 32 were British.

*Roads.* Total length of roads in some 3,000 km, little of which is practicable in ordinary motors. In 1962 there were about 8,400 motor vehicles.

Cables run from Port-au-Prince to Cuba, and from the Mole St Nicholas to Santiago de Cuba, Port-au-Prince, Cap Haitien, Puerto Plata (Dominican Republic) and to New York and South America. There are 133 post offices.

The state telephone service has 6 automatic telephone exchanges, but has not been in effective working order for some time. Work on the new telephone system was suspended in 1957. Instruments, 1962, number 4,400, of which 85% are automatic.

*Aviation.* There are air services to the US, Jamaica, Dominican Republic and Puerto Rico.

The Air Force runs an airline connecting Port-au-Prince with other towns in Haiti.

**MONEY.** The unit of currency is the *gourde*, which is equivalent to 20 cents US currency; on 9 April 1954 the IMF accepted this as the official par value. It stood at 13·99 to £1 in Mar. 1964. The total currency in circulation on 29 May 1959 was 59,818,837 gourdes in notes, and 6–7m. gourdes in coins. There are copper–nickel coins for 50, 20, 10 and 5 centimes and copper–zinc–nickel coins of 10 and 5 centimes. The amount of US currency in circulation is not known, due to the fact that it is used freely with the local currency.

**BANKING.** The Banque Nationale de la République d'Haiti, owned by the State, was established 21 Oct. 1910 with a capital of US$5m., and has a monopoly of the note issue. Note issue is limited to three times the bank's paid-up capital. US dollars may be included in the minimum required reserves. The Royal Bank of Canada has a branch at Port-au-Prince.

The metalled road from Amman to Ma'an and Aqaba has branches to Kerak, Tafileh and Wadi Musa (Petra). The town of Jerash is joined by a good road to Amman. The normal asphalted route from Amman to Deraa (in Syria) and thence to Damascus is through Jerash. The oasis of Azrak may be reached by motor car from Mafrak, Zerka or Amman. Total length of metalled roads, 2,116 km. Motor vehicles in 1962 included 7,433 passenger cars and 4,565 lorries and buses.

*Railways.* The Hejaz Railway runs from Deraa to Ma'an through Jordan. Communication between Aqaba and the railhead at Naqb Ishtar is by road only. A new Agrarian Reform Law signed by the President on 30 Sept. 1962 provides among other things for progressively penal taxation on farmland not in proper use.

*Forestry.* Honduras has an abundance of hard- and softwoods. Large stands of mahogany and other hardwoods—granadino, guayacán, walnut and rosewood—grow in the north-eastern part of the country, in the interior valleys, and near the southern coast. Stands of pine occur almost everywhere in the interior. 1962 exports (in cu. metres) mainly to USA, El Salvador, Jamaica, Venezuela, UK and Germany, were: Pinewood (41,443), cedar (182), mahogany and ebony (1,697) and walnut (54). *Industry.* A good quality of Panama hat is manufactured in the departments of Copán and Santa Bárbara, along with many other articles of domestic use. Clothing factories have been established in Tegucigalpa and San Pedro Sula. There are some oil-driven electric power-plants. An important hydro-electric scheme is being built at Río Lindo.

**Labour.** The organization of trade unions was begun in 1954 with the assistance of ORIT (Inter-American Regional Organization) sponsored by the USA trade unions. In 1961 they had about 16.000 members. A 'Charter of Labour' was granted in Feb. 1955 and an advanced Labour Code and Social Security Bill passed into law in May 1959. The application of these measures is not yet complete.

Tegucigalpa, the capital, is connected with both the Caribbean Sea and the Pacific Ocean. Roads in 1961 were 2,930 km (402 paved). Motor vehicles, 1 Aug. 1962, included 11,606 cars, 5,893 lorries and buses.

*Railways.* Only 3 railways exist, and they are confined to the north coastal region, where they are used mainly for transportation of bananas. Tegucigalpa, the capital, is not served by any railway, and there are no international railway connexions. The total railways operating at Dec. 1959 were 1,337 km.

*Aviation.* Over a large part of the country the aeroplane is the normal means of transport for both passengers and freight. There are 34 unpretentious local airports and 1 large international one, at Tegucigalpa; fares are reasonable, distances short and the planes are treated as casually as buses.

A second international airport is being constructed at La Mesa, San Pedro Sula.

**MONEY.** By a decree of 9 March 1931 the gold *lempira* (named after a native chief) is the monetary unit; its value is that of 0·836 gramme of gold, 900 fine, or 50 cents US currency. It is backed by a reserve fund of US deposits and securities; the fund stood at $12·3m. on 30 April 1961, against a total note circulation of Lps.33m. and coin of Lps.4·19m. Silver coins of 1 *lempira*, 50 and 20 centavos; copper–nickel, 10 and 5 centavos; copper–zinc–tin, 2 centavos and 1 centavo are in circulation. The value of the silver *lempira* was legally fixed in 1931 to 50 cents US. There are also 1, 5, 10, 20 and 100 *lempira* notes in circulation. US currency ceased to be legal tender on 1 Jan. 1954; the banks converted at the rate of 1·98 *lempiras* = US$1.

**BANKING.** The power to issue notes was taken over from the 2 private banks—Banco de Honduras and Banco Atlántida—by the new government bank, Banco Central de Honduras, which was inaugurated on 1 July 1950 with a capital of US$250,000. All private bank-notes have been withdrawn. The Banco Central has restored complete freedom in foreign-exchange transactions, controlled since 1934. Since July 1950 the Central Bank's assets have risen from 14m. lempiras to over 85m. ($42·5m.) at the end of 1960. Another government bank, the National Development Bank, founded in 1950 with a capital of $750,000, grants long-term loans to coffee planters and 'supervised credits' to the poorer farmers.

The Bank of London and Montreal operates in Tegucigalpa and San Pedro Sula. The Central American Bank of Economic Integration opened in Tegucigalpa on 30 May 1961.

**WEIGHTS AND MEASURES.** The metric system has been legal since 1 April 1897, but English pounds and yards and the old Spanish system are still in use: 1 *vara* = 32 in.; 1 *manzana* (10,000 sq. *varas*) = 700 sq. metres; 1 *arroba* = 25 lb.; 1 *quintal* = 100 lb.; 1 *tonelada* = 2,000 lb.

# HUNGARY

## Magyar Népköztársaság

**HISTORY.** Hungary first became an independent kingdom in 1001. For events in Hungary since 1918 *see* The Statesman's Year-Book, 1945, pp. 1006–7, and 1957, p. 1096.

On 23 Oct. 1956 an anti-Stalinist revolution broke out, and the newly-formed coalition government of Imre Nagy on 1 Nov. withdrew from the Warsaw Pact and asked the United Nations to protect Hungarian neutrality. János Kádár, one of Nagy's ministers, formed a counter-government on 3 Nov. and asked the Soviet Government for support. Russian troops, tanks and artillery thereupon suppressed the revolution and abducted Nagy and his Ministers, who were later secretly executed.

The United Nations have passed several resolutions condemning the Soviet intervention, the latest on 20 Dec. 1961.

**CONSTITUTION AND GOVERNMENT.** On 1 Feb. 1946 the National Assembly proclaimed the Hungarian Republic.

A new constitution of a 'republic of workers and working peasants' was adopted on 18 Aug. 1949. Supreme power is vested in Parliament. Parliament elects a Presidential Council, which exercises the functions of Parliament in between sessions. The Presidential Council can dissolve government bodies and annual legislation if they 'infringe the constitution or are detrimental to the interests of the working people'. The Presidential Council is also collectively the titular Head of State, usually represented by its chairman.

Private property, 'if it does not violate the public interest', and right of inheritance are guaranteed, but the chief means of production and natural resources, banking, transport, etc., are in the hands of the State or of the Co-operatives.

Nationality groups are assured equal rights with Magyars, and are guaranteed education in their mother tongue, and the right to develop their national culture.

*National flag:* Red, white and green (horizontal).

*National anthem:* God bless the Hungarians—Isten áldd a Magyart (words by Ferenc Kölcsey, tune by Ferenc Erkel).

*Chairman of the Presidential Council:* István Dobi, President of the Independent Smallholders' Party, former Chairman of the Council of Ministers, elected 14 Aug. 1952; admitted to Communist Party membership in Dec. 1959; re-elected 1957 and 1963. *Deputy Chairmen:* Sándor Gaspar and Odon Kishazi. *Secretary:* Károly Kiss.

On 1 Feb. 1949 the Hungarian Working People's Party (Communists), the Smallholders' Party, the National Peasant Party, the Trade Union Federation, the Association of Working Peasants, the Democratic Women's Association and the Federation of Working Youth (DISZ) were merged in a single organization called the Hungarian People's Independence Front. At the end of Oct. 1954 a new comprehensive organization was formed, called the Patriotic People's Front.

The Communist Party, which numbered nearly 1m. members, was reorganized after the crushing of the October revolution, changed its name to 'Hungarian Socialist Workers' Party' and, in Nov. 1962, numbered 511,965, including candidate members. The First Secretary of the Central Committee and the head of its Politburo is János Kádár.

The Government was in March 1964 composed as follows: *Prime Minister:* János Kádár. *Deputy Prime Ministers:* Antal Apró, Lájos Fehér, Jenö Fock, Gyula Kállai, János Pap. *Minister of State:* Dr Ferenc Münnich. *Finance:* Mátyás Timár. *Foreign Affairs:* János Péter. *Chairman, National Planning Commission:* Miklós Ajtai. *Agriculture:* Pál Losonczy. *Speaker, National Assembly:* Mrs. Vas. *Interior:* Andras Benkei. *Culture:* Pál Ilku. *Defence:* Gen. Lájos Czinege. *Foreign Trade:* József Biró.

At the elections held on 24 Feb. 1963, 6,403,181 votes were cast for the single list of the Patriotic People's Front; 28,651 votes against it; 61,848 ballot papers were invalid. Parliament consists of 340 deputies, 1 for each 32,000 of the population, elected for a 4-year term; they include 62 women.

LOCAL GOVERNMENT. For administrative purposes the Republic is divided into 19 counties (*megyék*), 5 county boroughs, districts, towns and boroughs.

The local councils form the basis of local administration. They are elected for a term of 4 years and 'exercise their functions in close contact with the population, ensure the active participation of the workers in the work of local government and encourage initiative and vigilance on their part'.

The local councils elect from among their own members the Executive Committees which manage the daily affairs of administration and direct the work of the local-government apparatus. All local councils can issue regulations within the area of their jurisdiction and within the provisions of the law.

**AREA AND POPULATION.** The armistice of 20 Jan. 1945 restored the frontiers as of 1 Jan. 1938. This was confirmed by the peace treaty of 10 Feb. 1947, which further stipulated the cession to Czechoslovakia of 3 villages on the Danube opposite Bratislava (61 sq. km).

The census population (1 Jan. 1960) of the present territory of Hungary settled by the armistice, *i.e.*, 93,060 sq. km (35,912 sq. miles), was 9,977,870 (4,817,355 males and 5,160,515 females). In 1941 the mother tongue of the population was: 8,657,102 Magyars (92·8%); 477,057 Germans (5·1%); 75,920 Slovaks (0·8%); 22,269 Croats (0·2%); 18,661 Gipsies (0·2%); 14,161 Rumanians (0·2%); 5,444 Serbs (0·1%) and 23,420 others.

The population at the end of 1963 was 10·1m.; 60% rural, 40% urban (18% in Budapest).

Vital statistics, 1960: Births, 146,436; marriages, 88,616; deaths, 101,539. Infant mortality, 42 per 1,000 live births in 1963 (131 in 1938).

Area (in sq. km) and population (in 1,000) of the counties, their capitals and the county boroughs were as follows:

| Counties (1 Jan. 1960) | Area | Population | Chief town (mid-1963) | Population |

**RELIGION.** The Constitution of 1949 has abolished the former distinction between incorporated and recognized religions. All religions have equal standing. The Constitution 'in order to ensure the liberty of conscience' separated the Church from the State. Each church receives state subsidies according to special agreements with the State Office for Churches.

On 6 April 1959 a new law came into operation giving the State the right to appoint its own nominees for all vacant bishoprics which are not filled within 90 days; and to fill church posts of lower rank down to parish priest which have not been filled by the bishops within 60 days. In addition, State approval is required for all ecclesiastical appointments, transfers and dismissals before these are made public. Under the same law all clergy have to take an oath of allegiance to the State.

In Sept. 1950, 59 Roman Catholic orders with more than 10,000 monks and nuns were dissolved and their monasteries taken over by the State.

Latest estimates of Church membership (about 1955–56); Roman Catholics, 6·2m.; Reformed, 2m.; Lutherans, 433,000; Orthodox, 273,000; Baptists, 35,000; Seventh-Day Adventists, 14,000; Methodists, 2,500; Jews, 80,000.

**EDUCATION.** In 1945–46 a new type of school was introduced—the general school. Attendance is compulsory and free for children of 6 to 14 (raised to 16 in Oct. 1961). All elementary and primary schools and the lower classes of the middle schools have been transformed into general schools. The teaching of Russian is compulsory for children between the ages of 9 and 18.

On 16 June 1948 the 4,322 denominational schools were nationalized with the exception of 9 Calvinist, 2 Lutheran and 2 Jewish secondary schools. In 1950, 3 male and 1 female teaching orders were permitted to continue to staff the 8 licensed Roman Catholic schools.

In 1962 kindergartens had 8,311 teachers and 177,700 pupils; in 1962–63 elementary schools had 59,921 teachers and 1,472,743 pupils; secondary schools had 9,619 teachers and 333,261 pupils.

Elementary schoolteachers are being trained in 58 training colleges.

There are 4 universities in Budapest, Pécs, Szeged and Debrecen, and 3 technical universities in Budapest, Miskolc and Veszprém. Newly created institutions of higher education (mostly in Budapest, with colleges in the provinces) are the National School of Technology, the School of Agriculture, the School of Economics, and the Academy of Economics and Technical Science. The 45 institutions of higher education had, in 1962–63, 67,324 students, of whom three-fourths were full-time students and one-third were women.

The Hungarian Academy of Sciences, in Budapest, has been reorganized on the Soviet pattern.

*Cinemas* (1962). There were 4,530 cinemas; attendance in 1961 totalled 135·4m.

*Newspapers* (1963). Daily newspapers have a combined circulation of 1·6m. copies, led by *Népszabadság* with 700,000.

**SOCIAL WELFARE.** In 1950 the National Insurance Institute, created in 1927–28, was taken over by the Trade Unions Council. In 1963, 9·8m. people were insured.

In 1962 there were 17,175 physicians and surgeons and 73,969 hospital beds.

The taxes of all employees are paid by the employer. Low-cost mid-day meals are provided. All employees are entitled to paid holidays.

**JUSTICE.** Law and justice administration have been remodelled on Soviet Law and Procedure. Civil and criminal cases fall under the jurisdiction of the district courts, county courts and the Supreme Court in Budapest. Criminal proceedings are dealt with by district courts through 3-member councils and by county courts and the Supreme Court in 5-member councils.

District Courts act only as courts of first instance; county courts as either courts of first instance or of appeal. The Supreme Court acts normally as an appeal court, but may act as a court of first instance in cases submitted to it by the Public Prosecutor. All courts, when acting as courts of first instance, consist of 1 professional judge and 2 people's assessors, and, as courts of appeal, of 3 professional judges. District or county judges and assessors are elected by the district or county councils, all members of the Supreme Court by Parliament.

In addition to the normal civil courts, there are military courts of the first instance. Military cases of the second instance go before the Supreme Court. The 5 high courts have been abolished.

Judges are appointed for life, subject to removal for disciplinary reasons. Members of the Supreme Court are elected by Parliament, and other judges by the rural districts or county councils.

The Procurator-General and his office are directing and controlling justice.

After the suppression of the revolution in 1956, various emergency laws were introduced to deal with 'counter-revolutionaries'. Such persons may be tried by military courts and special people's courts; they can be held without trial for indefinite periods, and their defence may be conducted only by lawyers drawn from a panel approved by the régime. The death penalty has been extended to a variety of new crimes.

On 20 Dec. 1957 a 'law of the people's control' was promulgated, which organizes the supervision of workers in offices and factories.

A new Civil Code came into force on 1 May 1960, a new Criminal Code in Dec. 1961. The latter abolished the death penalty for people under 20 years.

**FINANCE.** The budget for calendar years was as follows (in 1,000m. forints):

| | *1957* | *1958* | *1959* | *1960* | *1961* | *1962* [1] | *1963* [1] |
|---|---|---|---|---|---|---|---|
| Revenue . . | 52·6 | 49·9 | 52·9 | 67·7 | 75·99 | 84·48 | 89·4 |
| Expenditure . | 51·8 | 48·8 | 52·1 | 67·4 | 75·72 | 83·89 | 88·9 |

[1] Estimates.

Of the estimated revenue for 1963 (in 1,000m. forints), 73·2 was to come from the profits of state enterprises, fiscal fees, social insurance contributions, etc., 4·9 from co-operatives, 2·9 from taxes and 8·4 from other sources.

The 1963 expenditure was earmarked as follows (in 1,000m. forints): 43·6 for national economy, 24·4 for social and cultural purposes, 6·6 for defence, 3·7 for police and justice, 2·6 for administration, 8 for debt repayment.

On 30 June 1952 Hungary's foreign debt included the equivalent of £29,257,000 and 52,885,503 gold francs of pre-1918 debts; £19,780,331, $26,425,600, 2,072,000 Swiss francs, 3,669,000 Dutch guilders, 2,825,833 Swedish kronor, 163,126,300 French francs, 128,723,500 Italian lire. Debts to Britain are variously estimated at between £20m. and £30m.

**DEFENCE.** The 1947 Peace Treaty has authorized Hungary to have an army up to a total strength of 65,000 personnel, and an air force of 90 aircraft, of which not more than 70 may be combat types, with a personnel strength of 5,000.

Hungary is divided into 4 army districts: Budapest, Debrecen, Kiskunfélegyháza, Pécs. The strength of the regular army in Dec. 1960 was about 80,000 men. Active military service begins at the age of 20 and lasts a maximum of 3 years.

*Air Force.* The Air Force has a strength greater than that authorized by the peace treaty, with at least 1 squadron of MiG-21 supersonic fighters, regiments of MiG-17 fighter-bombers and Il-28 jet-bombers (each 3 squadrons totalling about 40 aircraft), and transport, training and helicopter units. Guideline surface-to-air missiles are also operational.

*Navy.* Hungary has 15 patrol vessels and auxiliaries for police duty on the Danube and a training ship.

The security police (AVH) was reformed after the revolution of 1956 and now comes under the Ministry of the Interior.

The Militia has been taken over by the ordinary police and the Workers' Militia, a para-military organization armed with automatic weapons. Its strength in Dec. 1959 was about 35,000.

Four Soviet divisions are stationed in Hungary.

**PRODUCTION.** In 1962, 1·4m. people were employed in agriculture and 1·43m. in industry.

*Planning.* On 1 Jan. 1950 a 5-year plan was put into operation, designed 'to transform Hungary from an agrarian industrial country into an industrial agrarian country'.

The October revolution 1956 completely upset the economic life of the country, but this had fully recovered by the end of 1958, although the 3-year plan 1958–60 envisages a slower advance than in earlier years.

During the second 5-year plan, which runs from 1961 to 1965, industrial production is to rise by 83–87% over the level of 1958, agricultural production by 30–32% over the average of the period 1954–58; national income by 55–60%, real and personal income by 26–29%. In 1963, 39,400m. forints are to be spent on investments (18% on telecommunications, 16% on chemical industry, 14% on machine tools).

*Agriculture.* Under the post-war régime the greatest change has been the land reform, according to which large holdings and forests have been appropriated for the creation of smallholdings. By April 1950, 5,599,645 acres has been distributed—58·2% (arable land) among individual holders and 41·8% (forest) for public purposes.

In 1962 there were 4,018 collective farms with 1·16m. members. There were also 217 state farms and 231 machine tractor stations. In May 1962 the socialist sector of agriculture comprised 96·7%; the irrigated area, 220,000 hectares; on 31 Dec. 1962, 49,404 tractors were in use.

Of the total area of Hungary 56% is arable land, 15·7% meadows and pastures, 4·5% orchards and vineyards.

Production of major agricultural crops (in 1.000 metric tons):

| Crops | *1960* | *1961* | *1962* | Crops | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|---|---|
| Wheat | 1,768 | 1,936 | 1,959 | Maize | 3,504 | 2,715 | 3,240 |
| Rye | 355 | 297 | 233 | Potatoes | 2,656 | 1,630 | 1,882 |
| Barley | 986 | 984 | 1,146 | Sugar beet | 3,370 | 2,356 | 2,653 |
| Oats | 204 | 139 | 115 | Cattle turnip | 1,431 | 707 | 878 |

In 1962 and 1963 the targets were not reached. The sown area has been reduced by 355,000 acres.

Livestock on 1 March 1963 was (in 1.000 head) as follows: Cattle, 1,906; sheep, 3,043; horses, 339; pigs, 5,428.

Livestock products (1962): Eggs, 1,880m.; milk, 1,780m. litres; wool, 9,387 metric tons; (1963) meat, 211,900 metric tons; butter, 17,700 metric tons.

The north shore of Lake Balaton is an important wine-producing district. The best-known Hungarian wines come from the hilly country, 'Tokay', in the north-east. Wine production in 1962 was 3·1m. hectolitres.

*Forestry.* The area under forest in 1962 was 1,368,000 hectares (14·3% of the total area of Hungary).

*Fisheries.* Hungary retains important fishery preserves in the Danube and Tisza rivers and in Lake Balaton. The latter contains plentiful supplies of perch, carp, pike, sheatfish, shad and other fish.

*Industry.* For a summary of the successive stages of nationalization from 1946 to 1952 *see* THE STATESMAN'S YEAR-BOOK, 1954, p. 1115.

In 1962 food imports amounted to 9·6% of the total imports; maize, in which Hungary used to be self-sufficient, was imported from the USSR in 1961–62.

On 24 Jan. 1963 an Anglo-Hungarian trade agreement was signed in Budapest, to run for 3 years. During the first year, Hungary is expected to import British goods to the value of £8m. (machinery, textiles, motor vehicles, radio and television equipment, chemicals) whereas Hungary might export goods to an equal value (butter, bacon, textiles, chemicals, fruit, vegetables, aluminium).

Total trade between Hungary and UK according to British Board of Trade returns (in £ sterling):

**COMMUNICATIONS.** *Shipping.* The Hungarian Danube–Sea Navigation Co. (Mahart) had in 1960, 11 sea-going vessels of together 8,000 gross tons. Navigable waterways have a length of 1,556 km.

*Danube Commission.* The convention, signed at Belgrade on 18 Aug. 1948 by Bulgaria, Czechoslovakia, Hungary, Rumania, Ukraine, USSR and Yugoslavia, supersedes the Paris convention of 1921, on which the European Commission of the Danube (1856–1948) was eventually based. The Belgrade convention reaffirms free navigation on the Danube from Regensburg to Izmail, open to nationals, merchant vessels and trade of all countries, on a footing of equality.

In 1959 Austria and in 1963 the German Federal Republic acceded to the convention and joined the commission. The USA, UK and France have refused to sign the convention, which they maintain does not safeguard their former rights. Headquarters of the commission was in 1949 transferred from Belgrade to Budapest.

*Roads.* In 1962 the length of state and municipal roads totalled 29,180 km, of which 32% were hard-covered. Passenger cars numbered about 53,000. In 1962, 90·1m. metric tons and 418·2m. passengers were transported by road.

*Railways.* The length of railways in Hungary in 1962 was 8,874 km, of which 517 km were electrified. 517·2m. passengers and 98·7m. metric tons of freight were carried in 1962.

*Post.* Number of post offices (1962), 2,290; length of telegraph lines, 7,355 km; of telegraph wires, 187,105 km. Number of telephones in 1963, 265,650. Wireless licences, 1962, 2·4m.; television licences, 1963, 465,000. Hungary, Czechoslovakia, Poland, USSR and East Germany are linked in the Intervision system.

*Aviation.* The Hungarian Air Lines (Malév) operates from Budapest airport at Ferihegy, 16 km from the capital. In 1962, 131,138 passengers were carried. Malév opened air-services London–Budapest in April 1961.

**CURRENCY.** A decree of 26 July 1946 instituted a new monetary unit, the *forint* subdivided into 100 *fillér*. The official rate of exchange is forints 32·62–33·12 to the £ sterling (April 1957). As from 1 April 1957 the rate of exchange of Western and Yugoslav currencies for tourists has been doubled (65–66 forints to the £); this rate does not apply to commercial transactions.

**BANKING.** By a decree of 23 April 1948 all banking activities of the Central Corporation of Banking Institutes were taken over by the National Bank of Hungary. The National Bank also assumed control of the checking-account section of the Postal Savings Bank. A network of branch savings banks was established under the leadership of the Postal Savings Bank, including branches of the Hungarian Commercial Bank of Pest, of the Discount Bank and of the National Savings Bank of Pest. The Hungarian Commercial Bank of Pest simultaneously became the foreign-trade banking institution, with exclusive right to grant letters of credit for imports. The National Credit Institute of Co-operatives is handling all credit transactions for farmers, artisans and co-operatives.

A Hungarian Investment Bank was established on 24 Sept. 1948. (For details *see* THE STATESMAN'S YEAR-BOOK, 1957, p. 1104.)

**WEIGHTS AND MEASURES.** The metric system of weights and measures is in use. For land measure a cadastral yoke (1 acre = 0·7033 cadastral yoke) is used.

# ICELAND

## Lýðveldið Ísland

**HISTORY.** The first settlers came to Iceland in 874. Between 930 and 1264 Iceland was an independent republic, but by the 'Old Treaty' of 1263 the country recognized the rule of the King of Norway. In 1381 Iceland, together with Norway, came under the rule of the Danish kings, but when

Norway was separated from Denmark in 1814, Iceland remained under the rule of Denmark. Since 1 Dec. 1918 it has been acknowledged as a sovereign state. It was united with Denmark only through the common sovereign until it was proclaimed an independent republic on 17 June 1944.

**CONSTITUTION AND GOVERNMENT.** On 24 May 1944 the people of Iceland decided in a referendum to sever all ties with the Danish Crown. The voters were asked whether they were in favour of the abrogation of the Union Act, and whether they approved of the bill for a republican constitution: 70,725 voters were for severance of all political ties with Denmark and only 370 against it; 69,048 were in favour of the republican constitution, 1,042 against it and 2,505 votes were invalid. On 17 June 1944 the republic was formally proclaimed, and as the republic's first president the Alþingi elected Sveinn Björnsson for a 1-year term (re-elected 1945 and 1949; died 25 Jan. 1952). The President is elected for a 4-year term.

*President of the Republic of Iceland:* Ásgeir Ásgeirsson (elected 29 June 1952, with 32,925 out of 68,190 votes; inaugurated 1 Aug. 1952; re-elected unopposed in 1956 and 1960).

*National flag:* Red cross, with white borders, on blue.

*National anthem:* Ó Guð vors lands (words by M. Jochumsson, 1874; tune by S. Sveinbjørnsson).

The *Alþingi* (Parliament) is divided into two Houses, the Upper House and the Lower House. The former is composed of one-third of the members elected by the whole Alþingi in common sitting. The remaining two-thirds of the members form the Lower House. The members of the Althing receive payment for their services, besides travelling expenses.

The budget bills must be laid before the two Houses in joint session, but all other bills can be introduced in either of the Houses. If the Houses do not agree, they assemble in a common sitting and the final decision is given by a majority of two-thirds of the voters, with the exception of budget bills, where a simple majority is sufficient. The ministers have free access to both Houses, but can vote only in the House of which they are members.

The electoral law enacted in 1959 provides for an Alþingi of 60 members. Of these, 49 are elected in 8 constituencies by proportional representation; the remaining 11 are apportioned to the parties according to their total vote.

At the elections held on 9 June 1963 the following parties were returned: Independence Party, 24; Progressives, 19; Labour Union (Communists), 9; Social Democrats, 8.

The executive power is exercised under the President by the Cabinet. The coalition Cabinet, appointed 20 Nov. 1959, has remained unchanged after the 1963 elections. It is composed as follows:

*Prime Minister:* Bjarni Benediktsson (Ind. Party).

*Justice, Church, Health and Manufacturing Industries:* Jóhann Hafstein (Ind. Party).

*Fisheries and Social Welfare:* Emil Jónsson (Soc. Dem.).

*Foreign Affairs:* Guðmundur Í. Guðmundsson (Soc. Dem.).

*Finance:* Gunnar Thoroddsen (Ind. Party).

*Education and Commerce:* Gylfi Þ. Gíslason (Soc. Dem.).

*Agriculture and Communications:* Ingólfur Jónsson (Ind. Party).

The ministers are responsible for their acts. They can be impeached by the Alþingi, and in that case their cause will be decided by the *Landsdómur*, a special tribunal for parliamentary impeachments.

**LOCAL ADMINISTRATION.** For administrative purposes Iceland is divided into 16 provinces (*syslur*), each under a chief executive (*syslumaður*). Each province forms one or two municipal districts with a council superintending the 214 rural municipalities. There are also 14 urban municipalities with a town council, independent of the provinces, and forming by themselves administrative districts co-ordinate with the provinces. The municipal councils are elected direct by universal suffrage (men and women over 21 years of age), in urban municipalities by proportional representation, but in rural municipalities by simple majority.

**AREA AND POPULATION.** Iceland is a large island in the North Atlantic, close to the Arctic Circle, and comprises an area of about 103,000 sq. km (39,758 sq. miles), with its extreme northern point (the Rifstangi) lying in 66° 32′ N. lat., and its most southerly point (Dyrhólaey, Portland) in 63° 24′ N. lat., not including the islands north and south of the land; if these are included, the country extends from 67° 10′ N. (the Kolbeinsey) to 63° 19′ N. (Geirfuglasker, one of the Westman Islands). It stretches from 13° 30′ (the Gerpir) to 24° 32′ W. long. (Látrabjarg). The skerry *Hvalbakur* (The Whaleback) lies 13° 16′ W. long.

The 25 constituencies of the country are now grouped in 7 districts.

It falls into two main classes of activities, health service (including health protection and medical treatment and the care of sick persons) and income insurance (securing for the insured persons a living wage when they are no longer able to earn their bread themselves, as, for instance, owing to old-age disablement, sickness, accident or want of support). The health service division, however, is only partially operative.

The increase in 1960 is due partly to the devaluation of the *Króna* in Feb. 1960, but mainly to the abolition of the Export Fund, the revenue and expenditure of which have been transferred to the Treasury.

Eight armed fishery protection vessels are maintained by the Government.

**PRODUCTION.** *Agriculture.* Of the total area of Iceland, about six-sevenths is unproductive, but only about 0·5% is under cultivation, which is confined to hay, potatoes and turnips. In 1961 the total hay crop from cultivated and uncultivated land was 370.200 metric tons; the crop of potatoes, 10,200 metric tons, and of turnips, 540 metric tons. At the end of 1962 the livestock was as follows: Horses, 31,108; cattle, 55,744; sheep, 829,774; goats, 111.

On 11 March 1961 Great Britain withdrew her objection to the 12-mile limit around Iceland, but will continue to fish in certain areas of the outer 6 miles of the limit at various seasons for the next 3 years. The base-lines from which the limit is calculated have been modified in favour of Iceland.

# REPUBLIC OF INDONESIA

## REPUBLIK INDONESIA

**GOVERNMENT AND CONSTITUTION.** Indonesia is a sovereign, independent Republic which was proclaimed by Dr Sukarno and Dr Hatta on 17 Aug. 1945. In the 16th century Portuguese traders in quest of spices settled in some of the islands, but were ejected by the British, who in turn were ousted by the Dutch (1595). From 1602 the Netherlands East India Company conquered the Netherlands East Indies, and ruled them until the dissolution of the company in 1798. Thereafter the Netherlands Government ruled the colony from 1816 to 1945.

As a result of the Round Table Conference held at The Hague from 23 Aug. to 2 Nov. 1949, complete and unconditional sovereignty was transferred to the Republic of the United States of Indonesia. The transfer took place on 27 Dec. 1949, except for the western part of New Guinea, the status of which was to be determined through negotiations between Indonesia and the Netherlands within 1 year after the transfer of sovereignty. A union was created to regulate the relationship between the two countries. A settlement of the New Guinea (West Irian) question was, however, delayed until 15 Aug. 1962, when, through the good offices of the United Nations, an agreement was concluded for the transfer of the territory to Indonesia on 1 May 1963.

In Feb. 1956 Indonesia abrogated the union and in Aug. 1956 repudiated Indonesia's debt to the Netherlands.

During 1950 the federal system which had sprung up in 1946–48 (*see* THE STATESMAN'S YEAR-BOOK, 1950, p. 1233) was abolished, and Indonesia was again made a unitary state. The provisional constitution was passed by the Provisional House of Representatives on 14 and came into force on 17 Aug. 1950. The first general elections took place in 1955.

On 5 July 1959 by Presidential decree, the Constitution of 1945 was reinstated and the Constituent Assembly dissolved.

On 15 Aug. 1959 a supreme advisory council, a national planning council and a supervisory commission for the administration were established.

On 12 Jan. 1960 President Sukarno issued a decree enabling him to control the political parties, with the power (on the recommendation of the Supreme Court) to dissolve them. He also announced the formation of a mass organization, the National Front, and of a supreme State body called the People's Consultative Assembly.

On 6 March 1960 the President prorogued Parliament to be reorganized on the basis of the 1945 constitution. Local administrations nominated 130 members representing political parties and 153 members representing functional groups, who formed the new 'Mutual Co-operation House of Representatives'.

*President of the Republic:* Dr Sukarno, declared President for life by the Consultative Assembly in May 1963.

The cabinet formed on 13 Nov. 1963 consists of the President of the Republic as Prime Minister, 3 Vice-Premiers and some 50 Ministers. The Ministries are grouped in 8 'compartments', each under the direction of a 'co-ordinator'.

*First Vice-Premier, Foreign Minister and Minister for Foreign Economic Relations:* Dr Subandrio. *Co-ordinator of Defence and Security:* Gen. Abdul Haris Nasution. *Second Vice-Premier, Co-ordinator of Distribution:* Dr J. Leimena. *Third Vice-Premier, Co-ordinator of Development:* Chaerul Saleh.

*National flag:* Red, white (horizontal).

*National anthem:* Indonesia Raya (tune by Wage Rudolf Supratman, 1928).

**AREA AND POPULATION.** Indonesia, covering a total area of 1·9m. sq. km (575,450 sq. miles), consists of the islands of Sumatra, Java and Madura, Nusa Tenggara (Lesser Sundas), Maluku (Moluccas), Sulawesi (Celebes), Kalimantan (Borneo), West Irian (the western half of New Guinea) and some 3,000 smaller islands and islets. The capital is Djakarta with a population of approximately 3m. Indonesia has a tropical climate with two monsoons; the dry (June–Sept.) and the wet (Oct.–April).

The total population in 1961 (census) was 97,085,348, distributed as follows: Java and Madura, 63m.; Sumatra, 15·7m.; Sulawesi, 7m.; Nusa Tenggara, 6·5m.; Kalimantan, 4m. The population of West Irian was in 1962 estimated at about 700,000.

Indonesia is divided into the following provinces (capitals in brackets): Atjeh (Banda Atjeh), North Sumatra (Medan), West Sumatra (Bukittinggi), Riau (Pakan Baru), Djambi (Telanaipura), South Sumatra (Palembang), West Java (Bandung), Central Java (Semarang), East Java (Surabaya), West Kalimantan (Pontianak), South Kalimantan (Bandjarmasin), East Kalimantan (Samarinda), Central Kalimantan (Pahandut, now named Palangka Raja), North Sulawesi (Menado), South Sulawesi (Makassar), Bali (Singaradja), West Nusa Tenggara (Mataram), East Nusa Tenggara (Kupang), Maluku (Ambon), West Irian (Kotabaru, formerly Hollandia).

In Dec. 1957 Dutch citizens in Indonesia numbered about 60,000. On 5 Dec. the Indonesian Government ordered the expulsion, by stages, of all unemployed Dutch nationals. Dutch citizens in 1962 numbered under 10,000.

The principal ethnic groups are the Achinese, Bataks and Minangkabaus in Sumatra, the Javanese and Sundanese in Java, the Madurese in Madura, the Balinese in Bali, the Sasaks in Lombok, the Menadonese and Buginese in Sulawesi, the Dayaks in Borneo and the Ambonese in the Moluccas.

*Bahasa Indonesia* is the official language of the Republic.

**RELIGION.** Religious liberty is granted to all denominations. The majority of the Indonesians are Moslems. There are nearly 3m. Christians; their main strength is in Central and East Java, North Sulawesi, East Nusa Tengarra and the Moluccas. There are also about a million Buddhists, probably for the greater part Chinese. Hinduism flourishes on the island of Bali.

There are 30 Protestant bodies affiliated with the National Council of Churches in Indonesia, with about 4,000 congregations, 3,000 Indonesian ministers, 100 foreign missionaries and 2·2m. adherents.

The Roman Catholic Church had 1,129,000 members in 1962.

**EDUCATION.** The following table shows the number of schools, teachers and students in 1959–60:

| Schools | Number | Teachers | Students |
|---|---|---|---|
| Primary schools | 35,540 | 205,860 | 8,220,465 |
| Secondary schools | 6,742 | 57,953 | 731,262 |
| Universities and Academies | — | — | 69,000 |

English is the first foreign language taught in schools.

Higher education is given at the University of Indonesia at Djakarta and Bogor (9,038 students in 1956), the University of Gadjah Mada at Jogjakarta (11,772 students), Airlangga University at Surabaya, Malang and Bali (6,789 students), Andalas University (1956) at Bukittinggi, Pajakumbuh, Padang and Batusangkar (1,001 students), Hasanuddin University (1956) at Makasar and Tondano (1,224 students), Padjadjaran University (1958) at Bandung (4,720 students), the University of North Sumatra at Medan (2,000 students), and the Institute of Technology at Bandung (3,000 students), the State Institute of Islam (1960) at Jogjakarta, the Sriwidjaja University (1960) at Palembang and Tandjungkarang, the Lambung Mangkurat University (1960) at Bandjarmasin, the University of Sjah Kuala at Kutaradja, the University of Diponegoro at Semarang, the University of North and Central Sulawesi at Menado, the Institute of Technology at Surabaja and the new universities of Riau (at Pakanbaru), Maluku (at Ambon), East Nusa Tenggara (at Kupang), West Nusa Tenggara (at Mataram), and Tjenderawasih (at Kota Baru), Mulawarman (at Samarinda), Brawidjaja (at Malang) and Pantjasila (at Djakarta) universities. In 1961 a separate Department of Higher Education and Science was set up.

In 1963, 18% of the population were illiterate.

*Cinemas* (1962). There were 1,011 cinemas with a seating capacity of 470,000.

*Newspapers* (1961). There were 90 Indonesian daily newspapers and a number of English language papers. In Sept. 1960, 11 opposition papers were banned.

**JUSTICE.** The judicial organization is under the direction of the Minister of Justice. There are courts of first instance, high courts of appeal in the larger towns and a supreme court of justice for the whole of Indonesia in the capital.

In civil law the population is divided into three main groups: Indonesians, Europeans and foreign Orientals, to whom different law systems are applicable. When, however, people from different groups are involved, a system of so-called 'inter-gentile' law is applied.

The present Criminal Law, which has been in force since 1918, is codified and is based on European penal law. This law is equally applicable to all groups of the population. For private and commercial law, however, there are various systems applicable for the various groups of the population. For the Indonesians, a system of private and agrarian law is applicable; this is called Adat Law, and is mainly uncodified. For the other groups, the prevailing private and commercial law system is codified in the Private Law Act (1847) and the Commercial Law Act (1847). These Acts have their origins in the French *Code Civile* and *Code du Commerce* through the similar Dutch codifications. These Acts are entirely applicable to Europeans, whereas to foreign Orientals they are applicable with some exceptions, mainly in the fields of family law and inheritance.

**FINANCE.** The budget, for calendar years, was as follows (in Rp. 1m.):

| | *1959* | *1960* | *1961* | *1962* | *1963* | *1964* |
|---|---|---|---|---|---|---|
| Gross revenue | 21,100 | 44,000 | 66,000 | 61,010 | 272,024 | 391,001 |
| Gross expenditure | 29,000 | 46,000 | 82,650 | 97,996 | 305,618 | 392,777 |

The main sources of revenue in 1960 were direct taxes, Rp. 41,780·2m.

Main items of expenditure in the 1961 budget were (Rp. 1m.): Defence and security, 33,914; foreign affairs, 795; finance, 8,132; internal and regional affairs, 4,868; in the 1960 budget: supreme administrative body, 3,453; production 3,046·6; distribution, 1,782·8; welfare, 1,730; reconstruction and development, 1,179·1.

The consolidated external debt (1959 budget) was Rp. 7,277m., the internal debt was Rp. 4,544m. and the aggregate debt was Rp. 50,840m.

On 4 Aug. 1956 the Government declared that Indonesia no longer recognized any debts to the Netherlands. At that date the debts amounted to 4,081m. Dutch guilders. The Indonesian Government argued that of this amount only 661m. guilders were pre-war debts to the Netherlands, while the other 3,420m. guilders were incurred on account of the Netherlands 'war against Indonesia' and that consequently the Netherlands was actually in debt to Indonesia to the amount of 2,759m. guilders.

The budget of Dutch New Guinea in 1961 balanced at 156·1m. guilders, including a Netherlands government grant of 91·5m., the 1962 budget balanced at 170·1m. guilders, including a grant of 100·8m.

**DEFENCE.** The Indonesian Armed Forces were formally set up on 5 Oct. 1945. There is an emergency compulsory service.

**PRODUCTION.** At the beginning of Dec. 1957 the trade unions expropriated all Dutch-owned banks, trading firms, hotels, etc., which were then placed under government control. On 3 Dec. 1958 parliament passed a bill for the nationalization of all Dutch-owned businesses.

On 15 Aug. 1960 the National Planning Council produced the draft of the First National Overall Development Plan, which the Consultative Assembly subsequently ratified. The Plan aims at establishing 'Indonesian socialism', the first stage of which is to be completed by Dec. 1968. Rp. 240,000m. are to be spent on investment programmes during these 8 years.

In Nov. 1963 all business enterprises owned 'wholly or partly by Malaysian nationals or Indonesian nationals domiciled in Malaysia' were sequestrated by presidential decree.

*Agriculture.* Indonesian agriculture is divided between estate and smallholders cultivation.

The total cultivated area in use for estate agriculture in Indonesia in 1957 was 1,818,900 hectares (1,195 estates). Oil plays an important part in Indonesian economy, being a major source of revenue and providing employment for some 50,000. Indonesia is the principal producer of petroleum in the Far East, production coming from Sumatra, Kalimantan (Indonesian Borneo) and Java, where Anglo-Dutch and US interests operate. The 1962 output of crude oil was 27m. metric tons. Indonesian refinery capacity was about 15m. tons per annum at the end of 1959.

On 1 Nov. 1960 the Government announced a new regulation providing that all mineral oil and gas exploitation must be exclusively in the hands of Indonesian Government mining companies. Mining rights held by oil and gas companies issued before the new regulation will continue.

From 28 Aug. 1961 Anglo-Dutch and American oil companies have been operating as government contractors, the Government receiving 60% (formerly 50%) of the profits.

The oil output of Dutch New Guinea in 1961 was 161,274 metric tons.

In 1954, however, the Government bought up the shares held by KLM for 15m. guilders and nationalized GIA; and in Jan. 1958, the Government unilaterally terminated the contracts with the technical assistants provided by KLM. GIA maintains a direct service between Djakarta and Manila, Bangkok, Hong Kong and Tokyo. In 1961 GIA carried 335,000 passengers.

The following exchange rates were fixed on 27 May 1963: £1 = Rp. 882; US$1 = Rp. 315; Dutch fl. 1 = Rp. 87.

On 24 Aug. 1959 the currency denominations were reduced to a tenth of their nominal value.

Special bank-notes—called 'Irian Barat rupiah'—were issued on 1 May 1963 for the province of West Irian.

**BANKING.** The Bank Indonesia, formerly the Java Bank, established in 1828, was made the central bank of Indonesia on 1 July 1953. It has a capital of Rp. 25m.; a reserve fund of Rp. 18m. and a special reserve of Rp. 84m.; its gold and foreign exchange holdings, 31 Dec. 1957, amounted to Rp. 402m.

Bank Negara Indonesia with a capital of Rp. 300m. is a state bank and is designed to act as a source of credit for reconstruction purposes. Its gold assets, as of June 1956, amounted to US$257m.

The Bank Pembangunan Indonesia, with a capital of Rp. 500m., accords long-term credits for agricultural, industrial and mining projects.

The Bank Koperasi Tani & Nelajan has a capital of Rp. 24m. and mainly extends credits to co-operative societies and smaller business men.

There are 7 major commercial banks and 8 foreign banks; the latter include the Chartered Bank and the Hongkong and Shanghai Banking Corporation.

In Aug. 1961, 29,000 co-operative societies had a combined membership of 6m. and a capital of Rp. 957·5m.

The post office savings bank had, in Dec. 1961, deposits of Rp. 804·08 m. to the credit of 2·26 m. accounts.

**WEIGHTS AND MEASURES.** The metric system of weights and measures was officially introduced in Feb. 1923, and came into full operation on 1 Jan. 1938.

The following are the old weights and measures: *Pikol* = 136·16 lb. avoirdupois; *Katti* = 1·36 lb. avoirdupois; *Bau* = 1·7536 acres; *Square Pal* = 227 hectares = 561·16 acres; *Tjengkal* = 4 yd; *Pal* (Java) = 1,506 metres; *Pal* (Sumatra) = 1,852 metres.

## IRAN

### KESHVARÉ SHAHANSHAHIYÉ IRÂN

**REIGNING KING (SHAH). Mohammad Reza Pahlavi** (born 26 Oct. 1919), who was sworn before the Majles on 18 Sept. 1941 on the abdication of his father Reza Shah Pahlavi (died 26 July 1944), who after the overthrow of the Qajar dynasty had been elected shah on 13 Dec. 1925. After the dissolution of two former marriages, the Shah on 21 Dec. 1959 married Farah Diba, daughter of an army officer. *Heir apparent:* Prince Reza Pahlavi, born 31 Oct. 1960.

*Minister of the Court:* Hossein Ala, GCVO, CMG.

**CONSTITUTION AND GOVERNMENT.** In Jan. 1906 the Shah, up to then an absolute ruler, gave his consent to the establishment of a National Assembly, or 'Majles', which drew up a constitution, which received the Shah's approval on 30 Dec. 1906. The Constitution also provided for the establishment of a Senate, but this body was constituted only in Feb. 1950; 30 of its 60 members are nominated by the Shah, while the other 30 are elected. As the result of constitutional amendments approved in 1949 and 1957 the number of Majles deputies has been increased from the original 136 to 200 and the term of each Majles has been extended from 2 to 4 years; the Shah has the right to dissolve either or both houses of parliament and to return to the Majles finance bills for further consideration. All other legislation approved by parliament the Shah is obliged to sign and promulgate as law.

A programme of social reform designed by the Shah was approved on 26 Jan. 1963 in a nation-wide referendum by 5,598,711 votes against 4,115.

The Cabinet was in March 1964 composed as follows:

*Prime Minister:* Hassan Ali-Mansour.

*Agriculture:* Gen. Esma'il Riahi. *Development and Housing:* Dr Hushang Nahavandi. *Economy:* Dr Ali-Naqi Alikhani. *Education:* Dr Abdol-ali Jahanshahi. *Finance:* Amir Abbas Hoveida. *Foreign Affairs:* Abbas Aram. *Health:* Dr Jamshid Amuzgar. *Information:* Nosratollah Mo'inian. *Interior:* Dr Javed Sadr. *Justice:* Dr Baqer Ameli. *Labour:* Atta'ollah Khosravani. *Posts:* Dr Farhang Shafi'i. *Roads:* Dr Mahmud Kashfian. *War:* Gen. Assadollah Sani'i. *Water and Power:* Mansour Rouhani. *Ministers of State:* Dr Hadi Hedayati; Dr Mohamed Nassiri; Dr Nasser Yeganeh (*Parliamentary Assistant to the Prime Minister*); Dr Manuchehr Gudarzi (*Secretary-General of the High Administrative Council*). *Assistant Prime Ministers:* Gen. Hassan Pakravan (*Head of National Security*); Mehrdad Pahlbod (*Head of Fine Arts Administration*); Dr Qassan Rezai.

The country is divided into 10 *ustán* (administrative provinces) and 2 special provinces, each under an *ustándár* (governor-general). Tehran and its suburbs has its own governor-general resident in the city. The *ustán* are divided into *shahrestán* (counties), each under a *farmándár* (governor). The *shahrestán* are subdivided into *bakhsh* (districts) under a *bakhshdár* and *dehistán* (groups of villages) under a *dehdár*. Finally, each village has a *kadkhodá* (headman). All these officials, with the exception of the village headmen, are appointed, directly or indirectly, by the central government.

The *ustán* are numbered and named as follows: (1) Gilán, covering Zenján, Qazvin and Arák; capital Rasht; population 3m.; (2) Mázandarán, covering Gorgán, Semnán, Dámghán and Sháhrud; capital Sári; population 3·5m.; (3) eastern Azerbáiján; capital Tabriz; population 2·4m.; (4) western Azerbáiján; capital Rezáyeh; population, 800,000; (5) Hamadán, covering Kermánsháh and southern Kurdistán; capital Kermánsháh; population 2·2m.; (6) Khuzistán; capital Ahwáz; population 1·8m.; (7) Fárs; capital Shiráz; population 1·5m.; (8) Kermán; capital Kermán; population 1m.; (9) Khorásán; capital Meshed; population 1·3m.; (10) Esfahán and Yazd; capital Esfahán; population 1·5m. A re-division into 14 *ustán* is being planned.

The 5th and 8th *ustán* include within their boundaries the special provinces of Kurdistán (capital Sannandaj) and Baluchistán (capital Záhedán).

On 29 Jan. 1942 a treaty of alliance was signed in Tehrán between Great Britain, the USSR and Iran. The British and Soviet Governments undertook to respect the territorial integrity, sovereignty and political independence of Iran. At the Tehrán conference Mr Churchill, President Roosevelt and Marshal Stalin issued a 'Declaration of the Three Powers concerning Iran', dated 1 Dec. 1943, pledging respect for the integrity and independence of Iran and economic assistance.

On 3 Nov. 1955 Iran joined the Baghdad pact between Turkey, Iraq, Pakistan and Great Britain; now, without Iraq, known as CENTO (*see* p. 45).

*National flag:* Green, white, red (horizontal).

*National anthem:* Shahanshah é ma zendeh bad (words by Prince Afsar, tune by Da'ud Najmi Moghaddam).

**AREA AND POPULATION.** Iran has an area of about 1,621,860 sq. km (627,000 sq. miles), but a vast portion is desert, and the average density is only 13 inhabitants to the sq. km.

According to the results of the first general census taken in Nov. 1956, the population of Iran is 18,944,821. Estimate 1960, 20,849,000.

The principal cities, with population (census 1956) are: Tehrán, 1,512,082; Tabriz, 289,996; Esfahán, 254,708; Meshed, 241,989; Abadán, 226,083; Shiráz, 170,659; Kermánsháh, 125,439; Ahwáz, 120,098; Rasht, 109,491; Hamadán, 99,909; Qum, 96,499; Rezáyeh, 67,605; Qazvin, 66,420; Ardabil, 65,742; Yazd, 63,502; Kermán, 62,157; Arák, 58,998; Dizful, 52,121; Burujird, 49,186; Zanján, 47,159; Káshán, 45,955; Masjed-i-Suleimán, 44,651; Khorramshahr, 43,850; Sannandaj, 40,641; Khurramábád, 38,676; Marágheh, 36,551; Bábul, 36,194; Khuy, 34,491; Bandar Pahlavi, 31,349; Kázerum, 30,641; Sabsavár, 30,545; Najafábád, 30,422.

**RELIGION.** The official religion is the Shia branch of Islam, known as the *Ithna-'Ashariyya*, which recognizes 12 Imáms or spiritual successors of the Prophet Mohammad. Of the total population, 850,000 are of the Sunnî sect, 10,000 are Parsîs (Ghabrs), 40,000 Jews, 50,000 Armenians, 20,000 Nestorians and 7,600 Protestants.

The Shia Moslems reject the *Sunna* or tradition, as distinct from the actual text of the Koran, both of which are recognized by the Sunnî Moslems. The power of the clergy has diminished, as the result of the increased power of the central government. The highest authority is the leading *ayatullah*. The post is vacant after the death of the *ayatullah* Burujerdi in 1961.

All mosques and shrines have some endowments (*ouqáf*, sing. *vaqf*), now devoted to charitable and educational institutions and administered by the Ministry of Education. The shrines of some favourite saints are richly endowed and own extensive property.

The Gregorian National Armenians form 2 dioceses, each under a bishop, the one residing at Tabriz and the other at Esfahán. There are also a few thousand Roman Catholic Armenians, who have a bishop of their own rite at Esfahán, the bishop of the Latin rite residing at Rezayeh (Urmia). There is an Anglican bishop residing at Esfahán.

**EDUCATION.** A law providing for the gradual establishment of compulsory primary education was passed in July 1943. In 1960 schooling was available for two-thirds of the children of school age. The literate population is estimated at 40%.

The influence of the French educational system has been prominent. As in France, education is highly centralized. The curricula for primary and secondary schools are drawn up by the Ministry of Education.

The great majority of primary and secondary schools are state schools. Grants are made to private schools. Elementary education in state schools and university education are free; small fees are charged for state-run secondary schools. Textbooks are issued free of charge to pupils in the first 4 grades of elementary schools.

In 1963 there were 12,451 primary and 1,380 secondary schools with 1,719,426 and 341,905 pupils respectively. In addition, there were 114 vocational schools (12,198 pupils) and 41 institutions of higher education (24,456 students).

A campaign against adult illiteracy was launched in 1956; by 1961 some 420,000 students had been enrolled and over 1·5m. copies of specially compiled textbooks had been sold.

Higher education is provided by universities and technical colleges. In 1962 some 13,000 students were enrolled at Tehrán University (with 11 faculties; it also maintains a secondary teachers' training college and a midwifery school). There are also universities at Shiráz (letters, agriculture, science, medicine), Tabriz (letters, agriculture, science, medicine, pharmacy), Rezayeh (agriculture), Esfahán (letters, pharmacy, medicine), Meshed (medicine, letters, theology) and Ahwáz (agriculture, science, medicine). There are in Tehrán an Institute of Technology for the training of teachers of vocational subjects at secondary-school level, and a Polytechnic with institutes of mechanical, textile and electrical engineering and building construction. The National Iranian Oil Company maintains an institute of technology at Abadán. The Central Treaty Organization in 1959 set up an institute of nuclear science in Tehrán, and in 1961 opened an agricultural machinery and soil conservation training centre at Karaj near Tehrán, and in 1960 a vocational training centre south of Tehrán.

*Cinemas* (1962). There were 74 cinemas with a seating capacity of about 74,000.

*Newspapers.* There are numerous daily papers in Tehrán and other cities. Their circulation is relatively small, *Ettela'át* and *Kayhán* leading with about 65,000 each. Two English-language and a French-language daily appear in Tehrán.

**HEALTH.** The Ministry of Health controls the health of the country through the Department of Public Health, which has achieved some remarkable results in the fight against malaria; large areas along the Caspian and the Persian Gulf and in Azerbáiján are now free from malaria. Opium addiction has been greatly reduced, and the cultivation of the poppy has been practically eradicated. Programmes to combat tuberculosis, small pox, trachoma, venereal diseases, etc., have been introduced.

In 1962, about 20,000 hospital beds (half of them in Tehrán) were available. Medical personnel included 5,982 physicians and surgeons, 1,073 dentists, 4,000 pharmacists and 1,000 nurses. Numerous hospitals, health centres, dispensaries and maternal and child health clinics and 14 schools of nursing have been set up.

**JUSTICE.** The judicial system is modelled on that of France. There are justices of the peace in villages and small towns, higher courts in the larger towns, police magistrates in all important places, courts of appeal in Tehrán, Tabriz, Shiráz, Kermánsháh, Esfahán, Meshed, Kermán and Ahwáz, and a court of cassation, or supreme court, in Tehrán. The courts are supervised by the Ministry of Justice. New civil, criminal and commercial codes based on French and Swiss codes were introduced in the early 1930s.

**FINANCE.** Budget estimates for years ending 20 March (in 1,000 rials):

| | *1958–59* | *1959–60* | *1960–61* | *1961–62* | *1962–63* |
|---|---|---|---|---|---|
| Revenue . . . | 27,565,000 | 64,158,755 | 81,926,682 | 55,500,000 | 56,941,000 |
| Expenditure . . . | 29,029,000 | 65,267,541 | 81,024,105 | 57,000,000 | 59,151,000 |

The main items of estimated revenue in the budget for 1962–63 were (in 1m. rials): Direct taxation, 4,800; indirect taxation, 3,300; tobacco monopoly, 4,562; sugar monopoly, 7,012; Treasury share of oil revenues, 13,770; customs duties, 7,500; railways, 3,900. Main items of estimated expenditure (in 1m. rials): Defence, 12,500; police and gendarmerie, 3,800; education, 7,926; monopolies, 11,494; health, 1,562; communications, 5,093.

The position of credit, loan and free aid received by the Iranian Government during 1960 was as follows: (1) US$26·2m. from the USA Development Bank: (2) US$15m. from the Export-Import Bank; (3) US$22m. from the USA Government as aid.

In 1963 the USSR granted Iran a credit of 35m. roubles for a number of joint economic projects, including a dam on the river Aras.

**DEFENCE.** *Army.* The Army consists of about 170,000 men organized in 12 infantry divisions and 4 independent brigades. Two years' military service is compulsory. Gendarmerie strength is about 28,000. Its function is internal security in rural areas. A US Military Mission is attached in an advisory capacity to the Army and another to the Gendarmerie.

*Navy.* The Navy comprises 1 frigate, 3 corvettes, 4 coastal minesweepers, 4 patrol boats, 2 dispatch boats, 2 landing craft, 9 motor launches, 9 custom guard boats, the Imperial yacht, a tug, a tender and an oiler.

*Air Force.* In Aug. 1955 the Air Force became a separate and independent arm. In 1963 it comprised 4 wings, including a tactical fighter wing equipped with F-84G aircraft and a transport wing with 4 C-130B turboprop transports and smaller types. It had a total strength of some 5,000 officers and men, 75 jet and 65 piston-engined aeroplanes.

**PRODUCTION.** Iran's chief natural products are oil, wool, cotton, silk, fruit, nuts, cereals, vegetables, gum, timber, oil seeds, metalliferous ores, coal, cattle, sheep and goats. Its principal manufactured or processed products are textiles, carpets, skins, casings, vegetable oil, soap, metal products, plastic products, furniture, beet sugar, tea, tobacco and cigarettes, wine, vodka, soft drinks, caviar, footwear, petroleum products, glass products, tiles, bricks, cement, leather and leather goods, dairy products and manufactured foodstuffs, and printed matter.

*Development.* The third development plan 1962–68 envisages an expenditure of 140,000m. rials, of which 21·6% is to be allotted to agriculture and irrigation, 21·4% to communications, 18·7% to power and fuel, 16·7% to education and health, 13% to industry and mining. The Government is allocating to the plan a substantial share of Iran's oil revenues, the proportion rising by 5% annually to a maximum of 80% in the final year. It is hoped to obtain the balance of 40,000m. rials by borrowing, both foreign and internal.

*Agriculture.* Reliable statistics of production are not available. It is estimated, however, that out of 163·6m. hectares of land area only 16,857,000 are crop land (including 10,300 hectares fallow), 27·8m. hectares are forests and ranges and 32·7m. hectares are potentially cultivable waste.

Tractors in use numbered 8,000 in 1961–62.

Final crop returns for 1960–61, the last period for which statistics are available (in 1,000 metric tons): Wheat, 2,590; barley, 684; rice, 600; sugar beet, 588 (sugar, 1963: 160); dates, 141; raisins, 66; cotton, 100 (1963: 100·9); tea, 9·3.

Wool comes principally from Khorásán, Kermánsháh, Mázandarán and Azerbáiján. The most popular carpets are manufactured in the environs of Tabriz, Kermán, Arák, Káshán, Esfahán, Shiráz and Hamadán. Esfahán is the traditional textile manufacturing centre, but in recent years important textile mills, particularly cotton, have been built in other towns, including Tehrán. Exports of carpets were valued at 1,930·6m. rials in 1960–61.

Beet-sugar production was 468,479 metric tons in 1960–61.

Rice is grown largely on the Caspian shores.

Tobacco is grown along the shores of the Caspian. It is purchased by the Tobacco Monopoly and manufactured in the government tobacco factory at Tehrán. Production in 1960–61 was 12,000 tons of tobacco from 16,650 hectares.

Opium, until 1955, was an important export commodity in Iran. On 7 Oct. 1955 an Act was approved by Parliament to prohibit the cultivation and usage of opium. The cultivation of opium on a small scale and under strict Government supervision may again be contemplated once combat against the usage of it is complete.

Most of the 50,000 villages in Iran are owned by absentee landlords who treat the peasants as virtual serfs. Several land reform laws presented to the Majlis by the government remained ineffective and the only large-scale redistribution of land to smallholders was that of Crown property, which the Shah began in 1952. However, the latest land reform act, passed in Jan. 1962, is now being implemented.

*Livestock* (1959–60): 30m. sheep; 12·5m. goats; 5·5m. cattle; 2m. asses; 600,000 horses; 234,000 camels.

*Industry.* Apart from the oil industry, the industries employing most workers are textiles, sugar refining, flour milling, fruit processing, tea, furniture, printing, leather, matches, glass, building materials and light metal goods.

Production, 1963: Textiles, 240m. metres; yarn, 3·29m. bales; cement, 745,000 tons.

*Fisheries.* The Caspian Fisheries Co. (Shilát) is a government monopoly. Its catch in 1961–62 was 2,179 tons, including 177 tons of caviare.

*Mining.* Iran has substantial mineral deposits relatively undeveloped. Production figures for 1960–61 (in 1,000 tons): Iron ore, 57·6; copper, 12·4; lead, 100; zinc, 17; chromite, 68 (1961–62: 103; 1962–63: 109); salt, 130; coal, 230. Smaller quantities of antimony, manganese, turquoise ore and sulphur were also mined.

*Oil.* The exploitation of Iran's large oil resources was undertaken by the Anglo-Persian (later Anglo-Iranian) Oil Company, which held a concession for a considerable area of southern Iran, built a large refinery and produced the following quantities of crude oil (in long tons): 1946, 19,189,551; 1948, 24,871,058; 1950, 31,750,147; 1951 (Jan–Oct.), 16,176,000.

This concession was terminated as a result of the nationalization of the Iranian oil industry in 1951. The ensuing dispute (*see* THE STATESMAN'S YEAR-BOOK, 1954, p. 1294) led to the cessation of oil exports in June 1951, and of the company's operations in Iran in Oct. 1951. The dispute was finally settled on 5 Aug. 1954, and on 29 Oct. 1954, the date when the Shah signed it, an agreement came into force between the Iranian Government and the National Iranian Oil Company on the one hand, and 17 international oil companies on the other; of these, the British Petroleum Co. Ltd. holds 40% of the shares. These companies came to be known collectively as the Consortium.

The agreement is for 25 years with provision for three 5-year extensions, at the option of the Consortium under specific terms and conditions. Two operating companies—Iraanse Aardolie Exploratie en Producte Maatschappij (Iranian Oil Exploration and Producing Company) NV and Iraanse Aardolie Raffinage Maatschappij (Iranian Oil Refining Company) NV—were formed by Consortium member companies and they received the necessary rights and powers from Iran to be solely responsible respectively for exploration and production in a defined area in South Iran and for the operation of the Refinery of Abadan. While the National Iranian Oil Company, the shares of which are held by the Iranian Government, is the owner of the fixed assets of the oil industry in South Iran, the Operating Companies have the unrestricted use of them. The two Operating Companies do not sell the oil; their function is solely to produce and refine it. So-called Trading Companies, subsidiaries representing Consortium members, deal individually and independently of each other with the buying and selling in Iran of oil for export.

The National Iranian Oil Company was united in Jan. 1955 with the Iran Oil Company, whose object is the exploration and production of oil throughout Iran except in regions subject to special agreements. The National Iranian Oil Company operates the Naft-i-Shah oilfield and the Kermánsháh refinery in West Iran and is solely responsible for the distribution and marketing of oil in Iran. The net effect of the financial aspects of the sale of oil by the National Iranian Oil Company to the Trading Companies for export is to bring about an equal sharing between Iran and each Trading Company of the profits arising in Iran from the Trading Companies operations.

Total income to Iran from Trading and Operating Companies for 1960, £101·9m.; 1961, £103·9m.; 1962, £115·4m.

Crude oil production figures since the Consortium began operations in Oct. 1954 have been (in metric tons): 1955, 16m.; 1956, 26·3m.; 1957, 35·3m.; 1958, 40·4m.; 1959, 53·6m.; 1960, 50·1m.; 1961, 56·3m.; 1962, 64·5m.; 1963, 66m.

**Labour.** Legislation regulating conditions of employment in certain industrial undertakings was first introduced in 1949. The subsequent adoption of certain international minimum standards led to the enactment of the Labour Act of 1959, which establishes basic provisions dealing with hours of work; holidays with pay; the payment of wages, salaries and overtime; the formation, registration and activities of employers' and workers' organizations; employment contracts and collective agreements; the settlement of disputes; industrial safety, health and welfare; and labour inspection. Regulations concerning safety, health and welfare in industrial premises, conciliation procedure and the settlement of disputes, the formation, registration and activities of trade unions, the duties and powers of labour inspectors have since been promulgated. The employment of foreigners is controlled by regulations promulgated in 1960. Responsibility for the enforcement of the Labour Act, 1959, and supporting legislation is entrusted to provincial and district departments of labour.

According to a survey of manpower undertaken in 1958, the country's non-agricultural work force numbered about 1·37m., of whom nearly 70,000 were women and about 33,000 were under 13 years of age. Just over half (718,000) were engaged in crafts, production process and related occupations, while 18% were employed in sales and related occupations.

A system of social security benefits covering accident, sickness, retirement, death, marriage, maternity and childbirth and free medical attention and hospitalization for insured contributors and their families is embodied in the Workers' Social Insurance Law, 1960. This law provides for the insurance under the scheme of all workers in receipt of wages or salaries, but is at present being applied to some 250,000 workers employed mainly in industrial and mining establishments employing 10 or more workers. It also provides for the compulsory payment by employers of family allowances to workers with 2 or more children.

*Post.* Postal, telegraph and telephone services are administered by the Iranian Ministry of Posts, Telegraphs and Telephones.

The Indo-European Telegraph Company relinquished its lines in Iran in 1931, while the telephone system was nationalized in 1952. There is wireless-telegraph communication between Tehrán and Tabriz, Meshed, Kermánsháh, Kermán, Khorramshahr, Bushehr, Yazd, Shiráz and Lingeh and a wireless-telephone link between Tehrán and Tabriz. Tehrán is also in wireless communication with Europe and is linked by wireless telephone with Baghdad, London, Berne and New York. In 1963 the number of telephones was 150,000, of which some 73,000 were in Tehrán. Wireless sets numbered over 1m. in 1962.

Iran National Airlines Corporation, registered on 29 March 1962, has monopoly rights on all internal flights and also operates in the Persian Gulf. The Iranian Government owns 51% of its shares.

**MONEY.** The Iranian unit of currency is the *rial* subdivided into 100 *dinars*.

Notes in circulation are of denominations of 10, 20, 50, 100, 200 and 1,000 rials. Coins in circulation are bronze–aluminium and copper, 50 dinar; silver alloy, 1, 2, 5 and 10 rials, and nickel–copper, 1, 2 and 5 rials. There are also gold *pahlavi* and ½ *pahlavi* pieces containing 7·322382 and 3·661191 grammes of gold respectively which do not constitute part of monetary circulation, but have a market value as any other commodity.

The currency law of 21 Jan. 1954 provides that (*a*) at least 40% of the cover for the notes issued up to 21 Jan. 1954 is to consist of gold or foreign exchange convertible or guaranteed to be convertible into gold provided that at no time the gold cover is to fall below 35% of the note issue; (*b*) the maximum amount of gold or foreign exchange convertible or guaranteed to be convertible into gold which is to be held as cover, in addition to the 40% cover, for further note issues must not exceed the equivalent of US$30m., calculated at the rate of 32·25 rials per US$1; (*c*) the remainder of the cover up to 100% of the note issues is to consist of government obligations secured by the Crown jewels. In May 1957, however, a Note Reserve (Amendment) Act fixed the gold/rial parity rate at rials 75·75 per US$ and authorized the Bank Melli Iran to increase the note issue as required, provided a deposit of 100% backing in gold or gold-guaranteed currencies is made for any notes issued in excess of the 1954 Act.

The basis of the note cover was further revised by the Monetary and Banking Law of 1960, under which at least 40% of the total note issue must be covered by gold and foreign currencies, including Iranian Government subscriptions to the IMF, IBRD, etc.

Government control of foreign exchange was introduced on 1 March 1936. The official parity of the rial is 75·75 rials = US$1. This parity is used only in calculating the value of the gold and foreign exchange held as reserve for the note cover. The effective rates for all authorized foreign-exchange payments are· Buying, £1 sterling = 210 rials, US$1 = 75 rials; selling, £1 = 214·2 rials, $1 = 76·5 rials.

**BANKING.** The following banks are established in Iran: (1) Bank Markazi (Central Bank), which was officially established in 1961 under the Monetary and Banking Law of May 1960 to implement the monetary and credit policy of the country. The Irano-British Bank, the Bank of Iran and the Middle East, the Mercantile Bank of Iran and Holland, and the Bank of Iran and Japan opened in 1959.

The British Bank of Iran and the Middle East, formerly the Imperial Bank of Iran, founded in 1899, withdrew from Iran in 1952.

Most banks are now authorized to deal in foreign exchange.

**WEIGHTS AND MEASURES.** By a law passed on 8 Jan. 1933, the official weights and measures are those of the metric system.

# IRAQ

### AL JUMHOURIYA AL 'IRAQIA

**CONSTITUTION AND GOVERNMENT.** On 14 July 1958 the Republic of Iraq was declared by a group of Army officers, after an armed *coup d'état* in which the reigning King Faisal II and his uncle, the ex-Regent the Emir Abdul Ilah, and the Prime Minister, Nuri al Said, lost their lives. For the next 4 years the country was under the control of Gen. Qasim, who was executed on 9 Feb. 1963, following a *coup d'état* by the Army and Air Force on the previous day.

The republican régime terminated the adherence of Iraq to the Arab Federation (*see* THE STATESMAN'S YEAR-BOOK, 1958, p. 806).

The Organic Law of 1924 with all its amendments (*see* THE STATESMAN'S YEAR-BOOK, 1958, p. 1144) was annulled in the interim constitution of the new Republic, which was announced on 27 July 1958. Its provisions include the establishment of Iraq as an independent, sovereign and Islamic republic. The state is described as 'an integral part of the Arab nation', and emphasis is laid on the partnership of Iraqi Kurds and Arabs.

The National Council for the Revolutionary Command, which took office on 8 Feb. 1963, following the overthrow of Gen. Qasim, affirmed its adherence to the spirit of the 14 July Revolution. It abolished the Sovereignty Council, which had exercised the functions of the Presidency since

1958, and appointed a new President and Cabinet. It reached agreement with Kuwait on the question of Kuwaiti sovereignty, which Gen. Qasim had disputed, but failed to find a peaceful solution to the 2-year old Kurdish revolt. Increasing domination of the government by Ba'ath Party members and consequent estrangement from Egypt led to a military coup-d'état on 18 Nov. 1963, after the Ba'ath had been weakened by factionalism and the exile of several of its leaders.

*President:* Field-Marshal Abdul Salam Muhammad Arif. *Vice-President:* Brig. Ahmad Hassan Al-Bakr.

The cabinet formed on 20 Nov. 1963 is composed as follows:

*Prime Minister:* Lieut.-Gen. Tahir Yahya.

There are also a number of third-class magistrates courts, powers for this purpose being granted to municipal councils and a number of administrative officials. Some administrative officials are granted the powers of a peace judge to deal with cases of debts due from cultivators.

Special religious courts for non-catholic Christians at Baghdad, Basra and Mosul deal with matters of personal status such as divorce, separation and maintenance between husband and wife.

The prison population at the end of 1961 was 4,108 men and 59 women, including persons on remand and in the reformatory school.

*Police.* In 1959 the police force consisted of 19,182 officers and men. Of these, 2,996 belonged to the Mobile Force.

**FINANCE.** Revenue and expenditure (in 1,000 Iraqi dinars) for fiscal years ending 31 March:

| | *1958–59* | *1959–60* | *1960–61* | *1961–62* | *1962–63* [1] |
|---|---|---|---|---|---|
| Revenue . . . | 75,572 | 89,724 | 103,614 | 120,700 | 118,456 |
| Expenditure . . | 79,207 | 100,167 | 114,286 | 119,188 | 127,004 |

[1] Estimates.

The above figures relate to the ordinary state budget; development expenditure is financed through a separate budget. Until the 1959–60 budget, 70% of the Iraqi government's share of oil revenues was allocated to development, the remainder going to the ordinary state budget. In 1959, however, the proportions were altered and the amount assigned to development was to be not less than 50%.

Oil revenues account for over half, customs and excise for about a third of the total revenue. Defence and security take about two-fifths, education about a quarter of the expenditure.

The public debt was 58·9m. dinars on 31 Dec. 1962, including a Soviet loan of 17·3m. dinars.

**DEFENCE.** Military training is compulsory for all men when they reach the age of 18. This consists of 2 years' service with the colours and 18 years on the reserve. However, a man may volunteer for service in the army or change his conscript service into voluntary service. In such circumstances voluntary service is for 2 years, and he may extend it by periods of 2 years until he reaches the age of 45.

*Army.* The strength of the Iraqi Army is about 70,000, organized into 2 infantry divisions, one mountain division, 2 armoured divisions and Ministry of Defence troops. The infantry divisions are organized on the lines of British infantry divisions, while the mountain division differs only in its use of pack animals in addition to mechanical transport. The armoured divisions consist of 2 armoured and 2 infantry brigades. Ministry of Defence troops include an infantry brigade, 2 regiments of heavy anti-aircraft artillery and a Republican Guards battalion. Three-quarters of all equipment is of Russian origin.

Training establishments include a staff college, a military college for cadets, a senior officers' school, an infantry school and a school of artillery.

*Navy.* The navy comprises 12 *ex*-Soviet motor torpedo-boats, 3 *ex*-Soviet submarine chasers, 4 training craft, 4 river gunboats, a lighthouse tender, the *ex*-royal yacht and a tug.

*Air Force.* The Iraqi Air Force in Oct. 1963 consisted of 11 squadrons, of which 2 were equipped with British-built Hunter and Venom ground attack aircraft, and the remainder with Soviet types, including Tu-16 medium bombers, Il-28 light bombers, MiG-21 day interceptors, MiG-17d night fighters, MiG-19 and MiG-17c day interceptor and ground attack fighters, Mi-4 helicopters, and An-12 heavy and An-2 light transports. A few Bristol Freighters, Herons and Doves are used in a transport/communications role, while Vampire T.11, Provost T.1 and Chipmunks are employed with Soviet U-MiG-15 and Yak 11 trainers in the Air Force College. Total strength is about 250 operational and training aircraft. Eighteen additional Hunter fighters and 2 Hunter two-seat trainers were ordered in 1963 and some Jet Provost trainers in 1964.

**PRODUCTION.** Iraq is a land of great potentialities. The soil of the country is rich, but there are vast areas which can be cultivated only if irrigated by canals or pumps. The Irrigation Department operates several canal systems, new dams have been completed and other irrigation works are under construction.

A 5-year economic plan 1961/2–1965/6 envisages total investments of I.D.566·3m., of which 112·2m. are allocated to agriculture, 166·8m. to industry, 136·9m. to transport and communications, 140·1m. to housing and 10m. to servicing the external debt. Oil revenues are to provide 316m., Soviet and Czech loans 77·2m.

*Agriculture.* An Agrarian Reform Law, issued in Sept. 1958, limits land ownership to 1,000 dunums for flow-irrigated land and to 2,000 dunums for rain-irrigated land.

In 1957–58, 15m. *mesharas* were planted, 13m. lay fallow, 2m. were uncultivable, 595,000 were orchards and vineyards, 18,000 were pasture and 45,000 woodland. About 13m. *mesharas* were irrigated.

The chief winter crops are wheat (1960–61: 857,000 tons) and barley (1960–61: 911,000 tons). The chief summer crop is rice (1961: 68,500 tons). The date crop is important (average yearly production, 350,000 tons), the country furnishing about 80% of the world's trade in dates (exports, 1962, 229,000 tons); the chief producing area is the totally irrigated riverain belt of the Shatt-el-Arab. Wool is also an important export (1962: 3,918 tons). In 1962, 1,644 tons of cotton were exported.

Livestock (1960): Cattle, 85,583; buffaloes, 44,392; sheep, 5,598,292; goats, 1,743,300; horses, 194,631; asses, 526,403; mules, 100,830; these figures do not include the livestock held by nomadic tribes.

*Forestry.* Up to 1961, 614,952 donums have been demarcated and surveyed in Arbil, Mosul and Sulaimaniya Liwas.

*Industry.* Industrial and constructional establishments in 1960 numbered 1,236, employing a total of 106,000 persons. Constructional establishments employed the largest number of workers, 25,569, followed by the oil industry with 13,198. Other large employers were the brick industry, water and electricity services, date packing, the textile industry, cigarette factories, oil refining and the cement industry. Iraq is still relatively under-developed industrially, but work has begun on 13 new industrial plants which are being established with Soviet equipment and technical assistance. A light-industries company was formed in 1960 to foster smaller industries.

*Oil.* The greater part of Iraq's oil production comes from the Iraq Petroleum Company's field at Kirkuk (found in 1927). This company, an international group, has constructed pipelines to the Mediterranean, including one to Banias on the Syrian coast, with a throughput of about 35m. tons in 1960. The Mosul Petroleum Co. Ltd holds a concession for oil covering Iraqi territory west of the Tigris and north of the 33rd parallel of latitude. Oil was found at Ain Zalah, north-west of Mosul, and the company has laid a pipeline from there to Baiji. The Basra Petroleum Company have been granted a concession for oil covering the southernmost part of Iraq (the old Basra vilayet). High-grade quality oil has been found here, and production started in Dec. 1951. Production at the oilfield of Rumaila started in Dec. 1954; its pipeline is linked to the Zubair–Fao system. An oilfield near Khanaqin, in the area known as the Transferred Territories near the Iranian frontier, was, until Nov. 1958, operated by the Khanaqin Oil Company, a subsidiary of the British Petroleum Company, and is now being operated by the Iraqi Government. There is a pipeline to a refinery near Khanaqin. Oil for consumption in Iraq is refined by the government oil refineries administration (GORA) and is distributed and marketed in Iraq at cheap prices by the Ministry of Oil.

Under an agreement dated 3 Feb. 1952 between the Government and the Iraq, Basra and Mosul Petroleum Companies, the Government receives 50% of the profits before the deduction of foreign taxes, and in any case not less than I.D.25m. in 1955 and thereafter, from which date onward the minimum rate of oil-production will be 30m. tons annually. On 11 Dec. 1961, on the severance of the negotiations with the oil companies, the Iraqi Government enacted a law defining the areas in which the Iraq Petroleum Company and its associates may carry out operations. The defined areas total less than ½% of the concessions.

The total crude petroleum exported by the Iraq Petroleum Company and its associates was (in 1,000 long tons) 34,931 in 1958, 41,988 in 1959, 46,534 in 1960, 48,049 in 1961 and 48,214 in 1962. Revenue received by the Iraqi Government from oil amounted to I.D.79·9m. in 1958, I.D.86·5m. in 1959, I.D.95m. in 1960, I.D.94·82m. in 1961 and I.D.95·11m. in 1962.

An oil refinery (annual output, 1m. tons) at Daura near Baghdad, and a bitumen refinery (annual output 60,000 tons) at Gayyarah in the Mosul district both started production in 1955 under the direction of the GORA. The capacity of the Daura refinery has been doubled by 1958, but production at the Gayyarah bitumen plant was suspended in Aug. 1958. A lubricating oil plant (annual output, 25,000 tons) had been added to the Daura refinery and started production in May 1957. A new refinery with a capacity of 1·3m. tons is planned at Basra.

**COMMUNICATIONS.** *Shipping.* In 1961, 2,256 vessels of 10,862,047 NRT entered the Port of Basra; 653 vessels of 2,763,329 NRT were British.

*Railways.* The Iraqi state railway system consists of a metre-gauge line from Basra, at the head of the Persian Gulf, to Baghdad, 669·2 km. At Baghdad the line crosses the river Tigris by a combined road and rail bridge and then extends through Juloula (Qaraghan), which is 147·8 km from Baghdad on to Kirkuk 321·8 km, thence to the terminal station of Arbil 104·9 km. Khanaqin on the Iraqi–Iranian frontier is served by a branch line from Juloula (27·9 km). There is also a standard gauge (4 ft 8½ in.) line from Baghdad to Tel-Kotchek (528 km) on the Syrian frontier, following the right bank of the Tigris *via* Mosul; it links with the Syrian railway system at Tel-Kotchek, thus establishing a through service from the Persian Gulf of Turkey, Egypt and Europe. The total length of track open in 1961 was 2,019 km, including 349 km of sidings.

The Iraq Railways are engaged in converting the Baghdad–Basra railway from metre to standard gauge with equipment and technical assistance provided by the Soviet Union.

*Roads.* About 4,550 miles of roads and tracks have been developed for vehicular traffic. The main surfaced roads are: (1) the road north from Baghdad *via* Kirkuk, Arbil and Mosul to a point near the Turkish frontier at Zakho, with branches from Kirkuk to the Kurdish province of Sulaimaniya, from Arbil to the Iranian frontier, and from Mosul to Sinjar; (2) about 350 miles of the main road west from Baghdad to the Jordan frontier; (3) the road east of Baghdad, which connects the road system of Iran near Khanaqin; and (4) the road south from Baghdad to Hilla and the holy city of Kerbela.

Vehicles registered in 1961 included 34,306 passenger cars, 14,242 taxis, 16,829 lorries, 5,590 buses.

*Post.* In 1961 there were 270 post and telegraph offices and 170,775 miles of telephone and telegraph wires. Wireless telegraph services exist with UK, USA, UAR, Lebanon and Saudi Arabia, and wireless telephone services with UK, USA, Italy, UAR and USSR. Telephones, 31 March 1962, numbered 54,434, of which 30,650 were in Baghdad and 5,160 in Basra.

*Aviation.* Baghdad and Basra airports are served by BOAC, Lufthansa, Alitalia, Swissair, KLM, Middle East Air Lines, Pan American Air Services, Iraqi Airways, Iranian Airways, Misrair, Air Liban and other companies In 1961 there arrived by air 68,133 passengers, 1,375 metric tons of goods and mail; 69,802 passengers, 574 metric tons of goods and mail left Iraqi airports.

**CURRENCY.** The monetary unit is the *Iraqi dinar* (I.D.) = 1,000 *fils* = 5 *riyals* = 20 *dirhams* = £1 sterling. Silver alloy coins for 100 and 50 fils (*Dirham*) and 25 fils are in circulation, and other coins for 10, 5 and 1 fils. Notes are for ¼, ½ and 1 dinar, and for 5 and 10 dinars. The total currency in circulation in Dec. 1962 amounted to 85·2m. dinars. The currency was formerly controlled by an Iraqi Currency Board sitting in London, but was taken over by the National Bank of Iraq on 1 July 1949, which in 1956 was re-named the Central Bank of Iraq.

**BANKING.** The British banks are the British Bank of the Middle East and the Eastern Bank, with branches in the chief towns. In 1941 the Rafidain Bank, financed by the Iraqi Government, was instituted to carry out normal banking transactions with head office in Baghdad and branches in the chief towns and abroad, including London.

Other banks are the Arab Bank, the Commercial Bank of Iraq, the Credit Bank of Iraq, the United Bank of Iraq, the Bank of Baghdad, the Federal Bank of the Lebanon and the National Bank of Pakistan.

In addition, there are 4 government banks which are authorized to issue loans to companies and individuals: the Industrial Bank, the Agricultural Bank, the Estate Bank and the Mortgage Bank.

In Dec. 1962 post office savings amounted to 3,870,841 dinars held by 98,892 depositors.

**WEIGHTS AND MEASURES.** The metric system is gradually being introduced and is mandatory for linear measures, but native weights and measures are still met with, the principal ones being: *Hogga* = 2·8 lb.; *man* = 56 lb.; *wazna* = 224 lb.; *tughar* = 4,480 lb.; *dhar* = 29·38 in. # IRISH REPUBLIC

ÉIRE

**HISTORY.** In April 1916 an insurrection against British rule took place and a republic was proclaimed. The armed struggle was renewed in 1919 and continued until 1921. The independence of Ireland was reaffirmed in Jan. 1919 by the National Parliament (*Dáil Éireann*), elected in Dec. 1918.

In 1920 an Act was passed by the British Parliament, under which separate Parliaments were set up for 'Southern Ireland' (26 counties) and 'Northern Ireland' (6 counties). The Unionists of the 6 counties accepted this scheme, and a Northern Parliament was duly elected on 24 May 1921. The rest of Ireland, however, ignored the Act.

On 6 Dec. 1921 a treaty was signed between Great Britain and Ireland by which Ireland accepted dominion status subject to the right of Northern Ireland to opt out. This right was exercised, and the border between *Saorstát Éireann* (26 counties) and Northern Ireland (6 counties) was fixed in Dec. 1925 as the outcome of an agreement between Great Britain, the Irish Free State and Northern Ireland. The agreement was ratified by the three parliaments.

Subsequently the constitutional links between *Saorstát Éireann* and the UK were gradually removed by the *Dáil.* The remaining formal association with the British Commonwealth by virtue of the External Relations Act, 1936, was severed when the Republic of Ireland Act, 1948, came into operation on 18 April 1949.

*National flag:* Green, white, orange (vertical).

*National anthem:* The Soldier's Song (words by P. Kearney; tune by P. Heaney).

**CONSTITUTION AND GOVERNMENT.** The Irish Republic is a sovereign independent, democratic state. Its parliament exercises jurisdiction in 26 of the 32 counties of Ireland.

The first constitution of the Irish Free State came into operation on 6 Dec. 1922. Certain provisions which were regarded as contrary to the national sentiments were gradually removed by successive amendments, with the result that at the end of 1936 the text differed considerably from the original document. On 14 June 1937 a new constitution was approved by Parliament (*Dáil Éireann*) and enacted by a plebiscite on 1 July 1937. This constitution came into operation on 29 Dec. 1937. Under it the name Ireland (Éire) was restored.

The constitution applies in theory to the whole of Ireland, but it provides that, pending the reintegration of the national territory, the laws enacted by the Parliament established by the constitution shall have the same area and extent of application as those of the Irish Free State.

The *Oireachtas* or National Parliament consists of the President of the Republic and two Houses, viz., a House of Representatives, called *Dáil Éireann*, and a Senate, called *Seanad Éireann*, consisting of 60 members. The *Dáil*, consisting of 144 members, is elected by adult suffrage. Of the 60 members of the Senate, 11 are nominated by the *Taoiseach* (Prime Minister), 6 are elected by the universities, and the remaining 43 are elected from 5 panels of candidates established on a vocational basis, representing the following public services and interests: (1) National language and culture, literature, art, education and such professional interests as may be defined by law for the purpose of this panel; (2) Agriculture and allied interests, and fisheries; (3) Labour, whether organized or unorganized; (4) Industry and commerce, including banking, finance, accountancy, engineering and architecture; (5) Public administration and social services, including voluntary social activities. The electing body is a college of about 900 members, comprising members of the *Dáil*, Senate, county boroughs and county councils.

A maximum period of 90 days is afforded to the Senate for the consideration or amendment of Bills sent to that House by the *Dáil*, but the Senate has no power to veto legislative proposals.

No amendment of the constitution can be effected except with the approval of the people given at a referendum.

Irish is the first official language; English is recognized as a second official language.

For further details of the Constitution *see* THE STATESMAN'S YEAR-BOOK, 1952, pp. 1123–24.

*President of the Republic:* Éamon de Valéra (installed on 25 June 1959).

The President holds office for 7 years. Remuneration £5,000 per annum. The office carries a pension of £1,200 per annum.

*Former Presidents:* Dr Douglas Hyde (1938–45); Seán T. O Ceallaigh (1945–59; 2 terms).

General elections were held on 4 Oct. 1961: Fianna Fáil, 70 (1957 election, 78); Fine Gael, 47 (40); Labour Party, 16 (12); Clann na Poblachta, 1 (1); Clann na Talmhan, 2 (3); Independents, 6 (7); National Progressive Democrats, 2 (2); Sinn Fein, 0 (4).

There are no formal party divisions in the Senate.

The Fianna Fáil Government, formed on 11 Oct. 1961, consists of the following members:

*Taoiseach* (*Prime Minister*): Seán F. Lemass.
*Tánaiste* (*Deputy Prime Minister*) *and Minister for Health:* Seán Mac an tSaoi (Seán MacEntee).

LOCAL GOVERNMENT. There are 27 administrative counties and 4 county boroughs governed by councils which are elected quinquennially. The county councils administer county affairs generally, can hold property, levy rates and borrow money. The county borough council possesses, with certain exceptions, the powers of a county council.

The administrative counties include the urban county districts, which are urban areas that have been constituted sanitary districts. Each such district is governed by an elected council that administers the Acts relating to sanitary services, housing, urban roads, etc., and is the sole rating authority within its area. There are 56 urban sanitary districts and 28 towns constituted under the Towns Improvement (Ireland) Act, 1854, which are not urban sanitary districts. These towns have elected town commissioners who exercise certain minor powers.

The county and county borough councils, the urban district councils and other elective bodies have a system of government which combines an elected council with a manager. The manager for a county is, by virtue of his office, the manager for every elective body in the county. These councils have certain specified functions including the making of a rate, raising loans and making bye-laws. All functions formerly exercised by the councils other than those now specifically reserved by law are exercised by the manager, a paid official, who has control over all officers, and whose removal from office is, like theirs, subject to the sanction of the central authority.

Elected members of local authorities are not paid, but provision is made for payment of travelling expenses and subsistence allowances.

Elections to county and county borough councils, urban district councils and town commissioners are held according to the principle of proportional representation by means of the single transferable vote. A person who is of full age and not subject to any legal disability is entitled to be registered once in each electoral area as a local-government elector at the place of ordinary residence on a qualifying date or in respect of lands or premises occupied as owner or tenant during a qualifying period. Women are eligible for election as members of all local-government bodies in the same manner and on the same conditions as men.

A central body called the Local Appointments Commission is charged with the duty of selecting suitable persons to be appointed by local authorities to chief executive offices, professional offices and other prescribed offices. Where a prescribed office is not being filled by promotion, the local authority must request the Commissioners to recommend to them a suitable person. The Commissioners normally select persons for appointment by the machinery of selection boards.

A scheme of combined purchasing has been established in order to enable local authorities to obtain commodities of standard quality at the lowest possible price. Official contractors are appointed annually by the Minister for Local Government on the recommendation of an Advisory Committee.

**EDUCATION.** *Elementary.* Elementary education is free and is given in 4,867 national schools. The average daily enrolment of pupils in 1961–62 was 484,618; the percentage average daily attendance, 87; the number of teachers of all classes, 14,552. There are 6 state-aided training colleges.

The estimated state expenditure on elementary education for 1963–64 is £12.659,500, excluding the cost of administration.

Since the establishment of the State in 1922, the Irish language has been an essential part of the curriculum for all schools subsidized by the Government. In 138 national schools in the English-speaking areas, Irish is the medium of instruction in all subjects except English itself. The number of children whose home language is Irish is about 10,000.

*Secondary.* The secondary schools are under private control and are conducted in many cases by religious orders; all schools receiving grants from the State are open to inspection by inspectors of the Department of Education. The number of recognized secondary schools during the school year 1962–63 was 557, and the number of pupils between the ages of 12 and 20 years in attendance was 84,916. Estimated total state expenditure for 1963–64 is £3,745,000, excluding the cost of administration.

*Continuation and Technical.* Vocational schools and temporary centres are controlled by the local Vocational Education Committees, and are maintained partly by the rates and partly by state grants. The estimated state expenditure for 1963–64 is £2,255,200, exluding the cost of administration, and the expenditure from the local rates, £1,019,878.

*Agricultural.* Full-time instruction in agriculture is provided for all sections of the farming community. There are 2 state agricultural schools for young men, administered by the Department of Agriculture, and 6 private state-aided agricultural colleges, at each of which a one-year course in agriculture is given. Scholarships tenable at these institutions, all of which are residential, are awarded by the County Committees of Agriculture. In addition, most County Committees award second-year scholarships—tenable at one of the private state-aided colleges—to young men who have attended a first-year course at an agricultural school or college. There are also provided at another state residential school short courses in agriculture, generally of 2–4 weeks' duration. The County Committees also conduct winter classes in agriculture and horticulture at convenient local centres. A more comprehensive course of instruction is provided in winter farm schools. Committees of Agriculture and Vocational Education Committees co-operate in conducting these schools, which are intended, in general, for persons of not less than 18 years of age who are engaged in farming.

For young women a one-year course is provided, mainly in dairying, poultry-keeping and domestic economy subjects at 12 state-aided residential schools and one of the agricultural colleges. The County Committees of Agriculture award scholarships tenable at these institutions. Classes for the instruction of young women in poultry-keeping, butter-making and cheese-making are also organized at convenient rural centres by County Committees of Agriculture. More advanced training for young women is provided at the Munster Institute, Cork, a residential school administered by the Department of Agriculture. A 2-year course in horticulture is provided by the Department of Agriculture at the National Botanic Gardens, Dublin. Rural science (including practical gardening and surveying) is taught in some 100 day vocational schools throughout the country.

Instruction of University status is provided by the University Colleges at Dublin, Galway and Cork, and at Trinity College, Dublin.

Education in veterinary medicine and surgery is provided at the Veterinary College, Dublin.

*University Education* is given at the University of Dublin (Trinity College), founded in 1591, and at the National University of Ireland, founded in Dublin in 1909. The latter has 3 constituent colleges, namely, the University Colleges of Dublin, Galway and Cork, and a recognized college at St Patrick's, Maynooth. Statistics for the academic year 1961–62:

*Cinemas* (1961). There were 183 cinemas, with a seating capacity of about 152,000.

*Newspapers* (1963). There are 7 daily newspapers (all in English) with a combined circulation of 634,981; 5 of them are published in Dublin (circulation, 552,410).

**SOCIAL WELFARE.** Social-welfare services concerned primarily with income maintenance are under the general control of the Minister for Social Welfare. The services administered by the Department of Social Welfare are divided into Insurance and Assistance schemes.

*Insurance Services.* Non-manual employees earning up to £800 a year and all manual employees irrespective of their earnings are compulsorily insured from age 16 to 70 years and pay weekly contributions. (The insured population is approximately 712,000.) Subject to appropriate statutory conditions (but without regard to the recipients' means) the following insurance benefits are available: Disability benefit, unemployment benefit, widow's pension, orphan's allowance, marriage benefit, maternity benefit, treatment benefit and old-age pension. The cost of these benefits is borne by a Social Insurance Fund, which is maintained on a tripartite basis by (approximately equal) contributions from employers and employees, supplemented by a state grant sufficient to keep the Fund in equilibrium.

*Assistance Services.* Children's allowances are payable without a means test in respect of each child under 16 years of age normally residing with the claimant. The following Assistance services are subject to means and, sometimes, residence tests: Non-contributory widows' and orphans' pensions to the survivors of persons whose lack of insurance (or inadequate insurance record) precludes payment of contributory pensions; old age pensions payable at age 70 to persons not entitled to insurance pensions; blind pensions (under the same general conditions as apply to old age pensions) payable at age 21; unemployment assistance payable during unemployment to persons not entitled to receive unemployment benefit. A person unable to provide the necessaries of life for himself is eligible for public assistance; failing assistance in an institution, such a person must be given home assistance, generally in the form of a cash payment on a weekly basis, but, in particular cases, in kind.

**HEALTH SERVICES.** Persons in the lower income group (those who are unable to provide medical services from their own resources, and their dependants) are entitled to free general medical practitioner attention, including any medicines or appliances that may be necessary, free hospital and specialist treatment, free maternity care and infant-welfare services, free dental, ophthalmic and aural treatment and appliances, and free mental-hospital treatment. Persons in the middle income group (*i.e.*, those outside the lower income group in the categories made up of insured workers, persons whose yearly means are less than £800, farmers with a rateable valuation of £50 or less, and dependants of such persons) are entitled to hospital (including mental hospital) treatment at a charge not exceeding 10*s.* a day, specialist treatment (with a small charge for out-patients) and free maternity care and infant-welfare services. Hospital treatment for tuberculosis and certain other infectious diseases is provided free of charge to all classes of the community. Pupils of national (elementary) schools are provided with a free school health-examination service and are also eligible for free hospital and specialist treatment and free dental, ophthalmic and aural services for defects discovered at school health examinations. A free child-welfare clinic service for children under 6 years of age is available in many urban areas. All these services are provided by local health authorities under the direction and control of the Minister for Health. The local health authorities are generally the County Councils, but the Dublin, Cork, Limerick and Waterford health authorities provide the services in both the city and county areas in each case.

**JUSTICE.** The Constitution provides that justice shall be administered in public in Courts established by law by Judges appointed by the President on the advice of the Government. The jurisdiction and organization of the Courts are dealt with in the Courts (Establishment and Constitution) and the Courts (Supplemental Provisions) Acts, 1961. These Courts consist of Courts of First Instance and a Court of Final Appeal, called the Supreme Court. The Courts of First Instance are the High Court with full original jurisdiction and the Circuit and the District Courts with local and limited jurisdiction. All Judges are independent in the exercise of their judicial functions. A Judge may not be removed from office except for stated misbehaviour or incapacity and then only on resolutions passed by both Houses of the *Oireachtas*. Judges of the Supreme, High and Circuit Court are appointed from among practising barristers. Judges of the District Court (called District Justices) may be appointed from among practising barristers or practising solicitors.

The Supreme Court, which consists of the Chief Justice (who is *ex officio* an additional Judge of the High Court) and 4 ordinary judges, has appellate jurisdiction from all decisions of the High Court and, on questions of law, from all decisions of the Circuit Court in Workmen's Compensation cases. The President may, after consultation with the Council of State, refer a Bill, which has been passed by both Houses of the *Oireachtas*, to the Supreme Court for a decision on the question as to whether such Bill or any provision or provisions thereof is or are repugnant to the Constitution.

The High Court, which consists of a President (who is *ex officio* an additional Judge of the Supreme Court) and 6 ordinary judges, has full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal. In all cases in which questions arise touching the validity of any law having regard to the provisions of the Constitution, the High Court alone exercises original jurisdiction. The High Court on Circuit acts as an appeal court from the Circuit Court.

The Court of Criminal Appeal consists of the Chief Justice or an ordinary Judge of the Supreme Court, together with either 2 ordinary judges of the High Court or the President and one ordinary judge of the High Court. It deals with appeals by persons convicted on indictment where the appellant obtains a certificate from the trial judge that the case is a fit one for appeal, or, in case such certificate is refused, where the court itself, on appeal from such refusal, grants leave of appeal. The appeal is heard and determined by the Court of Criminal Appeal on the report of the official stenographer present at the trial, with power to the court to hear further evidence or to refer any matter back for report by the trial judge. The decision of the Court of Criminal Appeal is final, unless that court or the Attorney-General certifies that the decision involves a point of law of exceptional public importance, and that it is desirable that an appeal should be taken to the Supreme Court.

The Central Criminal Court consists of a Judge or judges of the High Court, nominated by the President of the High Court. At the President's direction, 2 or more judges may sit together as a court for a particular case. The Court sits at such times and in such places as the President of the High Court may direct, and tries criminal cases which are outside the jurisdiction of the Circuit Court or which may be sent forward to it for trial from the Circuit Court on the application of the Attorney-General or the accused person. The Central Criminal Court invariably sits in Dublin.

The country is divided into a number of circuits for the purposes of the Circuit Court. The President of the Circuit is *ex officio* an additional judge of the High Court. The jurisdiction of the court in civil proceedings is limited to £600 in contract and tort and £2.000 in equity (including probate and administration), save by consent of the parties, in which event the jurisdiction is unlimited. In actions founded on hire-purchase and credit-sale agreements, jurisdiction is limited to £1.000. In criminal matters, it has jurisdiction in all cases except murder, treason, piracy and allied offences. The Circuit Court acts as an appeal court from the District Court.

The District Court has a summary jurisdiction in a large number of criminal cases where the offence is not of a serious nature. In civil matters the Court has jurisdiction in contract and tort (except slander, libel, criminal conversation, seduction, slander of title, malicious prosecution and false imprisonment) where the claim does not exceed £50; in proceedings founded on hire-purchase and credit-sale agreements, the jurisdiction is £100.

All criminal cases, except those of a minor nature, are tried by a judge and a jury of 12. Juries are also used in very many civil cases. In a criminal case the jury must be unanimous in reaching a verdict, but in a civil case the agreement of 9 members is sufficient.

STATISTICAL INFORMATION. The Central Statistics Office (The Castle, Dublin) was established in June 1949, and is attached to the Department of the Taoiseach; *Director:* M. D. McCarthy, MA, PhD.

The Central Statistics Office took over the work carried out since 1922 by the Statistics Branch, Department of Industry and Commerce, which in turn had continued the statistical work carried out by the Department of Agriculture and Technical Instruction (since 1900) and by the Irish Department of the Ministry of Labour, London (since 1919). Vital statistics from 1864, annual agricultural statistics prior to 1900 and decennial census of population were compiled by the Registrar-General for Ireland. The population censuses were carried out in 1926, 1936 and 1946 by the Statistics Branch of the Department of Industry and Commerce and are now the responsibility of the Central Statistics Office, which has also, as from July 1950, taken over from the Registrar-General the compilation of Vital Statistics. The Statistics Act 1926 confers wide powers for the collection, compilation and publication of statistics. Other Acts under which statistics are collected are Workmen's Compensation Act, Merchant Shipping Act, Customs Consolidation Act and Road Transport Act.

Principal publications of the Central Statistics Office are *National Income and Expenditure* (annually), *Statistical Abstract* (annually), *Census of Population Reports*, *Census of Industrial Production Reports*, *Trade and Shipping Statistics* (annually and monthly), *Trend of Employment and Unemployment* (annually), *Reports on Vital Statistics* (annually), *Irish Trade Journal and Statistical Bulletin* (quarterly).

# ISRAEL

### Medinat Israel—State of Israel

**CONSTITUTION AND GOVERNMENT.** Israel is an independent sovereign republic, established by proclamation on 14 May 1948. For the history of the British Mandate, *see* The Statesman's Year-Book, 1920–49, under Palestine.

A proposal to enact a written Constitution has been rejected by the Knesset. Instead it was decided to enact from time to time fundamental laws which, taken together, would form a Constitution. There are, however, a number of ordinary laws dealing with constitutional matters, such as the Law and Administration Ordinance, 1948, the Knesset Elections Law, 1955, the State President (Tenure) Law, 1951, the Judges Law, 1953, and the State Comptroller Law, 1949. The Law of Return, 1950, providing that 'Every Jew shall be entitled to come to Israel as an immigrant', the Nationality Law, 1952, and the Women's Equal Rights Law, 1951, also belong to this type of constitutional legislation.

*National flag:* White with 2 horizontal blue stripes, the blue Shield of David in the centre.

*National anthem:* Hatikvah (The Hope). Words by N. N. Imber (1878); adopted as the Jewish National Anthem by the first Zionist Congress (1897).

The Knesset, a one-chamber parliament, consists of 120 members. It is elected for a 4-year term by secret ballot and universal direct suffrage. The system of election is by proportional representation. After the elections of 15 Aug. 1961 the Knesset was composed as follows: Mapai (Labour Party), 42; Herut, 17; Liberals, 17; National Religious Front (Hapoel Hamizrahi and Mizrahi), 12; Ahdut Avoda, 8; Mapam (United Workers Party), 9; Agudat Israel, 4; Poalei Agudat Israel, 2; Communists, 5; Co-operation and Fraternity (Arab), 2; Progress and Development (Arab), 2.

The President is elected by the Knesset by secret ballot by a simple majority; his term of office is 5 years.

*President of the State:* Zalman Shazar, elected on 21 May 1963, after the death (on 23 April) of President Izhak Ben-Zvi, by 67 to 33 votes and 7 abstentions.

The coalition government formed on 24 June 1963 was, in March 1964, composed as follows:

*Prime Minister and Defence:* Levi Eshkol (Mapai).

*Deputy Prime Minister:* Abba Eban (Mapai). *Foreign Affairs:* Mrs Golda Meir (Mapai). *Finance, Trade and Industry:* Pinhas Sapir (Mapai). *Education and Culture:* Zalman Aranne (Mapai). *Justice:* Dr Dov Joseph (Mapai). *Agriculture:* Major-Gen. Moshe Dayan (Mapai). *Development and Housing:* Yosef Almogi (Mapai). *Police:* Bethor Shitrreet (Mapai). *Posts:* Eliahu Sasson (Mapai). *Interior and Health:* Moshe Shapiro (National Religious Front). *Social Welfare:* Dr Yosef Burg (National Religious Front). *Religious Affairs:* Dr Zerah Warhaftig (National Religious Front). *Transport:* Israel Bar-Yehuda (Ahduth Haavoda). *Labour:* Brig. Yigal Allon (Ahduth Haavoda). *Without portfolio:* Akiva Govrin (Mapai).

LOCAL GOVERNMENT. Local authorities are of three kinds, namely, municipal corporations, local councils and regional councils. Their status, powers and duties are prescribed by statute. Regional Councils are local authorities set up in agricultural areas and include all the agricultural settlements in the area under their jurisdiction. All local authorities exercise their authority mainly by means of bye-laws approved by the Minister of the Interior. Their revenue is derived from rates imposed with the approval of that Minister. Local authorities are elected for a 4-year term of office.

**AREA AND POPULATION.** The area of Israel, within the boundaries defined by the armistice agreements with Egypt, Jordan, the Lebanon and Syria, is 20,700 sq. km (7,993 sq. miles), with a total population (1 Jan. 1963) of 2,330,300, of whom 2,068,900 were Jews, 183,000 Moslems, 52,600 Christians and 25,800 Druzes. Density of population, 115·1 per sq. km. For details of the boundaries *see* THE STATESMAN'S YEAR-BOOK, 1951, p. 1166, and map.

Crude birth rate per 1,000 population of Jewish population (1962), 22·47; non-Jewish, 54·03; crude death rate, Jewish, 5·94; non-Jewish, 7·03; infantile mortality rate per 1,000 live births, Jewish, 27·38; non-Jewish, 46·45.

On 23 Jan. 1950 the Knesset proclaimed Jerusalem the capital of the state. Population of the 3 main towns: Jerusalem (Israeli part only), 171,000; Haifa, 187,000; Tel-Aviv/Jaffa, 390,000.

The official languages are Hebrew and Arabic.

IMMIGRATION. The following table shows the numbers of Jewish immigrants entering Palestine (Israel), including persons entering as travellers who subsequently registered as immigrants. For a year-by-year breakdown, *see* THE STATESMAN'S YEAR-BOOK, 1951, p. 1167.

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| 1919–32 | 84,093 | 1940–47 | 92,563 | 1952–47 | 213,592 | 1961 | 47,000 |
| 1933–39 | 218,099 | 1948–51 | 702,779 | 1958–60 | 72,782 | 1962 | 60,000 |

During the period 1948–61, 46·9% of the immigrants came from Europe and America, and 53·1% from Asia and Africa.

The Jewish Agency for Palestine which, in accordance with Article IV of the Palestine Mandate, played a leading role in laying the political, economic and social foundations on which the State of Israel was established, continues to be instrumental in organizing immigration and ensuring the absorption of immigrants in Israel. Its headquarters are divided between Jerusalem and New York.

**RELIGION.** Religious affairs are under the supervision of a special Ministry, with departments for the Christian, Moslem and Druze communities. The religious affairs of each community remain under the full control of the ecclesiastical authorities concerned: in the case of the Jews, the Sephardic and Ashkenasic Chief Rabbis, in the case of the Christians, the heads of the various communities, and in the case of the Moslems, the Kadis. The Druzes were officially recognized in 1957 as an autonomous religious community.

The Jewish Sabbath and Holy Days are observed as days of rest in the public services. Full provision is, however, made for the free exercise of other faiths, and for the observance by their adherents of their respective days of rest and Holy Days.

The General Assembly of the United Nations proposed, in its resolution of 29 Nov. 1947, the establishment of an international regime for the Jerusalem area. The Israel Government made the counter-proposal of an international regime concerning itself exclusively with the supervision and protection of, and access to, the holy places and sites. Most of these are situated in Jordan-held territory. The matter was discussed at the General Assembly in Dec. 1950, but no conclusion was reached.

**EDUCATION.** The school system is under the direction of the Ministry of Education, and comprises kindergarten, primary, secondary and technical schools. The Hebrew University, founded in 1925, is an independent centre of higher education and research.

A law passed by the Knesset on 12 Sept 1949 provides for free and compulsory primary education from 5 to 14 years of age. Youths in the age groups 14–18, who have not completed their primary schooling, must attend special classes.

The State Education Law of 12 Aug. 1953 established a unified state-controlled elementary school system with a provision for special religious schools. The standard curriculum for all elementary schools is issued by the Ministry of Education with a possibility of adding supplementary subjects comprising not more than 25% of the total syllabus. Many schools in towns are private, a number are maintained by municipalities and some are administered by teachers' co-operative or trustees.

Statistics relating to schools under government supervision, 1962:

| Type of school | Schools | Teachers | Pupils |
|---|---|---|---|
| Elementary | 1,161 | 16,973 | 368.648 |
| Secondary (including evening classes) | 151 | 3,053 | 41,256 |
| Vocational schools | 66 | 1,094 | 13,537 |
| Agricultural schools | 31 | 545 | 6,261 |
| Arab elementary and secondary | 174 | 1,698 | 38,120 |

There are also a number of private schools maintained by religious foundations—Jewish, Christian and Moslem—and also by private societies.

The Hebrew University in Jerusalem comprises faculties of the humanities, social sciences, law, science, medicine and agriculture. In 1963 it had 1,100 professors, lecturers and instructors, and 8,500 students.

The Institute of Technology in Haifa had, in 1963, 14 faculties and departments with 520 teachers and 4,000 students, including 1,000 students of the affiliated technical high school. The Weizmann Institute of Science in Rehovoth is engaged in research in chemistry, physics and biology. In 1963 the Tel Aviv University had 235 teachers and 1,672 students.

The religious Bar-Ilan University at Ramat Gan, opened in 1955, had, in 1963, 4 faculties (Jewish Studies, Natural Sciences, Social Sciences, Philology), 158 teachers and 1,150 students.

*Cinemas* (1962). There were 274 cinemas with a seating capacity of 170,000.

*Newspapers* (1962). There were 25 daily newspapers, including 15 in Hebrew, 1 in Yiddish, 2 in German, 1 in English, 1 in Arabic, 1 in French, 1 in Hungarian, 1 in Polish, 1 in Bulgarian, 1 in Rumanian, with a total circulation of about 400,000.

**SOCIAL WELFARE.** In 1962 Israel had 137 hospitals with over 16,000 beds. The 'Malben' organization cares for sick, aged or handicapped immigrants. The Women's International Zionist Organization has a number of children's homes, crèches and kindergartens as well as vocational schools and training institutions for nurses.

The National Insurance Law, which took effect in April 1954, provides for old-age pensions, survivors' insurance, work-injury insurance, maternity insurance and family allowances.

**JUSTICE.** LAW. Under the Law and Administrative Ordinance, 5708/1948, the first law passed by the Provisional Council of State, the law of Israel is the law which was obtaining in Palestine on 14 May 1948 in so far as it is not in conflict with that Ordinance or any other law passed by the Israel legislature and with such modifications as result from the establishment of the State and its authorities.

Capital punishment was abolished in 1954, except for support given to the Nazis and for high treason.

The law of Palestine was derived from three main sources, namely, Ottoman law, English law (Common Law and Equity), and the law enacted by the Palestine legislature, which to a great extent was modelled on English law. The Ottoman law in its turn was derived from three main sources, namely, Moslem law which had survived in the Ottoman Empire, French law adapted by the Ottomans and the personal law of the non-Moslem communities. However, the Arabs in the frontier districts are subject to severe restrictions (passport, curfew, enforced residence, etc.).

CIVIL COURTS. Municipal courts, established in certain municipal areas, have criminal jurisdiction over offences against municipal regulations and bye-laws and certain specified offences committed within a municipal area.

Magistrates' courts, established in each district and sub-district, have limited jurisdiction in both civil and criminal matters.

District courts, sitting at Jerusalem, Tel-Aviv and Haifa, have jurisdiction, as courts of first instance, in all civil matters not within the jurisdiction of magistrates' courts, and in all criminal matters, and as appellate courts from magistrates' courts and municipal courts.

The Supreme Court has jurisdiction as a court of first instance (sitting as a High Court of Justice dealing mainly with administrative matters) and as an appellate court from the district courts (sitting as a Court of Civil Appeal or as a Court of Criminal Appeal).

In addition, there are various tribunals for special classes of cases, such as the Rents Tribunals and the Tribunals for the Prevention of Profiteering and Speculation. Settlement Officers deal with disputes with regard to the ownership or possession of land in settlement areas constituted under the Land (Settlement of Title) Ordinance.

Religious Courts. The Rabbinical courts of the Jewish community have exclusive jurisdiction in matters of marriage and divorce, alimony and confirmation of wills of members of their community other than foreigners, concurrent jurisdiction with the civil courts in such matters of members of their community who are foreigners if they consent to the jurisdiction, and concurrent jurisdiction with the civil courts in all other matters of personal status of all members of their community, whether foreigners or not, with the consent of all parties to the action, save that such courts may not grant a decree of dissolution of marriage to a foreign subject.

The courts of the several recognized Christian communities have a similar jurisdiction over members of their respective communities.

The Moslem religious courts have exclusive jurisdiction in all matters of personal status over Moslems who are not foreigners, and over Moslems who are foreigners, if under the law of their nationality they are subject in such matters to the jurisdiction of Moslem religious courts.

Where any action of personal status involves persons of different religious communities, the President of the Supreme Court will decide which court shall have jurisdiction, and whenever a question arises as to whether or not a case is one of personal status within the exclusive jurisdiction of a religious court, the matter must be referred to a special tribunal composed of 2 judges of the Supreme Court and the president of the highest court of the religious community concerned in Israel.

**FINANCE.** The budget year runs from 1 April to 31 March. The main items of the 1963–64 budget are as follows (in I£m.; I£5·046 = £1 sterling):

**DEFENCE.** The Defence Service Law of 8 Sept. 1949, as amended in 1950 and 1952, provides a compulsory 2½-year conscription for men between the ages of 18 and 26 and a 2-year conscription for men in the age-group of 27–29 years. Unmarried women aged 18–26 serve 2 years. The compulsory military service includes a period of agricultural training. Men up to the age of 49 and childless women up to the age of 34 are liable for service in the reserves for consecutive periods of 14–31 days a year. In addition, all are liable to 1 day's service per month. Officers and n.c.o.s are liable to an additional 1 week's service per year. The war-time strength of the defence forces is about 250,000.

Men over 49 years are exempted from service in the reserves, but may volunteer for Civil Defence. Women exempted from service in the Armed Forces on religious grounds are to be employed in agricultural work, service in new immigrant's centres or service in other institutions.

The highest army rank is that of Major-General (*Rav Alouf*), and the Chief-of-Staff, who is the C.-in-C., holds that rank. A divisional commander is a Brigadier (*Alouf*), and a brigade commander a Colonel (*Alouf Mishne*).

The Navy includes 2 destroyers, 1 frigate, 2 submarines (acquired from Britain in 1958), a patrol vessel, 12 motor torpedo-boats, 5 motor launches and 3 flotillas of landing craft. The former Nautical School in Haifa has been re-organized as a Naval Officers' School in Acre.

The Air Force has a personnel strength of about 14,000, with 450 aircraft. All first-line combat aircraft are jets, mostly of French manufacture. 96 Mirage III supersonic multi-mission fighters are being delivered, the first squadron of 24 operational in mid-1963. Three fighter-bomber squadrons are equipped with Mystère IVAs, and one interceptor squadron with supersonic Super Mystères. There are also a tactical bomber/reconnaissance squadron of twin-jet Vautours, 2 transport squadrons of Noratlas, C-47 and Stratocruiser aircraft, helicopter and training units, the last-named having locally-built Magister jet trainers.

**PRODUCTION.** *Agriculture.* In the coastal plain (Sharon, Emek Hefer and Shephelah) mixed farming, poultry raising, citriculture and vineyards are the main agricultural activities. The Emek (the Valley of Jezreel) is the main agricultural centre of Israel. Mixed farming is to be found throughout the valleys; the subtropical Beisan and Jordan plainlands are also centres of banana plantations and fish breeding. In Galilee, mixed farming, olive and tobacco plantations prevail. The Hills of Ephraim are a vineyard centre; many parts of the hill country are under afforestation. In the northern Negev farming has been aided by the Yarkon Negev water pipeline. Farther south much of the territory is desert. The total cultivated area in the Southern District (which comprises the territory south of Ashkelon and includes the Negev) was over 1·5m. dunams (4 dunams = 1 acre) in 1962. Agricultural products grown in the Negev include barley, sorghum, wheat, sunflowers, cotton, sugar beet, vegetables and fruit. In 1962 there were 122 agricultural settlements in the Negev with a total population of 33,000, excluding some 18,000 Bedouin.

A land-utilization survey has graded the country as follows: 3,392,000 dunams under dry farming and 3,938,000 dunams under irrigation suitable for all types of cultivation, 697,000 dunams under dry farming and 1,339,000 dunams under irrigation suitable for plantations, 8·49m. dunams suitable for pasture, 882,000 dunams suitable for afforestation, 470,000 dunams unfit for any type of cultivation. The draining of the Huleh marshes in the north has added some 15,000 acres to the land reserve.

The area under cultivation (in 1,000 dunams) in 1962–63 was 4,185, of which 1,495 were under irrigation. Of the total cultivated area 2·85m.

dunams were under field crops, 285,000 under vegetables, potatoes and groundnuts, 800,000 under citrus and orchards, 58,000 under fish ponds, 167,000 under miscellaneous crops and 25,000 in preparation.

Industrial crops, such as cotton and sugar beet, have successfully been introduced.

Livestock (1962) included 249,000 cattle, 355,000 sheep and goats, 44,000 draught animals, 7·8m. laying hens.

Characteristic types of rural settlement are, among others, the following: (1) The *Kibbutz* and *Kvutza* (communal collective settlement), where all property and earnings are collectively owned and work is collectively organized. (2) The *Moshav Ovdim* (workers' co-operative smallholders' settlement) which is founded on the principles of mutual aid and equality of opportunity between the members, all farms being equal in size; hired labour is prohibited. (3) The *Moshav Shitufi* (co-operative settlement), which is based on collective ownership and economy as in the *Kibbutz*, but with each family having its own house and being responsible for its own domestic services. (4) The *Moshav* (smallholders' settlement), which resembles the *moshav ovdim* but lacks the latter's rigid ideological basis; hired labour, for instance, is permitted. (5) The *Moshava* (village), in which land and property are privately owned and every resident is responsible for his own well-being. In 1962, of the 808 rural settlements in Israel, 228 were kibbutzim (population, 79,000), 346 moshvei ovdim and other smallholder settlements (120,000), 20 moshavim shitufiim (4,000), 71 moshavot and other villages based on private marketing (90,000), 98 Arab villages (155,000, including 27,000 Bedouin); the rest were temporary settlements and educational institutions.

*Mining.* The most valuable natural resources of the country are the potash, bromine and other salt deposits of the Dead Sea, which are exploited by the Dead Sea Works, Ltd. Geological research and exploitation of the natural resources in the Negev are undertaken by the Israel Mining Corporation. Copper is being worked at Timna near Eilat. Phosphate production in 1962 was 190,000 tons; potash, 150,000 tons.

Oil was first discovered in Sept. 1955 at Heletz in the Negev. Twenty-eight oilwells were in operation at the beginning of 1963; output in 1962 was 160,000 tons.

*Industry.* A wide range of products is manufactured, processed or finished in the country, including chemicals, metal products, textiles, tyres, diamonds, paper, plastics, leather goods, glass and ceramics, building materials, precision instruments, tobacco, foodstuffs, electric goods, including refrigerators and radios. The textile industry had 240,000 spindles working at the end of 1961; estimate for 1964 is 350,000.

A law for the encouragement of capital investment, passed on 29 March 1950, grants substantial privileges to foreign investors. An Investment Centre was established in May 1950, and had by the end of 1962 approved 3,063 undertakings involving a total investment of I£655·6m. and US$784·3m.

*Power.* Electric-power consumption amounted during 1962–63 to 2,422m. kwh., of which 865m. kwh. were used for industrial purposes.

**Labour.** The General Federation of Jewish Labour (Histadrut), founded in 1920, had, in 1962, 800,000 members (including 29,000 Arabs); including workers' families, this membership represents 60% of the Jewish population. Several trades unions of lesser importance also exist.

Histadrut participates in over 70% of Israeli agriculture and 23% of industrial production; it runs the Kupat Holim (workers' health service) and has large interests in banking, insurance, retail business, construction and building.

In 1962 the average daily number of registered unemployed was 4,611.

**COMMERCE.** External trade, in US$1,000, for calendar years:

In 1962, of the imports 32·9% came from USA and 16·3% from UK; of the exports 15·1% went to USA and 13·7% to UK.

The main exportable commodities are citrus fruit and by-products, fruit-juices, textiles, wines and liquor, sweets, polished diamonds (838,228 carats, valued at US$82·34m. in 1962), chemicals, motor cars, tyres, textiles, electrical goods. Exports of citrus fruit in 1962–63 amounted to 12,580,052 cases, of which 3,688,278 went to UK.

**COMMUNICATIONS.** *Shipping.* Israel has 4 ports, Haifa, Tel-Aviv, Jaffa and Eilat. The construction of a deep-water port at Ashdod started in 1961. An Israel Ports Authority was set up in 1961 and began to operate in 1962. In 1962, about 2,000 ships anchored in Israeli ports. 3·5m. tons of freight (not including fuel) were handled in 1962–63. The Israeli merchant fleet consisted at 1 Jan. 1964 of 74 vessels, totalling 450,000 tons deadweight.

*Railways and Roads.* Internal communications are provided by 423 km of main railway lines and 237 km of branch lines (1962). In 1962–63, 5m. passengers and 2·9m. tons of freight were carried by rail.

The Israeli airline EL AL maintains regular flights to London, Paris, Rome, Amsterdam, Brussels, Athens, Vienna, New York, Zürich, Munich, Nicosia, Istanbul, Tehran, Johannesburg and Frankfurt. In 1963 EL AL carried 237,635 passengers.

**CURRENCY AND BANKING.** The unit of currency is the Israeli £ (I£), divided into 100 *agorot* (up to 31 Dec. 1959; 1,000 *prutah*). There are coins of I£½ and I£1 as well as of 1 *agora*, 5, 10 and 25 *agorot* and bank-notes for I£½, 1, 5, 10 and 50; coins of 5, 10, 25, 50, 100 and 250 *prutah* are still in circulation. On 24 Aug. 1954 the Knesset passed the Bank of Israel Law, establishing a state-owned central bank. The Bank of Israel started operations on 1 Dec. 1954; it is the bank of issue and sole banker of the Government. Other principal banks are Bank Leumi le Israel BM, the Israel Discount Bank, Barclays Bank DCO and the Workers' Bank, Ltd. Assets and liabilities in the 26 commercial banks and the 26 Co-operative Credit Societies operating in Israel totalled I£4,748,354,000 at the end of 1963.

**WEIGHTS AND MEASURES.** The metric system is in general use. The (metrical) *dunam* = 1,000 sq. metres (about 0·25 acre).

The Jewish year 5724 corresponds to 19 Sept. 1963–6 Sept. 1964; 5725 to 7 Sept. 1964–26 Sept. 1965.

# ITALY

## Repubblica Italiana

**CONSTITUTION AND GOVERNMENT.** On 10 June 1946 Italy became a republic on the announcement by the Court of Cassation that a majority of the voters at the referendum held on 2 June had voted for a republic. The final figures, announced on 18 June, showed: For a republic, 12,718,641 (54·3% of the valid votes cast, which numbered 23,437,143); for the retention of the monarchy, 10,718,502 (45·7%); invalid and contested, 1,509,735. Total 24,946,878, or 89·1% of the registered electors, who numbered 28,005,449. For the results of the polling in the 13 leading cities, *see* The Statesman's Year-Book, 1951, p. 1175. Voting was compulsory, open to both men and women 21 years of age or older, including members of the Civil Service and the Armed Forces; former active Fascists and a few other categories were excluded.

On 18 June the then Provisional Government without specifically proclaiming the republic, issued an 'Order of the Day' decreeing that all court verdicts should in future be handed down 'in the name of the Italian people', that the *Gazzetta Ufficiale del Regno d'Italia* should be re-named *Gazzetta Ufficiale della Repubblica Italiana*, that all references to the monarchy should be deleted from legal and government statements and that the shield of the House of Savoy should be removed from the Italian flag.

Thus ended the reign of the House of Savoy, whose kings had ruled over Piedmont for 9 centuries and as Kings of Italy since 18 Feb. 1861. (For fuller account of the House of Savoy, *see* The Statesman's Year-Book, 1946, p. 1021.) The Crown Prince Umberto, son of King Vittorio Emanuele III, became Lieut.-Gen. (*i.e.*, Regent) of the kingdom on 5 June 1944. Following the abdication and retirement to Egypt of his father on 9 May 1946, Umberto was declared King Umberto II; his reign lasted to 13 June, when he left the country. King Victor Emmanuel III died in Alexandria on 28 Dec. 1947.

The new constitution was passed by the constituent assembly by 453 votes to 62 on 22 Dec. 1947; it came into force on 1 Jan. 1948. The constitution consists of 139 articles and 18 transitional clauses. Its main dispositions are as follows:

Italy is described as 'a democratic republic founded on work'. Parliament consists of the Chamber of Deputies and the Senate. The Chamber is elected for 5 years by universal and direct suffrage; 1 deputy, who must be 25 years or over, for 80,000 inhabitants. The Senate is elected for 6 years on a regional basis; each Region having at least 6 senators, 1 for 200,000 inhabitants; the Valle d'Aosta is represented by 1 senator only. The President of the Republic can nominate 5 senators for life from eminent men in the social, scientific, artistic and literary spheres. On the expiry of his term of office, the President of the Republic becomes a senator by right and for life, unless he declines.

The President of the Republic is elected in a joint session of Chamber and Senate, to which are added 3 delegates from each Regional Council (1 from the Valle d'Aosta). A two-thirds majority is required for the election, but after a third indecisive scrutiny the absolute majority of votes is sufficient. The President must be 50 years or over; his term lasts for 7 years. The President of the Senate acts as his deputy. The President can dissolve the chambers of parliament, except during the last 6 months of his term of office.

The Cabinet can be forced to resign only on a motivated motion of censure; the defeat of a government bill does not involve the resignation of the Government.

A Constitutional Court, consisting of 15 judges who are appointed, 5 each, by the President of the Republic, Parliament (in joint session) and the highest law and administrative courts, has rights similar to those of the Supreme Court of the USA. It can decide on the constitutionality of laws and decrees, define the powers of the State and Regions, judge conflicts between the State and Regions and between the Regions, and try the President of the Republic and the Ministers. The court was set up in Dec. 1955.

The re-organization of the Fascist Party is forbidden. Direct male descendants of King Victor Emmanuel are excluded from all public offices, have no right to vote or to be elected, and are banned from Italian territory; their estates are forfeit to the State. Titles of nobility are no longer recognized, but those existing before 28 Oct. 1922 are retained as part of the name.

Italy ceded to France 4 frontier districts on the Little St Bernard Pass, the Mont-Cenis Plateau, the Mont-Thabor and Chaberton areas, and the upper valleys of the Tinée, Vésubie and Roya (*see* MAP in THE STATESMAN'S YEAR-BOOK, 1948); to Yugoslavia, nearly the whole of the province of Venezia Giulia, the commune of Zara and the island of Pelagosa; to Greece, the Dodecanese; to Albania, the island of Saseno; to China, the Italian concession at Tientsin. Italy also gave up her former colonies.

Under the peace treaty Italy was to pay reparations to the following states: Greece, $105m.; Yugoslavia, $125m.; USSR, $100m.; Ethiopia, $25m.; Albania, $5m. On 31 Dec. 1961 the residual debt was: USSR, $100m.

REGIONAL ADMINISTRATION. Italy is administratively divided into 92 provinces (*province*), each under a prefect (*prefetto*) appointed by the government. The division into 19 autonomous regions (*regioni*), as envisaged in art. 114, 115, 131 of the constitution, has not yet been carried out.

Art. 116 of the constitution provided for the establishment of 5 autonomous regions with special statute (*regioni autonome con statuto speciale*). Five of these regions have been organized. These special regions have their own parliaments (*consiglio regionale*) and governments (*giunta regionale e presidente*) with certain legislative and administrative functions adapted to the circumstances of each region. A government commissioner is in charge for the co-ordination between regional and government activities.

I. *Sicily* (Sicilia), established on 15 May 1946, comprises the islands of Sicily, the Lipari and Egadi groups, Ustica and Pantelleria, divided into 9 provinces; capital, Palermo. The regional elections on 9 June 1963 returned 37 Christian Democrats, 7 Liberals, 1 Monarchist, 7 Social Movement, 3 Social Democrats, 11 Socialists, 24 Communists. The regional government is a coalition of Christian Democrats and Socialists, headed by Giuseppe D'Angelo (Christian Democrat).

The population of Alto Adige comprises about 222,000 German-speaking, 110,000 Italian-speaking and 9,500 Ladin-speaking inhabitants; the Italian-speaking population live mainly in the towns of Bozen, Brixen and Meran.

The autonomous region consists of the 2 provinces of Bolzano and Trento, each of which has a semi-autonomous status. The members of the regional parliament also sit in the 2 provincial parliaments (South Tirol, 22; Trentino, 26 members). It meets alternately for 2 years in Trent, the capital of the Trentino, and for 2 years in Bozen, the capital of Alto Adige, with an Italian-speaking and a German-speaking chairman also alternating.

**Trieste.** The peace treaty of 10 Feb. 1947 provided for the cession of the city of Trieste and the Istrian peninsula in order to found the Free Territory of Trieste. Since the terms of the treaty relating to the Free Territory of Trieste could not be put into effect, the Territory remained under military occupation for 9 years. The Territory was divided into two zones: Zone A (which included the city of Trieste), administered by the US/UK Military Government, and Zone B, administered by the Yugoslav Military Government. On 5 Oct. 1954 the Governments of the UK, US, Italy and Yugoslavia initialled in London a Memorandum of Understanding terminating military government in both zones (Cmd. 9288). On 25 Oct. the UK and US Governments withdrew their forces from Zone A and handed over the administration of this zone, less one small strip of territory, to the Italian Government. Zone B, together with this strip, was placed under Yugoslav civil administration. The Security Council of the United Nations was informed of these 'practical arrangements', and the Soviet Government 'took cognizance' of them in a manner which virtually amounted to approval. The Free Territory had an area of 773·16 sq. km, of which 211 sq. km are now under Italian and 562 sq. km under Yugoslav administration (*see* MAP in THE STATESMAN'S YEAR-BOOK, 1955).

In Aug. 1953 the resident population of the Anglo-American zone was

297,003, comprising 257,858 Italians and 39,145 Slovenes. The 1945 census of the Yugoslav zone counted 67,461 inhabitants, of whom 30,789 were classified as Slavs and 29,672 as Italians.

In the 'Memorandum' of 1954 Italy undertakes to maintain Trieste as a free port.

**RELIGION.** The treaty between the Holy See and Italy, of 11 Feb. 1929, confirmed by article 7 of the constitution of the Republic, lays down that the Catholic Apostolic Roman Religion is the only religion of the State. Other creeds are permitted, provided they do not profess principles, or follow rites, contrary to public order or moral behaviour.

The appointment of archbishops and of bishops is made by the Holy See; but the Holy See submits to the Italian Government the name of the person to be appointed in order to obtain an assurance that the latter will not raise objections of a political nature.

Catholic religious teaching is given in elementary and intermediate schools. Marriages celebrated before a Catholic priest are automatically transferred to the civil register. Marriages celebrated by clergy of other denominations must be made valid before a registrar.

In 1960 there were 280 dioceses with 25,930 parishes.

In 1962 there were about 100,000 Protestants and about 50,000 Jews.

**EDUCATION.** Education is compulsory from 6 to 14 years of age. An optional pre-school education is given to the children between 3 and 5 years in the preparatory schools (nursery and kindergarten schools). Illiteracy of males over 6 years was 3% in 1961, of females 6%.

Compulsory education can be classified as primary education (5-year course) and junior secondary education comprising also vocational training (3-year course).

Senior secondary education is subdivided in classical (*ginnasio* and classical *liceo*), scientific (scientific *liceo*) and technical education: agricultural, industrial, commercial, technical, nautical institutes, institutes for geometrists, institutes for girls (5-year course) and teacher-training institutes (4-year course).

University education is given in Universities and in University Higher Institutes (4, 5, 6 years, according to degree course).

[2] Converted into a guided-missile light cruiser in 1957–62.

The light cruiser *Luigi di Savoia Duca degli Abruzzi* was discarded in 1961.

Two guided-missile cruisers (8,000 tons), 4 fast frigates, 4 corvettes and 4 submarines are under construction or projected.

Summary of the Italian Navy: 2 cruisers, 2 guided-missile escort cruisers, 2 guided-missile destroyers, 2 large destroyers (*ex*-light cruisers converted), 4 destroyers, a command ship and an experimental ship (*ex*-destroyers), 14 frigates (8 new escorts, 3 *ex*-US escort destroyers and 3 *ex*-torpedo boats), 6 submarines, 27 corvettes, 4 ocean minesweepers, 54 coastal minesweepers, 20 inshore minesweepers, 16 general-purpose vessels (*ex*-minesweeping trawlers), 13 motor torpedo-boats, 5 motor gunboats, 2 anti-submarine patrol boats, 6 landing support gunboats, 2 surveying vessels, 1 salvage ship, 3 transports, 3 training ships, 2 oilers, 19 water carriers, 2 netlayers, 28 auxiliaries, 45 landing craft and 26 tugs. The ban imposed by the Peace Treaty having expired, Italy re-introduced submarines into the Fleet in 1953. The nucleus of the submarine flotilla comprises 3 small boats resurrected from the laid-up wartime fleet and 3 large submarines transferred from the US Navy.

The coastline of the peninsula is divided into zones, with headquarters at

Spezia, Naples, Taranto and Venice. The three former are under the jurisdiction of flag officers with the status of C.-in-C.; but the admiral commanding at Venice does not rank as a C.-in-C. Nor do the admirals commanding on the coasts of Sardinia and Sicily. Other localities of strategic importance under naval administration are Brindisi, where there is an admiral commanding, and Genoa, Leghorn, Augusta and Ancona, each of which is under a senior naval officer.

The personnel of the Navy in 1963 numbered 40,000 officers and ratings.

AIR FORCE. With an operational history dating back to 1911, the Air Force has been built up since 1951 largely with US assistance. It is divided into 4 territorial zones, with HQ at Rome, Milan, Padua and Bari, plus the air commands of Sicily and Sardinia.

In 1963 Italy's air contribution to NATO forces consisted of 3 air brigades (each of 3 squadrons of 25 aircraft) of F-84F Thunderstreak and Fiat G91 (1 squadron) jet fighter-bombers and one air brigade (2 squadrons) of RF-84F Thunderflash reconnaissance-fighters. There are also a brigade of Canadian-built Sabre interceptors and 2 groups of Italian-built Sabre all-weather fighters and Canadian-built Sabres for home defence, 3 squadrons of Tracker anti-submarine aircraft, 2 squadrons of C-119 transport aircraft and training, air/sea rescue and helicopter units. The tactical fighter units are being re-equipped with F-104G Starfighters, and the reconnaissance-fighter units with Fiat G91 aircraft. The air-defence fighter units are supplemented by American-supplied Nike surface-to-air missiles.

**MONEY.** The standard coin is the *lira* of 100 *centesimi*. Under law of 28 Jan. 1960 the gold reserves of the Banca d'Italia have been revalued on the basis of 703,297·396 lire per kg of fine gold, equal to the exchange rate of 625 lire per dollar. On this basis from 30 March 1960 the gold standard was formally established as equal to 0·00142187 gramme of gold per lira.

State notes of 5, 10, 50 and 100 lire have been withdrawn from circulation and replaced by metal coins of 5, 10, 20, 50, 100 and 500 lire. There are also in circulation bank-notes of 500, 1,000, 5,000 and 10,000 lire; they are neither convertible into gold as foreign moneys nor exportable abroad, nor importable from abroad into Italy (except for certain specified small amounts).

Circulation of money at 31 Dec. 1962: State coins, 104,218m. lire; bank-notes, 3,234,450m. lire.

**BANKING.** According to the law of 6 May 1926 there is only one bank of issue, the Banca d'Italia. Its gold and foreign credits reserve amounted to 1,000,000m. lire in Dec. 1962; this includes the reserves of the Exchange Bureau (*Ufficio Italiano Cambi*) which have been absorbed by the Banca d'Italia.

Since 1936, all credit institutions have been under the control of a state organ, named 'Inspectorate of Credit'; the Bank of Italy has been converted into a 'public institution', whose capital is held exclusively by corporate bodies of a public nature. Other credit institutions, totalling 1,261, are classified as: (1) 6 chartered banks (Banco di Napoli, Banco di Sicilia, Banca Nazionale del Lavoro, Monte dei Paschi di Siena, Istituto di S. Paolo di Torino, Banco di Sardegna); (2) 3 banks of national interest (Banca Commerciale Italiana in Milan, Credito Italiano in Genoa and Banco di Roma); (3) banks and credit concerns in general, including 149 joint-stock banks and 213 co-operative banks; (4) 89 savings banks and Monti di pegno (institutions granting loans against personal chattels as security), and (5) 801 Casse rurali e agrarie (agricultural banks, established as co-operative institutions with unlimited liability of associates).

At the end of 1962 there were 365 credit institutes handling 99% of all deposits and current accounts, with capital and reserves of 463,688m. lire.

On 31 July 1963 the post office savings banks had deposits of 2,742,516m. lire; ordinary credit institutions, 14,850,548m. lire.

*Insurance.* By a decree of 29 April 1923 life-assurance business is carried on only by the National Insurance Institute and by other institutions, national and foreign, authorized by the Government. At 31 Dec. 1961 the insurances vested in the *Istituto Nazionale delle Assicurazioni* amounted to 1,130,755m. lire, including the decuple of life annuities.

**WEIGHTS AND MEASURES.** The metric system is in general use.

# JAPAN

## Nippon

**HISTORY.** According to Japanese historical myths the empire was founded by Jimmu Tennō, 660 B.C., and the dynasty founded by him still reigns. From 1186 until 1867 the emperors had little but ceremonial functions, while successive families of Shoguns exercised the temporal power. In 1867 the Emperor Meiji recovered nominally the imperial power after the abdication on 14 Oct. 1867 of the fifteenth and last Tokugawa Shogun Keiki, known historically as Yoshinobu. In 1871 the feudal system (Hōken Seido) was abolished; this was the beginning of the rapid westernization undertaken by the new government, then mainly controlled by the western clans of Satsuma and Chōshu. The Emperor bears the title of Nihon-koku Tennō ('Emperor of Japan'). Only foreigners make use of the poetical title 'Mikado'.

At San Francisco on 8 Sept. 1951 a Treaty of Peace was signed by Japan and representatives of 48 countries. For details *see* THE STATESMAN'S YEAR-BOOK, 1953, p. 1169. On 26 Oct. 1951 the Japanese Diet ratified the Treaty by 307 votes to 47 votes with 112 abstentions. On the same day the Diet ratified a Security Treaty with the US by 289 votes to 71 votes with 106 abstentions. The treaty provided for the stationing of American troops in Japan until Japan was able to undertake her own defence.

The peace treaty came into force on 28 April 1952, when Japan regained her sovereignty.

**CONSTITUTION AND GOVERNMENT.** Article I of the constitution, which came into force on 3 May 1947, says: 'The Emperor shall be the symbol of the state and of the unity of the people, deriving his position from the sovereign will of the people.' The Emperor himself, in a New Year's broadcast, 1946, explicitly divested himself of the attributes of divinity ascribed to him in folk beliefs.

*Emperor of Japan.* **Hirohito**, born at Tōkyō, 29 April 1901; succeeded his father, Yoshihito, 25 Dec. 1926; married, 26 Jan. 1924, to Princess Nagako, born 6 March 1903, daughter of H.I.H. Prince Kuninomiya (died 27 Jan. 1929). Living offspring: I. Princess Kazuko (Takanomiya), born 30 Sept. 1929; married to Mr Takatsukasa. II. Princess Atsuko (Yorinomiya), born 7 March 1931; married to Mr Ikeda. III. Prince Akihito (Tsugunomiya), born 23 Dec. 1933; formally installed as Crown Prince on 10 Nov. 1952; married to Miss Michiko Shoda (born 20 Oct. 1934), 10 April 1959. *Offspring:* Prince Naruhito (Hironomiya), born 23 Feb. 1960. IV, Prince Masahito (Yoshinomiya), born 28 Nov. 1935. V. Princess Takako (Suganomiya), born 2 March 1939; married to Mr Hisanaga Shimazu, 10 March 1960.

By the Imperial House Law of 11 Feb. 1889, revised on 16 Jan. 1947, under the new constitution, the succession to the throne was definitely fixed upon the male descendants.

The constitution has deprived the Emperor of all political power, abolished the peerage, granted votes to women, abolished conscription, pledged the country not to maintain Armed Forces and to renounce war as means of settling international disputes, guaranteed complete academic freedom and outlined a 'Bill of Rights' on Western lines.

*National flag:* White, with a red sun (without rays).

*National anthem:* Kimigayo (words 9th century, tune by Hiromori Hayashi, 1881).

Executive powers rest with the Prime Minister and his Cabinet. The Prime Minister is elected by the Diet from its own members. Prime Ministers must be civilians and not former Army or Navy officers.

Legislative power rests with the Diet, which consists of the House of Representatives (of 467 members), elected by men and women over 20 years of age for a 4-year term, and the House of Councillors of 250 members

(100 elected at large and 150 from prefectural districts), one-half of its members being elected every 3 years. The Lower House controls the budget and approves treaties with foreign powers.

The Upper House in 1963 was composed as follows: Liberal-Democratic Party, 142; Socialist Party, 66; Democratic Social Party, 11; Independents, 15; Doshikai (right-wing), 11; Communists, 4.

After the general elections of 22 Nov. 1963 the House of Representatives was composed as follows: Liberal-Democratic Party, 294; Socialist Party, 144; Democratic Socialist Party, 23; Communists, 5; Independent, 1.

The Cabinet, as constituted in March 1964, is composed as follows:

*Prime Minister:* Hayato Ikeda.

*Justice:* Okinori Kaya. *Foreign Affairs:* Masayoshi Ohira. *Finance:* Kakuei Tanaka. *Education:* Hirokichi Nadao. *Health and Welfare:* Takeji Kobayashi. *Agriculture and Forestry:* Munenori Akagi. *Trade and Industry:* Hajime Fukuda. *Transport:* Kentaro Ayabe. *Postal Services:* Shinzo Koike. *Labour:* Takeo Ohashi. *Construction:* Ichiro Kono. *Autonomy and Public Safety:* Takashi Hayakawa. *Administrative Agency:* Shinjiro Yamamura. *Defence Agency:* Tokuyasu Fukuda. *Science and Technology:* Eisaku Sato. *Chief Cabinet Secretary:* Yasumi Kurogane.

LOCAL GOVERNMENT. The country (except Hokkaidō) is divided into metropolitan districts (*To* and *Fu*) and 46 prefectures (*Ken*), and the prefectures into municipalities (*Shi*), towns (*Chō* or *Machi*) and villages (*Son* or *Mura*). Each district, prefecture, city, town and village has a representative assembly elected by the same franchise as in parliamentary elections. Each city, town and village elects a mayor; the governor of a prefecture (formerly appointed by the Home Office) is elected by the voters in the area. The metropolitan district governments have charge of matters affecting the area as a whole.

New legislation, which came into effect on 1 July 1954, has given the central government complete control of the police throughout the country. The autonomous police forces of the 5 big cities, Osaka, Kyōto, Yokohama, Kōbe and Nagoya, were absorbed by the prefectural organization in June 1955. In 1956 the police numbered 114,715.

Administratively there are (as of Dec. 1954), 46 prefectures; 536 rural districts (*Gun*), 464 cities, 1,783 towns and 5,461 villages.

**AREA AND POPULATION.** Japan, as constituted after the Second World War, has total area of 369,662 sq. km (142.726·5 sq. miles). Census population, 1 Oct. 1960, was 93,418,501, with density of 252·7 per sq. km (45,871,194 males and 47,535,636 females); estimate, Oct. 1962, 95·08m. State subsidies have ceased for all religions, and all religious teachings are forbidden in public schools.

Shintoism claims 78m. adherents, Buddhism 61m.; these figures obviously overlap. Christians number about 670,000, of whom two-thirds are Protestants.

**EDUCATION.** Education is compulsory and free between the ages of 6 and 15. Six years are spent in the primary schools and 3 in the middle schools; a further 3 years in high schools is optional. On 1 May 1961 there were 26,741 elementary schools with 348,876 teachers and 11,810,871 pupils; 12,125 junior high schools with 231,597 teachers and 6,924,693 pupils; 3,610 senior high schools with 134,393 teachers and 3,118,896 pupils; 290 junior colleges with 6,743 teachers and 93,361 pupils.

Japan has 6 main state universities, formerly known as the Imperial Universities: Tōkyō University (1877); Kyōto University (1897); Tōhoku University, Sendai (1907); Kyūshū University, Fukuoka (1910); Hokkaidō University, Sapporo (1918), and Osaka University (1931). In addition, there are various private universities of very high standing, such as Keio (founded in 1859), Waseda, Rikkyo, Hosei, Meiji universities, and several women's universities among which Tōkyō and Ochanomizu are most notable. There are altogether over 70 institutions of university rank; the 250 colleges and universities had (1961) 670,192 students and 45,471 teachers. In the collegiate institutions, all now co-educational, girl students in 1957 formed 19%.

*Cinemas* (1961). Cinemas numbered 7,231, with an annual attendance of 863m. (1958: 1,127m.).

*Newspapers.* Daily newspapers, 4 April 1962, numbered 93 with aggregate circulation of 39·24m., including 4 major English-language newspapers.

*The Japanese Press.* Tokyo, annual from 1949

**SOCIAL WELFARE.** Hospitals in 1960 numbered 6,094 with 500,000 beds, divided into 4,921 general hospitals, 595 tuberculosis hospitals, 506 mental hospitals, 14 for leprosy and 58 isolation hospitals. Physicians numbered 96,038; dentists, 31,797; pharmacists, 60,257.

There are in force various types of social security schemes, such as health insurance, unemployment insurance and old-age pensions. About 90% of the total population come under these schemes.

**JUSTICE.** The Supreme Court is composed of the Chief Justice and 14 other judges. The Chief Justice is appointed by the Emperor, the other judges by the Cabinet. Every 10 years a justice must submit himself to the electorate. All justices and judges of the lower courts serve until they are 70 years of age.

Below the Supreme Court are 8 regional higher courts, district courts (*Chihōsaibansho*) in each prefecture (4 in Hokkaido) and the local courts.

The Supreme Court is authorized to declare unconstitutional any act of the Legislature or the Executive which violates the constitution.

**FINANCE.** Ordinary revenue and expenditure for fiscal years ending 31 March balanced as follows, in 1m. yen (360 yen = US$1): 1958–59, 1,333,083; 1959–60, 1,512,595; 1960–61, 1,765,163; 1961–62, 2,107,382 (plus a supplementary budget of 99,700); 1962–63, 2,426,801 (plus a supplementary budget of 2,563,000); 1963–64, 2,974,000 (including a supplementary budget of 124,100).

Of the proposed revenue in 1962–63 (in 1m. yen), 1,975,126 was anticipated from taxes, 66,984 from stamp duties and 159,532 from 'repayments of monopoly'. **Local.** The estimated 1959–60 budgets of the prefectures and other local authorities forecast revenues and expenditures aggregating 1,334,107m. yen, the former to be made up partly by local taxes on land, houses, occupations, and partly by government grants and local loans; expenditures include capital investment of 374,468m. yen.

Ministry of Finance, *An outline of Japanese tax.* Tokyo, 1962

**DEFENCE.** In June 1954 legislation brought the ground, naval and air services under a Joint Staff Council which comes under the Director-General of the Defence Agency, who is a Cabinet Minister.

The Japan–USA security treaty of April 1952 gave the USA the right to maintain armed forces and bases in Japan. Under the Japan–USA mutual defence assistance pact of Sept. 1954 the USA supplies almost the entire equipment of the Japanese forces. The treaty of mutual co-operation and security, signed on 19 Jan. 1960, put the two countries on a footing of equality.

*Army.* In Aug. 1950 Gen. MacArthur established a 'National Police Reserve' of 75,000 men, who were placed under a civilian Minister of State who also controlled the 'National Rural Police'.

Under its new name of 'Ground Self-Defence Force', it numbered in Jan. 1963, 171,500 uniformed and 13,405 civilian personnel, plus a reserve of 19,000 men. The Army is organized in 5 corps and 13 divisions.

The Western Corps, stationed in Kyūshū, consists of a division, a combined brigade, an artillery group and an engineering group. Three corps are stationed in Honshū. A division (of 12,700 men) comprises 3 infantry regiments, 1 artillery regiment, 1 tank battalion, 1 engineering battalion, 1 medical battalion and 1 air unit. A combined brigade (of 6,000 men) comprises 1 infantry regiment, 1 artillery regiment, 1 engineering battalion and 1 air unit (287 aircraft).

*Navy.* The 'Maritime Self-Defence Force' comprises a new guided-missile destroyer, 14 new destroyers, 7 new frigates and 5 new submarines (all built in Japan), 4 destroyers, 1 submarine, 2 destroyer escorts and 18 frigates (all acquired from US), a radar picket destroyer, 2 minelayers, 36 coastal minesweepers, 17 submarine chasers, 10 fast patrol boats, a supply and repair ship, a cable layer, 32 motor launches, 4 landing ships, 6 landing craft, 3 depot ships, 1 oiler, 3 tugs and 150 auxiliaries. Personnel in 1963 numbered 38,800 officers and ratings.

The Navy has a strong air arm, including 59 S2F and 56 P2V anti-submarine patrol bombers, 86 trainers, 32 helicopters and 12 other aircraft.

The 'Maritime Safety Board Organization' comprises 7 large patrol vessels, 22 medium patrol vessels, 56 small patrol vessels, 200 patrol craft, 24 hydrographic ships and 89 navigation supply vessels. Personnel in 1963 numbered 11,155 officers and men.

In Feb. 1960 some 520,000 agricultural tractors were owned or rented by 1·2m. farmers.

For post-war land reform, *see* THE STATESMAN'S YEAR-BOOK, 1955, p. 1179. Holdings average 2 acres (0·8 hectare); only 5% are more than 10 acres.

Rice is Japan's greatest crop, occupying 55% of the cultivated area. Much marginal land is used at a severe cost in labour and fertilizer. The entire crop is consumed plus imports (where possible) of another 15 or 20%. Output of rice (in 1m. tons) averaged 9·26 in 1934–38 and 9·59 in 1948–52; it rose to 12·38 in 1955 and 12·42 in 1961.

Sweet potatoes for several decades have mitigated the effects of rice famines; yield, in 1961, was 6·33m. tons. Sugar beet, in 1961, yielded 1,136,000 tons from 174,800 hectares. Fruit production, 1961 (in 1,000 metric tons): Peaches (201·3), pears (294·8), apples (955·4), grapes (174·5), persimmons (393·5) and mandarins (875·6).

Livestock (1962): 1m. dairy cattle, 2·33m. draft cattle, 546,700 horses, 4m. pigs, 504,400 sheep, 498,600 goats. Milk output is increasing—in 1962, 2,113,537 metric tons of milk.

*Forestry.* Forests and grasslands cover about 61m. acres (67% of the whole land area), with an estimated timber stand of 722,400m. bd ft. In 1961, 49·89m. cu. metres were felled.

*Fisheries.* Before the War, Japanese catch represented one-half to two-thirds of the world's total fishing; annual average, 1935–37, 6·3m. metric tons; 1961, 6,710,568 metric tons, excluding deep-sea fishing and whaling. The antarctic whaling has greatly expanded. Output of whale-oil, 1961, 139,024 metric tons.

*Mining.* Production in metric tons, 1961, of copper, 96,409; lead, 46,280; aluminium, 153,699; manganese, 290,355; iron ore, 1,158,724; zinc 212,431; tungsten ore, 824·8; asbestos, 17,054; antimony, 2,126·6; coal, 54·5m.; barite, 29,250; cadmium, 723·96; gold, 11·8m. grammes; silver, 389·2 tons.

The chemical industry ranks third in production value after textiles and iron and steel. Production, 1961, included (in metric tons) 2·5m. ammonium sulphate, 1·9m. calcium superphosphate, 1·4m. ammonium, 4·7m. sulphuric acid, 1·5m. calcium carbide.

In 1961 paper production was 5·4m. tons and pulp production, 4·1m. tons.

Japan's textile industry before the War had 13m. cotton-yarn spindles. After the War she resumed with 2·78m. spindles; in 1957, 9m. spindles were operating. Output of cotton yarn, 1961, 551,519 metric tons, and of cotton cloth, 3,383m. sq. metres.

In wool, Japan aims at wool exports sufficient to pay for the imports of raw wool. Output, 1961, 144m. metric tons of woollen yarns and 340m. sq. metres of woollen and worsted cloth.

The rayon industry (the world's largest in 1936) was heavily stripped during the War, only about 30% surviving. Output, 1961, of filament-rayon fabrics, 793·9m. sq. metres; spun-rayon fabrics, 981·4m. sq. metres; synthetic fibre fabrics, 616m. sq. metres; silk fabrics, 174,148 sq. metres; spun silk yarn, 1,049 tons; raw silk, 18,679 tons.

*Power.* There were in 1961, 1,539 hydro-electric and 519 thermal power plants with a combined capacity of 25,954,000 kw. Electric power generated in 1961 was 132,023m. kwh., of which 67,957m. was hydro-electric.

**Labour.** Total labour force, Oct. 1961, was 45·2m., of which 13·5m. were in agriculture and forestry, 560,000 in fishing, 460,000 in mining, 2·55m. in construction, 10·16m. in manufacturing, 8·4m. in commerce and finance, 2·54m. in transport and other public utilities, 5·6m. in services (including the professions) and 1·34m. in government work.

**COMMUNICATIONS.** *Shipping.* In Dec. 1961 the merchant fleet consisted of 3,067 vessels (over 100 gross tons) of 7,312,965 gross tons; there were 110 ships for passenger transport (67,767 gross tons), 1,967 cargo ships (5,216,359 gross tons) and 889 oil tankers (1,916,720 gross tons). Only 41% of Japanese exports and imports was in 1961 carried in Japanese ships (70% pre-war).

*Roads.* The total length of roads (excluding urban and other local roads) was 147,042 km in 1961; the 'national' roads extend 24,937 km, of which 8,141 km were paved; prefectural roads covered 122,018 km (9,306 km paved). The Bank undertakes the actual management of Treasury funds and foreign exchange control.

The total gold and foreign currency holdings of the Government and the Bank of Japan in Dec. 1961 stood at US$1,484m.

The Yokohama Specie Bank (specializing in foreign exchange) became the Bank of Tōkyō in Aug. 1954. There were 87 banks with total assets of 16,059,714m. yen in 1961.

The post office savings bank is modelled upon the British; deposits amounted to 1,293,066m. yen at 1 March 1961.

### Al Mamlaka al Urduniya al Hashemiyah

**CONSTITUTION AND GOVERNMENT.** The Kingdom is a constitutional monarchy headed by His Majesty King **Hussein**, GCVO, eldest son of King Talal, who, being incapacitated by mental illness, was deposed by

Parliament on 11 Aug. 1952. The King was born 14 Nov. 1935, and married Princess Dina Abdel Hamid on 19 April 1955 (divorced 1957) and Toni Avril Gardiner (Muna al Husain) on 25 May 1961. Offspring: Princess Aliyah, born 13 Feb. 1956; crown prince Abdulla, born 30 Jan. 1962; prince Faisal, born 11 Oct. 1963.

By a treaty, signed in London on 22 March 1946, Great Britain recognized Transjordan as a sovereign independent state. A new Anglo-Transjordan treaty was signed in Amman on 15 March 1948. The treaty was to remain in force for 20 years, but by mutual consent was terminated on 13 March 1957.

The Arab Federation between the Kingdoms of Iraq and Jordan, which was concluded on 14 Feb. 1958, lapsed after the revolution in Iraq of 14 July 1958 and was officially terminated by royal decree on 1 Aug. 1958.

On 25 May 1946 the Amir Abdullah assumed the title of King, and when the treaty was ratified on 17 June 1946 the name of the territory was changed to that of 'The Hashimite Kingdom of Jordan'. This name, instead of 'Transjordan', however, came into general use only in 1949. The legislature consists of a lower house of 60 members elected by manhood suffrage (30 from East Jordan and 30 from West Jordan), and a senate of 30 members nominated by the King. Elections took place on 6 July 1963.

The constitution passed on 7 Nov. 1951 provides that the Cabinet is responsible to Parliament.

The metalled road from Amman to Ma'an and Aqaba has branches to Kerak, Tafileh and Wadi Musa (Petra). The town of Jerash is joined by a good road to Amman. The normal asphalted route from Amman to Deraa (in Syria) and thence to Damascus is through Jerash. The oasis of Azrak may be reached by motor car from Mafrak, Zerka or Amman. # KOREA

## HAN KOOK

**HISTORY.** Korea, which had for many centuries been closed to foreigners, was in 1876 forced by Japan to open its ports to Japanese shipping and trade. China, which claimed a vague suzerainty over Korea, dispatched troops to Korea and, in order to offset Japanese influence, forced Korea to conclude trade agreements with the USA, Great Britain, Germany (1883), Italy and Russia (1884). After the Russo-Japanese war of 1904–5 Korea was virtually a Japanese protectorate until it was formally annexed by Japan on 22 Aug. 1910, thus ending the rule of the Yi dynasty which had begun in 1392.

Following the collapse of Japan in 1945, American and Russian forces entered Korea to enforce the surrender of the Japanese troops there, dividing the country for mutual military convenience into two portions separated by the 38th parallel of latitude. Negotiations between the American and Russians regarding the future of Korea broke down in May 1946.

On 25 June 1950 the North Korean forces crossed the 38th parallel and invaded South Korea. The same day, the Security Council of the United Nations asked all member states to render assistance to the Republic of Korea. When the UN forces had reached the Manchurian border, Chinese troops entered the war on the side of the North Koreans on 26 Nov. 1950 and penetrated deep into the south. By the beginning of April 1951, however, the UN forces had regained the 38th parallel.

After the first year of fighting, Y. A. Malik, President of the Security

Council, broadcast on 23 June 1951 suggesting a cease-fire in Korea. This was accepted by both sides, and on 10 July representatives of Gen. Ridgway met representatives of the North Koreans and of the Chinese Volunteer Army. An agreement was signed 2 years later on 27 July 1953.

For the contributions of member-nations of the United Nations to the war, *see* THE STATESMAN'S YEAR-BOOK, 1954, p. 1195, and 1956, p. 1180.

On 9 Aug. 1953 the USA and Korea signed a mutual defence pact and on 28 Nov. 1956 a treaty of friendship, commerce and navigation.

**GOVERNMENT.** The first general election was held, under United Nations observation, on 10 May 1948. The National Assembly adopted a constitution on 17 July, elected Dr Syngman Rhee President of the Republic on 20 July, and proclaimed the Republic of Korea on 15 Aug., when US military government ended.

President Syngman Rhee was re-elected on 5 Aug. 1952, 15 May 1956 and 15 March 1960, but was forced to resign and leave the country at the end of April 1960. The National Assembly on 15 June 1960 amended the constitution, changing the presidential-government system to a cabinet system, with the president as the symbolic head of state. A joint session of both Houses of Parliament on 12 Aug. 1960 elected the Democratic leader, Posun Yun, president.

The elections held on 29 July 1960 gave the Democratic Party 31 out of 58 seats in the House of Councillors and 181 out of 233 seats in the National Assembly.

The democratically elected government of Dr Myun Chang was overthrown by a military revolution on 16 May 1961. The National Assembly was dissolved and political parties were banned.

The 'Supreme Council of National Reconstruction' is headed by Gen. Chung Hee Park who was confirmed as President of the Republic in the presidential election on 15 Oct, 1963.

The cabinet appointed on 12 Dec. 1963 by the military junta (which dissolved itself on 16 Dec.), includes Too Sun Choi as prime minister and Gen. Park's vice-chairman, and Gen. Il Kwon Chung as foreign minister.

In Oct. 1962 the Supreme Council decreed the resumption of party-political activities in 1963, in preparation for elections to re-establish civilian government. Martial law was raised on 5 Dec.

A new constitution was approved by a referendum on 17 Dec. 1962 (7,843,505 votes in favour, 2,008,201 against, 237,864 invalid). The constitution provides for a strong president and a unicameral legislature of 175 members. The elections held on 26 Nov. 1963 gave Gen. Park's Democratic Republic Party over 100 seats.

**AREA AND POPULATION.** After a transfer of some frontier districts by the United Nations command on 12 Aug. 1954 the area of South Korea is now 38,452 sq. miles (98,431 sq. km).

A census in Dec. 1960 showed a population of 24,994,117. The population of the largest cities was as follows: Seoul, the capital, 2,445,402; Pusan, 1,163,671; Taegu, 698,277, and Inchon, 402,009.

South Korea includes 9 provinces and Seoul City, which has provincial status.

**RELIGION.** Basically the religions of Korea have been Animism, Buddhism (introduced A.D. 372) and Confucianism, which was the official faith from 1392 to 1910. Catholic converts from China introduced Christianity in the 18th century, but the ban on Roman Catholics was not lifted until 1882. Estimated Christian population in 1959 was 1,578,643 (one-third Presbyterians, on-sixth each Roman Catholics and Methodists).

**EDUCATION.** In 1961 Korea had 3,854,912 pupils enrolled in primary schools, 700,709 pupils in 1,076 middle schools and 184,933 pupils in 367 high schools.

For higher education there were, in 1959, 18 normal schools with 383 teachers and 10,952 students and 61 colleges and universities with 3,858 teachers and 79,551 students; in Seoul and 7 provinces there are national universities. For adult education (the campaign against illiteracy) there are some 3,100 folk schools, with 292,300 pupils.

The Korean language belongs to the Ural–Altaic group, is polysyllabic, agglutinative and highly developed syntactically. The modern Korean alphabet of 10 vowels and 14 consonants forms a script known as Hangul.

*Cinemas* (1959). There were 265 cinemas in South Korea, with a seating capacity of 150,000.

*Newspapers* (1962). There were 38 daily papers, including 2 in English.

**HEALTH.** South Korea had, at the end of 1959, 10,121 physicians, 1,276 dentists, 3.789 midwives and 3,856 pharmacists.

**FINANCE.** In the 1962 budget actual revenue amounted to 78,869m. *won* and actual expenditure to 73,498m. *won*. The 1963 budget envisaged revenue of 74,138m. *won* (including foreign aid of 25,521m. *won*) and expenditure of 74,138m. *won* (including defence, 21,432m. *won* and government investment and loan, 20,339m. *won*).

**PRODUCTION.** The 5-year plan 1962–66 aims at achieving a self-sufficient agricultural economy on which two-thirds of the population is dependent; and a considerable increase of coalmining, chemical industry and electrical power production. The plan envisages financial requirements of 22,800m. *won* plus US$700m.

*Agriculture.* The arable land in South Korea comprises 22·4m. acres, of which nearly 5m. acres are cultivated.

The chief crops are rice (1961: 100m. bushels), barley, wheat, beans, grain of all kinds, besides tobacco and cotton.

Output of tobacco manufactures, a government monopoly, was 21,687 metric tons in 1959.

Raising of livestock, once a flourishing industry, has barely survived as a by-product of agriculture. But the Government and the UN are aiding its revival. In 1961 cattle numbered over 1m.; hogs, 1·23m.; poultry, 13·4m.

*Fisheries.* The catch in 1959 was 382,125 metric tons. Whale fishing is carried on off the coast.

Food and beverage processing, cement and textile production accounted for more than 50% of the total value of industrial output in 1959. Other consumer goods occupy another 20% of the total output, and metals and machinery contribute less than 12% of the total. Cotton-manufacturing industry is fairly well developed. In 1959 there were 380,073 cotton spindles and 7,300 looms; production, 1959, was 106·9m. lb. of yarn and 231·6m. sq. yd of cloth. Silk manufacture in 1959 amounted to 3·6m. sq. yd of fabrics.

Severe inflation followed until on 17 Feb. 1953 President Rhee abolished the *won*, substituting a new unit, the *hwan*, equal to 100 *won*. The *hwan* depreciated from 60 in Feb. 1953 to 1,300 to US$1 in April 1961. On 10 June 1962 the *hwan* was revalued at the rate of 10 *hwan* = 1 *won* (130 *won* = US$1).

# NORTH KOREA

## Chosun Minchu-chui Inmin Konghwa-guk

**HISTORY.** In northern Korea the Russians, arriving on 8 Aug. 1945, one month ahead of the Americans, who landed 8 Sept., established a Communist-led 'Provisional Government'. The newly created Korean Communist Party merged in 1946 with the New National Party into the Korean Workers' Party. In July 1946 the KWP. with the remaining pro-Communist groups and non-party people, formed the United Democratic Patriotic Front. On 25 Aug. 1948 the Communists organized elections for the Supreme People's Assembly, both in Soviet-occupied North Korea (212 deputies) and in US-occupied South Korea (360 deputies, of whom a certain number went to the North and took their seats). The USSR established full diplomatic relations on 12 Oct. 1948 and had withdrawn its armed forces by 25 Dec. 1948.

**CONSTITUTION AND GOVERNMENT.** On 8 Sept. 1948 the Assembly passed the constitution of the Democratic People's Republic of Korea. In 1954 and 1955 some amendments were made, dealing mainly with administrative divisions and the composition of the Council of Ministers.

The highest *de facto* authority is the Politburo of the Korean Workers' Party. The present Politburo was elected on 18 Sept. 1961 by and from the Central Committee of the Party (85 members and 50 candidate members). The Politburo has 11 full and 4 candidate members; the most important are: Marshal Kim Il-Sung, *Chairman of the Central Committee of the Party, Premier since* 1948, *Supreme Commander of the Armed Forces*; Choi Yong Kun, *a Deputy Chairman of the Central Committee and Chairman of the Presidium of the Supreme People's Assembly* (*i.e.*, titular Head of State); Kim Il, *a Deputy Chairman of the Central Committee and First Vice-Premier of the Cabinet*; Gen. Kim Kwang Hyup, *a Vice-Premier and Minister of National Defence.* The Foreign Minister Pak Sung Chul is not in the Politburo. There is no Party Secretariat.

**AREA AND POPULATION.** The area of North Korea is 46,814 sq. miles (121,248 sq. km). Estimated population in 1963, 11·04m. In 1960 the birth-rate was 38·5 and the death-rate 10·5 per 1,000. The capital is Pyongyang, with 940,000 inhabitants.

The country is divided into 11 higher administrative units: two cities (Pyongyang, the capital; Kaesong) and the following 9 provinces (capitals in brackets): South Pyongan (Wonsan), North Pyongan (Sinuiji), Jagang (Kanggye), South Hwanghai (Haijoo), North Hwanghai (Sariwon), Kangwon (Choonchun), South Hamkyung (Hamheung), North Hamkyung (Chungjin), Ryanggang (Hyesan). The two leading ports are Chungjin (200,000 inhabitants) and Heungnam, near Hamheung (150,000).

**EDUCATION.** In 1960 North Korea introduced a 7-year system of compulsory and free education (4 years elementary schools, 3 years middle schools), followed, for suitable pupils, by a 2-year course at a technical school and a 2-year course at a technical college.

In 1962–63, 9,190 schools of all grades were attended by 2·55m. pupils, including 214,000 college and university students, two-thirds of whom were studying technical and engineering subjects.

There are 3 universities—Kim Il Sung University, Kim Chaek Technical University, Pyongyang Medical School—and an Academy of Science (founded 1952). In 1961–62 Kim Il Sung University had 54 professors and 1,000 junior teaching staff, and 5,600 full-time and 6,500 evening and correspondence students.

On 13 Oct. 1960 China promised a new credit of 420m. roubles, raising the total of Chinese loans to over 2,000m. roubles. On 1 Nov. 1960 the USSR cancelled the repayment of credits worth 760m. roubles and postponed indefinitely the repayment of a further 140m. roubles.

**DEFENCE.** Military service is compulsory at the age of 17.

*Army.* In 1958 (latest available figures) the army numbered about 430,000 officers and men, organized in 18 divisions and 5 brigades, with 600 tanks and armoured cars.

*Navy.* The navy comprises 10 fleet minesweepers, 17 submarine chasers, 21 motor torpedo-boats, 20 minesweeping boats, 26 auxiliaries and 70 armed junks. Personnel in 1963: 8,800 officers and men.

*Air Force.* The air force is equipped with about 1,000 modern aircraft, including over 700 Soviet-built MiG-15 and MiG-17 jet-fighters and Il-28 twin-jet bombers. It is believed to have about 33,000 officers and men.

**PRODUCTION.** *Planning.* After the Korean War (1950–53) North Korea started rehabilitation and development of her national economy through 3 consecutive plans: a 3-year plan 1954–56, to exceed the 1949 level; a 5-year plan 1957–61 and a 7-year plan 1961–67, overlapping in 1961.

The target figures of the 7-year plan are, by the end of 1967, the following:

*Agriculture* (in 1,000 metric tons): Grain, 6,600; vegetables, 4,230; flax, 60; hemp, 10; tobacco, 44; meat, 350; milk, 110; fruit, 500; silk cocoon, 22; 800m. eggs; marine products, 1,200. *Livestock:* Cattle, 1m., of which 100,000 milch cows; pigs, 3m.; sheep 500,000; goats, 300,000; rabbits, 1·33m.; poultry, 9·61m. *Mining and Industry* (in 1m. metric tons): Coal, 25; iron ore, 7·2; pig and granulated iron, 2·3; steel, 2·3; rolled steel, 1·7; chemical fertilizers, 1·7; sulphuric acid, 0·65; caustic soda, 0·1; sodium carbonate, 0·11; carbide, 0·53; cement, 4·3. Electricity, 17,000m. kwh.; tractors, 17,100 units. *Major consumer goods:* Fabrics (mostly cotton), 500m. metres; footwear, 40·7m. pairs (of which 19·8m. pairs leather shoes); watches and clocks, 725,000 units; radio sets, 120,000; sewing machines, 123,000; bicycles, 150,000; paper, 250,000 metric tons.

Actual mining and industrial production (in 1,000 metric tons) in 1963 (and 1962): Coal, 14,040 (15,200); pig-iron, 1,159 (1,213); steel, . . (1,500); steel ingots and castings, 1,022 (1,050); rolled steel, 762; chemical fertilizers, 853 (779); iron ore (1961), 3,454 (3,963); lead (1961), 49,890 (49,890); zinc (1961), 81·6 (81·6); tungsten, 5 (5); phosphate rock (1961), 50·8 (50·8); graphite, . . (50). Gold, 130,000 (130,000) troy oz.; silver, 500,000 (500,000) troy oz. Electricity, 11,766m. (11,445m.) kwh. Textiles, 227m. (250m.) metres; cement, 2·53m. tons.

*Agriculture.* In March 1946 all Japanese-owned property and all Korean landowners' property above 5 *jungbo* (1 *jungbo* = 1 hectare = 2·5 acres) were distributed among some 724,500 landless peasants and smallholders.

In 1960, 1·9m. *jungbo* were under cultivation, of which 800,000 *jungbo* had regular irrigation. There were, in 1963, 18,000 tractors (in 15-h.p. units) and 49,000 trailing farm machinery. The technical revolution in agriculture (nearly 95% of ploughing etc., is mechanized) considerably increased the yield of grain (sown on over 650,000 *jungbo* of land); this amounted in 1960 to 3·8m. metric tons, and in 1961, to the record harvest of 4·83m. tons.

In 1963 rice accounted for 58% of the total agricultural output (1962: 51%).

Livestock, 1960: 672,000 cattle, 1,123,000 pigs, 105,000 sheep.

*Fishery.* The catch was 690,000 tons in 1960.

*Mining.* North Korea has the iron ore and almost all the important metallurgical works of the peninsula. Oilwells went into production in 1957.

*Industry.* Industries in the North were intensively developed by the big Japanese concerns, notably cotton spinning, hydro-electric power and cotton, silk and rayon weaving, and the leading industry, the nitrogeneous fertilizer works of the Chōsun Chilso Company and its allied chemical factories at Heungnam, on the east coast. The 5 biggest power stations and the projected station of the Yalu River, to be one of the largest in the world, are all in the North, as is Korea's sole petroleum refinery and 7 out of 8 major cement works (production, 1960, 2,285,000 tons). All these plants have been rebuilt after the war-damage.

**COMMERCE.** North Korea in 1963 imported to the UK goods valued at £211,782 (1960, £5,205; 1961, nil; 1962, £70,249) and exported from the UK goods valued at £21,921 (1960, £79,266; 1961, £20,631; 1962, £15,546).

About 60% of the foreign trade was with the USSR, 30% with China and 3% with non-Communist countries.

**COMMUNICATIONS.** *Railways.* Before 1950 there were 6,360 km of railways in North Korea; as many of the Japanese-built lines served their strategic purposes only, and as the 1953 cutting of Korea into two parts made some other lines useless, the restoration of the heavily damaged tracks and installations has been restricted to the rehabilitation of about 5,000 km, the total length exploited in 1964. The *Kyung-ui Line* (normally Seoul–Sinuiji, 496·7 km; at present, within North Korea, Kaesong–Sinuiji, 431 km) runs through major industrial and agricultural districts on the western plains; its electrification is scheduled to be completed by Aug. 1964. The international through-train Peking–Pyongyang–Moscow crosses the Yalu bridge and connects with the Chinese railways; the *Wonra Line* (862·2 km) connects the ports of Wonsan and Rajin, the latter also known as Najin and Rashin.

In 1961 the North Korean railways transported 32m. metric tons of freight.

*Roads.* Motor transport is very important, as about one-third of the inhabited places are without railway communications. Roads are bad and mostly unpaved; statistics about their length, etc., are lacking. In 1961 lorries and coaches transported 17·7m. tons of freight.

*Inland Waterways* accounted, in 1961, for 3·5m. tons of cargo. The biggest navigable river is the Yalu, up to the Hesan district, 698 km from the mouth.

*Shipping.* There are excellent and important seaports, predominantly on the east coast (Japan Sea). However, west coast ports (Yellow Sea) also play their role, and Nampo, the port of Pyongyang, has been specially dredged and expanded in the post-war period. The two cities are connected by railway and by the navigable river Taidong. In mid-1962 the North Korean merchant navy consisted of 3 modern motorships, with a total of 5,370 GRT; they were built in Bulgaria (Varna) and their Diesels are from East Germany (Magdeburg). The 7-year plan expects to raise the shipping tonnage to some 36,500 GRT.

*Aviation.* Domestic lines: Pyongyang–Hamheung–Chungjin (the 3 biggest centres of the country); international lines: Pyongyang–Shenyang (China)–Chita (USSR), providing regular connexion with Peking and Moscow.

*Radio.* In 1961 there were 600,000 radio receivers. The Pyongyang Central Broadcasting Station was rebuilt about 1955.

**MONEY.** The monetary unit is the *won*, divided into 100 *jun*. Official rate of exchange: £1 = 7·2 *won*; US$1 = 2·57 *won*; 100 *won* = 74·93 roubles. This 'new' *won* was adopted in Feb. 1959.

**DIPLOMATIC RELATIONS.** North Korea maintains diplomatic relations only with the Communist countries.

# KUWAIT

THE independent and sovereign State of Kuwait is situated on the north-western coast of the Arabian Gulf. The ruling dynasty was founded by Shaikh Sabah abu Abdullah, who ruled from 1756 to 1772. In 1899 the then ruler Shaikh Mubarak, fearing that the Turkish Government intended to make their nominal authority in Kuwait effective, concluded a treaty with Great Britain wherein, in return for the assurance of British protection, he undertook not to alienate any of his territory without the agreement of Her Majesty's Government. In 1914 the British Government recognized Kuwait as an independent government under British protection. On 19 June 1961 an agreement was signed between Britain and Kuwait in which the independence and sovereignty of Kuwait was reaffirmed and the government of Kuwait's responsibility for the conduct of internal and external affairs was recognized; the agreement of 1899 was terminated and Her Majesty's Government expressed their readiness to assist the government of Kuwait should they request such assistance.

*Ruler:* H.H. Shaikh Sir Abdullah as-Salim as-Sabah, GCMG, CIE, the 11th Amir of Kuwait, succeeded on 25 Feb. 1950. *Heir* (appointed 30 Oct. 1962), Shaikh Sabah as-Salim as-Sabah, the ruler's brother.

*Flag* (adopted on 1 Jan. 1962): A horizontal rectangle, whose length is twice its breadth. It is divided into green, white and red horizontal stripes of equal size, and contains a black trapezoid whose longer base is against the flagstaff and is equivalent in length to the breadth of the flag, whose shorter base is equivalent in length to the breadth of the white division and whose height is a quarter of the length of the flag.

*Constitution and Government.* Elections for a National Assembly were held on 23 Jan. 1963. A Council of Ministers was formed on 28 Jan. 1963; the ruler is the Head of the State, the heir apparent is the Prime Minister. Ten of the other 15 ministries are administered by members of the ruler's family.

The country is divided into 3 governorates, Kuwait (the capital), Ahmadi and Al-Hawalli.

*Area and Population.* Area, about 5,800 sq. miles (15,000 sq. km); the total population at the census of 1961 was 321,621; there were in 1961 about 3,450 Europeans and Americans in Kuwait.

*Education.* In 1962–63 there were 2,551 teachers, including 1,180 women, in 142 government schools. Pupils numbered 30,860 boys and 20,230 girls. About 640 Kuwaitis (60 of them girls) are studying abroad, 230 in England, 300 in the United Arab Republic and 110 in USA.

*Finance.* The 1962–63 expenditure amounted to 173·1m. dinars, of which 76·5m. was earmarked for development projects.

*Health.* Medical services are free to all residents. There are altogether 10 hospitals with over 2,500 beds in the state, including 3 tuberculosis sanatoria and 2 mental hospitals.

*Defence.* Kuwait maintains a small, well-equipped and mobile army.

The first operational air-force unit consists of 4 Hunter ground-attack fighters and 2 Hunter 2-seat fighter-trainers. Other equipment includes 2 Caribou twin-engined STOL transports, 6 armed Jet Provost trainers and Whirlwind helicopters.

*Production.* Kuwait oil comes mainly from the Burgan oilfield, the residential and administrative centre for oil operations being at Ahmadi. The field is developed by the Kuwait Oil Co., a joint British–American company. Production of crude oil began in 1946; in 1962 it totalled 93m. and in 1961, 84·4m. long tons. Pipelines connect the oilfields to the port of Mina al Ahmadi, near the village of Fahahil, which has 2 deep-water piers capable of handling up to 5 super-tankers simultaneously. The refinery at Mina al Ahmadi has been expanded to process 190,000 bbls of crude oil per stream day, but over 80% of the production from the fields is exported as crude oil. Revenue from oil operations is being utilized for large-scale development works, including power stations, schools, medical facilities and the supply of fresh water to Kuwait town. On 3 Dec. 1951 an agreement was concluded which gave the Shaikh an equal share of the company's profits.

In 1948 a concession was granted by the Shaikh to the American Independent Oil Company to exploit oil in the Kuwait Neutral Zone which Kuwait shares with Saudi Arabia. The Saudi Arabian portion is exploited by the Getty Oil Co. Oil was disovered in March 1953; exports of commercial quantities began at the end of the year. Total oil production of the American Independent Oil Company in 1961 was about 8m. tons. The construction of a 30,000-bbl-per-day refinery was completed in 1958.

In May 1958 a Japanese company was granted offshore oil rights in the Neutral Zone, in return for 57% of the profits. Twelve wells were drilled in 1960 and drilling continues. The first commercial shipment of oil to Japan was made on 25 March 1961.

The Royal Dutch-Shell group was granted a concession to exploit oil in the offshore area of Kuwait itself in Nov. 1960. The concession agreement in the name of the Kuwait Shell Petroleum Development Co. Ltd, was signed on 15 Jan. 1961.

*Commerce.* The port of Kuwait formerly served mainly as an entrepôt for goods for the interior, for the export of skins and wool, and for pearl fishing. Entrepôt trade continues but, with the development of the oil industry, is declining in importance. Pearl fishing is now on a small scale. Imports for the calendar year 1962 amounted to £101·9m., of which some were re-exported to Iran, Saudi Arabia and other Gulf states. Exports, including re-exports, totalled £8·2m. in 1962 (excluding oil). Dhows and launches of traditional construction are still built.

Total trade with UK, in £ sterling (British Board of Trade returns):

| | *1959* | *1960* | *1961* | *1962* | *1963* |

*Communications.* Ships of 27 lines make regular calls at Kuwait. BOAC, Kuwait Airways, Iraqi Airways, Iranian Airways, United Arab Airlines, Middle East Airlines, Trans Arabian Airlines, Saudi Arabian Airways, Lebanese International Airways, Air Liban, Air India, Lufthansa, Japanese Airlines and Gulf Aviation operate scheduled air services. Wireless communication was taken over by the Kuwait Government in 1956, internal postal services in Feb. 1958 and external postal services in 1959. There are about 3,750 telephones in Kuwait and about 2,000 in Ahmadi. There are a broadcasting and a television station.

*Currency.* The Kuwait *dinar* (at par with the £ sterling) of 1,000 fils, replaced the Indian external rupee on 1 April 1961. The amount of currency in circulation on 31 Dec. 1962 was KD 34m.

*Banking.* Four banks operate in Kuwait: the British Bank of the Middle East, the Kuwait National Bank, the Commercial Bank of Kuwait Ltd, which opened in April 1961, and the Gulf Bank of Kuwait, which opened in 1962.

# LAOS

**HISTORY.** The ancient Laotian Kingdom of Lan Xang (*i.e.*, of the Million Elephants) in the 14th century dominated a large part of Indo-China and Thailand, but later crumbled under invasions by the Annamites and Burmese. In 1707 it split into the kingdoms of Luang Prabang, Vientiane and Champassac. In 1827 Vientiane was conquered by the Thais. Although the dominant people of the Lao Thai race shared a common language and traditions, the almost complete absence of communications prevented any feeling of unity. Moreover, approximately half the population, living mainly in the mountainous regions, belonged to various tribal minorities.

The existence of Laos was saved by the arrival of the French. Thanks largely to the efforts of Auguste Pavie, the French Vice-consul at Luang Prabang, a French protectorate was established in 1893 after French soldiers had expelled the Thais. The Kingdom of Vientiane was not revived, and Champassac reverted to a principality.

In March 1945 French authority was suppressed by the Japanese. When the Japanese withdrew, an independence movement known as Lao Issarak set up a government under Prince Petsarath. This collapsed with the return of the French in 1946 and the leaders fled to Thailand. Under a new Constitution of 1947 the United Kingdom of Laos was formed with a constitutional monarchy under the Luang Prabang dynasty. In 1949 Laos became an independent sovereign state within the French Union and most of the Lao Issarak leaders returned to Laos. A few remained in dissidence under the leadership of Prince Souphannouvong, who allied himself with the

Vietminh and subsequently formed the 'Pathet Lao' rebel movement. In April 1953 the Vietminh aided by Pathet Lao forces invaded Laos.

An agreement on the cessation of hostilities in Laos was reached at the Geneva Conference in July 1954. This provided, *inter alia*, for the military and political integration of the Pathet Lao with the rest of the country. Lengthy negotiations to this end between Prince Souvanna Phouma (the Prime Minister) and Prince Souphanouvong led to the Vientiane agreements of Nov. 1957. A new government containing 2 members of the Neo Lao Hak Sat (the political party of the Pathet Lao) was formed, arrangements were made to integrate the Pathet Lao forces into the Laotian army, and supplementary elections were held in May 1958. The success of the NLHS in these elections (a quarter of the votes but half the seats) inspired the formation of a right-wing group, the Committee for the Defence of National Interests. With CDNI support Phoui Sananikone formed a new government which ruled by decree. In the summer of 1959 the breakdown of the Vientiane agreements, the failure to integrate the Pathet Lao troops and the arrest of NLHS leaders led to further Pathet Lao guerilla activity. Under pressure from the Army, led by Gen. Phoumi, Phoui Sananikone resigned in Jan. 1960. The elections produced a majority for the CDNI and a right-wing government under Prince Somsanith was formed in June 1960.

On 9 Aug. 1960 a *coup d'état* by Capt. Konglae led to the overthrow of the government and the return to power of Prince Souvanna Phouma, committed to neutralism and conciliation with the Pathet Lao. A right-wing rebellion led by Gen. Phoumi captured Vientiane in Dec. 1960 and forced Souvanna Phouma to flee the country; and a new government was set up under Prince Boun Oum. Capt. Konglae's 'neutralist' troops withdrew, and on 1 Jan. 1961 captured Xieng Khouang in co-operation with the Pathet Lao. In March Souvanna Phouma re-established his 'government' at Xieng Khouang and set up a joint headquarters with Souphanouvong.

In April 1961 a joint appeal by the British and Soviet Foreign Secretaries (as co-chairmen of the 1954 Geneva conference) led to a cease-fire (effective early May), the return to Laos of the International Control Commission and the convening at Geneva of a 14-nation conference to secure the neutrality of Laos. After prolonged negotiations between the 'Three Princes' (Souvanna Phouma, Boun Oum, Souphanouvong) a Government of National Union was formed on 23 June 1962 under Prince Souvanna Phouma. On 23 July 1962 an agreement was signed by all 14 nations providing for the withdrawal of foreign troops and international guarantees of Laotian neutrality.

*National flag:* Red, with a 3-headed white elephant in the centre.
*National anthem:* Phing Sad Lao ('Our Laos race').

**AREA AND POPULATION.** Laos has an area of 236,800 sq. km (88,780 sq. miles) and is divided into 16 provinces. In 1962 it had an estimated population of approximately 2·2m., a mean density of 8 inhabitants per sq. km. The country is mountainous and in places densely forested. The inhabitants belong to 3 racial groups: Thai (Lao, Neua, Dam, Deng, Lu), Indonesian (called Lao Theung, *i.e.*, mountain people) and mountaineers of Chinese origin (Ho, Yao, Meo). The largest group, the Thai, is Buddhist in culture and religion. There are also about 35,000 Chinese and 25,000 Vietnamese.

The chief towns are Luang Prabang, the royal capital (population about 8,000), Vientiane, the administrative capital (population about 100,000), Paksé and Savannakhet.

The official language is Lao; French is the second official language.

**GOVERNMENT.** The King is Head of State, C.-in-C. of the Army and supreme religious authority. He appoints the Prime Minister, who is assisted by a Council of Ministers. The legislative body is a National Assembly, elected every 5 years by universal suffrage. It can be dissolved by the King.

*The King.* Savang Vatthana, succeeded on 29 Oct. 1959, on the death of his father, King Sisavang Vong.

*Prime Minister and Defence:* Prince Souvanna Phouma.
*Vice-Premier and Economy:* Prince Souphanouvong.
*Vice-Premier and Finance:* Gen. Phoumi Nosavan.

**EDUCATION.** There were, in 1958, 770 primary schools (77,133 pupils); 1 high school, 5 colleges and 1 *lycée* provided secondary education for 1,984 pupils.

**JUSTICE.** A new judiciary system came into force in 1951. The King is the final arbiter of justice. There are courts of first and second instance, and a supreme court of appeal.

**FINANCE.** The budget for the Laotian fiscal year 1962–63 (ending 30 June) envisaged a total revenue of 1,218m. *kip* and a total expenditure of 4,639m. *kip*. Of this, 1,639m. was for the civil budget and 3m. for the military and police budget.

**DEFENCE.** Before Aug. 1960 the Laotian Army consisted of about 24 battalions. In 1962 the government forces numbered about 70,000, the neutralist forces about 15,000 and the Pathet Lao about 25,000. The Government has also 4 river squadrons of small gunboats and landing craft and a small air force, equipped mainly with T-28 and Texan piston-engined trainers, fitted with guns and rockets for army-support duties, C-47 transports, observation and light communication aircraft.

**PRODUCTION.** *Agriculture.* The chief products are rice (average production, about 520,000 tons), maize (average production, 10,000 tons), tobacco (700 tons), citrus fruits, sticklac, benjohn, tea and, in the Boloven Mountains of Champassac, coffee (100 tons), potatoes (700 tons), cardamom and cinchona. Opium is an important source of revenue. Cattle, buffalo and pig are numerous.

*Forestry.* The forests in the north produce valuable woods, teak in particular; the logs are floated down south on the Mekong. Northern Laos and the districts near Cambodia and the Annamese Chain abound in game, and elephant, gaur and tiger are hunted. Elephants are trained in forest work.

*Mining.* Various minerals are found in small quantities, but only tin is mined at present, and only at one mine, Phontiou (1962 production, 720·1 metric tons of 50% concentrate). There are extremely rich deposits of high-quality iron ore in Xieng Khouang province.

*Industry.* Industry is limited to silk weaving, pottery, leather goods, silver-work, etc. Modern saw-mills and rice-mills exist. 9·4m. kwh. of electricity were produced in 1962.

**COMMERCE.** In 1962 imports, including gold, amounted to K.3,773m. and exports, excluding gold, to K.61,984,600. The main imports were foodstuffs, textiles, machinery and metal and metal products; the main exports were wood and wood products, minerals and coffee. The chief supply countries were Thailand, USA and France.

Total trade with UK (British Board of Trade returns, in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK | 1 | — | 113 | 97 | 1 |

| Re-exports from UK | — | 28 | 133 | 374 | 115 |

**COMMUNICATIONS.** *Shipping.* The river Mekong is an important navigable waterway, but is interrupted by rapids. There are four navigable stretches when the ship's speed is maintained and the river is sufficiently high: Vientiane–Savannakhet (458 km), ships of 200 gross tons drawing 1·75m. at 7 knots; Savannakhet–Paksé (257 km), ships of 200 gross tons drawing 1·75m. at 12 knots; Paksé–Khône–Saigon (690 km), ships of 500 gross tons drawing 2·5m. at 7 knots. These figures are good only for certain times of the year. A hydrographical survey of the Lower Mekong basin is being organized under the auspices of the United Nations.

*Roads.* In 1961 there were 2,800 km of roads, of which 438 km were asphalted and a further 558 had a stone core. The remainder are usable by normal traffic only during the 6 dry months of the year. In 1961 there were some 5,000 private cars and 1,750 lorries and buses.

*Post.* There were, in 1954, 25 post offices, 850 km of telegraph lines. Telephones numbered 847 in 1962, and there were 6 radio stations.

*Aviation.* Laos had in 1960, 4 aerodromes and 19 airstrips. Royal Air Lao and Air Vietnam maintain services between Saigon and Vientiane. The former also maintains services inside Laos. Royal Air Lao and Thai Airways provide a daily service between Vientiane and Bangkok; Royal Air Lao and Royal Air Cambodge run weekly flights between Vientiane and Hanoi.

**MONEY AND BANKING.** The Laotian National Bank is responsible for the issue of currency. On 5 May 1955 the name of the currency unit was changed from piastre to kip (abbreviated K.). From 1 Jan. 1964 the official rate of exchange is K.240 = US$1 (Oct. 1958–Dec. 1963: K.80).

# LEBANON

## al-Jumhouriya al-Lubnaniya

**HISTORY.** After 20 years' French mandatory régime, the Lebanon was proclaimed independent at Beirut on 26 Nov. 1941. On 27 Dec. 1943 an agreement was signed between representatives of the French National Committee of Liberation and of Lebanon, by which most of the powers and capacities exercised hitherto by France were transferred as from 1 Jan. 1944 to the Lebanese Government. The evacuation of foreign troops was completed in Dec. 1946.

In early May 1958 the opposition to President Chamoun, consisting principally (though not entirely) of Moslem pro-Nasserist elements, rose in insurrection; and for 5 months the Moslem quarters of Beirut, Tripoli, Sidon and the northern Bekaa were in insurgent hands. On 15 July the USA Government acceded to President Chamoun's request and landed a considerable force of army and marines. President Chamoun's term of office expired on 23 Sept. when he was succeeded by the Commander-in-Chief, General Fuad Chehab.

On 31 Dec. 1961 an attempt was made to overthrow the government by the Parti Populaire Syrien, a small group which aims to create a single state out of the countries of the Fertile Crescent (*i.e.*, Iraq, Syria, Lebanon, Jordan). The uprising was quickly suppressed.

**CONSTITUTION AND GOVERNMENT.** Lebanon is an independent republic and a member of the United Nations and the Arab League. The first constitution was established under the French Mandate on 23 May 1926. It has since been amended in 1927, 1929, 1943 (twice) and 1947. It is a written constitution based on the classical separation of powers, with a President, a single chamber elected by universal adult suffrage, and an independent judiciary. The Executive consists of the President and a Prime Minister and Cabinet appointed by him. The system is however adapted to the peculiar communal balance on which Lebanese political life depends. This is done by the electoral law which allocates deputies according to the confessional distribution of the population, and by a series of constitutional conventions whereby, *e.g.*, the President is always a Maronite Christian, the Prime Minister a Sunni Moslem, and the Speaker of the Chamber a Shia Moslem. There is no highly developed party system.

*President of the Republic:* Gen. Fuad Chehab (took office 23 Sept. 1958).

Parliamentary elections were held between 12 June and 3 July 1960. The elections were the first to be held on the basis of a new electoral law, which increased the number of deputies from 66 to 99.

The Cabinet, formed on 21 Feb. 1964, is constituted as follows:

*Prime Minister, Interior and Defence:* Hussein Oweini.

*Deputy Prime Minister and Minister of Justice:* Jubran Nahhas. *Foreign Affairs:* Philippe Takla. *Education:* Charles Helou. *Agriculture:* Fuad Najjar. *Finance:* Amin Baihum. *Public Works, Guidance and Information:* George Naccache. *Labour and Social Affairs:* Dr Rida Wahid. *Economy and Planning:* Dr Fuad Ammoun. *Health and Posts:* Muhammad Kneio.

*National flag:* Red, white, red (horizontal), with a green cedar on the white stripe.

*National anthem:* Kullu na lil watan lil ‘ula lil ’alam (words by Rashid Nachleh, tune by Mitri El-Murr).

**AREA AND POPULATION.** The Lebanon is a mountainous country about 135 miles long and varying between 20 and 35 miles wide, bounded on the north and east by Syria, on the west by the Mediterranean and on the south by Israel. Between the two parallel mountain ranges of Lebanon and Anti-Lebanon lies the fertile Bekaa Valley. About one-half of the country lies at an altitude of over 3,000 ft.

The area of Lebanon is estimated at 10,400 sq. km (3,400 sq. miles) and the population at 1·75m. (1963). The principal towns, with estimated population, are: Beirut, 500,000; Tripoli, 100,000; Zahlé, 33,000; Saida (Sidon), 22,000; Tyre, 12,000.

Vital statistics, 1962: Births, 68,402; deaths, 8,494; marriages, 15,088; divorces, 971.

The official language is Arabic. French and, increasingly, English are widely spoken in official and commercial circles.

**RELIGION.** About half the population are Christians, who have been indigenous since the earliest time of Christianity. There were in 1958, 792,000 Christians, of whom 424,000 were Maronites, 150,000 Greek Orthodox, 69,000 Armenians, 91,000 Greek and Roman Catholics, 14,500 Armenian Catholics, 14,000 Protestants. Moslems numbered 536,000, of whom 286,000 were Sunnis and 250,000 Shiites. There were also 88,000 Druzes and 6,600 Jews.

**EDUCATION.** Government schools in 1962 comprised 1,024 primary schools (116,295 pupils) and 68 secondary schools (7,603 pupils). There were also 1,225 private primary schools (151,192 pupils) and 203 private secondary schools (28,031 pupils). In addition, according to 1960 statistics, the Government ran 6 technical and trade schools (525 pupils), 4 agricultural schools (237 pupils), 1 school of music (350 pupils), 1 school of hotel-keeping (311 pupils), 2 teachers' training colleges (60 students) and a reformatory (93 boys).

There are 4 universities in Beirut. In 1963 the Lebanese (State) University, opened in Nov. 1951, had 1,376 students; the American university had 2,478 students; the French university of St Joseph (founded in 1875) had 1,889 students; the Arab University, a branch of Alexandria University, had about 150 students. The French Government runs the École Supérieure de Lettres (478 students in 1960) and the Centre d'Études Mathématiques (155 students in 1960).

The Lebanese Academy of Fine Arts includes schools of architecture (120), art (100), music (60), political and social science (100).

*Cinemas* (1963). There were over 100 cinemas with a seating capacity of about 50,000.

*Newspapers* (1963). There were about 30 daily newspapers in Arabic, 3 in French, 2 in English and 4 in Armenian, with a total circulation of 100,000.

**FINANCE.** The 1963 budget balanced at £Leb.425·4m. Indirect taxation accounts for nearly one-half of the revenue. The main items of expenditure (in £Leb.1m.) were: Public works and transport, 131·2; defence, 67·2; education, 56·2; interior, 36·9; finance, 16·3; health, 13·8; foreign affairs, 13·4.

The 1964 budget envisaged £Leb.393·4m. revenue and £Leb. 476·4m. expenditure.

**HEALTH.** In 1957 there were 1,260 physicians and 6,000 hospital beds.

**DEFENCE.** The Army strength is about 10,000, the gendarmerie about 2,500, the police force about 500 and the security force about 250 men. The Army and the gendarmerie use British, American and French equipment.

The Air Force of about 600 men and 27 aircraft comprises 3 Chipmunk primary trainers, 5 Hunter jet fighters, 12 Vampire fighter-bombers and trainers, 1 Dove light transport and 6 Alouette II and III helicopters.

The Navy consisted in 1963 of 5 coastal patrol launches and 1 landing craft and about 200 men.

**PRODUCTION.** *Agriculture.* Lebanon is essentially an agricultural country, although owing to its physical character only about 26% of the total area of the country is at present cultivated. The forests of the past have been denuded by exploitation and the unrestricted grazing of goats, and only about 80,000 hectares of indifferent timber remain, and soil erosion is considerable.

The estimated yield (in 1,000 metric tons) of the main crops in 1962–63 was as follows: Oranges, 120; apples, 55; grapes, 75; wheat, 60; potatoes, 45; lemons, 42.

Livestock (official estimate, 1960): Goats, 500,000; sheep, 75,000; cattle, 70,000 (one-fourth are dairy cows); buffaloes, 200; camels, 1,400; hogs, 7,000; horses, 3,000; donkeys, 20,000; mules, 6,000.

*Mining.* Iron ore exists in large quantities, but the absence of coal is an obstacle to smelting. Other minerals known to exist are iron pyrites, copper, bituminous shales, asphalt, phosphates, ceramic clays and glass sand; but the available information is of doubtful value.

*Industry.* Industry as a whole is on a small scale. According to 1959 figures the largest industries by registered capital were the textile and food industries (£Leb.115m. and £.Leb.101m. respectively). Other industries (with registered capital in £Leb.1m.) were: Metallurgical (excluding transport machinery and equipment) (34); petrol refining (33); chemical products (33); beverages (32); wood and cork (28); furniture (25); printing (21); cement (2).

There are 2 oil refineries in Lebanon, one at Tripoli, the property of the Iraq Petroleum Company, which there refines oil brought by pipeline from Iraq, and the other at Sidon, the property of the Trans-Arabian Pipeline Company, which there refines oil brought from Saudi Arabia. The production of these refineries, which in 1962 was about 841,000 tons, is insufficient to meet the country's requirements of refined fuel.

**COMMERCE.** Foreign as well as local wholesale and retail trade is the principal source of income in Lebanon and provides a little over 25% of the total. Because of the protectionist policies followed in some neighbouring countries, this sector has been declining in recent years in relation to others, the sectors to gain being those of banking, real estate, government and services (especially tourism).

In 1961 Lebanese imports totalled 1,973·5m. kg. valued at £Leb.1,061·4m.; exports totalled 219·7m. kg. valued at £Leb.397·3m. Of the imports 23% came from UK, 15% from USA, 7% from West Germany, 6·7% from France and 5% from Italy. Of the exports 20% went to Saudi Arabia, 9% to Switzerland, 8% to Jordan, 5% to Syria, 5% to Iran and 3% to UK.

Total trade with UK (British Board of Trade returns, in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . . | 2,380,749 | 1,889,110 | 1,837,183 | 2,939,093 | 3,753,680 |
| Exports from UK . . | 9,497,910 | 10,902,938 | 16,017,867 | 11,519,870 | 13,514,666 |
| Re-exports from UK . | 245,496 | 196,957 | 259,619 | 448,176 | 896,325 |

Customs duties are usually imposed on an *ad valorem* basis: the receipts are the Lebanese Government's main source of income. The considerable adverse balance of trade is offset by invisible receipts, including foreign capital investment in Lebanese real estate, remittances from émigrés and receipts from tourism and international arbitrage operations.

**COMMUNICATIONS.** *Shipping.* Beirut is by far the largest and busiest port. In 1962, 3,264 vessels (total tonnage 4,632,655) loaded 403,267 tons and unloaded 1,229,236 tons. Activity in the port of Tripoli has, however, grown in recent years due to increased movements in goods and petroleum. The small port of Sidon in the south, near to the closed Lebanese–Israeli frontier, is at present of little importance.

*Railways.* There are 3 railway lines in Lebanon, all operated by the Office des Chemins de Fer de l'Etat Libanais (CFL): (1) Nakoura–Beirut–Tripoli (standard gauge); the Nakoura–Sidon section has been idle since the establishment of Israel; (2) a narrow-gauge line running from Beirut to Rayaq in the Bekaa Valley and thence to Damascus, Syria; (3) a standard-gauge line from Tripoli to Homs and Aleppo in Syria, providing access to

Ankara and Istanbul. From Homs a branch of the CFL line extends south and re-enters Lebanon, terminating at Rayak.

The railway system is operated at a considerable annual loss, attributable largely to unrestricted competition from road transport. 71,689 passengers and 449,048 tons of goods were carried in 1961. Receipts were £Leb.3,039,186.

*Roads.* The main roads in Lebanon are good. The surface is normally of asphalt and they are normally well maintained. The arterial roads are as follows: Coastal north/south trunk route, Lebanon/Syria frontier–Tripoli–Beirut–Saida–Nakoura (Israel frontier), 228 km; west/east trunk route (for Damascus, 112 km), Beirut–Aley–Chtaura–Lebanon/Syria frontier, 65 km; Inland north/south trunk route, Lebanon/Syria frontier (Homs)–Baalbeck–Zahlé–Chtaura, 105 km.

The network of main roads and secondary roads for intercommunication and connexion with the arterial routes is adequate and in general attains a reasonable standard of efficiency.

Passenger transport outside the town of Beirut is provided by a great number of small private companies running cheap and regular bus services and long-distance taxi services. Most goods traffic is hauled by road.

At 31 Dec. 1962 there were 65,555 cars (of which some 3,000 were taxis), 1,512 buses and 8,849 goods vehicles.

Beirut is the western terminus of Nairn Transport, Ltd, who run a bus service to Damascus to connect with their trans-desert coach service to Baghdad.

*Posts.* There is an automatic telephone system in Beirut, Tripoli and Sidon which is being extended to other towns and villages. There are no telegraph, postal or telephone communications with Israel. Number of telephones (1962), about 70,000.

The state radio transmits in Arabic and French. There are 2 commercial television stations, transmitting in Arabic and French, but American films, etc., are frequently shown.

*Aviation.* Beirut International Airport is used by many international airlines which connect Lebanon with most countries in the world. Extensive local services cover the Middle East, Persian Gulf and Europe. There are 3 national airlines, Middle East Airlines/Air Liban, Lebanese International Airways and Trans-Mediterranean Airways. In 1962, 16,791 aircraft arrived with 331,684 passengers, 6,524,320 kg of freight and 255,601 kg of mail; 16,786 aircraft departed with 343,192 passengers (174,151 in transit), 13,318,644 kg of freight (4,148,750 in transit) and 555,281 kg of mail (44,699 in transit).

**CURRENCY.** The official currency since 1 May 1920 is the Lebanese pound, divided into 100 piastres. Under the Anglo-French Financial Agreement, concluded at Algiers in Feb. 1944, the rate of the Syrian-Lebanese pound was fixed at 8·83 Syrian–Lebanese pounds to the pound sterling. On the devaluation of sterling the official parity became £Leb.6·13 = £1 sterling, as the Lebanon did not devalue. The official rate of exchange is used only for the calculation of customs duties on Lebanese imports and for the conversion into local currency of the salaries of personnel in Lebanese diplomatic and consular missions abroad. For other purposes the free market is used; the rate of the £ sterling in Sept. 1963 was £Leb.8·60 = £1, *i.e.*, £Leb.1 = 2*s.* 4½*d.* approximately.

On 31 Aug. 1963 the note circulation was £Leb.493m., the gold cover being 87·66%.

**BANKING.** Beirut is an important international financial centre, and there are over 50 banks in the city. The Banque de Syrie et du Liban had the sole right of note issue until 31 March 1964 when its concession expired and a new Central Bank of issue came into being. Two British banks are represented in Lebanon, namely the British Bank of the Middle East and the Eastern Bank.

**WEIGHTS AND MEASURES.** A decree dated 22 Aug. 1935 makes the use of the metric system legal and obligatory throughout the whole of the country. In outlying districts the former weights and measures may still be in use. They are: 1 *okiya* = 0·47 lb.; 6 *okiyas* = 1 *oke* = 2·82 lb.; 2 *okes* = 1 *rottol* = 5·64 lb.; 200 *okes* = 1 *kantar*.

# LIBERIA

**HISTORY.** The Republic of Liberia had its origin in the efforts of several American philanthropic societies to make permanent provision for freed American slaves by establishing them in a colony on the West African coast. In 1822 a settlement was formed on the west coast of Africa near the spot where Monrovia now stands. On 26 July 1847 the state was constituted as the Free and Independent Republic of Liberia. The new state was first recognized by Great Britain and France, and ultimately by other powers.

**CONSTITUTION AND GOVERNMENT.** The constitution of the Republic is modelled on that of the US. The executive power is vested in a President and Cabinet, and the legislative power in a legislature of 2 Houses, the Senate (10 members) and the House of Representatives (39 members). The President is elected for 8 years in the first instance, the House of Representatives for 4 and the Senate for 6 years.

*President of Liberia:* William V. S. Tubman (elected on 6 May 1943; re-elected in 1951, 1955, 1959 and 1963).
*Vice-President:* William Richard Tolbert, Jr.

The President may be re-elected for any number of subsequent 4-year terms. He must be a citizen of over 25 years' residence and have unencumbered real estate to the value of $2,500. Electors must be of negro blood and owners of land. The tribal people are not excluded from the franchise, but, except in the centres of civilization, take little part in political life. By the end of 1945, legislation was passed granting manhood suffrage to the tribes in the 3 hinterland provinces, which are now represented in the legislature by 13 members. In 1947 the franchise was extended to women.

The official language is English.

*National flag:* Six red and 5 white horizontal stripes alternating. In the upper corner, nearest the staff, is a square of blue covering a depth of 5 stripes. In the centre of this blue field is a 5-pointed white star.

*National anthem:* All hail, Liberia, hail! (words by President Warner; tune by O. Luca, 1860).

On 31 March 1942 an agreement was signed between the USA and Liberia by which the US were given the right to construct, control, operate and defend airports in Liberia for the duration of the war. On 8 June 1943 a further mutual aid agreement was concluded with the US, which extended lend-lease aid to Liberia for the purpose of defence and enabled it to increase its Armed Forces.

On 22 Dec. 1950 an agreement of assistance and co-operation was signed in Washington whereby a development programme is implemented under control of a joint American–Liberian Commission. In 1963 the US Agency for International Development announced loans for the construction of a hydro-electric project ($24·3m.), schools ($1·7m.) and hospitals ($4·7m.); the Federal Republic of Germany made a loan for road construction ($8·2m.).

**AREA AND POPULATION.** Liberia has about 350 miles of coastline, extending from Sierra Leone, on the west, to the Ivory Coast, on the east, and it stretches inland to a distance, in some places, of about 200 miles. The boundaries were determined by the Anglo-Liberian agreement of 1885 and the Franco-Liberian agreements of 1892 and 1907–10. In 1911 the territory of Kanran-Lahun was transferred to Sierra Leone in exchange for a strip on the south side of Morro River, which now is the boundary.

The total area is about 43,000 sq. miles (111,000 sq. km). The total population is estimated to be between 0·75m. and 2·5m., all of the African race, apart from a few thousand Europeans and Americans. The indigenous natives belong in the main to 6 principal stocks: (1) The Mandingos (Muhammedan), (2) the Gissi, (3) the Gola, (4) the Kpelle, (5) the Kru and (6) the Greboes. The other principal tribes are: Vai, Mendi, Belle, Dey, Manoh, Geo, Bassa, Buzzi, Gbandi, Krahn and Geh.

Monrovia, the capital, has a population of 80,000 and is administered as a commonwealth district by a Municipal Board appointed by the President. It is one of the 9 ports of entry along the 350 miles of coast, the others being Robertsport (Cape Mount), Marshall (Junk), Buchanan (Grand Bassa), River Cess, Greenville (Sinoe), Sasstown, Grand Cess and Harper (Cape Palmas). Other towns are Kolahun, Voinjama, Bomi Hills, Zorzor, Kakata, Nimba, Suakoko, Gbarnga, Ganta, Sanniquellie, Saklape and Tappita.

Under legislation approved in 1963 the country will be divided into 9 counties and 4 territories instead of into 5 counties and 4 territories in the coastal region and 3 provinces in the hinterland as hitherto.

**RELIGION.** The main denominations represented in Liberia are Methodist, Baptist, Episcopalian, African Methodist, Pentecostal, Seventh Day Adventist, Lutheran and Roman Catholic, working through missionaries and mission schools.

**EDUCATION.** Schools are classified as: (1) Public schools, maintained and run by the Government; (2) Mission schools, supported by foreign Missions and subsidized by the Government, and operated by qualified Missionaries and Liberian teachers; (3) Private schools, maintained by endowments and subsidized by the Government; (4) Tribal schools, maintained by tribal authorities.

By the end of 1962 there were said to be nearly 900 schools with nearly 80,000 pupils. By late 1963 some 239 US Peace Corps Volunteers were teaching in schools throughout the country.

**JUSTICE.** Justice is administered by a supreme court of 5 judges, circuit courts and lower courts. A new Liberian code of laws has been published (5 vols. to 1961).

**FINANCE.** The budgets for fiscal years ended 30 Sept. were as follows (in US $):

| | *1959–60* | *1960–61* | *1961-62* | *1962–63* | *1963–64* |
|---|---|---|---|---|---|
| Revenue | 29,933,152 | 32,709,000 | 36,093,000 | 36,154,695 | 39,000,000 |
| Expenditure | .. | 32,785,000 | 41,022,000 | 46,340,832 | 42,500,000 |

External debt in March 1963 was about $117m.

**DEFENCE.** For defence every citizen from 16 to 45 years of age capable of bearing arms is liable to serve. The establishment organized on a militia basis numbers 4,000, divided into 10 infantry regiments. There is in addition an enlisted frontier force, the Liberian National Guard, of 93 officers and 2,200 men. An American Military Mission to train these forces arrived in Sept. 1951.

The USA presented Liberia with 2 coastguard cutters in 1957 and 2 more in 1962. Personnel totals 200 officers and men.

**PRODUCTION.** *Agriculture.* The soil is productive, but due to excessive rainfall (from 160 to 180 in. per year), there are large swamp areas. Rice, cassava, coffee and sugar-cane are cultivated. Rice production does not equal consumption, and sugar-cane is grown for manufacture of locally consumed rum. Coffee production is increasing (exports, 1961, over 2m. lb.). Concessions have been given to foreign firms for timber production.

*Forestry.* Many forest products are gathered for export, of which piassava fibre (exports, 1961, 2·9m. lb.) and palm-kernels (exports, 1961, 28·4m. lb.) are the most important. The Firestone Plantation Co. have large rubber plantations, employing about 35,000 men. Their concession comprises about 1m. acres and expires in the year 2025. In 1961 the company had 102,000 acres planted and produced 79·6m. lb. of rubber.

Independent producers had a further 65,000 acres planted, producing about 11m. lb. of rubber in 1961.

The B. F. Goodrich Co. was, on 9 July 1954, granted an 80-year concession to produce rubber; part of the 12,300 acres planted was coming into production in 1963.

*Mining.* Diamonds are of increasing importance and there is some gold-mining. Mineral resources have not been completely surveyed. However, the Liberia Mining Co. at Bomi Hills, the National Iron Ore Co. near the Mano River and the Liberian American–Swedish Mineral Co. in the Nimba Mountains are exploiting their iron-ore concession areas. Iron ore exports amounted to 3·5m. tons in the 12 months Sept. 1961–Aug. 1962. The Liberian–German Mining Co. (DELIMCO) is developing a concession in the Bong Hills.

*Industry.* There are a number of small factories (brick and tile, soap, oxygen, acetylene, tyre re-treading, a brewery and soft drinks).

**COMMERCE.** Foreign trade for 5 calendar years was as follows (in $):

| | *1958* | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|
| Imports | 27,796,339 | 42,908,547 | 69,190,435 | 90,667,766 | 132,173,977 |
| Exports | 40,277,070 | 66,892,469 | 78,873,427 | 61,906,457 | 67,342,919 |

The substantial rise in the 1962 import figures reflects the considerable imports of capital equipment for the iron-ore mines at Nimba and in the Bong Hills, for the port of Lower Buchanan, and for the mineral railway from iron-ore mines at Nimba to Buchanan.

A considerable part of the value of exports relates to the export of iron ore and concentrates. A standard value per ton is used in the calculation of the value of iron ore and concentrates, and this standard value was sharply increased when the 1959 calculations were made. This resulted in a much larger total value for the 1959 exports arising neither from correspondingly increased exports of iron nor from any marked rise in actual world prices. The 1957 and 1958 export totals, using the new standard for iron ore, would be $54,469,765 and $53,768,257 respectively.

The principal exports in 1962 were: Rubber, $25,661,501; iron ore and concentrates, $33,148,012. Main importers were: USA ($29,875,500), Netherlands ($12,622,600), UK ($8,307,900), Federal Germany ($3,445,100).

According to British Board of Trade returns, the value of the trade between UK and Liberia was as follows (in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . . | 2,377,212 | 3,723,007 | 2,818,608 | 4,202,693 | 5,427,287 |
| Exports from UK . . | 3,067,939 | 4,577,205 | 2,928,291 | 6,304,585 | 6,624,899 |
| Re-exports from UK . | 82,753 | 114,785 | 196,279 | 215,615 | 348,574 |

The figures for exports from the UK include the value of shipping transferred to the Liberian flag; the genuine exports are considerably lower.

Liberia was placed in the American account area in 1952.

**COMMUNICATIONS.** *Shipping.* In 1962, 599 main-line ships entered Monrovia. There were also 421 calls made by coastal craft.

The Liberian merchant navy, in 1962, had a total registered gross tonnage of 10·8m. The Liberian Government requires only a modest registration fee and an almost nominal annual charge and maintains no control over the operation of ships flying the Liberian flag.

Constructed under the auspices of the USA Government under lend-lease terms, the port of Monrovia, a free port, was opened on 26 July 1948.

A modern port for the shipment of iron-ore from the mines at Nimba has been built at Lower Buchanan, capable of accommodating vessels up to 45,000 tons.

The river St Paul is navigable for a distance of 25 miles from its mouth for small craft of shallow draught. The Cavalla River is navigable for 50 miles.

*Railway.* A railway (for freight only) was built in 1951, connecting Monrovia with the Bomi Hills iron-ore mines about 40 miles distant; this has been extended to the National Iron Ore Co. area. A line from Nimba to Lower Buchanan (170 miles) was completed in 1963 and another line from Bong to Monrovia is under construction.

*Roads.* There are over 1,200 miles of state roads, suitable for motor traffic, as well as roads on private plantations. The principal highway connects Monrovia with the road system of Guinea, with branches leading into the Eastern and Western Provinces of Liberia. The latter branch reaches the Sierra Leone border and joins the Sierra Leone road system. A bridge over the St Paul River carries road and rail traffic to the iron-ore mines at Bomi Hills.

In the interior, communication is maintained by tracks, all goods being carried by native porters, but secondary roads are being constructed by native chiefs with state assistance, and transportation by vehicle is becoming increasingly common.

*Post.* There is cable communication (Compagnie des Cables Sud-Américaine) with Europe and America *via* Dakar, and a wireless station is maintained by the Government at Monrovia. There is a telephone service in Monrovia, at Robertsfield airport and on the Firestone plantations.

There are wireless stations at Monrovia, Bassa, Harper, Kolahun, Cape Mount and Sinoe. The wireless stations at Harbel and Gedetarbo, near Cape Palmas, have since 1928 been operated as a public utility by the US–Liberia Radio Corporation, a subsidiary of Firestone Plantations Co.

Postal agencies have been organized throughout the interior.

A commercial broadcasting station opened in Dec. 1959 and a television service on 1 Jan. 1964.

*Aviation.* The airport for Liberia is Robertsfield (over 50 miles from Monrovia). The James Spriggs Payne Airfield, 5 miles from Monrovia, can be used by four-engined aircraft only in dry weather. Air services are maintained by UAT, Pan American Airways, Ghana Airways, Nigerian Airways, Air Liban, Air Mali, Air Afrique, SAS, KLM, Ethiopian Airlines, Air Guinée and Liberian National Airways.

**MONEY.** The money in circulation is US currency since 3 Nov. 1942, but there is a Liberian coinage in silver and copper. Official accounts are kept in dollars and cents. The Liberian coins are as follows: Silver, $1, 50-, 25-, 10- and 5-cent pieces; alloy, 2- and 1-cent pieces.

British currency ceased to be legal tender after the end of 1943, and on 1 Jan. 1944 the Liberian dollar was raised to parity with the US$.

**BANKING.** The Bank of Monrovia, Inc., previously owned by the Firestone Plantation Co., was taken over by the First National City Bank of New York on 15 Sept. 1955.

The Bank of Liberia, Inc., was founded on 28 July 1955. An Italian bank, Tradevco, started business in 1955. The International Trust Co. of Liberia opened a commercial banking department at the end of 1960. The Commercial Bank of Liberia and a branch of the Chase Manhattan Bank opened in 1961. The Union National Bank (Liberia) Inc. opened in 1962.

**WEIGHTS AND MEASURES.** Weights and measures are the same as in Great Britain and US.

# LIBYA

## Al Mamlaka al Libiyya

Libya became an independent, sovereign, federal kingdom under the Amir of Cyrenaica, **Mohammed Idris Al-Senussi**, as King of the United Kingdom of Libya, on 24 Dec. 1951, when the British Residents in Tripolitania and Cyrenaica and the French Resident in the Fezzan transferred their remaining powers to the federal government of Libya, in pursuance of decisions passed by the United Nations in 1949 and 1950. The King is married to his cousin Fatima and to Aliyah Lamlun. In Nov. 1956 the King announced the appointment of HRH Prince Al Hassan Rida as Crown Prince unless he himself should have an heir.

*National flag:* Red, black, green (horizontal), with a white crescent and star in the centre.

**HISTORY.** Tripoli fell under Turkish domination in the 16th century, and though in 1711 the Arab population secured some measure of independence, the country was in 1835 proclaimed a Turkish vilayet. In Sept. 1911 Italy occupied Tripoli and on 19 Oct. 1912, by the Treaty of Ouchy, Turkey recognized the sovereignty of Italy in Tripoli.

After the expulsion of the Germans and Italians in 1942 and 1943, Tripolitania and Cyrenaica were placed under British, and the Fezzan under French, military administration. Britain recognized the Amir Mohammed Idris Al-Senussi as Amir of Cyrenaica in June 1949.

A treaty of friendship and alliance between the UK and Libya, together with military and financial agreements, was signed at Benghazi on 29 July

1953; and an agreement governing the use of bases in Libya by the US forces was signed at Benghazi on 9 Sept. 1954.

A Franco-Libyan treaty providing for the evacuation of French forces from the Fezzan was signed on 10 Aug. 1955.

**CONSTITUTION.** Until 1963 Libya was a federal state, each of the 3 provinces, Tripolitania, Cyrenaica and Fezzan, being administered by a governor assisted by an executive and legislative council. In April 1963, however, comprehensive unity was proclaimed and the federal system (together with the governors and the executive and legislative councils) abolished. The country is now divided into 10 divisions, each administered by a commissioner (*muhafidh*).

There are 2 Chambers. The Senate consists of 24 members elected for 8 years, with election of half the members every 4 years. The House of Representatives is elected on the basis of 1 deputy to every 20,000 inhabitants. In 1961 there were 55 deputies.

Arabic is the official language. Tripoli and Benghazi form the dual capital, but it is planned to establish a single capital at Beida.

*Prime Minister and Interior:* Mahmud Muntasir.

*Finance:* Salim Lutfi Qadi. *Foreign Affairs:* Husain Maziq. *Defence:* Saif Al-Nasr Abdul Jalil. *Petroleum Affairs:* Ali Anaizi.

**AREA AND POPULATION.** The area of the kingdom is estimated at 1,759,540 sq. km (679,358 sq. miles). The population, according to the census of 1954, was 1,091,830 and is now thought to be about 1·2m.

According to an arrangement with France (12 Sept. 1919) the western frontier extends in a curve from west of Ghadames to south of Tummo, including Ghat. According to the agreement with France of 7 Jan. 1935, the southern frontier runs along a line between Tummo and a cross-point indicated by 24° E. long. from Greenwich and 18° 45′ N. lat. Further frontier agreements with France were signed on 10 Aug. 1955 and 26 Dec. 1956. In 1926 Egypt ceded the oasis of Jarabub to Italy, in exchange for a rectification of the frontier near Sollum. The eastern boundary follows in general the 25° parallel E. long. (*See* map in THE STATESMAN'S YEAR-BOOK, 1952.)

Tripolitania has an area of about 353,000 sq. km and a population of about 800,000, mostly Moslem Arabs and Berbers, with considerable negroid intermixture, a dwindling number of Italians (now about 35,000), and small communities of Greeks, Maltese and Jews. Its capital, Tripoli, has a population of 184,000, of whom 144,000 are Libyans. Other important centres are Zavia (district, 115,114 inhabitants), Misurata (district, 66,735), Homs-Kussabat (district, 62,387), Zliten (district, 41,067), Tarhuna (district, 40,639) and Zuara (district, 30,806).

Cyrenaica has an area of about 855,370 sq. km and a population of about 320,000. Its capital, Benghazi, has a population of 80,000 (municipality and district, 140,000). Other centres are Barce (municipality, 10,014; severely damaged by earthquake, 22 Feb. 1963; district, 36,423), Derna (district, 35,962), Beida (district, 30,998), Agedabia (district, 27,705) and Tobruk (district, 19,886).

The Fezzan has an area of about 551,170 sq. km and a population of 54,438. Its capital, Sebha, has a population of 7,193.

**RELIGION.** Islam is declared the State religion, but the right of others to practise their religions is provided for.

**EDUCATION.** Pupils spend 6 years in elementary schools, 3 in preparatory and 3 in secondary. In 1960–61 there were 197,208 pupils in Tripolitania, 46,525 in Cyrenaica and 11,230 in Fezzan. The Libyan University had, in 1961, 702 undergraduates studying arts and teaching, commerce and economics, and science. In 1960 Libyan university students abroad numbered 279 (135 in Egypt, 54 in the UK, 26 in USA, 24 in Italy, 17 in Turkey, the remainder in western Europe).

There are several schools, mainly in Tripoli, providing British, French, Italian, American and Dutch curricula, mainly on elementary and intermediate levels and chiefly for the non-Libyan communities.

**JUSTICE.** The Civil, Commercial and Criminal codes are based mainly on the Egyptian model. Matters of personal status of family or succession matters affecting Moslems are dealt with in special courts according to the Moslem law. All other matters, civil, commercial and criminal, are tried in the ordinary courts, which have jurisdiction over everyone.

There are civil and penal courts in Tripoli and Benghazi, with subsidiary courts at Misurata and Derna; courts of assize in Tripoli and Benghazi, and courts of appeal in Tripoli and Benghazi. The Supreme Court consists of a president and judges appointed by the King.

**FINANCE.** The estimated revenue for the fiscal year ending 31 March 1964 amounted to £L63,713,880. Revenue included £L23m. from petroleum, £L15m. from customs and excise, £L14,411,500 from other domestic sources, £L3·25m. from the UK under the 1958 financial agreement, and £L3,571,430 from the USA under the revised air-base agreement of 1960.

The estimated expenditure amounted to £L65,171,313, of which £L43,437,313 was allocated to the ordinary (*i.e.*, 'recurrent') budget and £L21,734,000 to the development budget.

**DEFENCE.** The build-up of an air force began in 1959 with the acquisition of 2 Egyptian-built Gomhouria primary trainers. In 1963, 2 T-33 trainer fighters and a C-47 transport were acquired from USA.

Two coastal minesweepers were acquired from Great Britain in 1963.

**PRODUCTION.** A 5-year development plan (1963–68) provides for expenditures of £L169,097,000, to be derived mainly from oil revenues. £L37·9m. are to be allocated for public works, £L27·5m. for communications, £L22·4m. for education, £L12·5m. for health, £L8·5m. for social welfare and £L6·9m. from industrial projects.

*Agriculture.* Tripolitania has 3 zones from the coast inland—the Mediterranean, the sub-desert and the desert. The first, which covers an area of about 17,231 sq. miles, is the only one properly suited for agriculture, and may be further subdivided into: (1) the oases along the coast, the richest in North Africa, in which thrive the date palm, the olive, the orange, the peanut and the potato; (2) the steppe district, suitable for cereals (barley and wheat) and pasture; it has olive, almond, vine, orange and mulberry trees and ricinus plants; (3) the dunes, which are being gradually afforested with acacia, robinia, poplar and pine; (4) the Jebel (the mountain district, Tarhuna, Garian, Nalut-Yefren), in which thrive the olive, the fig, the vine and other fruit trees, and which on the east slopes down to the sea with the fertile hills of Msellata. Of some 25m. acres of productive land in Tripolitania, nearly 20m. are used for grazing and about 1m. for static farming. The sub-desert zone produces the alfa plant. The desert zone and the

Fezzan contain some fertile oases, such as those of Ghadames, Ghat, Socna, Sebha, Brak.

Cyrenaica has about 10m. acres of potentially productive land, most of which, however, is suitable only for grazing. Certain areas, chief of which is the plateau known as the Barce Plain (about 1,000 ft above sea-level), are suitable for dry farming; in addition grapes, olives and dates are grown. With improved irrigation, production, particularly of vegetables, could be increased, but stock raising and dry farming will remain of primary importance. About 143,000 acres are used for settled farming; about 272,000 acres are covered by natural forests.

In the Fezzan there are about 6,700 acres of irrigated gardens and about 297,000 acres are planted with date palms.

The average annual cereal production of the whole of Libya is about 110,000 tons. Olive trees number about 3·4m. and productive date-palm trees about 3m. Livestock: 931,000 sheep, 1,236,000 goats, 93,500 camels.

*Industry.* Amongst the more important industries of Tripolitania and Cyrenaica are sponge fishing, tunny fishing, tobacco growing and processing, dyeing and weaving of local wool and imported cotton yarn. and olive oil. Tripolitania also produces bricks, salt, leather and esparto grass for paper-making. Home industries of both territories include the making of matting, carpets, leather articles and fabrics embroidered with gold and silver.

*Oil.* Twenty-three oil companies are now prospecting in Libya; the most important discoveries so far made are: (i) Zelten, about 200 miles south from Benghazi and 100 miles from the nearest point on the coast; discovered by Esso (the local subsidiary of the Standard Oil Company of New Jersey) in April 1959. A 30-in. pipeline to the coast has been completed by the Arabian Bechtel Corporation. Production and export began in 1961. (ii) Dahra, roughly midway between Tripoli and Benghazi and about 90 miles from the coast, discovered in 1958–59; a pipeline to Ras El Sidr was completed in 1962. (iii) Beda, about 140 miles from the coast and just east of the Tripolitanian/Cyrenaican border, discovered by Caltex in 1959. (iv) Other discoveries. either non-commercial or not yet evaluated, have been made by Mobiloil of Canada, Shell, Gulf, CPTL. British Petroleum has also discovered oil in commercial quantities in southern Cyrenaica some 400 miles from the coast.

At the end of Oct. 1963 the total production was 600,000 bbls per day. Exports in 1963 were about 13m. bbls.

Oil companies imported about £24m. worth of equipment in 1962, and are spending a total of about £70m. a year on exploration, about 30% of this going on local goods and services.

*Power.* Production of electric power in 1957 was 50,667,897 kwh. in Tripolitania and 23,643,768 kwh. in Cyrenaica.

**COMMERCE.** Total imports into Libya in 1962 were valued at £73m. (c.i.f.) and exports at £50m. (f.o.b.). The main suppliers were: Italy (£L17·7m.), USA (£L14·2m.) and (UK £L13·5m); the main customers were UK (£L17m.), Italy (£L9·1m.), Germany (£L5·6m.), Netherlands (£L5·2m.), Belgium (£L5m.), USA (£L3·7m.), France (£L3·2m.).

Total trade between Libya and UK (British Board of Trade returns, in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK | 739,256 | 715,246 | 2,876,355 | 20,171,317 | 42,652,867 |
| Exports from UK | 8,317,637 | 12,429,062 | 12,215,581 | 13,514,439 | 15,462,959 |
| Re-exports from UK | 102,708 | 238,955 | 339,726 | 325,210 | 282,552 |

**COMMUNICATIONS.** *Railways.* In Cyrenaica, the railway covers the lines Benghazi–Barce, 66 miles, and Benghazi–Soluch, 34 miles.

*Roads.* Good motor roads connect Tripoli through Zuara with Tunis, and through Homs and Misurata with Benghazi and thence with Tobruk and Alexandria. Other roads go to Tagiura, Garian, Jefren and Nalut. A new road connects Sebha with the main coastal road.

Surface communication between Benghazi and Tripoli is by twice-weekly bus service, and between Benghazi and Alexandria by weekly bus service to Sollum and thence by rail. Communication between Benghazi, Barce, Derna and Tobruk is by frequent bus services.

*Post.* Tripoli is connected by telegraph cable with Malta and by telephone lines with Bengardane (Tunis). There are overseas wireless-telegraph stations at Benghazi and Tripoli, and radio-telephone services connect Libya with the UK and most countries of western Europe. In 1962 some 20,000 telephones and 15,000 wireless sets were in use.

*Aviation.* Benghazi and Tripoli are both served by international airlines, including BEA and BOAC, linking them with each other and Athens, Cairo, Rome, Malta, Tunis, Nairobi and London.

**MONEY.** The Libyan pound, which is equivalent to the pound sterling, is divided into 100 piastres, each of 10 millièmes. The currency consists of seven denominations of notes printed in Britain and of five denominations of coins struck by the Royal Mint. Libya is in the Sterling Area (*see* p. 121).

**BANKING.** A National Bank of Libya was established in 1955; it was renamed Bank of Libya in 1963. As at 31 Aug. 1962, its assets amounted to £L23·01m. and currency in circulation to £L15·24m.

The National Agricultural Bank has offices in Tripoli and Benghazi.

There are branches of Barclays Bank DCO in Tripoli, Misurata, Homs, Benghazi, Tobruk and Derna. The British Bank of the Middle East, the Banco di Roma and the Banque Misr have branches in Tripoli and Benghazi; the Banco d'Italia, Banco di Sicilia, Banco di Napoli and the Crédit Foncier d'Algérie et de Tunisie have branches in Tripoli and the Crédit Foncier in Sebha; the Arab Bank has a branch in Benghazi.

**WEIGHTS AND MEASURES.** Although the metric system has been officially adopted, the following weights and measures are still used: *oke* = 1·282 kg; *kantar* = 40 *okes* = 51·28 kg; *draa* = 46 cm; *handaza* = 68 cm.

*History.* The Principality of Liechtenstein, situated between the Austrian province of Vorarlberg and the Swiss cantons of St Gallen and Graubünden, is a sovereign state whose history dates back to 3 May 1342, when Count Hartmann I became ruler of the county of Vaduz. Additions were later made to the count's domains, and by 1434 the territory reached its present boundaries. It consists of the two former counties of Schellenberg and Vaduz (until 1806 immediate fiefs of the Roman Empire). The former in 1699 and the latter in 1712 came into the possession of the house of Liechtenstein and, by diploma of 23 Jan. 1719. granted by the Emperor Charles VI, the two counties were constituted as the Principality of Liechtenstein.
